REPORT

ON THE

REVENUE ADMINISTRATION

OF THE

UNITED PROVINCES OF AGRA AND OUDH

FOR THE REVENUE YEAR 1909-1910, ENDING 30TH SEPTEMBER 1910.

No. $\frac{895}{\text{XII}-149\text{B}}$ OF 1911.

FROM

P. HARRISON, ESQ., I.C.S.,

SECRETARY TO THE BOARD OF REVENUE,

UNITED PROVINCES.

To

THE CHIEF SECRETARY TO GOVERNMENT,

UNITED PROVINCES.

Dated Allahabad, the 11th March 1911.

SIR,

Present:
THE HON'BLE MR. D. C. BAILLIE, C.S.I.
AND
THE HON'BLE MR. H. W. W. REYNOLDS, I.C.S.

§§ 1—3.—Introductory.

I AM directed to submit the following report on the revenue administration of the United Provinces for the year ending 30th September 1910.

2. The Members of the Board at the beginning of the year were Mr. L. A. S. Porter, C.S.I. and Mr. D. C. Baillie, C.S.I. From 29th April Mr. Porter officiated as Lieutenant-Governor and Mr. H. W. W. Reynolds officiated as Member of the Board for the remainder of the revenue year.

3. The Kumaun divisional report was received on the 28th of November and by the 9th December five other divisional reports had been received. The Rohilkhand and Allahabad divisional reports were received on the 22nd and 26th December, respectively, but the Gorakhpur divisional report was very late, being received only on the 16th January. The explanations given by the Commissioners of Rohilkhand and Allahabad are satisfactory, but the Gorakhpur report was delayed by a regrettable disorganization of the Commissioner's office.

§ 4.—Seasons.

4. The year 1908-09 marked a substantial recovery from the effects of the famine and scarcity of the previous year though agricultural conditions were not completely normal in all districts. In 1909-10 there was a further marked improvement. The rains set in earlier than had been usual in recent years and by the middle of June enough rain had been received to start agricultural operations satisfactorily everywhere except in Cawnpore and parts of the Meerut and Agra divisions. Even in those cases the deficiency was generally made good by the end of the month. In July the rainfall was exceptionally heavy and general, and the weather was on the whole too wet to permit full sowings for the autumn crops; nevertheless serious hindrance to tillage was reported only from parts of the Allahabad division. In August there was a welcome break in all parts of the provinces, except the hills and some submontane districts, and this was followed by timely rain which lasted up to the early part of September. The close of the monsoon was normal, rain becoming light and scattered in the west while there was favourable rain in the south and east. During September, however, there was a serious shortage of rain in four Oudh districts, viz. Hardoi, Kheri, Gonda and Bahraich which have given cause for anxiety in successive recent years. In October there was some useful rain in Gorakhpur, Gonda and Bahraich, but elsewhere fine weather prevailed. On the whole the rainy season may be classed as favourable, but it was not without its

drawbacks. The sowing-time for the autumn crops was too wet except in rice districts, and it seems that the distribution of the monsoon rain was more suitable than usual to the development of the insect pests which always appear at this season. At the sowing-time for the *rabi* there was as a rule sufficient moisture in the ground and irrigation before sowing was required to a much less extent than in recent years. The month of November was dry, but there was good general rain in December and further widespread falls occurred in January. February brought some light showers to the plains and fair rain to the hills, while March, April and the greater part of May were as usual dry. The cold weather and spring were thus generally most favourable, with an exception in regard to parts of the hill districts, where, after the rain of February, a prolonged drought occurred, lasting in some localities through March and April and part of May. In the plains the winter rainfall was so heavy in parts as to cause fears for the spread of rust. Fortunately these apprehensions were not realised, though there was considerable damage to the rape-crop from the well-known pest called *aphis*.

§ 5.—Areas sown.

5. The total area sown in the *kharif* season was very slightly above the normal for the provinces as a whole and fell below the areas of the three preceding years. The reason is to be found in the fact already mentioned that the sowing season, while not generally unfavourable, was in places too wet to permit of a maximum area being tilled; the decline as compared with the previous year was 660,000 acres. The decrease was common to nearly all districts and an area larger than that of the previous year was sown in only 12 districts. The more favourable character of the season for sowing the *rabi* resulted in the sowing of an area increased by 2½ million acres, and the total area sown almost reached the normal. The increase was very general, every district sharing in it except Agra and Muttra. In the province of Agra the *rabi* area exceeded the normal by about 1 per cent. and in no group of similar districts was there any serious defect; in Oudh, on the other hand, every district shows some defect from the normal and the total area for that province was no less than 12 per cent. below average. The shortage was least in the south, ranging from 5 to 8 per cent., but in the more northern districts (which had felt the drought of 1907 most severely) the deficit ranged from 10 to 20 per cent., the latter figure being recorded by Sitapur and Bara Banki. The returns of rainfall for September and October show that moisture was probably deficient in many parts of Oudh, but by themselves they can hardly be held accountable for the whole shortage of area when they are compared with those of the adjoining districts in the province of Agra. The Director of Land Records and Agriculture believes the most probable explanation to be that in Oudh generally *rabi*-sowing was temporarily out of fashion; *rabi* seed was scarce and dear; there was also some fear of failure of the wells, while the yield of *rabi* crops had been inferior for two years or more. The Director does not, however, consider that the change of fashion is permanent and he looks forward to a return to the normal should the seasons themselves be normal in the next year or two. The area sown with hot weather crops fell almost to the normal figure; no district shows an important increase and the figures indicate that the food-stocks of the people have again been brought to something like the standard at which they aim.

§ 6.—Crop areas.

6. It has already been mentioned that the area sown with autumn crops was very nearly normal. In 1908 the area under these crops was considerably higher, but the distribution of individual crops was quite abnormal. *Juár* and the small millets had been sown in over half a million acres more than in 1907; maize and *bájra* also had been grown much more extensively than usual, but rice, both early and late, was sown in a very restricted area. In 1909 rice of all kinds showed some recovery but the total areas sown were still 16 or 17 per cent. below normal, and the total area under maize, *juár*, *bájra* and the small millets decreased considerably. The total area occupied by the crops of these classes was however still considerably in excess of the normal of 8 or 10 years ago. Generally it may be said that there was a tendency to return to the normal after the disturbance following on the famine. Of the commercial crops sugarcane shows a further substantial fall in addition to that resulting from scarcity conditions in 1908-09, the famine having been at its height when that crop was sown. The decrease was not, however, general. In the Meerut division there was in fact a substantial increase, but in the Rohilkhand and

Benares tracts there were material decreases and in Oudh the area fell off by no less than one-third. The fall is doubtless due to a combination of unfavourable circumstances, the chief of which are (1) insufficient moisture at the planting season, (2) defective supply of water in the wells, (3) scarcity of seed-canes, (4) the discouragement caused by the two preceding crops, which were poor, and (5) high prices, which favoured the extended cultivation of food crops. A second important commercial crop—cotton—was also sown on a substantially smaller area than in 1908, the total being very little above the normal. The chief cause of this decrease was the wetness of the sowing season but, as in the case of sugarcane, doubtless the high prices of food grains made the growing of cotton relatively less profitable than hitherto. The oil-seed *til* (gingelly) was however sown on a greatly extended area, particularly in the Bundelkhand districts where late sowing is a common practice and the fine weather during August was specially favourable.

The returns of the area sown with *rabi* crops indicate on the whole a reversion to normal conditions. Barley, however, was still more than usually popular in 1909-10 and gram has not yet entirely recovered its position; linseed though sown on only 62 per cent. of a normal area made substantial progress towards recovery and rape-seed was sown on exceptionally large areas in northern Oudh. The area sown with poppy declined by nearly 30,000 acres but the decrease is mainly due to restriction of cultivation by the Opium department.

§ 7.—Irrigated area.

7. In the *kharif* season of 1909 the total area irrigated was 1,910,000 acres, a rather less area than in 1908. The *rabi* crops were irrigated to the extent of 8,532,000 acres, or rather more than in 1908, but not so much more in proportion as the area sown. In fact irrigation was less needed both in the *kharif* and in the *rabi* because the seasons were more favourable. As usual wells provided irrigation for the greater part (59 per cent.) of the area watered; while canals and "other sources" each supplied about 20 per cent. More use was made of "other sources" than in the previous year, not because of any change in practice but because the lakes and swamps were more full of water. The number of irrigation reservoirs in the south of the provinces rose from 117 to 119 and the area watered from them also rose slightly.

§ 8.—Wells.

8. The number of new masonry wells completed during the year was nearly 23,000; this is below the figure of the previous exceptional year but much above the number usually recorded before the famine. The districts of the Gorakhpur division, Rae Bareli, Fyzabad and Gonda each added over 1,000 to the number of wells, but it is perhaps more remarkable that in districts like Budaun and Kheri, where well-sinking has been rare in the past, the number of new wells completed in a single year is about 10 per cent. of the total number in existence. Allowing for wells that became useless during the year and for certain adjustments of previous figures, the net increase in the number of wells available for use amounts to over 19,000. Last year it was reported that there was considerable anxiety in parts of Oudh and of the Benares division owing to signs of failing supplies in existing wells. The complaints are not now repeated and it is probable that the evil has not progressed and that the more normal rainfall of 1909, followed as it has been by heavy rain in 1910, will entirely remove the apprehension which had begun to arise.

§ 9.—Calamities.

9. The year was singularly free from specific calamities. The most serious injury to crops on considerable areas was due to floods in the river valleys, particularly in the Ganges valley in Moradabad and Budaun, but the loss of *kharif* crops was usually more than made up by an exceptional yield of spring crops. Minor injuries were caused by the *aphis* pest to rape and to *juár* by borers. A more serious pest, however, was the grass-hoppers which have in recent years caused so much injury to the sugarcane crop in the east of the provinces. The area in which they are at work appears to be extending, its eastern and western limits being now Ballia and Allahabad. The matter of exterminating this pest is engaging the attention of the agricultural department, but it rests with the people themselves to adopt the measures recommended.

§ 10.—Outturn.

10. The yield of *kharif* crops in 1909 was substantially better than that of the previous year. The single exception is found in the case of maize which is usually affected by a wet

July such as occurred in 1909. The millets were as good as in the previous year, rice and sugarcane were much better, and cotton and *til* showed some improvement. In fact the great majority of *kharif* crops did well in the great majority of districts. Early rice was a fair to good crop in all districts where it is important, but late rice was poor or bad in Ghazipur, Unao and Kheri. *Juár* was a poor crop in a large part of Oudh, notably in Lucknow, Sitapur and Kheri, and it was very nearly a failure in Shahjahanpur. *Bájra, mandua,* cotton and maize gave nearly a normal outturn everywhere except in north Oudh, but cotton was least successful in districts where it was most important. *Til* was very poor in Banda where an exceptionally large area had been sown, and sugarcane was poor in most of the Oudh and eastern districts. The losses of *juár,* sugarcane and cotton are attributed in a large degree to various insect pests.

The returns of the *rabi* crops are markedly satisfactory. With the single exception of rape-seed, every important crop shows an improved outturn. The yield of wheat, barley and gram was fully equal to the normal, that of linseed and opium was nearly normal, and that of rape-seed was about 80 per cent. of the normal It was estimated by the officiating Director of Land Records and Agriculture that the yield of all *rabi* crops in the provinces was no less than 112 per cent. of the normal, i.e. the district figures probably under-state the actual outturn. In only two districts, Dehra Dun and Garhwal, were the crops substantially below average, the cause being local deficiency in the rainfall. The hot weather crops gave practically a normal outturn. The yield of mangoes was in most places plentiful, but the *mahua* flowered with so little uniformity that no general statement can be made regarding it. Taking the year as a whole it may be described as distinctly satisfactory; it is true that the *kharif* did not justify the high expectations formed in the earlier part of the season but still it was a good crop, and the success of the spring and hot weather crops was practically universal.

§ 11.—Monsoon and *kharif* of 1910.

11. The rains of 1910 broke earlier than has been usual in recent years: light showers fell in the beginning of June and were followed by copious rain in the middle of the month and finer weather at its close. All districts received enough rain for a satisfactory start of *kharif* sowings except parts of the Meerut and Agra divisions. The fortunes of different portions of the provinces differed materially during July. The Himalayan and submontane country as far west as Kheri received ample rain without a prolonged break, and in the rest of the submontane tract the rain, though lighter, was as a rule timely and sufficient. The remaining portions of the province were very short of rain for the greater part of the month, but heavy falls at its close removed anxiety. In the Meerut, Agra and Allahabad divisions and in a large part of Rohilkhand sowings were delayed owing to the prolonged break, but were vigorously pushed forward at the close of the month. August was a wet month in the hills, the submontane tracts, the eastern districts and part of Bundelkhand, in the rest of the province the rain was lighter but timely and sufficient, and there were good falls in the last week. The rivers were in high flood causing serious loss in Gorakhpur and Garhwal. The rain during September was everywhere sufficient and in some places was in slight excess. It was well distributed and at the close of the month no more was wanted. A severe storm began to affect the west of the province on the last day of the month and gave exceptionally heavy rain during the first few days of October. In some districts the falls exceeded nine inches while most districts got at least three inches, causing heavy floods in the Ganges and some other rivers. The heavy rain was welcomed in the rice districts, but elsewhere it was not an unmixed blessing and cotton, *til,* the large millets and the pulses all suffered to a varying extent. In consequence of the prolonged break in July, which brought sowings to a standstill, the total *kharif* area of the province fell off by 963,470 acres or 4 per cent. The decrease is shared by every division except Allahabad which shows an increase of one per cent. There was an increase of 101,000 acres under cotton, and of 40,000 acres under late rice; the other principal *kharif* crops exhibit decreases. With the exception of the low-lying areas that suffered from floods and the *juár* crop which suffered seriously from insects, the *kharif* crops were generally satisfactory up to the end of September, but the heavy

rain which fell in the opening days of October did much harm to cotton and *til*. The yield of *juár* and cotton was consequently not satisfactory, but on the whole the harvest was fair, and in particular late rice was much better than has been the case in recent years. The percentage of a normal outturn obtained from each crop for the provinces as a whole is estimated as follows: Early rice 85, maize 85, small millets 85, indigo 75, late rice 95, *juár* 75, *bájra* 80, pulses 80, cotton 75, and *til* 80.

§ 12.—Health.

12. The mortality of the year was much less than in its predecessor. In the first quarter in particular the number of deaths was much lower than in the corresponding period in 1908. In the latter year over one million deaths were recorded from October to December, while in 1909 the total was little more than half a million in the quarter. In the other three quarters the total deaths were somewhat in excess of those recorded in 1909. Malarial fever as usual accounted for the greater part of the deaths but in some parts of the provinces plague was unfortunately prevalent from January to April 1910, and cholera appeared in the rains, but the epidemics were local in character, though plague was somewhat serious in some of the eastern districts.

§ 13.—Trade.

13. The returns of inland trade are compiled for the financial year and the Board are not in possession of information showing the course of that trade after the 31st of March 1910. In spite of the lower area under *rabi* crops in 1909, the exports for the whole financial year amounted to 44½ million maunds, an increase of about 7 million maunds over those of the preceding year; imports also increased by over 10 million maunds. The increase in exports is due to an increased despatch of grains, oilseeds and raw cotton to Calcutta, Bombay and Karachi, but this was partly counterbalanced by a fall in the exports of grain to Bengal districts and the Punjab. The chief increases in imports are found in coal, coke, European piece goods, kerosine oil, salt and spices, the last 3 articles having been imported on a larger scale than ever before. Grain and pulse were imported on a considerably less scale than in 1908-9 but the total imports were still above the level of normal years. Sugar on the whole was imported on a smaller scale than in the previous year, and on the other hand the exports increased. The yield of the cane crop in 1910, though obtained from a smaller area than in the previous year, was much better, and the total nett exports were about 33 lakhs of maunds. Altogether these facts afford ample proof of a return of prosperity after recent disasters.

§ 14.—Prices.

14. The average prices of the principal food grains were at the end of September 1909 as follows (in seers per rupee):—Wheat 9·6, barley 15·8, common rice 8·4, *juár* 14·5, *bájra* 14·1, gram 12·6, *arhar* 10·1 and maize 16·1. By the end of March there had not been much change, though barley, *juár*, *bájra*, gram and maize had become slightly cheaper. By the middle of June, however, prices had fallen considerably, wheat selling at 12¾ to 14 seers, barley at 19 to 25½, *juár* at 16½ to 19¾, *bájra* at 16 to 16¼, maize at 18¼ to 19¾, gram at 17 to 19¾ and *arhar dál* at 13¼ to 17¾. These prices were generally maintained until the end of September 1910. In places the price of *juár* had then fallen to 26¼ seers and of gram to about 21 seers, but the only grain distinctly and generally cheaper at that time was maize, which was selling at 24½ to 32 seers in various markets. These prices again reflect the improvement in the prosperity of the provinces during the year under report.

§ 15.—Agricultural stock.

15. The year was favourable throughout in respect of the fodder available for cattle; the seasons secured a more regular supply of grass than had been usual in recent years and the good crops ensured a plentiful supply of dry fodder. Disease of various sorts was however prevalent throughout the year; rinderpest was widespread in the Allahabad division when the year opened and it extended into a large number of districts; its severity abated in October 1909 but tended to increase again as the hot weather drew on. Foot-and-mouth disease was also widely prevalent during the greater part of the year. Nevertheless no very serious losses of cattle are reported from any district.

16. The total holdings area shows a further increase of 77,748 acres in Agra and of 14,875 acres in Oudh due to extension of cultivation, the cultivated area of the province having risen by 706,072 acres or 2 per cent. compared with the preceding year's figures. Moradabad shows an increase of 32,704 acres, the reason being that this year complete figures for the whole district have been received, while last year the previous year's figures were repeated. The other districts which show large increases are Jhansi (24,095 acres), Naini Tal (9,776 acres) and Kheri (11,363 acres). The chief variations in classification are as follows :—

§§ 16-17.—Statistics of holdings. Statements XXXIV-A and XXXIV-B.

In Agra.

	Acres.		Acres.
Sír	—23,700	Non-occupancy 12 years or more	+50,285
Khudkasht, &c.	+52,386	Ditto on 7 years' lease	+57,663
Exproprietary	+17,295	Ditto for less than 12 years	—120,487
Occupancy	+44,204		

In Oudh.

Khudkasht ... ... +14,739

17. The area under *sír* as usual shows a general decline, but there is an apparent increase of 15,580 acres in Moradabad owing to revision of records. The area under *khudkasht* shows a general increase; Moradabad, however, exhibits a decrease of 17,305 acres due to the increased area now recorded as *sír*. The increase in exproprietary holdings as usual is general but small in amount; in Moradabad however a more correct record has raised the total by 3,203 acres. The area held by recorded occupancy tenants in Moradabad is now shown as 131,396 acres more than before owing to revision of records, but elsewhere there is the usual decline. Under non-occupancy tenants recorded as having held for 12 years or more the increase is general save in Moradabad where a nominal decrease of 118,994 acres, due to the change of record, appears; while under non-occupancy tenants who have held for less than 12 years most districts show decreases which for the province amount to 120,487 acres.

18. The area held on seven-year leases in the province of Agra shows an increase which is large relatively to the total. About 10,000 acres of the increase is due to revision of records in Moradabad, but apart from this the real increase is substantial in the Meerut division and part of the Agra division in the west, and in the Gorakhpur division in the east. Most districts in the former area report that the increase is the result of growing familiarity with the law on the subject. The Commissioner of Agra has found the record of these leases defective and has instructed his Collectors in the matter.

§ 18.—Long-term leases in Agra. Statement XXXIV-A.

§ 19.—Holdings in Oudh. Statement XXXIV-B.

19. In Oudh also the *khudkasht* area has generally risen. The other heads show no striking variations

20. The total rental demand for the provinces shows an increase of 31½ lakhs of rupees, cash rents having risen by nearly 21 lakhs of rupees, grain rents by 6¾ lakhs and *siwai* income by 3¾ lakhs. Nearly ten lakhs of the increase in cash rents is due to enhancements of cash rents and commutation of produce rents in Moradabad at the recent settlement; excluding this item the increase is distributed as follows :—

§ 20.—Rental demand and collections. Statements XXXIV-A and XXXIV-B.

	lakhs.		lakhs.
Meerut division ...	3·21	Gorakhpur division ...	1·74
Agra ditto ...	1·62	Naini Tal district ...	0·23
Rohilkhand ditto ...	1·16	Lucknow division ...	1·71
Allahabad ditto ...	0·63	Fyzabad ditto ...	1·08
Benares ditto ...	—0·19 (decrease)		

The decrease in the Benares division is due to a fall of half a lakh in Ballia which more than counterbalances the small increase in other districts. The figures look large, but they are not of great significance having regard to the total demand. The increase in grain rents is nearly general, but most of it is accounted for by the districts of Sitapur and Bahraich and may be attributed to more satisfactory crops. Moradabad shows a decrease of 2¼ lakhs owing entirely to commutation of produce rents at the settlement, the effect of which is only now seen in the revised records. The increase in *siwai* income is also general and

follows on a decrease in the previous year. The percentage of total collections (current and arrear) to demand fell from 92 to 89 in Agra but in Oudh it rose from 97 to 99. The following table shows by divisions the proportion of recorded collections to the year's demand:—

Division.	1316F.	1317F.
Meerut	94	92
Agra	90	88
Rohilkhand	93	87
Allahabad	90	89
Benares	88	85
Gorakhpur	91	94
Lucknow	92	97
Fyzabad	102	101
Total, United Provinces	93	92

The increase in the Gorakhpur division is due to heavy collections in Azamgarh, which counterbalance slight decreases in Gorakhpur and Basti, while that in the Lucknow division is contributed mainly by the northern districts of Sitapur, Hardoi and Kheri, where the previous year had left heavy arrears. The almost general decline in the percentage of collections in a year like 1909-10 is at first sight a little surprising, but the reports from several districts indicate that in fact less pressure was brought to bear on cultivators than in the previous year. Arrears had been substantially reduced nearly everywhere, and there seems to be no doubt that the marriage season had a distinct effect because, on the one hand, many cultivators were spending their money on festivities, while on the other hand landholders and their agents were too much engrossed to collect, and in some cases (it is to be feared) patwaris were too much engrossed to record.

CHAPTER II.—FINANCIAL.

§ 21.—Total demand and collections.

21. The total demand on account of all the items of income dealt with in this report was 934½ lakhs, as compared with 1,092¾ lakhs in the previous year. The difference is chiefly due to a large decrease of nearly 68½ lakhs in the arrear demand of land revenue, 5 lakhs in canal rates, and over 81 lakhs in the demand on account of principal and interest of agricultural advances. The real demand, after writing off nominal and irrecoverable items, was rather less than 928½ lakhs. The actual collections were rather more than 920¾ lakhs and the arrear, excluding small sums remitted, was 12¾ lakhs, of which the most important items are 1¾ lakhs land revenue still under suspension, and nearly 9 lakhs under demands on account of loans.

§§ 22—24.—Land Revenue. Statements I, II and III.

22. The land revenue accounts are shown in statements I, II and III, but it is convenient to deal with them all together. The arrears outstanding at the end of 1908-9 were Rs. 21,41,870 shown in statement II; this total includes Rs. 8,150 composed chiefly of remissions cancelled in consequence of the failure of certain landholders to remit rents and omitted from last year's return. There was in addition an arrear of Rs. 3,082 of land revenue not on the roll shown in statement III. The current demand of revenue on the roll at the beginning of the year was Rs. 6,49,37,777 so that the total for collection was then Rs 6,70,82,729. During the year revenue not on the roll was added to the amount of Rs. 46,321, the addition being due to various transactions such as the re-settlement of alluvial mahals and the assessment of land formerly held free of revenue. On the other hand there were considerable reductions, shown as nominal balances in all three statements, amounting in all to Rs. 87,964. Of this total the revision of the assessments in alluvial mahals accounts for Rs. 29,906, reductions of demand in Bundelkhand and Kashipur for Rs. 4,357, land acquisition for Rs. 20,022, assignments for services, &c., for Rs. 17,475, the re-assessment of certain deteriorated mahals in Unao for Rs. 4,359, quinquennial assessments under the Bundelkhand rules in Allahabad, Jhansi and Jalaun for Rs. 10,113, and the remainder is due to various petty causes. The nett demand which might have been enforced during the year was Rs. 6,70,41,086.

23. The total collections of land revenue were Rs. 6,68,25,386 being short of the enforceable demand by Rs. 2,15,700. The difference is accounted for by remissions of current revenue owing to fire, flood and drought amounting to Rs. 1,609, and of arrears of Rs. 1,946 in Budaun on account of flood, by suspensions sanctioned by Government amounting to Rs. 6,832 (chiefly in Garhwal) out of the current demand and Rs. 416 postponed by Collectors on their own authority. The remainder (Rs. 2,04,897) is to be accounted for in the current year. It is composed chiefly of considerable items of Rs. 1,27,568 in Meerut and Rs. 49,665 in Azamgarh suspended since the famine. In part also it is due to summary settlements of which the result was not known in time to permit of collection within the year. Ordinary arrears are generally petty and appear in only nine districts, but Jalaun is remarkable with a balance of Rs. 9,557 due from estates under direct management.

Famine suspensions.

24. The last paragraph shows that with exceptions in Meerut and Azamgarh the whole of the suspended revenue on the roll was collected. The revenue year 1910-11, therefore, opened with almost a clean sheet, and with present prospects it may be anticipated that it will close with only trivial balances.

§ 25.—Malikana. Statement IV.

25. The demand of malikána was collected in full in all districts except Jhansi where the balance of Rs. 242 is chiefly due to the partial suspension of the demand at the famine; collections are being made gradually. Payments to persons entitled to receive malikána were as usual somewhat delayed owing to the non-appearance of recipients. The balance in hand was particularly large in Aligarh, Allahabad and Gorakhpur. In Aligarh the Awa estate has not applied for its dues for the last three harvests, but for Allahabad and Gorakhpur no explanation is forthcoming. The debit balance in Bareilly continued to grow although during the year the Government sanctioned the transfer of the payments to the Hearsey family to the head of assignments and compensation instead of the malikána head. The final adjustment of this matter was delayed until the Accountant General had issued a new payment order. It will be noticed that in four districts remissions of malikána are reported. The Board during the year examined the question of reduction of malikána on account of reduction in revenue and came to the conclusion that in the case of proprietors other than the original grantees malikána is rightly re-calculated with every change in revenue. A circular which seemed necessary to explain the rules governing this matter has been issued recently with the Lieutenant-Governor's approval.

§26.—Canal rates. Statements V and VI.

26. The year opened with an arrear demand of Rs. 65,511 on account of occupiers' rate. The demand for the year was Rs. 81,54,410. The gross collections amounted to Rs. 81,57,653 but Rs. 18,278 of the balance were remitted so that the uncollected demand carried forward to the current year is Rs. 43,990. Collections were generally satisfactory, balances exceeding Rs. 1,000 appearing only in Saharanpur, Mainpuri, Fatehpur, Jhansi and Jalaun. In Saharanpur the balance amounts to rather more than two per cent. of the total demand, but it is not explained. In Muttra the difficulty of collection is chronic and little seems to have been effected in the direction of securing more regular payment. In Mainpuri and Fatehpur the arrear is relatively trifling; in the latter district the improvement shown last year has been maintained. In Jhansi the uncollected demand was in part disputed and some of it has been remitted since the close of the year. For Jalaun no explanation is offered. The demand for owners' rate including arrears was Rs. 1,67,358. Of this sum Rs. 486 was remitted and the real balance at the end of the year was Rs. 552, for which Saharanpur and Muttra are almost entirely responsible.

§ 27.—Local rates and cesses. Statements VII, VIII, IX and X.

27. The total demand for local rates and cesses was (including arrears) Rs. 68,92,249, that for local rate in the temporarily settled districts of the province of Agra being nearly 44¼ lakhs, that for acreage rate, receipts from surrendered jagirs, and road cess in the permanently settled districts about 5⅓ lakhs, and that for consolidated local rate and rural police rate in Oudh 9⅛ lakhs and ten lakhs respectively. Collections were made in full in almost all districts, ten districts in the province of Agra alone showing petty balances amounting in all to Rs. 1,044.

§§ 28—29. State properties. Statement XI.

28. The number of state properties stood at 611 at the commencement of the year: six new properties were acquired and 12 disposed of during the year. The latter were all in the Bundelkhand districts and consisted of properties acquired under the Encumbered Estates Acts which were restored to their owners. The arrear demand at the beginning of the year amounted to Rs. 45,423 of which Rs. 15,429 were in the Kheri district while the districts of Allahabad, Gonda, Bahraich and Agra also showed a considerable balance of arrears. The current demand including that of the Dudhi estate fell slightly, from Rs. 3,36,371 to Rs. 3,34,533; the variations were in nearly all districts unimportant, but in Kheri the demand rose from Rs. 12,101 to Rs. 15,134 while in Jhansi it fell from Rs. 14,345 to Rs. 10,229. Of the total demand of Rs. 3,79,956 Rs. 3,46,940, or 91 per cent., were collected as compared with Rs. 3,55,674, or 88 per cent., in the preceding year. Collections were full in most districts, the only important exception being Kheri with arrears of Rs. 12,823, but the districts of Gonda, Bahraich, Allahabad, Lucknow and Agra also make considerable contributions to the outstanding balance of Rs. 33,016, of which Rs. 3,570 are classed as irrecoverable. In the Agra province the arrears now total Rs. 10,133, many districts showing a clean sheet, while Jhansi is the only Bundelkhand district with arrears approaching Rs. 500. The expenditure on contingencies fell slightly from Rs. 23,424 to Rs. 22,790 and that on establishment rose from Rs. 24,238 to Rs. 24,831. Rs. 26,148 were spent on improvements including Rs. 10,949 in the Dudhi estate and Rs. 4,858 in Allahabad. The balance accruing to Government after meeting all charges amounted to Rs. 1,59,227.

29. For the Dudhi estate the year has been one of fair prosperity. Continuous rain during the month of July caused a poor early *kharif* but the crops of *til* and *kodon* were good and on the whole the *kharif* was not much below the average. Retarded *rabi* sowings were made up for by good germination, and timely rain in December and January secured a good *rabi* crop. The current rental demand stood at Rs. 23,960 of which as much as Rs. 23,660 were realized. The high percentage of collections shows the completeness of the recovery from the effects of the distress of 1907-8. The expenditure on improvements totalled Rs. 10,949 as compared with Rs. 13,807 in the previous year. The most important works were the construction of a bridge on the Mundi-Semer road and the building of a new *musafirkhana* at Khanar. The unusually heavy rainfall has damaged two of the older bridges. The expenditure on education, though above the figures for the previous year, was Rs. 515 below the estimate, as lack of students prevented the opening of a proposed upper primary school at Arjhat. No fees were charged and books continued to be supplied free of cost, but the average attendance fell from 437 to 407. At the close of the year the balance to the credit of Government amounted to Rs. 9,033 as compared with Rs. 5,266 in the previous year. The people on the estate are reported to be generally prosperous, but the indebtedness of some of the aboriginal proprietors alluded to in the report of last year has continued to receive attention. Some restrictions on their powers of alienation will clearly be necessary but the submission of more definite proposals in this direction has been postponed pending the consideration of similar circumstances in other parts of southern Mirzapur.

§§30—31. Miscellaneous land revenue receipts. Statement XII.

30. The items included in the appendix relating to miscellaneous land revenue receipts are fines and forfeitures of revenue courts, rents of 'class C' lands occupied by railway companies, mutation fees and fines and partition fees. Of these all but partition fees are shared between the provincial and imperial Governments and are shown in the first part of statement; partition fees, being a purely 'provincial' receipt, are shown in the second part of the statement. Fines and forfeitures amounted to Rs. 2,466 the whole of which was collected; the rents of 'class C' lands amounted to Rs. 922 of which Rs. 533 only were credited to Government during the year the balance being mostly due in the Gorakhpur, Basti and Gonda districts from the Bengal and North-Western railway.

31. The demand for mutation fees, including arrears up to the time of their abolition in February 1910, amounted to Rs. 9,871; of this total Rs. 9,440 were collected and district officers report a balance of Rs. 431. According to the Board's instructions, however, all fees due at the time of the order of abolition

should have been written off as irrecoverable. The demand for fines in mutation cases amounted to the relatively large sum of Rs. 1,71,951 of which Rs. 1,57,255 were collected within the year, leaving a balance of Rs. 14,696. Several districts show absolutely full collections under this head but there were serious arrears exceeding 10 per cent. of the demand in Bulandshahr, Agra, Bareilly, Budaun, Shahjahanpur, Allahabad, Mirzapur, Ballia, Basti and Lucknow. The arrears are most serious in total amount in Allahabad (Rs. 1,076), Mirzapur (Rs. 2,827) and Basti (Rs. 1,125). From Allahabad no explanation is offered. In Mirzapur the Collector seems to have remitted considerable items owing to the poverty of the defaulters and the pettiness of the amount involved and the trouble of collection in villages situated at a great distance from head quarters. In Basti the Collector remarks that the balance is very small; the Board cannot regard the failure to collect about 15 per cent. of the demand as entirely satisfactory. The demand of partition fees, including arrears, amounted to no less than Rs. 2,67,263 and close upon Rs. 2,44,000 were actually collected, the balance being apparently due to demands which arose towards the end of the year.

§32. Sale of waste lands &c. Statement XIII.

32. The recovery of the sale proceeds of an escheat in Banda is still proceeding by annual instalments of Rs. 10. The demand for the year was duly realised and credited and the total balance still to be recovered is Rs. 10 only. Otherwise there is now no demand under the heads dealt in statement XIII.

§§33—35. Agricultural advances. Statements XIV and XV.

33. The improved character of the year resulted in a large decrease in the demand for State assistance in the form of takavi loans. In 1908-9, 24·31 lakhs had been advanced for temporary loans under Act XII of 1884 and 7·13 lakhs for improvements under Act XIX of 1883; in the year under review little more than $6\frac{1}{2}$ lakhs were advanced under Act XII of 1884 and little more than $5\frac{1}{2}$ lakhs under the other Act. The short-term loans were chiefly given for seed and cattle to the amount of 4·33 lakhs and 2·10 lakhs respectively. The largest advance for seed was made in the Gorakhpur district where nearly $1\frac{1}{2}$ lakhs were granted to assist tenants in the flooded tracts to sow their *rabi* crops; considerable sums amounting to Rs. 25,000 and over were also advanced in Banda, Jalaun, Sitapur, Kheri and Bahraich. The greatest demand for loans for the purchase of cattle arose in Aligarh, Banda, Lucknow, Rae Bareli, Fyzabad and Partabgarh; little was required for *kachcha* wells, but Rs. 4,000 were advanced in Agra and Rs. 4,450 in Moradabad for the installation of sugar factories. For improvements, sums exceeding Rs. 20,000 were advanced in Meerut, Aligarh, Agra, Etah, Benares, Mirzapur, Ghazipur, Azamgarh, Rae Bareli, Fyzabad, Partabgarh and Bara Banki and it is reported that in the Provinces as a whole nearly 6,000 wells were completed with the aid of these advances and that about 2,600 more were under construction; in addition about 600 more wells for which loans have been taken were not commenced within the year and over 400 wells were repaired. The demand for loans for these purposes was not very brisk and in the submontane districts generally small sums only were required, the chief reason being doubtless that *kachcha* wells are easily dug in most parts of them. On the whole the demand continued to be greatest in the Benares division and Azamgarh and in the south-eastern districts of Oudh, and in Etah, in which district alone Rs. 52,900 were advanced, a sum far ahead of that required in any other district.

34. The total principal sum outstanding on the 1st October 1909 was, according to the corrected figures in the return, 68·90 lakhs under Act XIX of 1883 and 85·97 lakhs under Act XII of 1884. The new advances made during the year including sums drawn from the treasury but not advanced raised the total to be accounted for to 74·73 lakhs and 92·75 lakhs respectively. The instalments due for repayment on account of improvements were in the majority of cases equated instalments including both principal and interest. The demand was 14·47 lakhs of which 13·44 lakhs were actually collected leaving rather more than one lakh overdue; on the other hand a total sum of 1·19 lakhs was collected in excess of the regular demand so that the total receipts were 14·62 lakhs. This sum was credited 10·99 lakhs to principal and 3·63 lakhs to interest. Including Rs. 5,748 remitted and Rs. 13,286 refunded into the treasury without being advanced, the total reduction of principal was 11·18 lakhs so that at the end of the year the gross outstanding was reduced to 63·54 lakhs. The demand for collection on

account of principal under Act XII was 79·68 lakhs, but of this total 4·99 lakhs was suspended and the net demand was 74·69 lakhs. Of this 66·98 lakhs were actually collected leaving a balance of 7·71 lakhs overdue ; on the other hand surplus collections over and above the regular demand were made to the extent of 1·22 lakhs. Including Rs. 13,888 remitted and Rs. 18,633 refunded without being advanced the total reduction of principal during the year was 68·53 lakhs and the balance outstanding at the end of the year was 24·37 lakhs. The total credits to interest during the year on account of loans under both Acts amounted to the considerable sum of 8·93 lakhs.

35. The largest uncollected balances of the demand under Act XIX appear in Muttra, Agra, Budaun, Basti and Bara Banki. The Collector of Muttra attributes the short collections to the fact that in the Mat tahsil, and partly in the Muttra tahsil also, the resources of the people have been weakened by several bad years. In Agra the Collector explains that the extra collecting staff was entertained too late at the *kharif* harvest, but this does not explain the failure to make deficiencies good at the *rabi*. No doubt, as the Collector says, injudicious pressure may result in driving tenants away into neighbouring native states, but the Board are not convinced that better collections might not have been secured without evil results. In Budaun and in Bara Banki no clear explanation of the arrear is given ; in Basti it is said to be due from impoverished zamindars. It may be stated generally that the collections on account of loans under this Act were satisfactory, particularly in view of the large demand in most districts. The considerable sums recorded as surplus collections are chiefly attributable to the failure of borrowers to execute the improvements for which loans had been given ; in Basti no less than Rs. 40,000 were recovered on this account and in Bara Banki over Rs. 23,000 were similarly repaid. The balance overdue under Act XII, apart from suspended instalments, is very heavy in Muttra, Agra, Budaun, Shahjahanpur, Mirzapur, Sitapur, Kheri and Bahraich. In Muttra and Agra the explanation offered is the same as that in respect of loans under Act XIX ; in Budaun the delay in collection was due mainly to the floods in the Ganges *khadir ;* in Shahjahanpur the large arrear is mainly due in the *bankati* tract which suffered severely in the famine and has not completely recovered since. For Mirzapur no explanation is given, but the Collector hopes to realise the whole of the outstanding advances during the current year ; in Sitapur there has been considerable difficulty in realising the advances made in the low-lying and sandy tracts in the east of the district but, as in Mirzapur, the Deputy Commissioner hopes to collect nearly all the arrears during the current year. In Kheri and Bahraich the balance is very large in spite of the formal postponement of part of the demand to the extent of about 2¼ lakhs in each district. In Kheri it appears that the whole unsuspended balance is due from Court of Wards estates, and the suspended balance is due in tracts which were for the most part flooded during the last rains so that collection has been postponed until the forthcoming *rabi*. In Bahraich no definite explanation is given but the Board are aware that owing to the issue of loans for successive harvests the burden of debt has become serious ; there is, however, little reason to apprehend that the bulk of the arrears will not be cleared off during the present revenue year. For the considerable sum reported as surplus collections the Garhwal and Bahraich districts are chiefly responsible. In the former district it would seem that considerable sums have been postponed for collection at the *kharif* of 1910 but that in the tracts which secured good crops at the last *rabi* the borrowers voluntarily repaid the overdue instalments ; for Bahraich no explanation is forthcoming. Generally it may be said that as in the case of loans under Act XIX the collections were on the whole satisfactory and it is not possible to charge any district officer with neglect in respect of recovery of these loans.

§ 36.—Advances for aided (famine) works.

36. Collectors seem to have had considerable difficulty in adjusting their accounts regarding the recoverable portions of advances made during the famine for aided works. but it is to be hoped that the figures have now reached some finality, as the Board have done much to secure adjustments with the Accountant-General's figures during the year. The total sum still outstanding on the 1st October 1909 is now reported to have been Rs. 7,55,078, or about Rs. 43,000 more than the balance shown in last year's report. The difference is mainly due to new items debited to this account, but partly also to transfers between this head and loans under Act XIX of 1883. The

nett amount of the instalments due for repayment within the year was Rs. 1,95,202, and the total collections were Rs. 1,77,819, leaving an arrear of Rs. 17,383. With surplus collections amounting to Rs. 9,537 the total available for payment of principal and interest was Rs. 1,87,356, of which Rs 50,847 were credited to interest and Rs. 1,36,509 to principal, the debt at the end of the year being thus reduced to Rs 6,18,569. No collections seem to have been made in Bijnor.

§ 37.—Loans under the Bundelkhand Encumbered Estates Act. Statement XVA.

37. At the beginning of the year there was an outstanding debt under the Bundelkhand Encumbered Estates Act amounting to Rs. 22,43,521. (This sum is slightly in excess of that returned in the last report as outstanding at the end of the previous year, the difference being due to various corrections and adjustments of accounts). About 15½ lakhs were due from borrowers who are in possession of their estates and rather more than 7 lakhs from persons whose property is managed by the Collector under section 21 *(c)* of the Act. In the former case the loans are repayable by equated instalments including principal and interest, the aggregate demand for the year being about 2¼ lakhs. Of this total over Rs. 2,18,000 were actually collected and in addition Rs. 53,45 were paid in advance of the regular instalments. Of the total collections Rs. 1,22,236 were credited towards principal and the remainder to interest, the balance of principal outstanding at the end of September last being thus reduced to Rs. 14,16,211. In Hamirpur, Jhansi and Jalaun alone was there any serious arrear. In Hamirpur the balance is due from proprietors who seem unable to clear off the debts by their own efforts and their estates are therefore being taken under direct management. For Jhansi the explanation given is satisfactory, but for Jalaun none is offered. The net rental demand of estates under the management of Collectors was Rs. 1,72,858 ; collections including surplus collections amounted to Rs 1,57,052, and with a balance in hand from the previous year the total amount available for expenditure amounted to Rs. 1,58,549. Of this over Rs. 79,000 was absorbed by the payment of revenue and cost of management and over Rs. 2,000 remained at the credit of the estates at the end of the year. The balance was devoted Rs. 45,684 to the payment of interest and Rs. 30,694 to repayment of principal. The total debt due from these estates was thus reduced at the end of the year to slightly less than 6¾ lakhs. The net result of the year's transactions was to reduce the outstanding balance under the two heads together to Rs. 20,90,644. A few instances are reported in which proprietors have voluntarily repaid the whole of the debt still outstanding against them and have thus secured the release of their estates. It will be noticed from the printed appendix that several Collectors report the conversion of loans from section 21*(c)* to section 21*(a)* and *vice versa*. The Board are examining the legality of this procedure.

§§ 38—40. Coercive processes. Statement XVI.

38. The total number of processes used in the recovery of arrears of land and other revenue was 216,548 a number nearly 50,000 in excess of that returned in the previous year. In the absence of any general difficulty in the realization of Government demands this increase must be attributed in the main to greater regularity in methods of collection, though a considerable part of it is due to the universal inclusion of writs of demands issued free of cost in connection with mutation fines but hitherto omitted from the returns of several districts. For the collection of the amalgamated demand of land revenue proper and local rates and cesses 4,322 writs of demand, 76,545 citations to appear, 9,909 warrants of arrest, 5,890 attachments of moveable property, 157 attachments of immoveable property and 28 transfers of shares, but no sales of immoveable property, were employed. These figures exhibit in the case of the efficient minor processes, namely, citations, warrants and attachments of moveables, a considerable increase over the figures of the previous year, and as already indicated, the only reasonable explanation is that legal pressure is being gradually substituted for irregular methods. The number of writs and citations together amounts to about 81,000 and in four-fifths of the total cases they seem to have been sufficient in themselves to secure payment without further process. The number of warrants of arrest shows a continuous rise but this again is due in part to the issue of separate warrants for each defaulter to be arrested. The number of defaulters actually detained in custody was 1,375, a number not high in itself though higher than in the previous year. Doubtless,

the facilities for arrest given by attendance in answer to citations have led to a general increase in the number of formal warrants, but probably not to any increase in the total number of persons formerly detained by regular and irregular processes together. In cases where preliminary citations failed and moveable property was attached sale took place in the insignificant number of 106 cases only.

39. The comparatively trivial demand for mutation fees and fines as usual required a totally disproportionate number of processes to enforce recovery, but of the total number no less than 60,443 processes were simple writs of demand issued for the most part free of cost; this does not imply any actual pressure on the persons from whom fines were due, but the clerical labour involved was not inconsiderable. The practice as to the issue of citations for the purpose of realising these demands varies from district to district. A good many Collectors in fact return no citations as having been issued for this purpose and in other districts the numbers are very few; in others again the numbers used were considerable, exceeding 400 in Saharanpur (1,193), Meerut (611), Aligarh (497), Mainpuri (553), Shahjahanpur (507), Benares (1,427), Azamgarh (1,092) and Unao (1,044). Warrants of arrest also seem to have been sparingly used in the majority of districts; in fact in only six did the number exceed twenty. Of these six Budaun (187), Azamgarh (136) and Hardoi (376) are most remarkable, though it appears that no defaulter was actually detained in custody. Failing citations the most popular method of recovery is by means of attachments of moveables, no less than 9,948 warrants having been issued for this purpose, but in this respect also there is great divergence of practice, more than 500 attachments having been employed in Muzaffarnagar (540), Bulandshahr (921), Gorakhpur (1,796), Fyzabad (1,170) and Sultanpur (845), but, as in the case of arrests no persons were actually detained, so in the case of these attachments they were followed in very few cases (only 40 in all) by sale of property. The collection of canal rates gave relatively little trouble apart from the issue of citations and writs of demand, though arrests and attachments of moveable property had occasionally to be resorted to and in two cases the demand had to be enforced by attachment of immoveable property. The collection of the large demand on account of takavi was effected, in most districts where the amount was substantial, by a peripatetic staff of naib tahsildars. Nevertheless considerable numbers of warrants of arrests and attachments of moveable property were required and sales of such property followed in a considerable number of cases, and in two cases resort had to be had to the sale of the defaulters' immoveable property for the improvement of which they had taken loans. These sales were legally made with the sanction of the Board, there being no excuse for non-payment and no mitigating circumstances which would have justified remission.

40. The Board are glad to be able to record that Commissioners are satisfied that regular methods are gaining ground nearly everywhere and that a wholesome check upon former irregular practices has been effected. In the eastern districts the collection of revenue is complicated and it may be necessary to devise some plan to cope with the ever-increasing sub-division of property and the number of individual payers of revenue. The matter is apparently to form a subject for early discussion in the Gorakhpur division and signs have not been wanting that action may soon be required in the Benares division also. It cannot, however, be said that the question is at present acute, for the revenue is collected year by year practically in full and if not strictly regular methods of collection have of necessity to be practised to secure this end, at least these methods appear to be the subject of no complaint.

§41.—Estates under direct management.

41. The number of estates under attachment at the close of the preceding year was 182 including 11 estates in the Muzaffarnagar district erroneously omitted from the last report. In all 408 were attached during the year making a total of 590 estates under attachment at some time in the year as compared with 471 in 1908-9. 373 estates were released during the year leaving a total of 217 at its close. Of the estates attached 208 were for arrears of land revenue, the largest numbers being reported from the districts of Bareilly (26), Jhansi (24), Sultanpur (20) and Moradabad (18). The attachments on account of failure to appoint a lambardar rose from 83 to 122 owing chiefly to Jhansi (35), Bijnor (22) and Aligarh (21);

the Bijnor and Jhansi districts appear to experience constant difficulties in procuring nominations to lambardarships. No estates were attached in the Gorakhpur or Kumaun divisions and the total number for the Benares division is only 12 but some of the Oudh districts—and Sultanpur more especially—show a considerable increase. The total demand was Rs. 2,19,675 as compared with Rs. 2,52,910 in the preceding year. Of this sum Rs. 1,59,969 were collected leaving a balance of Rs. 59,706 at the close of the year. The balances were largest in the Sultanpur and Bahraich districts in which they were Rs. 19,104 and Rs. 15,075 respectively, but on the whole the percentage of collections was much above that of the pervious year and in the Sultanpur district in which some large estates were attached Rs. 69,107 were collected. A sum of Rs. 1,06,785 was credited to land revenue and cesses and Rs. 16,263 spent on management of which Rs. 7,350 was in the Sultanpur district, where 44 estates remained under attachment from the previous year.

§ 42.—Alterations in the land revenue demand. Statement XVII.

42. The land revenue on the roll on the 1st October 1909 was Rs. 6,49,37,777. The demand was increased by additions during the year amounting to Rs. 1,23,670; of this sum Rs. 26,182 represents progressive enhancements of revenue in districts of which the new settlements have come into force during the last 10 years and Rs. 11,270 is due to the introduction of the new assessments in part of the Banda district. The remaining additions amounting to Rs. 86,218 are due chiefly to re-assessments of alluvial mahals and to the imposition of revenue on estates formerly held revenue-free; about Rs. 37,000 is however due to quinquennial revisions under the fluctuating system of assessment in the Bundelkhand districts of Jhansi, Jalaun and 'Allahabad. Reductions to the amount of Rs. 37,795 were granted in other mahals at similar revisions and a small sum of Rs. 195 was reduced by regular settlement in Banda. The nett result of the changes during the year was an increase of Rs. 85,680, the revenue on the roll at the end of the year thus becoming Rs. 6,50,23,457.

CHAPTER III.—LITIGATION UNDER THE TENANCY LAWS.

§43. Litigation generally in Agra. Statements XX-A and XXI-A.

43. There was a decline of about 30,000 in the total number of suits and applications instituted during the year in the province of Agra, but the decrease did not counterbalance the increase in the previous year and the volume of litigation was still heavy. The total number of cases of all sorts was 340,838, of which nearly half were suits for arrears of rent, rather more than a quarter ejectment suits and the remainder of a miscellaneous character, not more than 15,000 being of one kind. The decrease occurred chiefly in the institutions of suits for arrears of rent and suits for ejectment.

§44. Suits for arrears of rent. Statement XX-A.

44. There was a slight decline in the number of suits for arrears of rent from 178,038 in 1908-9 to 166,343 in 1909-10. The decrease is nearly universal, only seven districts showing an increase, namely, Shahjahanpur, Fatehpur, Banda, Jhansi, Jalaun, Basti and Azamgarh. In Shahjahanpur, Banda and Basti alone is the increase considerable and in most of the districts where there was a decrease the falling off is fairly large. The total was, however, larger than in any year except that immediately preceding and the inference to be drawn is that landlords had still to make good arrears which had continued since the famine. There is no special reason for the large increase of cases in Shahjahanpur and Basti except perhaps that the year was on the whole more favourable for recovery of rent than its predecessors which have been continuously unfortunate in these two districts. In Banda the Collector reports that the increase is almost entirely due to suits for recovery of water-rate; it is possible that this feature of the year may be only temporary as the people of the district are not yet accustomed to the payment of canal rates.

§45. Ejectment for arrears. Statement XXI-A.

45. Contrary to the usual experience the number of applications for ejectment after a decree for arrears of rent did not fall with the number of suits instituted; there was in fact a slight increase in the number of these applications though in the Gorakhpur division, while there was an increase in the number of suits for arrears, there was a fairly large decrease in the number of applications for ejectment. Of the total

number of applications for disposal (48,766), ejectment was ordered in only 9,831, the area affected being 55,033 acres the bulk of which was included in the holdings of occupancy tenants. The area affected was slightly less in the case of occupancy tenants than in the previous year, the number of cases in which ejectment was ordered being also less; but there was an increase in the case of non-occupancy tenants. As usual, about four-fifths of the applications succeeded in their primary object, namely, to secure the payment of decreed arrears under threat of ejectment.

§46. Distraint. Statement XX-A.

46. The number of suits arising out of proceedings in distraint was slightly higher than in the previous year, but variations from district to district are not of sufficient importance to require detailed comment.

§47. Suits for arrears of revenue and profits. Statement XX-A.

47. As in the case of suits for arrears of rent so also in the case of suits for arrears of revenue and profits there was a slight decrease as compared with the previous year but the changes are by no means uniform throughout the province. For instance, the Meerut district which is usually the most prominent with suits of this class shows a considerable decline from 1,056 to 823 cases, while there was an increase in these cases in most districts of the Agra and Rohilkhand divisions, the largest number being filed in Bijnor which this year returns an even higher number (859) than that usually reported from Meerut.

§48. Resumptions. Statement XX-A.

48. The number of suits for the resumption of rent-free grants shows a general decline, but the figures do not apparently depend on the particular conditions of any year and the total number of suits is nowhere important.

§49. Enhancement of rent. Statement XX A.

49. The number of suits for enhancement of rent (the law allowing them to be filed only between 30th June and 1st October) depends to a very great extent on the character of the monsoon and future prospects. It also depends doubtless on the general level of prices. The number filed in 1910 * was about 700 less than in 1909 but the decrease is practically confined to the Meerut and Agra divisions, while in the Gorakhpur division there was a slight increase and in the Rohilkhand and Benares divisions a relatively large increase. The variations are probably due to the effect of opposite causes, namely, good seasons, the tendency of which would naturally be to encourage these suits, and a fall in prices, which would make the prospects of success problematic. The total number for disposal in the current year is not absolutely high, having been exceeded frequently in the past. The Collector of Benares reports the institution by the Maharaja of Benares of a number of test suits against his occupancy tenants. If these are generally successful large numbers of such suits may be expected in future years.

§50. Surrenders. Statement XX-A.

50. The number of applications for service of notices of surrender was slightly in excess of that of the previous year but the figures vary considerably from district to district. Of the districts in which such notices are usually served in considerable numbers Bulandshahr, Agra, Farrukhabad, Bareilly, Bijnor, Budaun, Allahabad and Jaunpur show a fairly substantial decrease, but there was a very large increase in Muttra of over 800 such notices and in Moradabad the number recorded (1,591) was higher in 1910 than in any other district of the province. Cawnpore, Fatehpur and Jalaun also return more notices than usual and there was a similar rise in Mirzapur and Basti. In Muttra the increase is attributed by the Collector to the procuring by zamindars of formal surrenders as a substitute for ejectment, and partly to the years of stress and plague which have brought many cultivators into reduced circumstances. In Banda the increase is nominal, for in past years it has been the practice to record the number of files of applications for surrender, not the total number of individual applications. In Moradabad it is to be feared that the large number of notices is a symptom of a partial breakdown of the rents commuted at settlement. From other districts no special explanation of the changes is offered. In all cases it must be remembered that service of these notices by official agency is optional and is only resorted to when tenants are unable to attain a formal acknowledgement of relinquishment by direct communication with the zamindars.

* The numbers alluded to include those filed on the first court-day in October when 30th September is a holiday and are not therefore the same as those shown in the appendices.

There is no doubt that in many districts formal relinquishment is encouraged by zamindars and adopted by tenants to avoid the expense and trouble of a suit for ejectment which the tenants could not contest successfully.

§ 51 Ejectment on other grounds. Statement XXI A.

51. The total number * of suits for ejectment was slightly under 99,000 and was about 7,000 less than in the previous year and very little different from the figures of 1906-7 and 1907-8. The decrease is almost general but the figures of the Rohilkhand division show little change, and a slight increase appears in the Benares division. The enormous rise of recent years in the Gorakhpur division has been slightly checked but the figures remain very high. In the Meerut and Agra divisions the decrease is common to all districts except Meerut. In the Rohilkhand division Bareilly, Moradabad, Shahjahanpur and Pilibhit all show a more or less substantial decrease, but in Bijnor and Budaun there was an increase. In Allahabad, the Hamirpur and Allahabad districts alone show an increase, and the other districts a decrease; in the Benares division Jaunpur shows a substantial increase (largely attributable to the activity of occupancy and fixed-rate tenants in ejecting sub-tenants), but in the other districts the figures are either stationary or less than before; in the Gorakhpur division it is satisfactory to note that there was a decline of more than 1,000 cases in the Gorakhpur district and a smaller decline in Basti, though there was a small increase in Azamgarh. It seems to the Board probable that the substantial fall in prices towards the end of the last revenue year has had the effect of checking the growth in the numbers of ejectment suits, which growth the Board of recent years have attributed to the rapid and continuous rise in prices, and the consequent desire of the zamindars to secure a share in the increasing profits of cultivation. Few district officers attempt any explanation of the variations, and apart from the general cause already indicated, it need only be mentioned that the Collector of Gorakhpur attributes some part of the decline in his district to a reduction in the number of suits by tenants against sub-tenants, while more than one Collector points to the approaching expiry of the effect of section 15 of the Agra Tenancy Act on the growth of occupancy right. Here and there it is suggested, too, that the rush of mortgage suits, due to the change in the period of limitation, has probably distracted the attention of many zamindars from the business of enhancing rents by securing ejectment.

§ 52. Area affected by ejectment suits. Statement XXI-A.

52. Statement XXI-A shows the total area from which ejectment was ordered, chiefly in connection with suits filed in the previous revenue year and decided in that under report. The area from which ejectment was ordered during the year was 231,442 acres and ejectment was actually carried out in respect of 189,451 acres. Both these totals, particularly the latter, are lower than the corresponding figures of 1908-9. As usual the vacated area represents less than 2 per cent. of the whole area held by non-occupancy tenants in the province of Agra.

§53. Protection afforded by the Agra Tenancy Act.

53. Following the practice of the last few years, the Board note at this point the gross area protected from arbitrary ejectment by the acquisition of occupancy rights or by the grant of leases for seven years or more. The total protected area in 1910 showed a further considerable increase from 13,772,090 to 13,923,288 acres, the figure representing not only an increase in the total protected area but the usual progressive increase in the percentage of protected to the total area held by all ordinary tenants. That percentage is now 67.

§54. Litigation in Oudh. Statements XX-B and XXI-B.

54. While on the whole there was a general tendency to a decrease in litigation in the province of Agra, the reverse was the case in the province of Oudh. Suits for arrears of rent increased by about 2,400 and applications for ejectment were also more numerous than in 1908-9, and these classes form the bulk of litigation in Oudh. The increase of suits for arrears of rent was most remarkable in the Fyzabad division where all districts except Bara Banki show some increase, and Bahraich and Gonda stand out above all others; doubtless in these districts, which suffered most severely in the famine, there were still considerable arrears to be realised. The total number of notices for ejectment issued under section 55 of the Oudh Rent

* See footnote to paragraph 49.

Act was 27,685, a number slightly in excess of the previous maximum which was reached in 1906, and rather more in excess of the figures of 1908. The figures relating to ordinary statutory tenants are particularly high in Unao, Rae Bareli, Sitapur, Hardoi, Fyzabad and Sultanpur, but in no case is any special explanation given except that in Sultanpur the taluqdar of Amethi was specially active in serving notices of ejectment on the smaller tenants. The Balrampur estate ejected large numbers of thekadars in the Bahraich and Gonda districts on the expiry of their leases with a view to the re-settlement of the lease-money. Otherwise litigation in Oudh does not seem to require particular comment.

§ 55. Litigation in Kumaun. Statement XX–C.

55. The total number of cases in the Kumaun division was as usual small, but in the year under review it was rather larger than in 1908-9. Suits for arrears of rent were less than before and there were fewer suits for arrears of revenue and profits in Naini Tal and Almora than in the preceding year, but there were a considerable number of suits for ejectment under rule 30 of the Kumaun Rules in the Naini Tal district. It appears that the extension of the Agra Tenancy Act to the Kashipur tahsil in that district led to the filing of these suits under the Kumaun Rules in September 1910, in anticipation of the introduction of the Agra Tenancy Act on the 1st October, and probably in the expectation that they would be treated as suits under that Act.

§ 56. Work in courts of orignial jurisdiction. Statements XX–D, XXI–A and XXI–B.

56. The year 1909-10 opened with a large pending file of 117,658 suits and applications under the tenancy law in the province of Agra (Kumaun excepted) and 1,330 in Oudh. With cases newly instituted the total for disposal was 458,496 and 102,634 in the two provinces respectively. Of these 94,781 in the province of Agra and 1,787 in Oudh remained undisposed of.* Of the large balance in Agra, however, no less than 81,433 cases were suits for ejectment or enhancement of rent which, being filed in the last three months of the revenue year, could not be disposed of within it; the balance of other cases was thus 13,348, or about 1,000 less than at the beginning of the year. The balance of pending cases in Oudh is nowhere high, the largest numbers being 313 in Unao, 261 in Fyzabad, and 210 in Gonda; it was less than 200 in all other districts. The total number of cases of all kinds pending for more than three months was in Agra 1,079 and in Oudh 349. Among districts Saharanpur with 294 such cases, Mainpuri with 156, Budaun with 178 and Fyzabad with 173, are the most noticeable. With respect to long pending suits for enhancement of rent or ejectment the Saharanpur, Bulandshahr, Mainpuri, and Budaun districts are the most noticeable having each over 20 such cases which must have been pending more than a year. In Saharanpur the failure to dispose of the old enhancement suits is perhaps sufficiently explained by pressure of other work, but the Board find no explanation of the delay in the other districts named. It should very rarely be necessary to keep these cases pending over more than the cold weather.

§57. Execution of decrees. Statement XXX–C.

57. With 15,076 cases pending from the previous year the total number of applications for execution of decrees for disposal was 152,375. Of these 136,812 were disposed of, the total amount involved in them being over 52 lakhs. The total amount actually recovered was 25½ lakhs. The number of applications still pending at the close of the year was 15,563 involving a recovery of nearly 15½ lakhs. In Bara Banki, Fyzabad, Unao and Bulandshahr there are cases still pending which were instituted more than three years ago, and in Saharanpur, Muzaffarnagar, Aligarh, Shahjahanpur, Gonda and Sultanpur there are cases more than two years old. The case in Bara Banki involved sale of ancestral property, for which the sanction of Government was received only in August last. The case has now probably been disposed of. In Fyzabad a multiplicity of judgment-debtors have caused difficulty and in Unao, where also landed property is involved, the khewat appears to be wrong and its correction has caused delay. In Shahjahanpur sale was postponed pending a decision as to taking the debtor's property under the management of the Court of Wards. In Gonda the oldest case was of a money-decree against the Raja of Utraula, and it is hardly credible that more than two years should have been really necessary for its settlement. The case has since been

* These figures exclude applications for ejectment, the balance of which is not returned.

disposed of out of court. The other district officers concerned make no comments and separate explanations have been called for through the Commissioners, who have themselves omitted to notice these matters. It is to be feared that these cases do not everywhere receive the attention they deserve, and that closer supervision on the part of both district officers and Commissioners is required.

§58. Appeals to Collectors. Statement XXII.

58. Including appeals pending from the previous year the total for disposal by Collectors was 5,857 or about 600 more than in the previous year. All but 536 were disposed of leaving a balance at the end of the year nearly equal to that at the beginning. Appeals were filed in about 8 per cent. only of the total number of appealable cases decided by Assistant Collectors of the second class, *i.e.* generally speaking by tahsildars. This percentage is very small. Of the total number of appeals decided over 62 per cent. were entirely unsuccessful, the result being slightly less favourable to the original courts than in the previous year. The total for disposal was 378 in Moradabad, 290 in Budaun, 277 in Gorakhpur, 253 in Ghazipur, 231 in Ballia, but in other districts the number seldom was as great as 200; in Oudh, Sultanpur district had 180 appeals but no other district had more than 150. Forty-two appeals in all had been pending more than three months at the close of the year, the Budaun district with 10 cases and Shahjahanpur with 14 being most prominent. In Budaun the pressure of other work and the ill-health of the Collector precluded constant attention to appeals. From Shahjahanpur no explanation is given.

§59. Appeals to District Judges. Statement XXIII.

59. The number of cases appealable* to District Judges from the original decrees of Collectors and Assistant Collectors of the first class decided within the year was 10,035. Such cases are chiefly suits for arrears of rent, revenue and profits in which the claim is valued at over Rs. 100, and cases in which a question of proprietary title is involved. The number of appeals actually filed was 1,777, and with that pending from the previous year the total for disposal was 2,464. The pending file at the close of the year was reduced to 453, the Judges having disposed of 2,011 cases. The number of decided appeals which succeeded wholly or partially was about 43 per cent. of the total, the result being slightly more favourable to the lower courts than in the previous year. At the request of Government the Board during the year enquired into the cause of the comparatively large percentage of success in appeals from revenue courts to District Judges and arrived at the conclusion that in the classes of cases concerned difficult points of law occasionally arise for the decision of which Assistant Collectors are not in all cases well qualified; apart from points of law also some classes of cases, *e.g.* suits for profits or settlement of accounts frequently involve complicated calculations for which the courts are unable to spare sufficient time; but in many profits cases there is really room for difference of opinion as to the liability of the lambardar for particular items claimed. It is acknowledged, however, that Assistant Collectors are often ignorant of, or fail to follow, the prescribed procedure in the trial of these cases with the result that Judges frequently find cause for interference on technical grounds alone. The Board have during the year issued circular orders drawing attention to the salient provisions of the Code of Civil Procedure with reference to the trial of suits of this character and more particularly pointing to the neglect of many courts to deal legally and correctly with documentary evidence and to frame proper issues. The Board have also suggested that junior revenue officers should be compelled to acquire a certain proficiency in civil law and procedure to be tested at the departmental examinations. This proposal is still under the consideration of Government. It is to be hoped that with a more careful training of the younger generation and an increase of the staff there will in the future be less cause for complaint. The Board are not, however, convinced that the average work of the Assistant Collector is so bad as the mere figures tend to show.

§60. Appeals to Commissioners. Statement XXIV.

60. The number of cases appealable to Commissioners decided by subordinate courts during the year was 46,608, a number considerably higher than in the previous year. The number of appeals filed before Commissioners was also higher, being 7,312, but this total number represents less than 16 per cent. of the appealable cases decided—a smaller

* It appears that *ex parte* decrees are not always treated as appealable in district returns. Endeavours will be made to secure uniformity in future.

percentage than usual. The total number of appeals for disposal including 1,042 pending at the beginning of the year was 8,354. Of these 6,547 were decided and the pending file at the close of the year was more than 700 greater than at the beginning. The number of new appeals was 1,495 in the Rohilkhand division, 1,335 in the Gorakhpur division, and less than 1,000 elsewhere. The Commissioners of Meerut and Benares transferred 52 and 74 appeals respectively to some of the Collectors of their divisions. All those transferred in the Benares division were disposed of by the Collectors during the year, but 36 appeals transferred to the Collector of Muzaffarnagar and one transferred to the Collector of Bulandshahr had not been decided at the end of the year. The number of appeals pending before the Commissioners themselves at the end of the year was very high in Rohilkhand (571) and Gorakhpur (529), and high, but not so remarkably high, in Meerut (185). The Commissioner of Rohilkhand pleads his absence from head quarters (partly on council business) as the reason for his inability to keep pace with the appeals instituted in his court, and suggests that the pressure of appellate work on Commissioners generally calls for some remedy, such as the appointment of an Additional Commissioner to assist in the disposal of appeals in one or more divisions during the cold weather of each year. The Commissioner of Gorakhpur gives no explanation of the large number of undecided appeals left by his predecessor of which no less than 176 had been pending more than three months at the close of the year; he notes, however, that 373 of the pending appeals had been decided by him at the time when his report was despatched. The Board observe that the Commissioners of Meerut, Agra, Rohilkhand and Gorakhpur each disposed of 1,000 to 1,100 appeals, and this number seems to be the maximum with which a Commissioner can reasonably be expected to deal without detriment to his other duties. Should there be no improvement in the pending file at the end of the current year, very possibly some special measures may be necessary to remove the congestion. The number of appeals pending at the end of the year in the Fyzabad division (158) was also high in comparison with the total number of appeals for disposal, *viz.* 814, but only 14 of the pending appeals had been instituted more than three months before the close of the year. The Commissioner notes that the pending file would have been lower but for the occurrence of the conference of Commissioners towards the end of September. Of the total number of appeals decided by Commissioners, and by the Collectors to whom Commissioners' appeals were transferred, 4,614, or close upon 70 per cent., were entirely unsuccessful—a result rather more satisfactory as a criterion of the work of Assistant Collectors of the first class than in the previous year. The percentage was most satisfactory from this point of view in the Kumaun division (89) and in the Allahabad division (78). It ranged from 70 to 75 in the Benares, Rohilkhand, Gorakhpur and Lucknow divisions, but was only 67 or 68 in the Fyzabad, Meerut and Agra divisions. Few Commissioners comment on the character of the work of subordinate courts. The Commissioner of Lucknow, however, points to defects in the trial of cases, in which appeals were preferred in his court, such as have already been indicated in the preceding paragraph relating to the appeals in the courts of District Judges. The Commissioner of Meerut found the work in enhancement cases specially defective, so that large numbers had to be remanded; the Commissioner of Benares on the other hand has expressed his satisfaction at the way in which similar suits are tried in his division.

§ 61. Appeals to the Board.

61. The appellate jurisdiction of the Board in connection with the tenancy laws is exercised in connection with appeals under the Agra Tenancy and Oudh Rent Acts and the Kumaun Rules, and applications for revision under the former Act. Appeals to the number of 812 were filed during the year; and with 366 pending from the previous year, the total number for disposal was 1,178. Of these 839 were actually disposed of leaving 339 pending at the close of the year. The orders of lower courts were disturbed in 151 cases being about 18 per cent. only of the total number decided. The total of applications for revision under the Agra Tenancy Act, including those pending from the previous year, was 933, of which 780 were disposed of leaving 153 pending at the end of the year. The applications were successful in only 68 cases.

§ 62. Honorary Assistant Collectors.

62. Further appointments of retired officials as Honorary Assistant Collectors were made during the year, the number of such officers being more than double that of the previous year. They comprise one Subordinate Judge, one Small Cause Court Judge, 16 Deputy Collectors and 7 tahsildars, employed in the following districts:—Saharanpur, Muzaffarnagar, Meerut, Bulandshahr, Agra, Farrukhabad, Mainpuri, Etawah, Etah, Bareilly, Bijnor, Budaun, Moradabad, Benares, Gorakhpur and Azamgarh. One Subordinate Judge who resigned during the year is not included in these figures. In the opinion of the Commissioner of the Meerut division the result of the year's work indicates that the appointments have been a success, while the Collectors of Bareilly and Budaun report that these officers gave real assistance. The Commissioner of Rohilkhand, who has heard a large number of appeals from the decisions of Honorary Assistant Collectors, considers that on the whole their work was done well, but there was a drawback in that both judgement and evidence were recorded in Urdu, the effect being to increase the work of the Commissioner's office.

CHAPTER IV.—SETTLEMENT AND REVISION OF RECORDS.

§63. Regular settlement.

63. There was no regular settlement in progress during the year. The settlement of Banda which had been completed in 1909 was confirmed by Government for 30 years during the year under report and in Hamirpur and Azamgarh settlement operations were formally closed by notification; in Moradabad the preparation of new maps with the plots renumbered was continued during the year and the enhanced rents fixed by the Settlement Officer were brought on to the patwaris' papers. The work had made good progress by the end of September but the final checking and fairing of the papers probably will not be completed until about the end of May next.

§ 64.—Quinquennial revisions in Bundelkhand.

64. The periodical revision of assessment under the special Bundelkhand rules fell due during the year in parganas Mau, Lalitpur and Balabehat of the Jhansi district, pargana Bara in the Allahabad district and parganas Kunch and Orai in the Jalaun district. The revision was successfully carried out by the district staff and the results are summarised below:—

District.	Pargana.	Number of mahals.	Current demand.	Revised demand.
			Rs.	Rs.
Jhansi	Mau	443	1,11,558	1,21,196
	Lalitpur	223	38,972	44,306
	Balabehat	84	6,427	7,565
Allahabad	Bara	210	39,697	39,435
Jalaun	Kunch	250	2,66,836	2,68,774
	Orai	276	1,35,758	1,46,321

The general increase is due to an extension of cultivation since the famine which intervened after the original settlement.

§ 65. Future settlements.

65. The revision of the assessment of the Fatehpur district which was to be undertaken with the approval of the Government of India, was postponed on account of the census. The commencement of the re-assessment of the Etawah district was also sanctioned by the Government of India, but as in Fatehpur it was postponed for a year. Meanwhile in both districts preliminary arrangements have been made to bring maps and records up to date as far as possible in anticipation of the appointment of a Settlement Officer. The actual work of inspection and assessment will probably be commenced in October next. The extended term of the settlement of the Allahabad district being about to expire, the Director of Land Records was requested to furnish a preliminary report on the prospects of a re-settlement. The Board expect to receive this report shortly and will submit their recommendations for the orders of Government. Enquiries were also made in the Muttra district with a view to

determining whether the settlement of the district should be revised before the expiry of the extended term of the settlement about the year 1920. So far it has only been ascertained that the land records of the district are not in a satisfactory condition and the Board are considering in consultation with the Director of Land Records what measures should be taken to bring the records to such a condition that they may form the basis of the work of a Settlement Officer. Possibly a complete formal revision of records may be required.

§ 66. Miscellaneous.

66. A large number of mahals in the Shahjahanpur district, which in view of their deteriorated condition at the time of the regular settlement were assessed for a term of ten years only were inspected and reassessed by the Collector during the year. The proposals are now under the consideration of the Board. In Bara Banki some of the village records (chiefly khewats) were revised by a special staff.

§ 67. Case work. Statements XXVI-A. and XXVI-B.

67. The cases remaining for decision in connection with the Moradabad settlement were all disposed of within the year by the Collector exercising the powers of a Settlement Officer and by a Deputy Collector with the powers of an Assistant Settlement Officer. The outstanding appeals pending before the Collector of Moradabad as Settlement Officer and before the Commissioner of Rohilkhand were also all disposed of except two still pending in the Collector's court. The Commissioners of Allahabad and Gorakhpur also disposed of the remaining appeals which arose in connection with the settlements of Banda and Azamgarh.

CHAPTER V.—GENERAL.

§ 68.—Summary recovery of revenue for lambardars Statement XVIII.

68. Applications were filed by lambardars under section 184 of the Land Revenue Act for assistance by Collectors in recovering revenue due by co-sharers in 2,540 cases involving the recovery of Rs. 96,061. With the applications pending from the previous year, the total number for disposal was 3,246 involving the recovery of Rs. 1,32,269. About 74 per cent. of the total number were actually disposed of leaving 855 pending at the close of the year with Rs. 35,004 to be recovered. The Aligarh district is again remarkable for the large number of cases instituted during the year and pending at its close, though the number of new applications was about 100 less than in the previous year. No comment is made by the Collector or the Commissioner as to the failure of the district staff to reduce the pending file and it can only be presumed that large numbers of applications were made quite at the end of the year. Elsewhere the largest numbers of applications are reported from Muzaffarnagar, Meerut, Muttra, Moradabad, Banda, Basti, Sitapur, Hardoi and Gonda, in each of which districts the total number of cases for disposal considerably exceeded 100, while in Meerut it was as many as 249. The number of cases pending at the close of the year exceeded 20 in Aligarh (which has already been mentioned) and in Saharanpur, Muzaffarnagar, Meerut, Muttra, Agra, Moradabad, Banda, Basti, Hardoi, Gonda and Sultanpur. The Board would have been glad to receive some assurance from Collectors and Commissioners that adequate measures had been taken to dispose of these applications. It may be that most of those pending were filed too late in the year to permit of their final disposal within it, but few of the Collectors concerned attempt any explanation. From Moradabad it is stated that only six cases were pending for more than three months; in Gonda delay was caused chiefly by the recovery of large sums of takavi which absorbed an unusual share of the time of the staff, and in Sultanpur it seems that the older cases involved exceptional difficulty.

§ 69. Summary recovery of under-proprietary rents in Oudh. Statement XIX.

69. The similar process for the recovery of rents of under-proprietors on behalf of superior proprietors who had paid the revenue due for sub-settled mahals or under-proprietary holdings was applied for in 3,295 cases in Oudh under section 185 of the Land Revenue Act. With applications pending from the previous year, the total number for disposal was 3,704 involving the recovery of nearly $3\frac{3}{4}$ lakhs. Over $3\frac{1}{4}$ lakhs were actually recovered and the balance remaining at the close of the year was about Rs. 41,000 connected with 342 applications. This result must be regarded as satisfactory. As usual the Fyzabad

district had by far the largest number of these cases to deal with, there being no less than 1,513 applications for disposal involving the recovery of more than a lakh. Only 18 applications involving Rs. 726 remained undisposed of at the end of the year. After Fyzabad, Sultanpur is most prominent with a total of 886 cases for disposal involving the recovery of more than Rs. 94,000. The results in this district were not so satisfactory, as 187 applications involving nearly Rs. 20,000 were still undisposed of at the close of the year. Doubtless there are many difficulties due to the imperfect specification of the shares of sub-settlement holders but the Board are not satisfied that better results might not have been achieved. They note, however, that in 22 cases the defaulters' shares have been attached and the collections of rent must necessarily be a tedious process. The results in Bara Banki appear to be particularly good, for only 8 out of 523 cases were still pending at the close of the year. In Gonda the large number of cases not disposed of (79) is mainly due to under-proprietors in the Ajodhya estate who are notoriously difficult to deal with; the collection of takavi also seems to have engaged so much of the attention of the district staff that sufficient time did not remain to deal effectively with these and similar applications. The cases in other districts call for no remark.

§§70—71. Mutations in registers of proprietors. Statement XXVII.

70. The total number of changes in proprietary right recorded during the year shows a further rise of over 5,500 cases. There was, however, a fall of nearly 4,000 in the number of succession cases while practically every other class shows a rise. While, however, the sales of revenue-paying lands by order of court were more numerous than in 1908-9, the aggregate land revenue of the property transferred was considerably less. The increase in the number of cases was nearly general, the Benares division alone showing any decrease. Sales of revenue-free lands were also more numerous than in the previous year, but the transactions in no district exceeded 21 in number and were nowhere important in themselves. Sales of revenue-paying lands by private transfer were recorded in about 3,000 more cases than in 1908-9, every division sharing to a greater or less extent in the increase; and only a few districts show any decline in the transfers recorded under this head. Private sales of revenue-free lands were also rather more numerous than in the previous year but the transactions were obviously petty, the average estimated land revenue of these plots being little more than Rs. 11. The rise in mortgage cases from 27,456 to 29,248 was also very general, the Meerut and Benares divisions alone showing any decrease. The numbers were particularly high though not so high, as in the previous year, in the Meerut district. In Gorakhpur there was a rise from 1,629 to 2,208 cases and a less remarkable rise to 1,631 cases in Basti, but in Azamgarh, which returns the highest number in the provinces, there was a fall of over 600 cases. In the Lucknow division Hardoi alone is remarkable for a large and increased number of cases (1,239). In the Fyzabad division three districts returned more than 2,600 mortgages, Bara Banki returns 1,270, Gonda less than 1,000, and Bahraich only 49. The highest figures in the division are reported from Sultanpur, where, however, there was a decrease of 400 cases as compared with the previous year. But it is satisfactory to note that while the number of new mortgages increased, the recorded cases of redemption of mortgage also increased by over 1,000 cases, the increase being shared by all divisions except Fyzabad where there was a small decline. It is difficult to draw any definite conclusions from the figures of the year. The rise in the number of both sales and mortgages may possibly be an after-effect of the famine, but the subject and the rise are both of sufficient importance to justify detailed enquiry from district officers.

71. There was a fall of nearly 4,000 in the number of succession cases during the year, the decrease being fairly general. The prominent exceptions are found in the Benares and Gorakhpur divisions in each of which there was an increase of about 4,000 cases. The general decline, particularly in the western divisions, is due to the greater healthiness of the year and consequent diminution in the mortality. In the Benares division the rise is attributed chiefly to the heavy mortality from cholera and plague during the year, and similarly the unhealthiness of the seasons is assigned as the cause of the increases in the Gorakhpur and Azamgarh districts. The effect of the abolition of fees for mutations in cases reported within the statutory three months can hardly have had

any effect on the number of reports made by parties succeeding to property during the year, but there are signs that the procedure under which patwaris are now enjoined to obtain the signatures of parties in any case of transfer is tending to secure more accurate reporting and the more prompt correction of the records.

§ 72.—Partitions. Statement XXVIII.

72. The number of applications for perfect partition pending at the beginning of the year was 1,812 and the number of new cases filed was 1,259 making the total for disposal 3,071. On the whole the courts failed to keep pace with the institutions, for the pending file at the close of the year was larger by 127 cases than at the beginning. The largest total numbers of cases for disposal are found in the following districts:—Saharanpur (120), Muzaffarnagar (115), Meerut (152), Aligarh (136), Bareilly (103), Cawnpore (107), Jaunpur (102), Gorakhpur (103), Basti (106) and Azamgarh (147), but in spite of the heavy file the numbers of pending cases increased seriously in only one of these districts (Muzaffarnagar being the exception) and special attention seems to have been paid to this branch of the work; indeed in some of them there was a satisfactory decrease. The pending file exceeds 70 cases in Saharanpur (96), Muzaffarnagar (80), Meerut (96), Aligarh (91), Banda (82), Basti (71) and Azamgarh (93). The number of pending applications for imperfect partition was at the beginning of the year, 3,324 and the number of new cases was 2,743 making a total for disposal of 6,067. The pending file at the close of the year was 105 cases more than at the beginning. In this class of case the work was particularly heavy in Meerut (429 cases), Moradabad (407), Gorakhpur (876) and Basti (426); the numbers exceeded 200 cases in Saharanpur, Muzaffarnagar, Bareilly, Bijnor, Budaun and Azamgarh and the pending file at the close of the year was heavy in Gorakhpur (626 cases), Meerut (266), Moradabad (228), Basti (235), Muzaffarnagar (198), Saharanpur (171), Azamgarh (162) and Bijnor (127). In most of these districts it was impossible to keep pace with the institutions in spite of the great efforts made by the partition officers. There was, however, a satisfactory decrease in the pending file in Bijnor, Budaun and Azamgarh. On the other hand among the districts with a less numerous total the pending balance in Fyzabad rose from 44 to 77 cases, in Etah from 46 to 66 and in Allahabad from 43 to 65. There are many old cases pending in several districts. They are nearly all complicated cases in which the parties and the number of *mahals* or *pattis* to be made are numerous, and in most of them there have been appeals, sometimes up to the High Court and sometimes up to the Board; and when these appeals have been decided the work often begins again. Then objections are lodged, and bad work by amins is not infrequent, and altogether this branch of the work is most unsatisfactory and consequently disliked by the revenue courts. It is all the more creditable, therefore, that the work has been done so well and on the whole so promptly as it has been. The accumulation of cases, particularly of imperfect partitions, caused many applications both during and after the close of the year for extra amins and the Board have supplied what help they were able with the funds at their disposal: they have also succeeded in obtaining a larger allotment for the next financial year, and it is to be hoped that there will be no hindrance to the prompt disposal of cases on account of paucity of staff. There are about a dozen districts in which partition work is really heavy, and in them it is not possible for the Board to criticise figures in detail. They must trust the Collectors, under the guidance of Commissioners, to see that the work is kept up to date and performed in the most efficient manner possible. The work of patwaris employed to carry out partitions has been no more efficient than before, nor has their employment been more popular.

§73. Appeals under Land Revenue Act and Kumaun rules. Statement XXIX.

73. The number of new appeals instituted in the courts of Collectors under the Land Revenue Act and the Kumaun rules was 5,567 (about 200 more than in the preceding year) and the total for disposal was 6,315 of which 5,633 were decided leaving a balance at the close of the year of 682 cases (about 60 less than at the beginning). The number of appeals pending for more than three months shows a satisfactory decline from 98 to 88, the number exceeding 6 only in Saharanpur and Gorakhpur with 11 and 36 cases respectively. The appellate work of Collectors under this Act was heaviest in Meerut, Moradabad, Ghazipur, Ballia,

Gorakhpur and Basti, and among these Gorakhpur stands out with 420 cases, being followed by Ghazipur and Ballia with 325 each. The appeals pending over three months are almost all appeals in partition cases which cannot as a rule be taken up by Collectors immediately owing to the direction of the law which practically requires that all appeals in partition cases shall be decided together at certain stages. In Commissioners' courts the heaviest file of appeals under the Revenue Act is found in the Gorakhpur division where the Commissioner had 527 appeals for disposal; no other Commissioner had so many as 400 appeals. The pending file was small in the courts of the Commissioners of Agra, Rohilkhand, Allahabad, Benares, Kumaun, Lucknow and Fyzabad, but it was somewhat heavy in the courts of the Commissioners of Meerut (85 cases) and of Gorakhpur (155). Appeals pending over three months were also numerous in the Meerut and Gorakhpur courts only with 41 and 33 cases respectively. Neither of the Commissioners concerned makes any comment on these arrears, but it may be said generally that the disposal of appeals of this class is more prompt than that of appeals under the tenancy laws.

§74. Appeals to the Board.

74. The number of appeals for disposal by the Board under the Land Revenue Act was 563, of which 390 were decided and 173 were pending at the close of the year. The orders of the lower courts were modified or reversed in only 34 cases. There were also 115 applications for revision under this Act of which 102 were disposed of, leaving only 13 pending. The orders of the lower courts were disturbed in 5 cases only. In addition the Board had 44 appeals from the Family Domains of the Maharaja of Benares; 32 were decided, leaving 12 pending at the close of the year. The orders of the lower court were disturbed in 6 cases only. The total number of judicial cases of all kinds before the Board during the year was 2,833 of which 2,143 were disposed of, leaving 690 pending, or 37 more than at the beginning of the year.

§75. Action taken to avert sale in execution of decrees of civil and revenue courts. Statements XXX-A and XXX-B.

75. Including arrears of the previous year Collectors in the Province of Agra had a file of 7,109 decrees in the execution of which sale of ancestral property was sought. Such cases had been transferred by the civil courts for execution under section 320 of the Code of Civil Procedure, 1882, or the corresponding section (68) of the Code of 1908. Of the total number 4,538 were completely disposed of, sale of the whole property proving unavoidable in 1,672 cases—a rather higher proportion than in the preceding year. More than half the cases disposed of were settled without any of the special measures allowable under the Code of Civil Procedure, that is to say, either by the cases being struck off for technical defects, by the payment in full of the decreed amounts, by withdrawal on the part of decree-holders, or occasionally by payment of the sale-money with penalty before confirmation of the sale. In 95 cases the sale of part of the property was sufficient to satisfy the decree and in the remaining cases recourse was had to leases, mortgages, or direct management. The number of cases pending at the close of the year was practically the same as at the beginning. In Oudh, where the sale of ancestral land in the execution of decrees requires the sanction of the Lieutenant-Governor, and of self-acquired landed property the sanction of the Commissioner, sales of ancestral property were sanctioned in 1,212 cases and of self-acquired property in 164 cases, and sales actually took place in 771 cases of ancestral property and in 85 cases of self-acquired property. The Board were consulted during the year as to the repeal of section 20 of the Oudh Laws Act, 1876, and the issue of a notification under section 68 of the Code of Civil Procedure making the execution of decrees for the sale of ancestral property transferable to Collectors in Oudh as it has been since 1880 in the Province of Agra. The Board will shortly submit for the consideration of Government a draft of rules which they recommend should be issued under section 70 of the Civil Procedure Code if the notification under section 68 is issued.

§ 76.—Acquisition of land. Statement XXXI.

76. During 1909-10 there was considerably less work connected with the acquisition of land for public purposes, the total area acquired being less than 8,000 acres as compared with more than 11,000 acres in the previous year. The total disbursements, however, were considerably larger than in 1908-9 being about 18·3 lakhs as compared with 11¼ lakhs, chiefly owing to the appropriation of expensive urban land in Cawnpore.

Of the total area acquired, 4,519 acres were taken up for railway purposes, 1,436 acres for canals and 1,957 acres for other projects. The principal railway projects for which lands are acquired were the Rosa-Sitapur Branch and the Allahabad-Rae-Bareli-Unao extension of the Oudh and Rohilkhand Railway, forest lines of the Rohilkhand and Kumaun Railway in the north of Kheri, the Pilibhit-Baramdeo and the Pilibhit-Shahjahanpur extensions of the same line, and the Benares-Allahabad and the Burhwal-Sitapur extensions of the Bengal and North-Western Railway. For canals considerable areas were acquired in Muzaffarnagar for the Eastern Jumna canal, in Muttra for the Agra canal, in Etah for the Ganges canal, in Banda for the Ken canal, in Hamirpur and Jhansi for the Dhassan canal, and in Jalaun for the Betwa canal. The other miscellaneous purposes for which land was taken up were chiefly the construction of roads in Muttra, Allahabad, Gorakhpur and Basti, college buildings and military purposes in Meerut, the city improvement schemes in Lucknow and the bull-rearing dépôt in Kheri. The Board have no reason to be dissatisfied with the character of the work done by the Assistant Collectors employed on the duty of land acquisition. They note, however, that the valuation of urban land is becoming complicated; in fact, the Collector of Bareilly at one time complained that he was unable to obtain assistants experienced in these matters. Lately, however, he has reported that his present land acquisition officer has been able to make awards which are satisfactory both to the Collector and to the parties. The Board are inclined to the opinion that only an officer with considerable experience of this work can be expected to deal satisfactorily with such cases, which doubtless require special aptitude and special study of local conditions.

§§77—78.—Total work in district offices.
Statement XXXII.

77. The total number of letters received and issued in the English departments of district offices shows a considerable decrease, owing chiefly to the orders of the Board requiring a uniform system of reporting the volume of correspondence. The number of letters now returned has been rigorously confined to those issued in departments under the control of the Board, viz. departments I to XII of district office work. The other departments except XIII (Scarcity), which is not under the control of the Board, are those with which the district officer is concerned in his capacity as District Magistrate. The counting of reminders received and issued has also been stopped, and in cases where the Collector has a special office separate from his general English office for the business of the Court of Wards, letters dealing with estates managed by the Court of Wards have also been excluded. The result is that there are far fewer anomalies in the returns from district to district than hitherto.

78. In the vernacular departments the number of new cases instituted was 1,360,395 or about 550,000 less than in the previous year, and the total for disposal, with arrears, was just under 1,600,000. These figures include judicial cases the disposal of which has already been discussed. Excluding judicial cases the number of new cases instituted during the year was 992,815, and the total for disposal, including arrears was nearly 1,120,000. As a whole the offices more than kept pace with the work of this class, the pending balance being reduced from nearly 127,000 at the beginning of the year to about 122,000 at its close. The figures represent more truly than before the real state of the work as applications for copies (for which a separate establishment is provided) have been excluded from the returns. The districts with the heaviest files of new cases were Gorakhpur, Meerut and Muzaffarnagar with from 46,000 to 48,000 cases each: then follow Saharanpur, Moradabad, Allahabad, Basti and Azamgarh, with between 30,000 and 40,000 cases, twelve districts with between 20,000 and 30,000, twenty-one districts with between 10,000 and 20,000 and the remainder with less than 10,000, Dehra Dun being last with only 2,828. The pending balance rose seriously in Meerut from 4,652 to 6,073, in Farrukhabad from 3,078 to 4,418, in Etah from 2,152 to 2,752, in Mainpuri from 1,615 to 2,072, in Garhwal from 924 to 2,274, in Gonda from 1,753 to 2,547 and in Bahraich from 1,201 to 1,761, but most districts show satisfactory decreases, or at least did not lose ground substantially. Gorakhpur with a pending file of 8,560 cases had about 3,000 more cases on hand at the end of the year than any other district. Meerut stands next with 6,000 cases, and then Azamgarh with 5,100, but no other district except Aligarh, Bareilly and Allahabad had more than 4,000.

§79.—Assignments, &c., of land revenue. Statement XXXIII.

79. The total land revenue of the property assigned or alienated at the close of the year under report is Rs. 2,58,409 as against Rs. 3,13,859 shown in the previous year. The decrease of about Rs. 55,000 is due chiefly to correct figures having been supplied for the Bareilly district and partly to the resumption of a few muafis. In Shahjahanpur figures relating to grants made by Native Governments have not yet been differentiated from those made by the British Government.

§80.—Payment of Government dues by money order.

80. The number and value of money orders issued in the payment of land revenue, local rates and canal dues was greater than in the previous year, the total number being nearly 315,000 and value over 61¼ lakhs. The use of this means of remittance was most popular in the Gorakhpur division where nearly 125,000 orders with a value of over 12½ lakhs were issued; and in Meerut and Allahabad divisions 11¼ and 10¾ lakhs respectively were remitted in this way. The greatest increase appears in the Meerut division. Remittances of miscellaneous revenue on the other hand were less by about 3¾ lakhs than in the previous year, doubtless owing to the diminished demand for takavi. In respect of such revenue the Allahabad division heads the list with 3½ lakhs and is followed by Meerut with over two lakhs and by Gorakhpur with nearly two lakhs. On the whole it would seem that the system of remitting Government dues by money order is increasing in popularity but the chief cause contributing to the increase is most probably the more general use of citations and fear of the penalty of disobedience. It is not unnatural to suppose that defaulters prefer making their remittances by money order to attending personally at the tahsil in answer to citations.

§ 81.—Rental money orders.

81. The total remittances of rent by special rent money orders were about Rs. 41,000 only less than the 'record' figure of the previous year, the total being rather less than 17½ lakhs. This means of payment continued to be most popular in the Rohilkhand and Meerut divisions, where the aggregate remittances were 5½ and 3½ lakhs respectively, and among districts in Bijnor (2 lakhs), Moradabad (1·6 lakhs) and Aligarh (1 lakh). In all three districts there was some increase during the year, but there was a noticeable fall in Basti from Rs. 85,000 to Rs. 57,000 which the Collector thinks may possibly be attributed to the greater readiness of zamindars to grant proper receipts for direct payments. In Bijnor the landlords are reported to have attempted to trick their tenants over famine suspensions and remissions, and this is a possible explanation of the rise in that district. The Board have before expressed the opinion that, apart from cases of mere convenience, which must be many, an increase in the remittance of rents by money order is most probably a symptom of tension between some landlords and their tenants.

§ 82.—Maps.

82. At the close of the last revenue year the Thomason College Press had on hand for reproduction three tahsili maps of the Allahabad district; and one more of this district, two of the Etah district and four of the Hardoi district were taken in hand. All these 10 tahsili maps were prepared and issued during the year.

§§ 83—85.—Conclusion.

83. The tone of all the district and divisional reports indicates satisfaction and contentment among the people, who have now experienced a return of prosperity. The good crops were secured without a great fall in prices and their money-value was therefore high. The result is seen in the comparative ease with which the Government demands were met and the satisfactory record of collections of rent. Very little of the large amounts of the revenue suspended during the famine remains to be collected and in the majority of districts the burden of debt contracted by the peasantry by taking advances from Government has been reduced to normal proportions: in fact only a few unfortunate tracts which suffered either before or after, as well as during, the famine are in arrears with their payments on this account: and even these districts had good crops last year and expect good ones now, so it is to be hoped that the record at the end of September next will be still more satisfactory. Further proofs of the prosperity of the provinces are the revival of brisk trade, the scarcity of labour, and the great number of marriages celebrated with lavish expenditure during the last summer. From several districts, however, it is reported that there was a widespread belief that the rains of 1910 would fail (in

many places the appearance of Halley's comet was held to be of ill omen) and that consequently there was much speculative buying of food-stuffs in anticipation of a rise in prices. The rains having proved on the whole eminently satisfactory and a considerable fall having recently occurred in the price of wheat, those buyers would seem to have over-reached themselves.

84. In the matter of irrigation it may be noted that certain improvements in the canal system of Dehra Dun are being examined, that the Hathras branch canal was begun, and that various systems of water-storage were in progress of construction, and more were under consideration, in Bundelkhand; but the Board have not learnt what progress was made with the proposal to make a canal to tap the Rapti. It has already been noted that the number of wells increased considerably during the year in spite of the falling-off in the demand for loans to build them, but there is no doubt that further construction should be stimulated in all areas where the cost is not prohibitive so that the evils of a failure of the rains may be mitigated in the future. In a certain tract in Mainpuri where the well-water is brackish the Collector reports that an extension of the canal system would be an advantage, for without sweet water it seems impossible to check the spread of the noxious *baisurai* weed; but the water to supply this tract cannot apparently be found, unless indeed the Sarda canal project comes in the future to the relief of the Ganges canal systems.

85. This report is more particularly concerned with the agricultural interests of the United Provinces, and the Board conclude by noticing a few matters indirectly affecting them. Steady, though not rapid, progress is being made in the improvement of road communications, but there is still a large field for useful expenditure in this direction, particularly in bridging various rivers which prove formidable barriers for several months in the year. Railways on the other hand have of late years exhibited a more rapid development and many useful lines were either under construction or opened during the year. Their progress, however, results in the shifting of trade to new centres and their influence is consequently detrimental to those of the older marts that are not conveniently situated with reference to the line of rail. The business of the cotton gins and presses was disappointing, and some firms in this trade came to grief, partly, it is to be feared, through unsuccessful speculation apart from the mere business of ginning and baling, the prices of cotton in foreign markets having been low. The original enterprise through which an electric spinning-mill was started in Hathras failed, but the company has been reconstructed and prospects are now brighter. Some other recent industrial ventures in outlying towns have also proved not entirely successful, partly owing to inexperience in management, partly owing to adverse conditions and possibly also to the difficulty of competing with larger and established concerns in more favoured situations. Nevertheless every year new mills spring up and there is no doubt that industrial enterprise is awakening and that experience will soon indicate where capital can be employed profitably. The co-operative credit movement appears to be gaining a firm hold and to promise satisfactory developments in several places; and its influence will certainly be great not only in agricultural finance but among artisans. In Benares in particular its success among the latter class has been marked. A good many rural banks were closed during the year owing to the impossibility of continuing them on their originally unsound basis, or sometimes on account of the apathy of their members, but as a rule the closing of old banks has been followed by the establishment of new ones, not so numerous perhaps, but started on more promising lines.

I have the honour to be,

SIR,

Your most obedient servant,

P. HARRISON,

Secretary.

Fyzabad	47	14,441	27,013
Gonda	31	5,868	11,514
Sultanpur	3	951	1,040
Partábgarh	36	4,190	10,133
Bara Banki	3	1,514	2,845
Total, Oudh ...	166	53,242	77,473
Total, U. P. ...	3,890	237,955	2,58,409

NOTE.—(a) All the above grants except those shown against Gorakhpur (which represent the remission of revenue on Goraits' jagirs created in jungle grant Keotali and come under the class—"For the maintenance of public servants") were made "On other grounds."

(b) Difference in figures as shown in this statement and in that for the previous year is due to correct figures having been furnished this year for the Bareilly district and to resumption of a few muafis. As reported last year figures relating to grants made by Native Governments in Shahjahanpur cannot be differentiated from those made by the British Government.

STATEMENT XXXIV-A.—(PROVINCE OF AGRA).

Statement showing classification of holdings and rental statistics for 1317 *fasli or* 1909-1910.

District.	Area of holdings.					
	Held as sír.	Held by zamindars other than sír, and thekadar's cultivation.	Held free of rent.	Held by permanent tenure-holders and fixed rate tenants.	Held by ex-proprietary tenants.	Held by occupancy tenants with occupancy rights.

ORDERS OF GOVERNMENT.

No. $\frac{755}{I-203}$ OF 1911.

REVENUE DEPARTMENT.

Dated Allahabad, the 19th April 1911.

RESOLUTION.

READ—

Letter from the Secretary to the Board of Revenue, United Provinces, no. $\frac{895}{XII-149B}$, dated the 11th March 1911, being the Board's report on the revenue administration of the United Provinces for the year ending 30th September 1910.

OBSERVATIONS.—The revenue history of the year ending on the 30th September 1910 is a record of general prosperity and bears but few traces of the effects of the famine of 1907-8. The monsoon, though irregular in places, was generally favourable, while the conditions during the *rabi* season were almost everywhere unusually good. The area sown with autumn crops was slightly above normal, and would have been still greater but for an excess of moisture at the time of sowing; the *rabi* area, though not quite up to the normal, exceeded that of the previous year by 2½ million acres.

2. The Lieutenant Governor regrets to notice that Agra and Muttra alone of all the districts in the province failed to share in this increase of winter cultivation. There is perhaps less cause for anxiety about Agra, but the economic condition of the Muttra district has deteriorated in recent years, the district having since 1904 suffered from two famines, one bad frost, two epidemics of malaria and an exceptionally severe outbreak of plague. The recent census, which reports a decrease in population from 763,099 to 656,237, shows the result of this succession of calamities. In 1902 the Government accepted the Board's recommendation that the settlement of 1876 should be extended for another fifteen years, but subsequent events have made the Lieutenant Governor doubtful whether this decision should not be reconsidered. He will be glad to receive as soon as possible the opinion of the Board on the question whether there are sufficient reasons to justify a resettlement before 1920—23, when the extended settlement will normally expire.

3. The yield both of the autumn and of the spring crops was satisfactory, and the general prosperity of the year is reflected in the fact that out of a demand of 928½ lakhs the arrears amounted only to 12¾ lakhs, of which land revenue under suspension and demands on account of loans account for 1¾ and 9 lakhs respectively. With the exception of Meerut and Azamgarh, where land revenue suspended during the famine is still outstanding to the extent of 1¼ lakhs and half a lakh, the whole of the suspended revenue on the roll was collected.

4. The large fall from 31½ lakhs to 12 lakhs in the demand for agricultural advances is no doubt rightly explained by the Board as an indication of returning prosperity. At the same time the Lieutenant Governor cannot view without concern a diminution in the demand for loans for the purpose of building wells in areas which are at present imperfectly protected from the effects of drought. The marked fall in

the demand for loans for this purpose during 1910-11, and in the estimated demand for the present year, led Sir John Hewett in December last to issue a letter impressing on Collectors the importance of encouraging cultivators to build masonry wells, and of teaching them to regard such expenditure in times of prosperity as an insurance against recurring bad seasons. Mr. Porter trusts that the Board will watch carefully the action taken on that letter.

5. The very large increase of 50,000 in the total number of coercive processes for the recovery of arrears is, as the Board remarks, a matter for surprise in a year of prosperity, but the Lieutenant Governor notices that the reports of the Commissioners bear out the explanation offered by the Board that the number of recorded processes has risen chiefly owing to the suppression of irregular methods of collection. This was a necessary reform which received approval a year ago and Mr. Porter is glad to see that it has been pursued. Another important factor in the increase of processes is the inclusion of writs of demand for mutation fines, which had hitherto been excluded from the returns of several districts. It is satisfactory to observe that in spite of this large nominal increase of coercive processes, sales of immovable property were necessary in only 106 cases.

6. The statistics of suits under the tenancy laws do not hold out hope of any marked diminution in the volume of litigation. In Agra indeed litigation showed a decrease of 30,000 suits and applications, but in Oudh there was a general rise. In both provinces the number of suits for arrears of rent was very high. This in a good year indicates an attempt on the part of landlords to recover the arrears of previous bad seasons. The area affected by ejectment suits in Agra amounted to over 230,000 acres, a slight decrease on the figures for the previous year. The Lieutenant Governor is glad to see that the area protected from arbitrary ejectment by the operation of the Agra Tenancy Act, 1901, has steadily increased and now represents 67 per cent. of the area held by ordinary tenants.

7. Mr. Porter has read with interest the Board's brief summary on the work of honorary assistant collectors in the province of Agra, but would have been glad to receive more detailed information as to the number of suits which were disposed of by these gentlemen. He is pleased to see that they have been of real assistance in several districts, and desires to take this opportunity of thanking them for their services. So far the experiment has been confined to Agra, and gentlemen entrusted with these duties have been retired officials with long experience of judicial work; but the Lieutenant Governor hopes to extend to Oudh the practice of appointing honorary assistant collectors, and is considering whether it is desirable to confer such powers on selected landowners, thereby reviving an experiment which was started in Oudh by Sir Charles Wingfield so long ago as 1859. The Lieutenant Governor is in favour of giving the large landowners a share in the revenue administration of the province, but there is one great difficulty to be surmounted. In suits between landlord and tenant, which form the bulk of an assistant collector's work, the landlord could not try cases in

which he is personally concerned, and it is possible that the tenants even of another landlord would object to their cases being decided by one whose interests would naturally be on the proprietary side.

8. The number of registered proprietary mutations amounted to 253,344 as compared with 248,232 in the previous year and 238,895 in 1907-8. There was also a slight but general rise in the number of mortgages registered, against which may be set a similar increase in the number of recorded cases of redemption of mortgage. The rise in the number of sales and mortgages may, as the Board suggests, be an after effect of the famine, but the Lieutenant Governor would have been glad if the reports of district officers had enabled the Board to assign definite reasons for this increase and to explain what classes in the main had gained or lost by these transfers.

9. In conclusion the Lieutenant Governor desires to thank the Board for their full and interesting report on the revenue administration of the year.

ORDER.—Ordered that a copy of this resolution be forwarded to the Secretary to the Board of Revenue, United Provinces, for the information of the Board.

Ordered also that a copy of this resolution be published in the *United Provinces Government Gazette.*

By order of the Hon'ble the Lieutenant Governor, United Provinces,

J. W. HOSE,

Chief Secy. to Govt., United Provinces.

Report by the Board of Revenue

ON THE

REVENUE ADMINISTRATION

OF THE

UNITED PROVINCES OF AGRA AND OUDH

FOR THE REVENUE YEAR 1910-1911, ENDING 30TH SEPTEMBER 1911.

REPORT

ON THE

REVENUE ADMINISTRATION

OF THE

UNITED PROVINCES OF AGRA AND OUDH

FOR THE REVENUE YEAR 1910-1911, ENDING 30TH SEPTEMBER 1911.

No. 1026
XII—149B (2).

FROM

J. E. GOUDGE, ESQ., I.C.S.,
SECRETARY TO THE BOARD OF REVENUE,
UNITED PROVINCES

To

THE CHIEF SECRETARY TO GOVERNMENT,
UNITED PROVINCES.

Dated Allahabad, the 12th March 1912.

SIR,

Present:
THE HON'BLE MR. D. C. BAILLIE, C.S.I., and THE HON'BLE MR. J. A. BROUN, C.S.I.

I AM directed to submit the following report on the revenue administration of the United Provinces for the year ending 30th September 1911.

§§ 1.–3—Introductory.

2. The permanent members of the Board have been Mr. L. A. S. Porter, (now Sir Leslie Porter, K.C.S.I.) and Mr. D. C. Baillie, C.S.I. The former officiated as Lieutenant-Governor from the 1st to 19th October 1910, and from the 1st April 1911 till the close of the year under report, and was also absent on leave from the 19th January to the 31st March. His place was taken by Mr. H. W. W. Reynolds. Mr. Baillie proceeded on leave from the 6th May, and Mr. G. A. Tweedy officiated for him.

3. Four divisional reports were received in November and four in December, the Meerut and Allahabad reports arriving on the 26th and 30th of the latter month respectively. The Rohilkhand report was not received until the 11th January, which was very late. The explanation given by the Commissioner of Rohilkhand is that certain revised appendices to the district report from Shahjahanpur were not received until the 29th November. This is scarcely satisfactory.

4. The monsoon of 1910 gave general satisfaction. There was no marked deficiency in any part of the provinces. The rains broke in the early part of June and, with the exception of a prolonged break in July which caused some anxiety for the standing crops in the Rohilkhand, Allahabad, Meerut and Agra divisions, their progress was quite normal. There was well distributed rain during August and September, which was heavy in the Kumaun, Benares and Gorakhpur divisions. Elsewhere there was a slight excess, and in the two Oudh divisions, no noticeable variation from the normal. The feature of the monsoon was a torrential downpour in October. Every division felt it more or less, but it was heaviest in Kumaun, and the result was heavy floods in the Rohilkhand and parts of the Gorakhpur division. The effect of this late rain told most beneficially, however, on the rabi sowings, and there was an unexpected fall about the middle of November which enabled a still larger area to be brought under the plough. There was no winter rain of any importance in December, the Agra, Allahabad, Benares, Gorakhpur and Fyzabad divisions being entirely rainless, but it was not needed. In January,

§ 4.—Seasons.

134196

however, there were large falls, particularly in the end of the month and again, which was somewhat unusual, in March and April. On the whole therefore the rainfall of the year was copious, well distributed and seasonable. It was sufficient to give a good start to kharif sowings throughout the provinces in June, but the general drought in July retarded these to some extent. This led to no serious consequences and the latter part of the monsoon was exceptionally good. The winter rain was even more timely than the monsoon, and, with the exception of some rust which usually follows heavy rain at this season and the almost total extinction of the mango crop which resulted from the late rain in March, there has been no cause for complaint. The people of the provinces were favoured with admirable agricultural conditions on the whole, and it was pleasing to note, in many parts of the provinces how much leisure they enjoyed during the rabi season of 1910-11 owing to timely showers which made irrigation unnecessary.

§ 5.—Cultivated areas.

5. The total cultivated area of the year 1910-11 shows an increase of 2·1 per cent. above the average, but a small decrease of 113,000 acres or 0·3 per cent. below the total of the preceding year. Following the features of the rainfall above described there was a slight reduction in the kharif area with a large increase in the rabi, and a corresponding extension of the dofasli area. The Director's figures for the last four years show that there has been a somewhat remarkable decrease in kharif figures. Taking 100 as the normal the figures are 103·5, 104, 101 and 98 respectively. The decline in 1909-10 was explained last year as due to the sowing season being too wet, in the season 1910-11 the decline is said to be the natural result of the weather during June and July; in some parts of the provinces the rain was too continuous to permit of sowings, and elsewhere the dry weather of July was the controlling factor. There had also been two good kharif seasons so that food stocks were appreciably greater than in 1909 and very much greater than in 1908, with the result that there was less urgency to attempt a crop at all hazards when difficulties were met with in the kharif sowings. This may explain the continuous decline since the famine year of 1907-08, but it is still a remarkable fact that there was a decline of 660,000 acres in 1909-10 on the previous year's figures and that 1910-11 shows again a net decrease of 800,000 acres. The Allahabad division however showed large extensions of kharif area in Banda and Hamirpur, and, to a less degree, in Allahabad and Jalaun. In Mirzapur a very large extension was due partly to the favourable local monsoon and partly to the bringing of new land under cultivation. Four other districts show unimportant increases. In the rabi area it is worthy of note that the figures show a tendency exactly contrary to those of the kharif, inasmuch as since 1907 there has been a constant rise from 68, with reference to 100 as the normal, up to 108 in 1910-11. The actual rise in acres over the area of 1909-10 is $2\frac{1}{4}$ millions, and the exceptionally favourable rain in October and November naturally led to a large expansion. During recent seasons there have been late continuations of the monsoon, and the Director points out an interesting fact that a large excess over estimated normal areas is found in districts which are relatively ill supplied with stable sources of irrigation, and therefore depend especially on the October or November rain. He quotes Agra, Bijnor, Banda and Gorakhpur with an excess of 41 per cent., 22 per cent., 25 per cent. and 31 per cent. respectively. With reference to the remarks in last year's report on the rabi area in Oudh it is satisfactory to find that much progress has been made, the province as a whole being above the normal, though in the four districts of Lucknow, Unao, Rae Bareli and Bara Banki it was still slightly in deficit. The area sown with zaid crops continues to fall, and the Director infers from a large fall in the hot weather millets, a crop characteristic of South Oudh, that stocks of food were adequate. The largest rise relative to the previous year has taken place in the twice-cropped area, which is the natural result of a wet autumn enabling the people to sow pulses or linseed after early rice. Generally the statistics are thoroughly satisfactory, and clearly reflect improved agricultural conditions.

§6.—Crop areas.

6. The distribution of autumn crops shows no very striking variations from the normal, and nothing which is not at once explained by seasonal conditions. There was a drop of slightly more than $\frac{1}{4}$ of a million acres in small millets and maize respectively. The greater part of the decrease in the latter crop is reported from Kheri, Gonda and

Bahraich where the season was more favourable to rice than maize. There was a less marked decline in early rice, juar and bajra, all of them crops the sowings of which were adversely affected by either the excessive wet at the beginning of the monsoon, or by the drought in July. Where it was wet in July, however, as in the north-eastern districts, early rice increased substantially. Late rice sowings, though generally showing a decrease, were considerably extended in Gorakhpur and the north of Fyzabad. To turn to crops of commercial importance, sugarcane, cotton, and *til* (*sesamum*), the year was a successful one for the first named, the area under which shows a slight increase, but is still only 87 per cent. of the normal. Though the important sugar tracts of the west show slight decreases, continuing the movement which was referred to in last year's report, the Director draws attention to a substantial increase in Gorakhpur and some recovery of the Oudh area. Cotton was also sown on an increased scale, the area being 17 per cent. above the normal in 1910 as compared with 8 per cent. in 1909. The sowing season was unfavourable in the main cotton tract of the Meerut and Agra divisions, but the new cotton tract north of the Ganges, comprising Bijnor, Moradabad, Budaun, Hardoi and Unao, secured an extension of upwards of 90,000 acres in the area sown. There was a substantial increase in the Bundelkhand tract also, and a feature of the year was a rise from 7,000 to 9,000 acres in the Tarai pargana of Kashipur where the quality of cotton grown is said to be superior to the ordinary indigenous variety. A cotton crop has a special advantage in that locality in offering no attractions to wild animals. The sowings of *til* were 51 per cent. in excess of the normal area, but declined somewhat from the area last reported, which was 65 per cent. above normal. For this the wet weather of August is doubtless responsible.

There is a still further indication of a return to normal, if not specially favourable, conditions in the distribution of the rabi crops. The total rabi area was, as already pointed out, much above the normal and in this wheat, with 7 per cent. above normal, occupied its fair share of the ground, while gram and linseed have nearly recovered the area lost during the famine, this particular season being very favourable as they could be sown on the inferior rice lands. There was a very small decline in the barley area and a large one in that of rapeseed. In the latter case the probable reason is that the sowing season was too wet for this crop which is usually the earliest to be put into the ground. Poppy showed a rise of 14,607 acres due to the concentration of cultivation in the United Provinces, scattered areas in Behar being given up.

§7.—Irrigated area.

7. There was again a slight decrease in the area irrigated during the kharif season of 1910 as compared with 1909, but there was a very large fall in the net total irrigated area of nearly 1½ millions of acres. This was of course due to the extremely favourable winter rains, and the figures indicate a substantial saving in the cost of producing crops. With respect to the sources used reservoirs were responsible for an increase owing to their extension in Mirzapur, while the good natural supplies in lakes and rivers caused an increase in irrigation from "other sources." Though it was a year of general decrease in the canal irrigated area (217,000 acres), it is noteworthy that the opening of the Dhasan canal doubled that area for the Hamirpur district.

§8.—Wells.

8. Non-masonry wells fell off in 1910-11 by nearly 200,000, and only 15,366 masonry wells were built during the year as compared with nearly 23,000 of 1909-10 and 28,447 of 1908-9. The decrease was inevitable in a year of copious rainfall: in such a year not only is the need for wells less pressingly apparent, but the difficulty in sinking them is greatly increased. It is when the level of subsoil water is low that wells can most successfully and most economically be made. The Board is, however, not fully satisfied that even after Sir John Hewett's admonitions as much as is possible is done in all districts to facilitate well construction. Much however has been done. The Director of Agriculture has pointed out that upwards of one crore of rupees have been spent by the people of these Provinces in the construction of masonry wells since 1906, and the number has risen by 71,000. Apart from the protection against the results of drought there is an enormous increase of the rental value of land in the figures here indicated. It is to be hoped that district officers will continue to give all the stimulus they can to the movement for extending wells everywhere throughout the provinces.

§9.—Calamities.

9. The exceptionally heavy bursts of rain which occurred at intervals during the year naturally gave rise to severe floods which are reported from Moradabad, Etah, Saharanpur, Sitapur, Gorakhpur and Basti. Remissions were necessary in Moradabad, and in the Gorakhpur division the Gogra and Rapti kachars suffered considerably with the result that there was a local shortage of fodder, but generally the rabi was benefited to a compensating extent by deposits of fertilising silt. Some permanent damage by sand is reported to have been done by the Chauka river. Complaints about the grasshoppers in sugarcane have been fewer, and it is reported from Fyzabad that the eggs have been killed, so that it is a fair conclusion that the people are adopting the measures for eradication which have been fully explained to them. Juar continued to suffer from the ravages of borers mentioned last year. Rust and hail caused small local damage in Lucknow and Allahabad only, and the fruit crop in Kumaun was seriously affected.

§10.—Outturn.

10. The outturn in kharif crops was generally a little inferior to that in 1909, but sugarcane and late rice show an improvement, being only 5 per cent. below the estimated normal. The yield was on the whole satisfactory and only crops like juar, bajra and cotton, which suffer from heavy rain late in the season, were considerably below average. On the other hand this very phenomenon benefited sugarcane and late rice. A good yield of early rice in Allahabad and Benares and most of Oudh is to be set against poor results in western districts owing to drought, and in eastern districts owing to floods. Late rice however was uniformly good in the east. Maize and *til* both suffered from excessive rain at the end of the season. The yield in rabi on the whole, however, was as satisfactory as the large increase in area already mentioned. Barley, gram and linseed all gave a normal crop of cent. per cent., and though wheat was reported at 10 per cent. below normal, it must be remembered that the figures relate to a substantially larger area, and the estimates must be taken with even more caution than usual. In bulk the crops were remarkable, and an excess over normal may be safely surmised where the mere normal has been acknowledged. Such deterioration as was caused by the weather in March consisted only of a certain loss of weight and quality from the early promise of February. The poppy crop unfortunately was the worst on record in the annals of the department, suffering as it did from the combined ravages of insects, blight and rain. With the exception of melons and allied crops in the neighbourhood of Lucknow, the hot weather crops yielded satisfactorily. The yield of *mahua* which is of the greatest importance to the poorer classes south of the Jumna was satisfactory, but mangoes were practically an entire failure in the greater part of the provinces. Taking the year as a whole the results in the staple grains of the provinces were little, if at all, inferior to the distinctly satisfactory outturn of the year preceding, and to this must be added the remarkable increase in the area covered by the highly profitable rabi. There are invariably qualifications in the praise of seasons, and in this case it was unfortunate that fine promise in the early stage was disappointed by unfavourable conditions to the kharif in October, and to the rabi in March. The former justified hopes of a nearly normal yield, and the latter of a yield greatly above normal.

§11.—Monsoon and kharif of 1911.

11. The feature of the 1911 monsoon was its remarkable lateness; over the central part of the provinces, from Allahabad to Meerut, it cannot be said to have really broken until well into August. General rain fell in the middle of June sufficient for sowings in the east and for ploughing operations in the west of the provinces. At the end of the month hot dry weather set in till nearly the middle of July which brought fair rain in most districts, Agra and Meerut divisions excepted. There was another prolonged break of hot dry weather till the close of July when heavy local storms were fairly numerous over a large part of the provinces, but in the first fortnight of August generally sufficient rain had fallen in the Himalayan districts, parts of Bundelkhand, the divisions of Benares, Gorakhpur and Fyzabad, and in the submontane tract as far west as Pilibhit. The whole of the doab with parts of the Rohilkhand and Lucknow divisions were still very short. A fodder famine was anticipated by the Commissioner of Agra, and just as the situation was looked upon as grave over the central tract of the provinces, a great improvement came with the third week in August, when there was heavy

rain in the east and sufficient fell everywhere except in the Upper Doab and parts of the Agra division. The last week of the month brought light but almost general rain, and anxiety was relieved. September was wet throughout the province, and, at its close, there was no need of more rain, in fact, several districts reported injury to particular crops. The monsoon continued throughout the first fortnight of October, light general rain falling everywhere in the first week, and the eastern half of the province receiving excellent rain in the second week. Thereafter the month was practically rainless. Taking the monsoon period from 1st June to 31st October all the western divisions as then constituted showed a deficiency of about 25 per cent. the Allahabad division a normal amount, Lucknow a small defect, and the other divisions a slight excess. The deficiency of rain during July and August greatly restricted sowings and a full area could not be secured even though great energy was displayed when the weather conditions became favourable. The total kharif area fell off from 227 to 200 lakhs of acres, or by 11 per cent., and the area on which crops failed to come to maturity is reported to be as much as 8 lakhs of acres. The Gorakhpur division alone shows a slight increase of 2 per cent. in total kharif area while the staple crops for the provinces as a whole show decreases, except bajra, which increased by 329,000 acres.

Rice districts and especially the eastern districts were benefited by the late rains, but cotton and til were damaged to a varying extent. On the whole late kharif did better than the early kharif crops; the eastern districts fared better than the western, while in the Kumaun division the crops were excellent. The yield of juar is estimated at 75 per cent. of the normal, but other food crops gave an outturn of from 80 per cent. to 90 per cent. The percentage of a normal outturn obtained from each crop for the provinces as a whole is reported by the Director of Agriculture to be as follows :—Early rice 85, maize 80, small millets 80, indigo 70, late rice 90, juar 75, bajra 85, pulses 80, cotton 70, and til 70. The kharif as a whole was a poor one, and in many districts it was very poor. The concluding manifestations of the monsoon have however again been very favourable for a remarkably large area in the ensuing rabi.

§12.—Health.

12. The mortality was greater than in the revenue year 1909-10, the total number of deaths from all causes showing an increase of 218,711. In the quarter ending December 31st, 1910, there was a considerable decrease but afterwards the deaths increased, a culminating point being reached at the close of the third quarter with 585,865 as against 457,188 in the corresponding period of the preceding year. This was mostly due to an enormous increase in plague the mortality from which during the first six months of 1911 was more than double what it was in the same period of 1910. Muzaffarnagar and Meerut districts in the north and Ghazipur and Ballia in the other extremity suffered terribly from this scourge. There was a similar increase in deaths from fever. Deaths declined from October 1910 to April 1911, but increased greatly from May till August. During the rains there was a severe epidemic of cholera in the Fyzabad division, parts of the Gorakhpur division and in the Sitapur district. In regard to plague in particular, the Board would recall Mr. Moreland's remarks at the conclusion of the season and crop report. "The darkest shade in the annals of the year has been the renewed epidemic of plague ..... its effects on the productivity of agriculture cannot be overlooked." The truth of this statement is strikingly evidenced in the condition of the Muttra district, and, in particular, that part of the district which lies west of the Jumna. The density of population in this tract has always been considerably below that usual in these provinces. The ravages of plague greatly reduced the number of available workers. A large area consequently went out of cultivation, and, even when cultivation continued, it became rougher and less effective.

§13.—Trade.

13. Statistics of inland trade are only available up to the 31st March 1911, the close of the financial year, but in these are fully reflected the effects of the two seasons of the revenue year with which the Board are now dealing. There was again a large increase in the trade of the provinces, the exports increasing by over 4 millions of maunds and the imports by two millions. These are not so large as the corresponding figures of the preceding year, but conclusively show that the improvement in the general prosperity of the community is well maintained. The large area of rabi and the

excellent outturn finds expression in an increase of nearly 3 million maunds of wheat and of nearly two million maunds of oilseeds. The rise in linseed and rapeseed is remarkable as the exports of these were over two million of maunds, more than the total of all oilseeds combined. The explanation that a much larger area was sown is not altogether adequate. There must be a growing demand. The figures of import trade more strongly indicate an improvement in the purchasing power of the people, cotton goods having increased by 141,407 maunds in spite of a corresponding rise in 1909, while the articles of comparative luxury, kerosene, salt and spices which were the largest on record in 1909-10 have again been purchased on a greater scale. There was a decrease in imported coal and coke which had risen abnormally in 1909-10, and this is partly accounted for by a reduced demand for coal for brick and lime-burning after the recent large building operations in Lucknow. The general prosperity of the people at large is not concerned with this item, but it is satisfactory to note that the total imports of grain and pulse are dropping, though still somewhat above those of years of plenty.

§14.—Prices.

14. The average prices of the principal food grains at the close of September 1910 were as follows (in seers per rupee):—

Wheat	13
Barley	22·6
Juar	21·4
Bajra	17·4
Maize	28·3
Gram	19·2
Arhar	15

Until the end of June 1911, prices either tended to become cheaper or remained at this level, which is approximately normal, but in no case did the market rate rise. At the opening of the monsoon season the highest and lowest prices reported were—

Wheat	$13\frac{1}{16}$ to $15\frac{1}{2}$
Barley	20 to $24\frac{5}{8}$
Juar	$21\frac{1}{2}$ to 23
Bajra	18 to $21\frac{1}{8}$
Maize	$24\frac{5}{8}$ to $31\frac{3}{5}$
Gram	18 to $24\frac{5}{8}$
Arhar	12 to 20

In July when the prospects began to look rather doubtful prices took an upward tendency, and they ruled somewhat higher at the close than at the beginning of the revenue year. The improvement in the monsoon checked the rise, and it is clear that the course of prices throughout the year indicates a sufficiency of food stocks, and a general sense of security in the market.

§15.—Agricultural stock.

15. There has been no difficulty in feeding cattle during the year except that which occurs seasonally when lowlands are flooded, and cattle have to be moved hurriedly to elevated spots. In 1910 owing to the extent and duration of the floods this difficulty was felt more than usual, and there was a local scarcity during the cold weather of fodder in the Rapti and Gogra *kachhars*. Contagious diseases have been less prevalent than usual, and the Director of Agriculture thinks the decline to be progressive. Satisfactory reports as to the increasing popularity of inoculation are received. The Meerut division, particularly Dehra Dun, and Garhwal suffered from rinderpest, more than one-third of the recorded deaths occurring in these two districts.

There was some suffering among cattle during the prolonged drought in July and August last, and it is reported from the Lucknow division that withered crops used as fodder acted like poison, and resulted in considerable mortality among the cattle.

§16.—Statistics of holdings. Statements XXXIV-A and XXXIV-B (1) General.

16. The total holdings area, which steadily rose in recent years, declined by 134,214 acres in Agra and 21,865 acres in Oudh owing to a slight falling off in the cultivated area as a consequence of unfavourable conditions for sowing during June and July 1910. The decrease is shared by all the divisions except Benares which shows a slight increase.

The chief variations in classification are as follows:—

	Acres.
In Agra.	
Sír	—38,415
Khudkasht, &c.	+2,457
Exproprietary	+13,175
Occupancy	—87,428
Recorded non-occupancy for 12 years or more ...	+139,479
Non-occupancy on 7 years' lease	+45,215
Non-occupancy for less than 12 years	—206,158
In Oudh.	
Sír	—2,507
Khudkasht	+4,593
Ordinary tenants	—19,546

(2) Proprietors' cultivation.

In Agra the decline in *sír* which has been in progress for some years is general as fresh rights cannot arise. The area under *khudkasht* exhibits an increase in all divisions except Allahabad which shows a decrease of 8,648 acres, the net increase being 2,457 acres. In the Allahabad division the whole of the decrease is accounted for by the districts of Hamirpur, Jhansi and Jalaun, where the total cultivated area also showed a considerable fall. Owners' cultivation is slowly increasing on the whole; but it is barely maintaining its proportion to the cultivated and holdings area.

(3) Occupancy rights.

As usual exproprietary holdings exhibit a general increase and recorded occupancy holdings a general decrease, which latter amounts to 87,428 acres for the whole province. The real loss is more than made good by the growth of unrecorded occupancy rights (holdings for over 12 years), the increase in which amounts to 139,479 acres, shared by every district except Dehra Dun and Muttra. In the latter district the deterioration which has taken place of late years tends to bring non-occupancy rents below occupancy rents, with the consequence that relinquishments and abandonments by occupancy tenants have been frequent.

(4) Long term leases.

The area held on 7 years' leases also shows an increase of 45,215 acres which is almost general, Shahjahanpur alone shows an important decrease of 6,401 acres owing to the expiry of the first leases granted. The increase under the two heads just mentioned has caused a decrease of 206,158 acres in the holdings of non-occupancy tenants for less than 12 years.

(5) Oudh tenants' holdings.

In Oudh the only marked change is the decrease of 19,546 acres in the land held by ordinary tenants, which is due to the slight falling off in cultivation already referred to.

§17.—Rental demand and collections. Statements XXXIV-A and B.

17. The total rental demand for the whole province was practically the same as in 1909-10; cash rents rose by 14⅓ lakhs of rupees, but the grain rents fell off by nearly 12 lakhs and the *siwai* income by two lakhs. The decrease in the former case was caused by low prices of grains, and in the latter by the entire failure of the mango crop.

The percentage of total collections (current and arrear) to demand fell from 89 to 88 in Agra and from 99 to 96 in Oudh. The following table shows by divisions the proportion of recorded collections to the year's demand.

	1317 *F.*	1318 *F.*
Meerut	92	89
Agra	88	84
Rohilkhand	87	88
Allahabad	89	87
Benares	85	85
Gorakhpur	94	93
Lucknow	97	95
Fyzabad	101	97
Average, United Provinces	92	90

The increase in Rohilkhand is due to better collections in Moradabad and Pilibhit. In the Benares division the percentage of recorded collections to total demand is the same as in the last year. In the remaining divisions it has slightly fallen in consequence of the injury done to cotton, *juar*, *bajra*, and wheat crops.

CHAPTER II.—FINANCIAL.

§18.—Total demand and collections.

18. The total demand from all sources of income dealt with in this report amounted to 851 $\frac{1}{5}$ lakhs, as compared with 934$\frac{1}{2}$ lakhs of the year preceding, a difference of 83 lakhs. This decrease is due to a large reduction of nearly 19$\frac{1}{2}$ lakhs in the arrear demand of land revenue, and of nearly 56 lakhs under the head of agricultural advances. After writing off nominal items the real demand was nearly 849 lakhs, and the actual collections were 840$\frac{1}{4}$ lakhs. The arrear after excluding remissions, which amounted to a little more than a lakh, was nearly 9$\frac{2}{3}$ lakhs of which the most important item is about 8 lakhs, due on account of loans. The land revenue balance, which included 1$\frac{3}{4}$ lakhs under suspension last year, has now fallen to something quite nominal.

§19.—Land Revenue. Statements I, II and III. (a) Demand.

19. Passing to the various heads in detail, land revenue accounts will be found in statements I; II and III. The gross demand for the year was Rs. 6,52,64,444 composed of the following items:—

		Rs.	
Current demand of Land Revenue on the roll	...	6,50,23,457	Statement I.
Arrears outstanding at end of 1909-10	...	2,04,969	„ II.
Additions of revenue not on the roll during the year...		36,018	„ III.
Total	...	6,52,64,444	

From this considerable reductions amounting in all to Rs. 1,98,451 must be made. These are shown as nominal items in all three statements. Of this total the revision of the assessments in alluvial mahals accounts for Rs. 42,346, reductions of demand in Bundelkhand and Kashipur for Rs. 1,687, acquisition of lands for Rs. 16,615, assignments for services, &c., for Rs. 17,411 and Rs. 1,20,392 are due to various other causes. The largeness of this last item is a consequence of the nominal decrease of Rs. 1,16,160 in the demand owing to the exclusion of the revenue of pargana Bhadohi, which now forms part of the Benares State. The real demand which might have been enforced during the year is therefore Rs. 6,50,65,993.

(b) Collections.

The total collections of land revenue were Rs. 6,50,15,987 or only half a lakh short of the full enforceable demand. This difference is accounted for by remissions of Rs. 33,411 on account of damage caused by flood, hail and fire (out of which no less than Rs. 26,394 were remitted in the one district of Moradabad on account of the floods), by suspensions sanctioned by Government amounting to Rs. 8,520 in the Cawnpore district, and Rs. 2,412 postponed by Collectors. This leaves a small remainder of only Rs. 5,663 to be accounted for in the current year. Ordinary arrears now amount to only petty sums, the largest of which, Rs. 2,027 in Muttra, is misleading, because Rs. 1,800 of this were collected on the next day after the close of the year's accounts.

(c) Famine suspensions.

With reference to paragraph 24 of last year's report it is satisfactory to note that the suspensions of revenue on the roll in Meerut and Azamgarh have now been cleared off in full, and that the anticipations with regard to the position of affairs at the close of 1910-11 have been realised.

§20.—Malikana. Statement IV.

20. The demand of malikana was practically collected in full, the Jhansi balance having been reduced by adjustments and remissions to Rs. 39 only. Although the total amount unexpended is shown as Rs. 4,330 more than at the close of last year, this is not really the case, as the large debit balance of Rs. 13,611 in Bareilly shown in last year's statement, has been written off, and the allowance to the family is now paid on a pension payment order. The unpaid balance in Allahabad has been reduced satisfactorily, but in spite of a small reduction in Gorakhpur, there is still the very large amount of Rs. 18,219 to be distributed, the explanation being, as in other districts, the failure of recipients to appear; they generally wait till the accumulated balance makes up a substantial sum.

§21.—Canal Rates. Statements V and VI.

21. There was again a remarkable fall in the demand for canal water as shown by a decrease of Rs. 8,27,392 and Rs. 21,247 in the bills for occupiers' and owners' rates respectively. This has been constant since the last drought, and good seasonable winter

rain is the cause of the decrease. The year opened with an arrear demand of Rs. 44,141 on account of occupiers' rates and a current demand of Rs. 73,27,018. The gross collections amounted to Rs. 73,15,288, but Rs. 13,300 of the balance were remitted, so that the uncollected demand carried forward to the current year is Rs. 42,571. Collections were again satisfactory on the whole. Cawnpore and Jalaun show balances of over Rs. 2,000, but in the former district the bulk of the balance has been since remitted on account of damage done by hail, and in the latter Rs. 1,893, were postponed owing to fire which destroyed the rabi outturn. In Fatehpur satisfactory explanation of the balance of Rs. 1,467 has been received. There remain Saharanpur and Muttra. The balance is slightly less in the former than at the close of 1909-10, but in the latter it has increased by over Rs. 7,000 on a demand which had fallen by more than a lakh. No explanation is offered in the case of Muttra, but the Government is well aware that the collection of canal dues in these districts is a matter of recurring difficulty owing to the default of the lambardars who, in their turn, experience difficulty in realizing the dues from the cultivators. But the money eventually comes in as the Commissioner of Meerut points out, Rs. 15,220 of the arrears outstanding in Saharanpur at the close of last year being realised during the year under report. The fact that rates on a much larger scale are realised practically in full in the Meerut and Muzaffarnagar districts proves that the system is not itself in fault, and the Board have been considering it during the year on representations made by the Muzaffarnagar zamindars' association. The demand for owners' rate including arrears was Rs. 1,45,447. Of this sum Rs. 258 were remitted, and the real balance at the end of the year was Rs. 1,012 for which on this occasion Saharanpur and Muttra are wholly responsible. It is desirable that an effort should be made to improve the realisations in these two districts which appear to be somewhat out of hand in this respect.

§22.—Local rates and cesses. Statements VII, VIII, IX and X.

22. The total demand for local rates and cesses, (including arrears), was Rs. 69,52,884. The figures show very little difference from those in last year's report, an increase of Rs. 7,727 in the 10 per cent. local rate for the temporarily settled districts of Agra being due mainly to Rs. 3,851, which were levied under section 13 of Pargana Kaswar Raja Act on the transfer of that territory from the Family Domains to the Benares district. An increase of Rs. 57,059 in the rural police rate for Oudh is explained by an error, spread over the 3 years ending September 1910, in calculating the sums due from the Balrampur estate. The discovery of this during the year showed that Rs. 46,401 were due, and this sum has been shown as arrears against the Gonda district in statement X and recovered in full. Collections were made in full in practically all districts of the Provinces.

§ 23.—State properties. Statement XI. (a) General.

23. The number of state properties was 605 at the beginning of the year; 13 new properties were acquired and 10 disposed of during the year. One estate, the Naraura grazing grounds in Bulandshahr, has been excluded during the year, as its revenue is now credited to the Canal department, while the two large estates of Khargapur and Holagarh have been leased to Messrs. Fox and Aitchison for a term of 10 years. The arrear demand from 1909-10 amounted to Rs. 23,669, which was largely reduced from the balance shown in last year's statement by necessary remissions and exclusions. Out of the large balance of Rs. 12,823 due in Kheri, no less than Rs. 5,915 were remitted. There was a slight increase of the current demand which rose from Rs. 3,34,533 to Rs. 3,36,527. The variations were not remarkable in any case. The Dudhi estate rental rose from Rs. 33,597 to Rs. 36,867, and there was a rise of Rs. 2,102 in the demand of the Allahabad estates. The increases are mostly due to normal enhancements of rent. Collections have continued to improve; Rs. 3,35,087 or 99 per cent. of the current demand and 93 per cent. of the current demand including arrears were realized. A large proportion of the districts show a clean balance sheet, and the arrears to be carried forward are much less than last year, while there will be some remissions to still further reduce the demand. Agra, Allahabad, Lucknow, Kheri, Gonda and Bahraich have outstandings of more than Rs. 1,000, but it should be pointed out that the large sum of Rs. 8,165 shown against Allahabad consists of Rs. 5,723 due from the lessees during the current year, that Rs. 2,261 have been

secured by decrees, so that only Rs. 181 remain to be dealt with in the ensuing year. There was a fall in the expenditure on establishment from Rs. 24,831 to Rs. 21,051, while that on contingencies rose slightly from Rs. 22,790 to Rs. 23,624. The outlay on improvements was Rs. 24,635, a sum slightly smaller than last year, but still 7% of the current demand. The smallness of so many of the properties makes expenditure on improvements difficult ; where they are large, as in Dudhi or Bahraich, the percentage increases. The balance accruing to Government after meeting all charges, and inclusive of credits to cesses and land revenue, amounted to Rs. 2,65,777.

(b) Dudhi.

The Dudhi estate has had a year of great prosperity. The rain was well distributed throughout the monsoon, commencing on the 3rd June, and ending on the 8th October. Both harvests showed a full crop. The new settlement which came into force in October 1909, is reported to work most smoothly. The current rental demand was Rs. 24,020 of which Rs. 23,927, or practically cent. per cent., were realised. Out of the Rs. 93 balance Rs. 81 are classed as irrecoverable. Of the arrears of last year Rs. 670 have been remitted by the Board, and there is still a balance of Rs. 300 which is mostly due from *kham* or *supurdars'* villages, and may have to be partly remitted also. The expediture on improvements is Rs. 10,622. The main items are the construction of a bridge on Dudhi-Gaharwargaon road, and of a large iron covered shed at Mundi-Semar bazar. A *rasadkhana* has been built at Khushalnagar and a new school at Kirwil. Irrigation has not been neglected, Rs. 1,893 being devoted to steel escape pipes in important bandhs and to wells. Expenditure on education increased owing to a contribution of Rs. 2,000 to the Dudhi Mission school being included under this head ; 16 schools are maintained by the estate, and during the year another upper primary school has been opened at Arjhat. The average attendance rose to 466 from 407 of the previous year. These schools, which are quite free, are doing good work in bringing rudimentary education within reach of an aboriginal population. At the close of the year the balance to the credit of Government amounted to Rs. 12,538 as compared with Rs. 9,033 in the previous year. In 1908-9 the net income was only Rs. 5,266, figures which show conclusively the success of the Collector's management and the recovery from the stress of bad times. The people are at present said to be most happy and prosperous. The Senior Member will consider the question of restricting the power of alienation in Gonda Bajia, the portion which is held by aboriginal zamindars, with the late Collector Mr. Wyndham before the close of his current tour, and the question referred to in previous reports will be disposed of shortly.

§24.—Miscellaneous Land Revenue Receipts Statement XII.

24. Statement XII is in 2 parts, corresponding to the method of crediting the items dealt with. In the first part, which gives receipts divisible between Imperial and Provincial accounts, are included fines and forfeitures of revenue courts, rent of class C. railway lands and buildings situated therein, and mutation fines, and in the second part is shown the purely provincial account of Partition fees. Mutation fees were abolished in the year 1909-10, but erroneous realizations of small amounts are reported from Ghazipur, Sitapur and Jaunpur which will be refunded and have not been shown in the accounts. Fines and forfeitures amounted to Rs. 1,905 the whole of which was collected in full; the rents of class C. lands were Rs. 15,540, showing a large increase of Rs. 14,618 over the corresponding item last year. This increase is mostly due to Rs. 14,166 which were wrongly omitted by the Collector of Etah in previous years. These rents were mostly collected in full, only Rs. 365 being in arrear, and adjustments will be made at the close of the railway half year.

The demand for fines in mutation cases amounted to Rs. 1,50,795, a reduction of Rs. 21,156 on the relatively high figure of last year. During the year Rs. 1,34,224 were collected, leaving a balance of Rs. 16,571 or nearly 11 per cent. of the demand, as against only 8 per cent. last year. Only 16 districts show full collections under this head, and arrears of over Rs. 1.000 are found in Bulandshahr, Mirzapur, Ballia, Gorakhpur and Basti. With reference to the demand, the arrears are 20 per cent. or upwards in Agra, Allahabad, Benares, Mirzapur, Ballia and Gorakhpur. In Mirzapur efforts are being made to realise as quickly as possible, while in Gorakhpur Rs. 1,076 have been remitted as shown in

column 5 of the statement. No explanation has come from Basti, but apparently some of the balance is irrecoverable, and has been shown in column 6. There is a general tendency to collect these petty items as opportunity offers, and a small balance is inevitable in cases which come in during the last month of the year, but the Board do not view with satisfaction the growth of arrears under this head. The demand of partition fees including arrears was Rs. 2,70,057 out of which Rs. 2,41,161 were collected, leaving a balance of Rs. 28,896, of which Rs. 1,148 are nominal or irrecoverable. Large balances of partition fees, as in Ballia, represent the second half of the estimated fees, which is adjusted when cases are complete.

§ 25.—Sale of waste lands, &c. Statement XIII.

25. In the year under report there have been no new sales, but the last instalment of Rs. 10, due on account of land sold in 1903-4 in village Tamaura, Banda district, has been paid, and the sale price of Rs. 80 realised in full.

§§ 26–29.—Agricultural advances. Statements XIV and XV.

26. The advances made under taqavi during the year were Rs. 17,70,886 as compared with a little more than 12 lakhs of the preceding year. There was a decrease of about a lakh in the loans under Act XIX of 1883 for improvements, but those under Act XII of 1884 were more than doubled. The general tendency for these loans to fall, which has been noticed since good seasons began, has therefore received a temporary check, for which the exceptional floods in parts of the Rohilkhand division in October 1910, and the prolonged drought over the bulk of the provinces during July and August of 1911 are responsible. These occurrences created a large demand for money to purchase seed, bullocks and fodder, particularly in the Rohilkhand, Agra, Allahabad and parts of the two Oudh divisions, and this was promptly provided by an extra grant of 35 lakhs from the Government. Actual expenditure however proved to be much less than was at first anticipated, owing to the providential improvement of the situation which was developed by the end of August. The greatest demand for seed taqavi came from the Rohilkhand division, where 1·33 lakhs were expended in Moradabad, and Rs. 69,623 in Bareilly. These districts felt the brunt during the year under report of the two calamities above referred to, in fact more than half the total amount advanced for seed in the whole provinces was absorbed by the Rohilkhand division. Next to Rohilkhand came Gorakhpur division with Rs. 39,110 in the Gorakhpur and Rs. 31,504 in the Basti district, sums which were needed to enable tenants to sow rabi in the flooded tracts. The demand for assistance in the purchase of cattle was unusually brisk, the figures in Unao, Rs. 94,555, in Banda, Rs. 92,247, in Lucknow, Rs. 76,756 and in Mainpuri, Rs. 68,528, being worthy of note. Here again money was liberally allotted when it was seen that the cattle were in danger from the prolonged drought, and no less than Rs. 1,35,287 were advanced for fodder, almost entirely in the Agra division. The demand under these two last named heads would not have been so great, nor would it have been so generously complied with, if the sudden improvement in prospects could have been foreseen. It is interesting to note that advances taken under Act XII for machinery connected with agriculture continue to increase in popularity. Special interest was displayed in the sugar industry; in the Gorakhpur district Rs. 20,000 were taken for the purchase of the English sugar factory plant belonging to Messrs. Blair, Campbell and Mclean at the Allahabad Exhibition, in Agra and Hamirpur smaller sums were advanced for factory and ordinary pressing machinery, and Rs. 5,000 were advanced in Gonda for sugarcane. In Shahjahanpur Rs. 600 were advanced to a Muhammadan zamindar for castor oil seed, with a view to the culture of silk-worms. From Basti the purchase of 23 chain pumps is reported, and generally it may be seen that the agricultural court at the Provincial Exhibition was not without effect, though its results could only be very partially reflected in taqavi accounts.

Turning to improvements, it was inevitable for the reasons given in paragraph 8 above that there should be a fall in the demand for masonry wells. Only 2,019 are reported to have been completed during the year and 1,859 to be under construction, as compared with 6,000 and 2,600 respectively of the preceding year. The largest demand was from the Benares division, as is usual, but among districts Partabgarh and Unao took most with Rs. 32,815 and Rs. 32,277 respectively. Excluding Kumaun, Rohilkhand shows the smallest demand for Act XIX loans, the small sum of Rs. 8,893 only being distributed. The Commissioner reports that there is no general demand for irrigation from masonry wells in the division except perhaps

in Budaun ; but it is a noticeable fact that in 1907-8, when district officers took pains to push the matter, nearly 2½ lakhs were absorbed by Budaun for 1,570 wells and in the opinion of the Board there is probably scope for similar expansion in at least part of the other districts of the division.

27. The year opened with outstanding balances of principal amounting to 63·49 lakhs under Act XIX of 1883 and of 24·33 under Act XII of 1884. The new advances made during the year, including sums drawn from the Treasury but not advanced, raised the total to be accounted for to 68 lakhs and 38·18 lakhs respectively.

The important items of the account for land improvement loans (statement XIV) may be summarised as follows :—

(1) Net demand of instalments due, including interest, (column 9)	13·17	lakhs.
(2) Actual collections out of (1), (column 10) ...	11·68	„
(3) Balance of (1) overdue	1·49	„
(4) Surplus or advance collections, (column 12) ...	·87	„
(5) Total receipts [item (2) and item (4)], (column 13)...	12·55	„

Of this sum 7·42 lakhs were credited to principal and 5·13 lakhs to interest. Including Rs. 7,239 remitted and Rs. 14,283 refunded into the treasury as undisbursed allotments, the total reduction of principal was 7·63 lakhs, leaving a total outstanding of 60·37 lakhs at the close of the year.

Summarising similarly statement XV for loans under Act XII we have—

(1) Net demand of principal due, (column 9)... ...	24·16	lakhs.
(2) Actual collections out of (1). (column 10) ...	18·39	„
(3) Balance of (1) overdue	5·77	„
(4) Surplus or advance collections	·44	„
(5) Total receipts including remissions Rs. 46,344, refunds of undisbursed allotments, Rs. 29,756 [item (2) and item (4)]	19·58	„
(6) Balance outstanding at the close of the year ...	18 61	„

The credits made to interest during the year amounted to 7·03 lakhs under both Acts.

28. The collections of the net demand under Act XIX were 88 per cent. or 5 per cent. less than the corresponding collections of the previous year. The districts showing the largest uncollected balances are Muttra, Agra, Budaun, Bulandshahr and Sultanpur. The explanation given by the Collector of Muttra is that the resources of the people in Mat and Muttra tahsils are poor owing to several bad years, and the inadequate rainfall of the early part of the monsoon did not improve matters. In Bulandshahr also it was considered undesirable to press for the recovery of the demand in full owing to the unsatisfactory outlook in the second half of the year. In Agra, where the balance has gone up considerably, no explanation is given ; in Budaun the Gunnaur tahsil, which has suffered from a series of calamities for several years past, is mainly responsible for deficient collections, while in Sultanpur the real reason is acknowledged to be that the collection of taqavi took second place, partly owing to the inattention paid by tahsildars to a large number of accounts, and partly to the fact that large arrears of revenue required attention towards the close of the year. Generally, the deficient rainfall, at a time when exertions would ordinarily be made by the collecting staff, must be taken as sufficient explanation why there is not a greater improvement in the reduction of balances. The Board notice that in many districts the surplus collections are very large, as for instance in Muzaffarnagar, Farrukhabad, Bara Banki, Hardoi, Basti, and considerably exceed the overdue balance. In Farrukhabad money was refunded for breach of the conditions of the loan agreement, and in Hardoi there were also voluntary excess payments. Other districts gave no explanation. It may be surmised that large surplus collections are generally accounted for on the above grounds, but it is also possible, as pointed out by the Commissioner of Gorakhpur, that there is some confusion in the accounts, and the Board desire that such figures should invariably be explained in future.

The balance overdue from Act XII advances is heavy in Kheri, Sitapur, Muttra, Agra, Moradabad, Mirzapur and Budaun. Generally the districts with large balances at the end of 1909-10 have somewhat reduced them, but Kheri Moradabad and Budaun are exceptions. In Kheri only 49 per cent. of the net demand was collected, though the Commissioner writes that collection was pushed as far as it safely could be. It is explained that both the kharif and rabi crops

in this district were unsatisfactory. The Board accept these explanations, but desire that constant attention should be given to these accounts in order to prevent the increase of the debt. It hampers the administration, and is a burden to the people. In Moradabad the arrears have increased owing to the floods, and the same explanation is given for deficient collections in Sitapur. The same reason is offered in Budaun as was given above for the poor collections, under Act XIX, and generally it may be acknowledged that collections were retarded by the anxious period when the rain held off in July and August. On the other hand, in Partabgarh, Hardoi, Rae Bareli, Banda, Hamirpur, Jhansi, Bareilly, Gonda, Fyzabad, Lucknow, Gorakhpur, Garhwal, Almora, Azamgarh, and Basti, large demands under Act XII were collected either in full or practically in full, and in these districts the circumstances of the season did not widely differ from those in neighbouring districts which have large balances. The Board would enjoin the personal attention of the district staff to this important matter. Good realizations under Act XIX were found in Etah, Hamirpur, Rae Bareli and Partabgarh, and it is significant that the same districts showed good results under both Acts. It is satisfactory to find that the balance has been decreased in Bahraich which was in a similar condition to Kheri last year. It is now hoped with remissions to clear the account, except in the Nanpara tahsil. The large sum of Rs. 40,737, shown as surplus collections was paid in, on account of the suspended demand due, in October 1911.

29. The collection of amounts outstanding from advances for aided works made during the last famine, continues to be steady and satisfactory. The total sum outstanding on the 1st October 1910 was Rs. 6,18,698,* including the new item of Rs. 530, the recoverable cost of sluices built by the Irrigation department in Hamirpur during 1907-8. The net demand during the year was Rs. 1,70,872, of which Rs. 1,60,813 or 94 per cent. were collected. Surplus collections amounted to Rs. 4,620, and the total available for payment of principal and interest was Rs. 1,65,433, of which Rs. 1,20,785 were credited to principal, and Rs. 44,648 to interest, and the debt at the close of the year was thus reduced to Rs. 4,96,409.

§ 30—Loans under the Bundelkhand Encumbered Estates Act. Statement XV-A.

30. The year opened with an outstanding debt under the Bundelkhand Encumbered Estates Act of Rs. 20,95,700. The amount of the closing balance reported last year was Rs. 5,056 less than this, but the difference is explained by various corrections and adjustments of accounts which are necessary. The total amount due on loans advanced to the proprietors under section 21 (*a*) of the Act was Rs. 14,35,430 (column 7, item 12 of the statement) and the demand for the year in equated instalments of principal and interest was Rs. 2,10,152 [item (2)]. In Jalaun Rs. 11,759 were suspended, leaving a net demand of Rs. 2,04,440, out of which Rs. 2,03,597, including Rs. 4,662 on account of surplus, were collected. There were full collections in Allahabad. The balance in Jalaun is due from estates under direct management; the arrears in Jhansi are due from estates in the Mau and Garotha tahsils, several of which have been attached, but the profits have proved insufficient to clear off the amount due; in Hamirpur the whole arrear is due from 12 estates which have been attached, and in Banda the amount is trivial. It is satisfactory to note that the surplus collections of Rs. 2,250 in Hamirpur represent sums voluntarily paid in by debtors to clear off the balance of the loans and their properties were consequently released. Of the total collections, Rs. 1,37,967, were credited to principal and the balance to interest, so that the amount of principal still due at the end of the year was reduced to Rs. 12,97,463.

The second part of the statement gives details of the accounts of estates managed under section 21 (*c*) by the Collectors. The net rental demand for the year was Rs. 1,57,355; total collections including surplus amounted to Rs. 1,52,517, and there was a balance in hand of Rs. 2,165 from the previous year, so that Rs. 1,54,682 were available for reduction of the debt and expenses of management.

The Government revenue and cost of management absorbed Rs. 75,737, and Rs. 3,550 remained in deposit at the credit of the estates; out of the remainder Rs. 36,488 were paid towards reduction of the principal, and Rs. 38,907 were the interest charges. The principal outstanding at the close of the year was thus reduced to Rs. 6,19,554. The net result of the year's transactions was to reduce the outstanding balance against both heads of the account to Rs. 19,17,017.

* The difference of Rs. 129 between this and the figure given in last year's report is due to subsequent adjustments.

With respect to the conversion of loans referred to in paragraph 37 of last year's report, it has not seemed advisable to raise the point of law. Hitherto no complaint has been made, and it is extremely convenient to temporarily transfer a property from section 21 (*a*) to 21 (*c*), because it enables the Collector to secure a continuity of management by acting under section 153 of the Land Revenue Act, instead of under section 150. Recourse is only had to such transfers when the proprietors are continually in arrears, and it is a matter of constant attachment and release. The estate benefits when it is taken out of the hands of the proprietors temporarily, and the management no longer alternates between the Collector and the proprietor. In the same way transfers from 21 (*c*) to 21 (*a*) have only been made with the consent of the proprietors, and when they have proved equal to the management of their own estates and desire it there are manifest advantages. The Board have therefore not thought it necessary to raise the question in either case.

§ 31—Coercive Processes Statement XVI. (a) General.

31. The total number of processes used in the recovery of land and other revenue was 195,581, a decrease of 20,967 on the figures of the preceding year. This is a natural result in a year when reports show that collections were uniformly easy. The arrears for which processes were issued were 17 lakhs less than the sum concerned in 1909-10.

In accordance with the tendency which has been noticed and explained in former reports, there was a large drop in the number of writs of demand, and a rise in citations to appear. In all the severer processes there was a fall, or would have been if the statistics had not contained the unusual phenomenon of 86 attachments, and 4 out of the 5 sales of immoveable property in Garhwal. These figures will be subsequently explained. This year's returns indicate that the powers conferred by the Revenue Act are intelligently used and that, given normal conditions, any large variation under any particular kind of process is not now likely to occur. The large drop of 6,248 in the cases of attachment of moveable property, and of 205 in cases which ended in sale, are a clear indication that there was less friction and difficulty than in the preceding year. It is interesting to note that though warrants of arrest fell by 2,893, the percentage, (13), of cases in which persons were actually detained was the same in the two years.

(b) Land Revenue and Cesses.

Turning now to detailed heads of account, the following table contrasts the number of processes issued during the last two years for the recovery of arrears under land revenue and cesses.

Writs of demand.		Citations to appear.		Warrants of arrest.		Attachments of moveable property.		Attachments of immoveable property.		Transfers.	
1909-10.	1910-11.	1909-10.	1910-11.	1909-10.	1910-11.	1909-10.	1910-11.	1909-10.	1910-11.	1909-10.	1910-11.
4,322	3,042	76,545	83,064	9,909	8,253	5,890	5,078	157	157	28	1

There is a rise only in the citations to appear which calls for little comment. It is the result of enforcing the rule that this process must be issued separately against each defaulter personally. No less than 26,362 of these citations, or nearly $\frac{1}{3}$ of the entire number for the provinces are returned from the Gorakhpur division where the number of shareholders in mahals paying individually small sum is very large. It was particularly in the east of the provinces that citations by groups were most common, and protests were made for the continuation of the old system, but as tahsildars begin to pay more detailed attention to the issue of the three lighter processes and learn to justify their procedure, difficulties will tend to vanish.

(c) Other demands.

Out of the total number of writs of demand (51,621) no less than 45,917 were issued for the recovery of mutation fines. These are issued free of cost, and are a regular part of the mutation procedure under the Board's circulars. The tahsildar invariably sends an intimation of the amount of fine by post to the person in whose favour mutation of names has been ordered when he is not present in court. These intimations are therefore scarcely to be considered as coercive processes. Moreover, they have little effect, as no less than 8,902 attachments of moveable property were subsequently made for mutation fines, and 649 warrants of arrest were issued, 19 persons being actually detained. Considering the small sums involved, this head of account gives

a disproportionate amount of trouble. Those who are fined are naturally reluctant to pay and the administration grudges the trouble involved in realisation. Mr. Pike notes that in the Gorakhpur division, 72 lakhs of revenue were collected by 29,000 processes, while it took nearly 14,000 to collect mutation fines of Rs. 29,800.

In the case of taqavi the usual process adopted is a citation to appear, and no less than 10,965 were issued. There were 981 warrants of arrest resulting in the detention of 169 persons, 4,682 attachments of moveable, and 157 of immoveable property, resulting in 499 and 5 sales respectively. Generally taqavi was realised without much pressure through the agency of special naib tahsildars where circumstances demanded it, but in Garhwal the people seem to have required a lesson, as 411 attachments of moveable and 86 of immoveable property took place in this district only. It is rare to meet with such figures in a Kumaun district, but vigorous action was necessary to clear off a very large number of petty taqavi accounts, which had been postponed till the people thought that by delay they might possibly escape altogether.

§ 32.—Estates under direct management.

32. The number of estates under direct management on the 1st October 1910 was 217. During the year 367 came under attachment, making a total of 584 estates under management at some time during the year, as compared with 590 in 1909-10. The number of estates released in the year was 334, leaving a total of 250 at its close. The statistics differ very little from those of last year; actually 41 less were newly attached, but 33 more remained under management at the end of the year. As usual the bulk of the attachments (196) were for arrears of land revenue, either direct from defaulters (187) or at the instance of lambardars (9), and there were also 52 cases for arrears of under-proprietary rent in Oudh The largest number is reported from Sultanpur (81), while Aligarh and Jhansi show 21 cases each and Moradabad 16. The high figures in Sultanpur are due to the inclusion of 37 attachments under section 185 for under-proprietary rent at the instance of superior proprietors. In last year's report these items were not noticed in detail.

The attachments on account of failure to appoint a lambardar were 113 in number, the only important figures being 22 from Bulandshahr, 21 from Aligarh, 16 from Jhansi and 14 from Cawnpore. These attachments are not common and 34 districts show a blank return. It has been suggested that it is futile to attach a mahal for failure to appoint a lambardar, because if the revenue is paid no harm is done, while if it is not paid, attachment can be made in ordinary course. In this view the Board do not concur; it would be highly inexpedient to voluntarily weaken the lambardari system by taking away the Collector's power to enforce nominations.

No action was taken under section 153 of the Land Revenue Act. The total demand was Rs. 2,08,593 out of which Rs. 1,52,365 were collected, or 73 per cent. This was just a shade better than last year's percentage of 72·7 per cent. but it is scarcely satisfactory. In Budaun only 28 per cent. of the demand was collected, and in Sultanpur there was again a very large balance of Rs. 22,725 or 24 per cent. of the demand. A sum of Rs. 97,753 was credited to land revenue and cesses, and of Rs. 2,538 to principal and interest due on taqavi loans, and the cost of management absorbed Rs. 14,497, or less than 7 per cent. of the total rent demand.

§ 33.—Alterations in the land revenue demand
Statement XVII.

33. The land revenue borne on the roll on the 1st October 1910 was Rs. 6,50,23,457, and in the course of the year there was a net decrease of Rs. 1,23,456. There were actual increases of Rs. 92,442 in various districts, out of which Rs. 43,292 were due to the imposition of the progressive enhancements ordered at settlement, Rs. 5,611 to the introduction of new assessments in the Banda district, and the remainder to the revision of assessment due to alluvion. It may be noted that there were no quinquennial revisions in Bundelkhand owing to the census. The reason for an actual net decrease is the exclusion of Rs. 1,72,320, the revenue demand of pargana Bhadohi in Mirzapur, which now forms part of the Benares State; this large sum when added to the ordinary reductions of Rs. 43,578, which were due to diluvion, acquisition of land for public purposes and to a small reduction of Rs. 94 from the Banda settlement, brought the total reductions up to Rs. 2,15,898, and the revenue on the roll stood at Rs. 6,49,00,001 at the close of the year.

CHAPTER III.—LITIGATION UNDER THE TENANCY LAWS.

§ 34.—Agra litigation. Statements XX-A and XXI-A. (i) General.

34. The total volume of litigation in the province of Agra under Act II of 1901 was 336,891 suits and applications of all kinds, as against 340,838 of 1909-10. The former figure includes 692 cases from the Kashipur pargana in Kumaun, to which the Act was extended from 1st October 1910. These should be excluded for comparison, and also 9,615 ejectment and enhancement cases, which really belong to the previous year, but were filed in October 1910, because the 30th September was a holiday. It is however, necessary to add 10,329 enhancement and ejectment cases filed on the first court day in October 1911, as really belonging to 1910-11, the 30th September having again been a holiday. The net decrease in litigation is therefore 13,540 suits and applications, which denotes a further step towards the normal figure after the disturbances of recent years.

(ii) Suits for arrears of rent.

There was a trifling increase of 371 institutions of suits for arrears of rent over the figures of 1909-10; eighteen districts show increases and fifteen show decreases, and the largest numbers are found in Meerut (—1,052), Jaunpur (—928), Moradabad (+1,019), Farrukhabad (+727), Ghazipur (+741). These variations which, after all, are not very marked neither justify nor require any general conclusions. In Moradabad the increase is explained as due partly to the desire of landlords to eject occupancy tenants whose rents were commuted to cash at the recent settlement, while the decrease in Meerut indicates a return to normal figures after the large number of suits filed for rent which was suspended in 1907-8. In Farrukhabad the increase was mainly due to suits filed by the Tirwa estate under the Court of Wards.

(iii) Ejectment for arrears.

The statistics of applications for ejectment after a decree for arrears of rent (section 59) vary little from those of the preceding year. The total number for disposal (45,346) fell by 3,420 or 7 per cent., but the number in which ejectment was ordered (9,933) increased by 102. In nearly three-fourths of the cases therefore the arrears were presumably paid. The actual area affected was 49,674 acres or 5,359 acres less than in 1909-10. Out of this rather less than one-ninth belonged to tenants-at-will, and there was a total decrease of 5,422 acres in the area from which the ejectment of occupancy tenants was ordered.

(iv) Distraint.

It is satisfactory to record a fall of 570 in suits arising out of proceedings in distraint. In the preceding year Moradabad (353) and Mainpuri (309) were noticeably high, and in this year Mainpuri heads the list with 270. Moradabad figures have gone down to 112.

(v) Suits for arrears of revenue and profits.

There has been a small decrease of 46 in the number of suits for arrears of revenue and profits as compared with the previous year. The district statistics call for no comment.

(vi) Resumptions.

There is a further decline of 45 in the number of suits for the resumption of rent-free grants. The figures are fortuitous and unimportant.

(vii) Enhancement of rent.

The number of suits filed for enhancement of rent during the year, taking only those which really belong to the years in question as explained at the beginning of the paragraph, was 6,347 to be compared with 7,256 of the preceding year. There was thus a decrease of 909 following on a decrease of 711 in 1909-10. A decline in enhancement cases was to be expected owing to the uncertainty of future prospects during the last monsoon. The work under this head continued to increase remarkably, however, in Benares, which alone of all the divisions shows an increase. In the Benares district 442 cases more than last year were filed. This was anticipated as the result of the test cases filed by the Maharaja, to which reference was made in the last year's report. It was found necessary to put on a special officer for this work which offers exceptional difficulties in a permanently settled district. On the other hand there was an equally remarkable fall of 769 in the institutions in the Agra division, 545 of which belong to the Mainpuri district. No explanation is given for this decline, though the Collector of Mainpuri suggests that litigants hesitate to file suits because of the delay that results, the district being understaffed! This explanation is not endorsed by the Board.

(viii) Surrenders.

Applications for the service of notice of surrender on landlords have fallen from 14,979 in 1909-10 to 13,608 in the year under report. These appear to remain much the same from year to year, the numbers in 1908-9 being 14,163, but there are large variations among districts, the returns from Cawnpore (2,047), Moradabad (1,528), Muttra 1,143) and Allahabad (1,037) being noticeable as comparatively very high. Seeing however that figures vary much from district to district, Meerut having only 40 such cases while Aligarh has 763, no general inferences are warranted, though it is suggested by the Collector of Cawnpore that a rise in notices of relinquishment is brought about by zamindars who find it easier to secure the ejectment of a tenant who will not fight by this means than by formal ejectment proceedings. It is not possible to say definitely that this is the case, but, if so, it is a desirable alternative to an ejectment suit.

(ix) Ejectment on other grounds than decree for arrears.

The total number of suits for ejectment was 92,085, as compared with 98,893 of the previous year. There was thus a fall of 6,808, following on a similar fall of 7,076 recorded in last year's report. The decrease has been more or less general, only the two eastern divisions of Benares and Gorakhpur showing increases of 889 and 2,358, respectively. The Gorakhpur district has an increase of 2,004, and with the exception of 1909-10 when there was a small decrease of 7 per cent. on the preceding year's figures, it has shown a continuous increase since 1905-6. The probability is that this will continue until the new settlement. The land in these eastern districts has largely gone up in value, and the recorded rents are notoriously less than what is actually paid. Pressure is brought to bear on proprietors and tenants alike to attest rents, and to bring correct figures into the khatauni. A certain proportion of the ejectment suits are no doubt due to quarrels which arise in attestation, but it may be considered certain that the great bulk of the cases are intended to prevent accrual of occupancy rights or to enforce enhancements. The only other district which shows a fairly large increase is Bareilly with 384, for which indifferent crops are held by the district officer to be responsible. The decreases in other divisions are Rohilkhand 3,539, Meerut 2,547, Allahabad 2,266 and Agra 1,703. The explanation most generally given for a decrease is that the agricultural position in June and July was too serious to give leisure for litigation. This is probably correct. The district showing the largest decrease is Budaun (2,503), and it is interesting to find the Collector writing that this indicates good relations between the landlord and tenant. He states that zamindars are showing greater leniency, and that most of the cases filed in court were disposed of without contest. Generally, whatever be the true causes, if any can be stated for the province as a whole, it is satisfactory that there should be a decline in these cases, troublesome alike to the courts and the community.

(x) Area affected by ejectment suits.

Corresponding to the large decrease in the number of suits the total area from which ejectment was actually ordered during the year was only 219,967 acres, or a decrease of 5 per cent. on the figures of 1909-10. The area from which tenants were actually ejected was 185,728 acres, or a decrease of 2 per cent.

§ 35.—Protection afforded by the Agra Tenancy Act.

35. The gross area protected from arbitrary ejectment by the growth of occupancy rights, or the grant of long term leases of seven years or more, continued to rise. It is now 14,019,468 acres as compared with 13,923,288 of 1909-10. Since 1902-3 the percentage of the protected area to the total held in the province by all ordinary tenants has gone up from 64 to 68, a small but satisfactory testimony to the efficacy of existing agrarian legislation.

§ 36.—Litigation in Oudh. Statements XX-B and XXI-B.

36. There was a marked falling off in the litigation under the Oudh Rent Act, the total number of suits and applications being 93,921 as compared with 101,304 in the preceding year. It may be remarked that, in accordance with a suggestion received last year from the Deputy Commissioner of Rae Bareli, Statement XXB has been revised so as to show the cases instituted by landlords and tenants separately so far as this is possible. There was a decrease of 2,462 in arrears of rent cases, which is explained as due to a cause of general operation—fewer arrears and more prompt payments in consequence of continued good seasons. Where there were small increases, as in Sitapur and Gonda, they are explained as due to the action of individual estates.

The total number of notices issued under section 55 was 26,227 against 27,685 in 1909-10, showing a decrease of 1,458. This decrease was general throughout the two divisions, only Bara Banki (+879), Gonda (+49) and Hardoi (+58) returning an increase. In Bara Banki the explanation given is that owing to the great improvement in the value of land as a result of masonry wells adequate rent cannot be obtained by legal enhancements and consequently landlords resort to ejectments. The Board agree with the Commissioner that this is not convincing as, even if such a feeling exists it has not grown up in a single year. There was a noticeable increase of relinquishments from 115 to 831 in Unao, which has been explained as due to the fall in prices which caused tenants to give up their poorer lands. Generally, the decrease in important litigation may be taken as a sign of improved agricultural conditions, but it must be remembered that in Oudh the returns often depend on causes which originate among particular large properties, and should be studied in detail. Wide inferences may be misleading.

§ 37.—Litigation in Kumaun. Statement XX-C.

37. The total number of suits and applications connected with rent and revenue under the Kumaun Rules was only 446 for the year under report. In the previous year 712 had been returned; but the decrease has not been so large as would appear, because a large number of cases from the Kashipur pargana were filed last year under the Kumaun Rules which should have come under Act II of 1901. Happily the statistics of the Kumaun division need little comment.

§ 38.—Work in courts of original jurisdiction. Statements XX-D, XXI-A and XXI-B.

38. The year opened with a pending file of 102,064 suits and applications under the tenancy law in the province of Agra and of 1,791 in the province of Oudh. Preceding statistics have shown that there was a general falling off in litigation and after the institutions of the year there was a total file for disposal in Agra of 438,955 as against 458,496 of 1909-10, and in Oudh of 95,712 as against 102,634. The numbers undisposed of at the close of the year were *86,981 in Agra and *1,539 in Oudh. The large balance in Agra, however, contains 74,665 suits for ejectment or enhancement of rent, which, being filed in the last three months of the revenue year, could not be disposed of within it; the balance of other cases was thus 12,316, showing a decrease of over 1,000 following on a similar decrease in pending files reported last year. In Agra the districts with a noticeably large pending file are Budaun (929), Benares (718), Cawnpore (634), Jaunpur (532), Bareilly (518) and Gorakhpur (508). In Budaun these large arrears are explained by one sub-divisional officer being occupied in criminal work and by the bad health of an Honorary Assistant Collector. The Board trust that the Collector will take steps to improve this state of things. The explanation in the case of Benares is that the district has been understaffed and that pargana Kaswar Raja has been added. In Gorakhpur a very large number of arrears of rent cases were filed just at the close of the year. No explanation is received from Cawnpore and Bareilly, and in Jaunpur the reduction of the staff by one sub-divisional officer is mentioned by the Collector. The pending files in Oudh call for no remarks. The total number of cases of all kinds pending for more than three months in Agra was 1,322 as against 1,079 of last year, and in Oudh 221 as against 349. Long pending suits have thus increased in Agra and decreased in Oudh. The numbers of such suits in Budaun (587) and Benares (150) are noticeably high, and account entirely for the increase. It may be noted as satisfactory to find that the large district of Gorakhpur with a troublesome file has only seven cases pending for more than three months.

§ 39.—Execution of decrees. Statement XXX-C.

39. With 15,553 cases pending from the previous year the total number of applications for execution of decrees for disposal was 150,385. Of these 134,685 were disposed of, the total amount involved in them being Rs. 54·06 lakhs. The total amount actually recovered was Rs. 26·56 lakhs. The number of applications still pending at the close of the year was 15,700 involving a recovery of rather more than Rs. 15½ lakhs. In three districts, Muzaffarnagar, Aligarh and Fyzabad, cases have been pending since 1908. In Muzaffarnagar ancestral property was involved, and the decree-holder died, so that heirs had to be nominated. In Aligarh the case had to be referred to the Board, and in Fyzabad, after a reference to the Government, arrangements are being made to realise the decretal money by a lease. This subject has

* These figures exclude applications for ejectment, the balance of which is not returned.

received adequate attention this year from district officers and Commissioners in their reports, but that there is much room for improvement in execution proceedings which, to quote from the Bijnor report, "have in many courts been so long treated as a matter of routine, that personal interest in results is seldom taken". No explanation of the large pending file of 1,182 in Budaun was received. Generally there was a considerable drop of 2,467 in the applications filed, which indicates that owing to crops above the average tenants were able to pay up the arrears decreed against them.

§ 40.—Appeals to Collectors. Statement XXII.

40. Including appeals pending from the previous year the total for disposal by Collectors was 5,619, or 238 less than in the previous year. All but 570 were disposed of during the year, leaving a slightly higher balance at the end than at the beginning. Appeals were filed in 5,082 only out of 127,572 appealable cases decided, giving the very small percentage of less than four. Of the total number of appeals decided 65 per cent. were entirely unsuccessful as compared with 62 per cent. of the previous year. The heaviest appeal files were Moradabad (362), Budaun (327), Ghazipur (254), Ballia (247) and Gorakhpur (217). In Oudh the heaviest work was in Sultanpur (189), but generally the appellate rent work in Oudh is very light. Only 11 appeals were pending for over three months at the close of the year, four of which belonged to the Jaunpur district. This branch of the judicial work has been thoroughly satisfactory during the year.

§ 41.—Appeals to District Judges. Statement XXIII.

41. The number of cases appealable to District Judges from the original decrees of Collectors and Assistant Collectors of the first class decided within the year was 13,977. The number of appeals actually filed was 1,613 or 11 per cent. against 17 per cent. reported last year, and out of those disposed of 634, or 42 per cent. succeeded wholly or partially. Including the file pending from last year the Judges had 2,061 cases for disposal, and 557 remained pending at the close of the year as compared with 453 at the end of 1909-10.

§ 42.—Appeals to Commissioners. Statement XXIV.

42. The number of cases appealable to Commissioners decided by subordinate courts during the year was 75,898, a number which exceeded by no less than 29,290 the corresponding figure of last year. This very large increase is due to the inclusion of ex-parte decrees as appealable cases. The number of appeals actually filed before Commissioners was, however, only 6,786 or 526 less than during 1909-10, so that only about 9 per cent. of the decisions were taken to a higher court. This is an entirely satisfactory result. The total number of appeals for disposal, including 1,770 pending on the 1st October 1910, was 8,556, out of which 7,118 were decided, leaving at the close of the year a pending file of 1,286, an improvement of nearly 500 on the figures of last year. The number of new appeals was very large in Rohilkhand (1,283), and in the Gorakhpur division (1,265), the Meerut division coming third with 926. Appellate work differs greatly in various divisions, as will appear from the fact that in Allahabad only 489 new appeals were filed, and that no other division in the Agra province, except those mentioned above, had as many as 800 new appeals during the year. The two Oudh divisions also differ, Fyzabad showing 848 against only 459 new appeals in Lucknow. As the total of the cases disposed of indicated, the pending files show a great improvement on the preceding year—Gorakhpur having only 289 as against 529, and Rohilkhand 405 against 571. In Meerut, however, the pending arrears increased slightly from 185 to 227. The explanation is that there were three changes in Commissioners during the year, and that Council and Committee Meetings claimed much of their time, especially during the cold weather, but the removal of the district of Aligarh to the Agra division will give much needed relief. The most satisfactory feature of the schedule is a large reduction of the cases pending for three months or over from 599 to 247, Rohilkhand being responsible for a reduction from 246 on the 30th September 1910 to only 77 on the 30th September 1911. The Commissioner of Rohilkhand justly points out that it has only been by devoting a disproportionate amount of labour to cases that his file has been so greatly reduced. He has in fact decided 1,449 cases instead of the 1,000 or 1,100, which is regarded as the maximum possible without detriment to other duties. Considering, however, the very great improvement shown in this year's returns, the Board do not think it necessary at present to advocate any special measures to relieve the congestion.

The Commissioner of Meerut transferred 26 cases to the Collector of Bulandshahr for disposal, and the Commissioner of Benares no less than 126 to the various Collectors of his division. The Board note that this procedure in Benares was not altogether suitable, as in some cases the Collectors were junior and lacked the necessary experience that would fit them to deal with important appellate work. There was some justification for the transfers in this year, owing to the absorption of the Commissioner's time in the affairs of the newly formed Benares State. The disposal of this work by Collectors was prompt: only three cases remained pending at the close of the year.

The percentage of appeals decided by Commissioners and Collectors which entirely failed was nearly 67 per cent., a result rather worse than was recorded last year when the percentage was 70. Only in Allahabad (80 per cent.), and in Kumaun (81 per cent.) was the general percentage much exceeded. Commissioners generally comment unfavourably on the work of the subordinate courts though they give weight to the general condition of pressure and overwork. In both Lucknow and Fyzabad the markedly inferior work of certain Deputy Collectors is commented on; but the situation is well summed up by the Commissioner of Lucknow who writes: "The chief fault, and a very general one, is failure to settle beforehand what the court is going to try. Parties are not questioned about their pleadings, issues are framed as widely and vaguely as possible, and preliminary points and questions of law are not settled before taking evidence. Courts waste much of their own time by such defects." The Board have already recommended to the Government that a course of Civil Law should be prescribed in the departmental examination, and this would go far to improve the general standard of the revenue judiciary.

§ 43.—Appeals to the Board.

43. Appeals are preferred to the Board from decisions under the Agra Tenancy Act, the Oudh Rent Act, and the Kumaun Rules, and applications for revision are received under the former Act. During the year 881 appeals were filed, an increase of 69 on the figures of 1909-10. There were 339 pending for disposal on October 1st 1910, and 827 were disposed of, leaving 393 pending on the 30th September 1911. The orders of the lower courts were disturbed in 152 cases, being about 18 per cent. of the total number decided. The total number of applications for revision under Act II of 1901, including those pending from the previous year, was 863, of which 742 were disposed of, leaving 121 pending. The applications were successful in only 66 cases.

§ 44.—Honorary Assistant Collectors.

44. New appointments of two retired Deputy Collectors, as Honorary Assistant Collectors of the 1st class, one in the Meerut and the other in the Budaun district, were made during the year. One resigned in the Muzaffarnagar district. The numbers therefore now are 26, of whom 17 are retired Deputy Collectors. They are employed as last year in the districts of Saharanpur, Muzaffarnagar, Meerut, Bulandshahr, Agra, Farrukhabad, Mainpuri, Etawah, Etah, Bareilly, Bijnor, Budaun, Moradabad, Benares, Gorakhpur and Azamgarh. The Commissioners generally report that they have rendered useful assistance during the year. In some cases detailed returns of their work have not been furnished, but noticeable figures are 1,480 cases in Moradabad, 1,134 cases in Bareilly, 871 in Bijnor, and 805 in Benares. The Collector of Saharanpur calls attention to the excellence of the work done by Babu Durga Prasád, and acknowledges the substantial relief which he has given to the ordinary staff.

CHAPTER IV.—SETTLEMENT AND REVISION OF RECORDS.

§ 45.—Regular settlements.

45. Regular settlements were in progress during the year in the Fatehpur and Etawah districts in both of which map correction and the training of patwaris continued. A commencement was made of the attestation of records in one tahsil of each district in preparation for the inspection by the Settlement Officers who joined the districts in October.

A resettlement of the Allahabad district—excluding the tract south of the Jumna—was decided on, and training classes were held for the instruction of patwaris in survey.

In the Muttra district a summary revision of the revenue has been found necessary as a preliminary to the regular revision of settlement for which preparations are being made by pushing on the work of map correction. A report will shortly be submitted with reference to the question of a formal revision of records, and the necessity has been recognized of commencing the work of the regular revision of settlement as soon as possible owing to the very deteriorated condition of the district which necessitates a readjustment not only of the land revenue but also of occupancy rents.

In the Moradabad district the preparation of new maps and the entry in the patwaris' papers of the enhanced rents fixed by the Settlement Officer were completed during the year.

§ 46.—Quinquennial revisions in Bundelkhand.

46. The periodical revision of assessment under the special rules for Bundelkhand fell due during the year in one pargana of the districts of Allahabad, Jalaun and Banda, as also in two parganas of the Hamirpur district and four of the Jhansi district. In all these cases the work was postponed owing to the necessity of employing the kanungos and patwaris on census operations.

§ 47.—Miscellaneous.

47. The Board issued final orders on the Collector's proposals for the resettlement of 158 mahals in the Shahjahanpur district which had been assessed for a term of ten years. In five mahals a further short term settlement for five years was considered necessary, the remaining mahals being settled for the rest of the term of settlement. The Board also dealt with proposals for the resettlement of jungle grants in the Dehra Dun and Gorakhpur districts, while proposals came under review in Hardoi and Gonda for the assessment of a number of mahals, the period of settlement of which—five and ten years respectively—had expired. The work of khewat correction in Bara Banki was completed during the year and a new record-of-rights was prepared for a part of the Bisalpur municipality in the Pilibhit district.

§ 48.—Case work.

48. The unsatisfactory state of the records in the Fatehpur district led to the institution of 620 cases during the work of attestation, but of these only 182 were disposed of during the year. In the Etawah district the corresponding numbers were 507 and 100 respectively. The two outstanding appeals in the court of the Collector of Moradabad were disposed of during the year.

§49.—Cost of settlement operations. Statement XXV.

49. The cost of settlement operations during the year was Rs. 9,626. In Moradabad the expenditure during the year aggregated Rs. 229, which raised the total cost of the settlement to Rs. 3,43,153, or Rs. 149·78 per square mile.

CHAPTER V.—LITIGATION UNDER REVENUE ACT.

§50.—Summary recovery of revenue for lambardars. Statement XVIII.

50. Lambardars filed applications under section 184 of the Land Revenue Act for assistance by Collectors in recovering revenue due by co-sharers in 2,278 cases, involving the recovery of Rs. 90,484. With the applications pending from the previous year, the total number for disposal was 3,133, involving the recovery of Rs. 1,25,489. There was a small decrease of 262 new cases only from the figures of 1909-10. The number actually disposed of was 79 per cent. of the total, an increase of 5 per cent. on the figures of last year's report, and 652 cases were left pending with Rs. 25,108 to be recovered. There is thus an average of nearly Rs. 40 in each case. While it is generally made use of in Oudh, practice varies in the province of Agra, as will be seen from the divisional figures of the applications filed during the year: Meerut (653), Allahabad (421), Agra (374), Rohilkhand (129), Gorakhpur (88), Benares (10), Kumaun (*nil*). Where the lambardari system is weak and there are many independent pattidars who pay in their revenue direct, few applications are needed, and *vice versâ*. Among districts, Aligarh as usual heads the list with 282 cases, but this is again a large fall from the 504 of 1909-10. The cause is attributed to good seasons. The Board commented on the large pending file in the last report, and this year it has been satisfactorily decreased. These cases are confined to the Collector's own court, and a summary enquiry is often necessary into accounts before sums can be realised. This takes time. In Gonda the number of applications were reduced from 154 to 97 by the simple expedient of refusing aid for sums of Re. 1 and under, which seems a reasonable course. On the other hand, the Board do not

approve of rejecting applications, as was done in one case from Jhansi, because the lambardar had not paid till after the issue of a coercive process. This should be no bar to the lambardars receiving assistance.

§51.—Summary recovery of under-proprietary rents in Oudh. Statement XIX.

51. There was also less need for the employment of the similar process in Oudh under section 185 of the Land Revenue Act for the recovery of rents of under-proprietors on behalf of superior proprietors who had paid the revenue due for sub-settled mahals or under-proprietary holdings. Applications filed during the year numbered 2,559 as compared with 3,295 in 1909-10, and the total number for disposal, including pending cases, was 2,901, involving the recovery of 2·67 lakhs. Of this 2·32 lakhs, or 87 per cent., were realised, and only 205 applications, involving the recovery of Rs. 33,171, remained pending at the close of the year. The bulk of the applications were again received from the Fyzabad division, and the districts of Fyzabad (1,032), Bara Banki (553) and Sultanpur (430) head the list. Outstanding cases are most numerous in Sultanpur, though the pending file was reduced. Satisfactory explanations have been received, and it is noted by the Board with approbation that the necessity for working this section was reduced in Gonda by the efforts made to improve the *phantbandi*.

§52.—Mutations in registers of proprietors. Statement XXVII.

52. The total number of changes in proprietary rights recorded during the year shows a somewhat remarkable fall of 9,927 cases. Under every class of transfer there is a decrease. Sales by the order of a court decreased by 247 cases, though there is a solitary instance of a small rise of 62 in the case of sales of revenue-paying land, which was more than compensated by the decline in such sales of revenue-free lands and other cases. Private transfers by sale both of revenue-paying and revenue-free lands decreased by 2,393 and 119, respectively, and every division except Kumaun, where, however, the cause was certainly not poverty, shares in the decline. For the provinces as a whole, succession cases were fewer by 3,188 than in 1909-10, but the divisions of Gorakhpur and Benares show increases of 2,753 and 1,350, respectively, for which doubtless the ravages of plague must be mainly responsible. Mortgage cases fell from 29,248 to 26,904, and the Gorakhpur division shows the only increase (1,428) of any importance under this head. In the Gorakhpur district transfers as the result of mortgage have risen from 2,208 to 3,789, which is the largest number in the provinces. There is a special cause for this in the introduction of a "zamima khewat," or appendix to the proprietary register, in which have been recorded this year all cases of a form of mortgage common in certain tahsils, by which a piece of a borrower's property is offered as security for a purely temporary and insignificant loan. On repayment the plot is at once released. In Azamgarh the Collector has paid special attention to the reporting and disposal of mutation cases, so that these increases in the east of the provinces do not depend on economic factors. In no other district do the mortgage figures require comment, and the total number has now gone down to what it was before the last famine. There was a fall of 1,778 in the number of redemptions of mortgage, but generally the Board view the statistics in this schedule with satisfaction, as indicating a condition of stability and recovery among the proprietary classes. In reference to the remarks in paragraph 8 of the Government resolution on last year's report the Board would impress on district officers the necessity of watching the statistics of mutation with attention as indicative of economic movements, which they should endeavour to intelligently interpret. The remark received from one district, that the decrease in the number of succession cases was due to the diminution of mortality in the land-owning classes, is no doubt accurate but not enlightening!

§53.—Partitions. Statement XXVIII.

53. The number of applications for perfect partition pending from 1909-10 was 1,937, and the number of new cases filed was 1,161, making the total for disposal 3,098 as against 3,071 of the preceding year. The courts, all things considered, keep work fairly well up to date, the number of cases disposed of being only 51 less than the number of institutions. The largest total number of cases for disposal are found in Meerut (155), Azamgarh (150), Aligarh (135), Banda (126), Gorakhpur (118), Saharanpur (115), Muzaffarnagar (108), Basti (104), Cawnpore and Hamirpur (103 each). The pending file at the close of the year greatly increased in the case of Meerut (96 to 120), Agra (35 to 55), Unao (22 to 43), and Hardoi (23 to 36). It is not

satisfactory to find that in Meerut and Agra only about one-fifth of the cases on the file were disposed of.

The state of things is much the same with regard to imperfect partition. There were 3,431 cases pending from 1909-10 and 2,857 new cases were filed, making a total of 6,288 for disposal. In this case the balance of cases pending increased by no less than 248. Pending cases show the following progression of recent years :—

30th September	1909	...	...	3,324
„	1910	...	...	3,431
„	1911	...	...	3,679 (+355)

The heaviest files in this class of partition work are found in Gorakhpur (945), Moradabad (528), Basti (462), and Meerut (443). Though a few other districts have more than 200 cases, it appears that more than one-third of the imperfect partitions of the whole provinces came from these four districts. It is satisfactory to find that Gorakhpur with the heaviest file kept pace with the institutions, and slightly reduced its pending cases, but in Moradabad there was a rise from 228 to 315, and in Basti from 235 to 304.

It is of course not possible to avoid a heavy pending file where partition cases are concerned. They are not only difficult in themselves by reason of the mass of technical detail to be dealt with, but they are prolonged by the parties who can rarely bring themselves to accept any award. Often the work of the amins is badly done, but in many cases it is unnecessarily reduplicated by the objections of the sharers. The Board would draw attention to the remarks which were made on this subject last year, and regret that no improvement has yet been shown. An important change directing that partitions shall be carried out by each sub-divisional officer instead of, as hitherto, by a special officer for the district, has been introduced during the year. It is too early to see any result of this and it would be unfair to attribute any of the unfavourable features of the statistics to the change; in fact there is every hope that cases will become simpler if they are taken up by an officer who can visit the spot and get at the real difficulties from the very first. This has been impressed on district officers by circular instructions issued during the year. The careful preparation of the partition proceeding, and close attention to each detail by the presiding officer himself, are the best means of ensuring that the case will afterwards progress clearly and satisfactorily. The change above referred to has been carried out in most districts, but Meerut is said to find special difficulties in transferring partition work to sub-divisional officers, and up to date the special officer had remained in charge. It is hoped that next year more favourable comments on the state of the work generally may be possible. The work done by patwaris during the year has not improved, nor is it popular with litigants. The outturn is poor and slow and does not give satisfaction.

§54.—Appeals under Land Revenue Act and Kumaun Rules. Statement XXIX.

54. The number of new appeals instituted in the courts of Collectors under the Land Revenue Act and the Kumaun Rules was 5,675 (only 108 more than in the preceding year) and the total for disposal was 6,357 against 6,315 of 1909-10. The volume of work has therefore remained almost stationary, but the number of pending cases at the close of the year has gone up from 682 to 876, and of cases pending over three months from 88 to 159. Partition appeals swell the long pending cases, but it is unsatisfactory that there should have been a general increase in the undisposed of balance throughout the provinces, only the Fyzabad, Allahabad and Benares divisions showing a very slight decrease. Appeals in this schedule which are concerned mostly with entries in the annual registers, are markedly numerous in the eastern districts of Gorakhpur (464), Basti (381), Ballia (342), and Ghazipur (234). In the rest of the provinces only Moradabad (228), Meerut (226), and Bulandshahr (206), exceed 200 cases. In Commissioners' courts the appellate work calls for little comment. It decreased slightly in total volume, 2,008 cases being filed against 2,110 in the previous year, and there has been a satisfactory decrease of 46 in the undisposed of balance and of 53 in the cases pending for more than three months.

§55.—Appeals to the Board.

55. The number of appeals for disposal by the Board under the Land Revenue Act was 531, of which 401 belonged to the province of Agra and 130 to Oudh. Of these, 448 were disposed of leaving 83 pending at the close of the year against 173 received

from 1909-10. The orders of the lower courts were disturbed in only 31 or not quite 7 per cent. of the cases.

There were 82 cases of application for revision, of which 72 came from Agra and 10 from Oudh. Twelve cases were left pending, and in 13 instances, or about 19 per cent., the lower courts' orders were disturbed. There were also 32 cases for disposal from the Family Domains, of which 17 were decided and 15 were left pending. When these are completed this class of appeal will disappear.

Including appeals under the Tenancy and Rent Acts the total judicial work of the Board during the year was 2,728 cases for disposal, 2,104 decided, leaving a pending balance of 624.

CHAPTER VI.—GENERAL.

§ 56.—Action taken to avert sale in execution of decrees of Civil and Revenue Courts. Statements XXX-A and XXX-B.

56. Including arrears of the previous year, Collectors in the province of Agra had a file of 6,804 decrees in the execution of which the sale of ancestral property was involved. Of the total number, 4,359 were completely disposed of, sale of the entire property being found unavoidable in 1,709 cases or 39 per cent. In 80 cases it was found possible to satisfy the decree by selling only part of the property, in 28 cases the judgment-debtor was able to arrange for payment by postponement, and in 13 cases satisfactory terms were possible by farming the property, and in two cases the property was let on payment of a premium or mortgaged. There were 2,445 cases pending at the close of the year, or 151 less than the opening undisposed of balance. Though the result seems small there can be no question of the cumulative benefits of this procedure, the utility of which has been questioned by one Commissioner. In Oudh, where the rules are different, sales of ancestral property were sanctioned by the Lieutenant-Governor in 1,135 cases as against 1,212 of the preceding year, and sales of self-acquired property were sanctioned by the Commissioner in 115 cases. Out of these sales actually took place in 643 and 57 cases, respectively. The figures in both provinces show no great variation from those of 1909-10.

New amalgamated rules have now been framed to regulate the procedure in both provinces under section 70 and paragraph 7 (4), Schedule III, of the Civil Procedure Code. These will shortly replace the existing Board's Circular on the subject.

§ 57.—Acquisition of land. Statement XXXI.

57. The work of acquiring land for public purposes was slightly less heavy during the year, the total area acquired under the Act being 7,790 acres as compared with 7,912 acres in the previous year. The total compensation paid was considerably less, being only about 11·2 lakhs against 18·3 lakhs, chiefly owing to the comparatively small urban area acquired. Three thousand eight hundred and sixteen acres, or nearly half the whole land taken up, was acquired for railways. Two thousand five hundred and fifty-two acres were taken up for canals and 1,812 acres for other public projects. The principal railway projects were the Allahabad-Rae Bareli-Cawnpore branch of the Oudh and Rohilkhand Railway, the Pilibhit-Shahjahanpur extension of the Rohilkhand and Kumaun Railway, and the Gajraula-Chandpur and Dhakia-Sambhal branch lines. For canals, considerable areas were acquired for the Hathras branch of the Ganges canal in the Aligarh and Muttra districts, for the Lower Ganges canal in Cawnpore, for the Dhasan canal in Jhansi and Hamirpur, for the Chhoa and Bharail drains in Hardoi, and for training the Ranipur torrent in the Saharanpur district. The miscellaneous purposes for which land was taken up were chiefly the construction of roads in Gorakhpur and Jaunpur; municipal requirements in Muttra and Bareilly and the extension of reserved forests in Naini Tal. The largest amount of compensation was disbursed in the Rohilkhand division, where the award for the Pilibhit-Shahjahanpur extension amounted to nearly two lakhs of rupees, and the acquisition of urban lands in Bareilly absorbed another half lakh. The award was probably heaviest in Cawnpore, where about 12½ acres of garden land, situated on the outskirts of the municipality, was acquired for the extension of the Agricultural College, at a cost of Rs. 26,427. The price of land and houses is reported to be exceptionally high in that neighbourhood. Altogether 7,391 acres were acquired permanently, under the Act, at a cost of Rs. 11,14,676, which gives an average of Rs. 150 per acre. It is satisfactory to observe that this closely approximates

the rate of Rs. 159 per acre paid for 390 acres acquired by private negotiation for Rs. 62,162. Special land acquisition officers were employed in several districts, notably Moradabad and Aligarh; but in the majority of districts the work was done by Deputy Collectors in addition to their ordinary duties. The character of their work was generally satisfactory, both to the Collector and to the parties, and has been specially commended in the case of officers so employed in Cawnpore, Allahabad and Bareilly.

During the latter half of the year, the executive rules relating to the acquisition of land, contained in Board's Circular 1—VIII and the appendix thereto, were examined and amended with the approval of Government, conveyed in G. O. no. 887/I—99, dated the 15th May 1911. The old circular which has been replaced by circulars 1 and 1A—VIII was revised partly for the sake of greater clearness and partly to secure a more liberal and just estimation of the profits of land, both urban and agricultural, and a proper calculation of reductions of land revenue and rates in accordance with modern settlement principles. The rules have been made more elastic, and clearly bring out the necessity for awarding, in every case, the fair market value of the area acquired.

58. There was a further decrease of 22,397 in the correspondence register in the English departments of district offices shown in the last two columns of the statement, and this is generally attributed to the precise orders as to the restriction of these returns to matters pertaining exclusively to the departments controlled by the Board, which were issued in September 1910. At the same time district reports show that there is still a lack of uniformity, as increases have been explained by correspondence arising out of the Census, United Provinces Exhibition and the Imperial Darbar, all of which should have been excluded, as they actually were in some cases.

§ 58.—Total work in district offices. Statement XXXII. (*a*) Correspondence in Revenue department.

In the Vernacular departments the number of new cases instituted was 1,315,330, or only about 45,000 less than in the previous year. Including arrears the total for disposal was 1,534,644. The above figures given in statement XXXII are inclusive of judicial cases which have been already discussed. Excluding these, new cases numbered 953,183, and the total for disposal, including arrears, was 1,075,896. The work was not quite so well up to date at the end of 1910-11 as in the previous year, the pending balance having increased by 6,000. Gorakhpur is the only district that shows a very remarkable rise in the matter of new institutions which have risen from nearly 48,000 to 57,349. No explanation is given for this, but the figures provoke a hope on the part of the district officer that the overworked staff will be increased. Other districts show quite as remarkable a decrease, Bareilly from nearly 29,000 to nearly 21,000, and Benares from about 26,000 to less than 18,000, for which no explanation is given. The pending balance at Gorakhpur, which has gone up from 8,560 on the 30th September 1910 to 15,996 on the 30th September 1911, goes to show that the staff has been unable to deal with the increasing institutions, and on the other hand in Bareilly where, as already remarked, new cases fell off, the pending balance for no apparent reason rose from 2,217 to 2,986. There was a marked rise in the pending balance in Saharanpur (1,654), but the following districts show large decreases, Azamgarh (1,321), Bara Banki (818), Bahraich (792) and Farrukhabad (623). In none of these cases are explanations offered, and with such a mass of figures as the resultant total of all work presents, an explanation is difficult. Classification and methods of work must vary from office to office if we are to account for striking variations. Though there has been a slight reduction in the provinces as a whole it is far from probable that there has been any real reduction of work. These figures have been the basis of the proposals of Mr. Pike's committee, which will shortly be considered by the Board in detail, and it is hoped that some of their suggestions will lighten the burden of clerical work.

(*b*) Cases in Vernacular departments.

59. The total land revenue of the property assigned or alienated at the close of the year under report is Rs. 2,58,555 as against Rs. 2,58,409, shown in the previous year. The difference is due to the resumption of a few life muafis on the death of grantees, and to additional assignments.

§59.—Assignments, &c. of Land Revenue. Statement XXXIII.

§60.—Payment of Government dues by money-order.

60. There has been again a rise in the number of money-orders used for payment of land revenue, local rates and canal dues from 314,731 to 321,509, and the amount so remitted increased by nearly 4 lakhs. In the Gorakhpur division the system continued to be most popular, no less than 13·11 lakhs being remitted, but it cannot be considered a feature of the eastern districts, as 12·15 lakhs, the next highest figure, are returned from the Meerut division at the other extremity of the provinces. No further reason for an increase need be sought than that the money order remittance is growing in popularity; the fee is small and a journey to the tahsildar's office is saved. On the other hand a few districts show a decrease which is not explained, and this is most remarkable in the Lucknow division where the amount remitted fell by nearly Rs. 40,000, both Unao and Hardoi showing large decreases. In the Allahabad division there was on the whole an increase, though there were decreases in the Allahabad, Hamirpur and Banda districts.

There was a fall from 12·80 lakhs to 10·66 lakhs in the remittances of miscellaneous dues, such as taqavi, excise, &c. This is explained by there being fewer outstanding taqavi accounts than in the previous year, and that there was little pressure brought to bear on debtors during the last quarter of 1910-11.

§61.—Rental money-orders.

61. The rent remitted to landlords by special rent money-orders amounted to 17¼ lakhs, but showed a decrease of nearly Rs. 21,000 on the last year's total. The Rohilkhand and Meerut divisions continue to head the list for these remittances with 5·22 lakhs and 3·40 lakhs, respectively, but the Allahabad division is steadily increasing, and has this year touched a higher figure (2·26 lakhs) than ever before. There have also been increased remittances in the Benares, Lucknow and Kumaun divisions. There are three districts, Bijnor (1·92 lakhs), Moradabad (1·57 lakhs), Cawnpore (1·04 lakhs), where the remittances exceed a lakh. It is otherwise reported that there are causes of contention between landlord and tenant in both Bijnor and Moradabad, which doubtless explains why these districts resort so markedly to the money-order.

§62.—Maps.

62. During the year under report ten tahsili maps and one district map were taken in hand by the Thomason College Press. Of these five tahsili maps were prepared and issued, three in the Mainpuri district, one in Farrukhabad and one in Etah.

§§63—65.—Conclusion.

63. The figures discussed in the preceding paragraphs have all tended to indicate a year of satisfactory progress, which has resulted mainly from a continued improvement in seasons and agricultural conditions. Matter for grave anxiety existed and still exists in the prevalence of plague, cholera and malaria, and for a short time during the last monsoon it seemed as though the provinces might again have to cope with a widespread scarcity, but after making all allowances there are clear indications in the ease with which demands have been collected, the statistics of litigation, and above all in the temper of the people themselves, that the return to prosperity which was welcomed in last year's report, is still maintained. It is eminently satisfactory to find that the Commissioner of Allahabad can write of Bundelkhand, the part of the provinces which suffers most acutely and constantly from the effects of bad seasons, that "throughout the whole division all outward and visible signs of the effects of famine years have now vanished." The assistance which was ready for the people in August last showed them clearly the policy of the Government in such circumstances, and the Collector of Bijnor refers to "the complete conviction which now obtains everywhere that Government will intervene at once and effectively as soon as necessity arises." In the immediate present there is the promise of rabi considerably above the normal, which should make it easy for district officers to realise the extra advances which have been necessary. In spite of the poor kharif it is satisfactory to report that remissions and suspensions have been only necessary in Muttra, Budaun, Fatehpur and Unao districts, and elsewhere postponements have been found a quite adequate relief.

64. During the year under report the Dhasan canal was opened, and has brought irrigation within reach of a large and promising tract in south Hamirpur. Much attention has been paid to the possibility of extending irrigation and water storage works in Bundelkhand, and for the present instructions have been issued by the Government to revenue and canal officers, which will enable them to deal

with the construction of new, or the improvement of existing, embankments by entering into forms of agreement with the zamindars. These rules have been criticised by the district officers of Bundelkhand, and material is being collected for possible legislation, to provide for tank construction and management somewhat on the lines of the simple act contained in the Madras Code. Schemes which were under consideration for utilising the Rapti and the Tarai streams on the Nepal border have not proved promising, but the Board recently dealt with alternative schemes for the utilisation of the Sarda water, a question of great importance to the provinces, and one which, it may be hoped, will soon be satisfactorily settled.

65. The Board's report would not be complete without a reference to the great event of the year in these provinces, the Allahabad Exhibition. Prominent and highly popular features in this Exhibition were the Agricultural Court and a large collection of machinery connected with agriculture. These were widely viewed and explained to all classes of agriculturists in the provinces, and the effects will undoubtedly be seen in a new attitude of enlightened appreciation towards these things. The sugar industry is particularly bound up with the agriculture of the provinces, and it is satisfactory to report that two new factories have been started in Bijnor, and that the Utraula factory in Gonda continues to flourish. There is great hope of progress in the East of the provinces where hitherto little attention has been paid to improved methods of manufacture. The purchase of the Exhibition factory plant by a Gorakhpur zamindar is an indication that a movement has begun. It is reported from Bahraich that an experiment has been made with jute which the Commissioner considers a promising staple in that locality; the results will be watched with interest by the Board. There has been a striking record of railway extensions in all parts of the provinces, and among these the new line from Pilibhit to Tanakpur deserves mention as opening up entirely new ground.

I have the honour to be,

SIR,

Your most obedient servant,

J. E. GOUDGE,

Secretary.

NOTE.—(*a*) All the above grants except those shown against Gorakhpur (which represent the remission of revenue on Goraits' jagirs created in jungle grant Keotali and come under the class—"For the maintenance of public servants") were made "On other grounds."

(*b*) Difference in figures as shown in this statement and in that for the previous year is due to resumption of a few muafis and to additional assignments.

STATEMENT XXXIV-A.—(PROVINCE OF AGRA).

Statement showing classification of holdings and rental statistics for 1318 *fasli or* 1910-1911.

District.	Area of holdings.					
	Held as sir.	Held by zamindars other than sir, and thekadar's cultivation.	Held free of rent.	Held by permanent tenure-holders and fixed rate tenants.	Held by ex-proprietary tenants.	Held by occupancy tenants with occupancy rights.

‡ In thirty-three districts (except Fatehpur) where new forms of mauza registers have been introduced, columns 15—20 show cash-rented land only. In the district named above they include also the grain-rented land, and hence their totals do not correspond with columns 21 and 22.

ORDERS OF GOVERNMENT.

No. 904/I—239 OF 1912.

RESOLUTION.

REVENUE DEPARTMENT.

Dated Naini Tal, the 18th May 1912.

READ—

Letter from the Secretary to the Board of Revenue, United Provinces, no. 1026/XII—149B., dated the 12th March 1912, being the Board's report on the revenue administration of the United Provinces for the year ending 30th September 1911.

OBSERVATIONS.—The Board's report on the revenue administration of the province for the year which closed on the 30th September 1911 is a record of sustained prosperity. The last traces of the famine of 1907-8 have now, it may be asserted with confidence, been effaced. The monsoon of 1910, although somewhat abnormal in character, was generally abundant; its chief features being the prolonged break in July and the torrential falls of October. During the cold weather which followed heavy rain was received in January and March. In 1911 the break of the monsoon was delayed till the end of July, giving rise to apprehensions which were happily not realized.

2. The area of the autumn crop was appreciably smaller than that of the previous year, a natural consequence, in most tracts, of the drought in July. But the area under spring crops has continued to increase, the rain in October and November being especially favourable for this harvest and causing an increase in the area twice cropped. The progressive extension of the rabi area and reduction in the kharif area which are observable since the famine of 1907-8 are thus maintained. Owing to well-distributed rain the rabi season was notable for the leisure enjoyed by the cultivator and the relief afforded to the sources and agents of irrigation. The Lieutenant Governor observes with satisfaction that Agra and other districts relatively deficient in water supply have shared in peculiar measure in the expansion of the spring crop area. He is also glad to see that, as anticipated by the Director of Agriculture, there has been an effective return to normal conditions in Oudh, the prosperity of whose northern districts may be said to be completely re-established. Of the commercial crops sugarcane shows a slight increase on the whole. In the Meerut division the area, though still considerably larger than the average for ten years previous, was smaller than in 1909-10. But the progressive decline in Rohilkhand was barely arrested, and the area here is considerably lower than the average. The causes determining this gradual decline, whether the high prices of food grains or other factors, appear to be still in operation. Sugar has however, it is satisfactory to note, recovered lost ground in Oudh and gained new ground in Gorakhpur. In resolution no. 311, dated February 7th, 1912, the steps taken by Government to maintain, extend, and improve the cultivation and manufacture of sugar have been reviewed. The expansion of the cotton area in the new cotton tract north of the Ganges and in particular in Kashipur in the Naini Tal district is a satisfactory feature.

3. Though figures are available only to the end of March 1911, it is clear that the trade of the province has continued to improve. The increase in the exports of wheat and oil seeds, the large rise in the import of cotton goods and articles such as kerosene, salt, and spices and the fall in imports of food grains all point to sustained prosperity.

4. The Lieutenant Governor concurs with the Board in deploring the increased ravages of plague, which have had marked effect on agricultural production. In particular he views with concern its effects in the Muttra district, the depressed condition of which last year attracted the attention of the Government, and has actually led to the anomalous condition that non-occupancy rents are lower than those of occupancy holdings. Since the close of the year under report special inquiries have been made into the conditions of this district in anticipation of its resettlement, and they tend to show that rents are, in present conditions, too high in certain tracts.

5. The general prosperity of the year apart from this factor is sufficiently clear from the fact that out of a total enforceable demand of 650½ lakhs the collections of land revenue amounted to 648 lakhs, while the famine suspensions in Meerut and Azamgarh were recovered in full. A substantial decrease in the coercive processes issued for the recovery of revenue demands is a further satisfactory feature of the report.

6. Advances for seed, fodder, and bullocks were more than twice the amount of the previous year, but the increase is entirely accounted for by the need for assistance in the submontane tracts owing to floods in 1910 and the situation in the western half of the province when the monsoon of 1911 was delayed. The increase in the advances taken for agricultural machinery, largely owing to the Allahabad Exhibition, is also gratifying. While agreeing with the Board that some decline was inevitable in a wet year, Sir John Hewett regrets to observe a very considerable diminution in the number of masonry wells sunk. His Honour was hopeful that the experiences of the famine would result in a large extension of masonry wells. So long as the experience of the failure of the crops in 1907-8 was fresh in the minds of the tenantry considerable energy was shown in constructing wells, but it is evident that their interest in providing this form of protection against short rainfall has cooled, and the Lieutenant Governor fears that district officers have not done all that might have been done to stimulate well construction. The Lieutenant Governor is confirmed in this opinion by an examination of the *taqavi* loans granted for land improvements, which include chiefly wells. The figures show, especially in Rohilkhand, a greater shrinkage than can fairly be attributed to the general characteristics of the year. The immense importance, from an economic point of view, of the extension of masonry wells is naturally emphasized by the Board, and the Lieutenant Governor trusts that no legitimate means of encouraging their construction will be neglected. While collections of *taqavi* loans have generally been good, the remark of the Board that constant attention is required is by no means superfluous.

7. The Lieutenant Governor is glad to observe a considerable decrease in litigation under the tenancy laws, notably in suits relating to distraint and for ejectment. It is, however, a matter for some regret that the pending file of applications for execution of decrees was actually larger at the close of the year than at the beginning. Where courts look on such cases as a matter of routine the result is a denial of justice, which casts discredit on the administration. Appeals to district judges showed a slight improvement in standard, a point which last year received the Board's special attention. Appeals to the Board show a steady but very slight improvement in the working of the appellate courts. The Lieutenant Governor is however constrained to observe that the proportion of orders disturbed (18 per cent.) is still high. The increase in the arrears of partition cases, though small, is a matter which calls for attention. The Lieutenant Governor regrets that no improvement on last year's conditions is evident, and hopes that the policy of enforcing the responsibility in this matter of sub-divisional officers will eventually result in substantial progress. Sir John Hewett is aware that the staff of sub-divisional officers is not as strong as it should be, and he hopes before long to receive the sanction of the Secretary of State to the necessary additions for which budget provision has been made. The thanks of Government are due to the Honorary Assistant Collectors, who have rendered much useful assistance during the year.

8. The expenditure on land acquisition fell from 18·3 lakhs to 11·2 lakhs, the average price per acre of the land acquired being about Rs. 143. The whole question of compensation has lately received attention at the hands of the Board, and the question of the adequacy of the compensation which existing rules allow to occupancy tenants is now under the consideration of the Government.

9. Sir John Hewett cordially acknowledges the ability with which the Board have administered their charge and the well-arranged, full, and interesting account of their administration contained in their report, and on this, the last occasion on which he will have the pleasure of reviewing the work of the chief controlling revenue authority, desires to place on record his appreciation of the manner in which its different members have exercised their functions during the period for which he has had the honour of working in association with it. It gives him special pleasure to reflect that at the present moment the agriculturists of the province are, speaking generally, in a condition of greater prosperity than at any other time during his service in India.

ORDER.—Ordered that a copy of this resolution be forwarded to the Secretary to the Board of Revenue, United Provinces, for the information of the Board.

Ordered also that a copy of this resolution be published in the United Provinces *Government Gazette*.

By order of the Hon'ble the Lieutenant Governor, United Provinces,

R. BURN,

Chief Secy. to Govt., United Provinces.

REPORT

ON THE

REVENUE ADMINISTRATION

OF THE

UNITED PROVINCES OF AGRA AND OUDH

FOR THE REVENUE YEAR 1911-1912, ENDING 30TH SEPTEMBER 1912.

No. $\frac{1191}{\text{XII-149B (3)}}$ OF 1913.

FROM

J. E. GOUDGE, ESQ., I.C.S.,
SECRETARY TO THE BOARD OF REVENUE,
UNITED PROVINCES,

TO

THE CHIEF SECRETARY TO GOVERNMENT,
UNITED PROVINCES.

Dated Allahabad, the 13th March 1913.

SIR,

Present :
THE HON'BLE MR. D. C. BAILLIE, C.S.I.
AND
THE HON'BLE MR. G. A. TWEEDY, I.C.S.

§§1—3.—Introductory.

I AM directed by the Board to submit their report on the revenue administration of the United Provinces of Agra and Oudh for the year ended the 30th September 1912.

2. The office of Senior Member was filled by Mr. Reynolds till Mr. Baillie returned from leave on the 3rd November 1911, and when Mr. Tweedy took leave at the end of February 1912, Mr. Broun officiated for him till the close of the year.

3. The divisional reports were all received before the end of the first fortnight in December, except that from Agra, which arrived on the 19th December. Their submission was therefore fairly punctual. The Board desire to acknowledge a particularly full and interesting report from the new Bundelkhand division of Jhansi, which has for the first time been separately dealt with.

§4.—Seasons.

4. The monsoon of 1911 arrived punctually about the middle of June throughout the provinces, but dry hot weather set in immediately, suspending agricultural operations and threatening the early sown crops. Insufficient, irregularly distributed showers characterised the season, until the end of July, except in the central submontane and eastern districts, and sowings were resumed frequently only to be again suspended, while standing crops suffered seriously from want of rain. The position steadily improved during August, but it was not until September, which was generally a wet month throughout the provinces, that the cause for serious apprehension, either of a failure of the kharif harvest or of a widespread fodder famine, was really removed. It was found possible to put down a considerable area of late kharif crops which did unusually well. Timely rain in October facilitated rabi sowings, which were unprecedentedly extensive, and the characteristic of the winter season was a succession of useful showers in November, January and February. It is thus apparent that the year opened with a sense of relief, and it is satisfactory to record that as the season wore on, conditions improved, and the year terminated with one of the finest harvests on record. Though the drought in July and August involved a partial failure of the early sown kharif crops in many of the western districts and Bundelkhand, this was counterbalanced by the excellence of the rabi harvest, which was of unusual extent and quality. In the Gorakhpur division the Commissioner records that "two such bountiful harvests have not been gathered for many years."

§5.—Cultivated areas.

5. The total cultivated area for the year exceeded the normal by 80,711 acres or 0·2 per cent. only, but shows a decrease of 659,325 acres or 1·8 per cent. on the figures of the preceding year. The decrease in the kharif area was no less than 3,140,566 acres or 14

per cent. below the estimated normal, while the rabi area rose by 3,891,365 acres, and exceeded the normal by 20 per cent. Drought during the sowing season as in 1910-11 affected unfavourably the extent of the kharif area, and the abundant rains in September and October greatly stimulated rabi sowings. It is doubtful, however, whether the remarkable decline in the kharif area and corresponding increase in the rabi area are fully accounted for by the characteristics of the seasons. In 1907-8 the kharif area was represented by 103·5 with reference to a normal of 100. In 1910-11 it had fallen to 98 and in 1911-12 it has gone down with a rush to 86. On the other hand rabi was only 68 with reference to a normal 100 in 1907-8, the last famine year, and it has progressed by stages of 17, 12, 11 and 12 respectively up to 120 in 1911-12. This represents an actual increase of 75 per cent. during the quinquennium. It seems to the Board that along with the unfavourable seasons for kharif, and the inducements offered by late rain to sow extended rabi which might compensate for losses and deficiencies in kharif, economic causes have also been at work to produce these remarkable variations from the normal, and chief among them is the great demand which has sprung up in the export market for oil-seeds, wheat and barley.

The Director has quoted the more remarkable increases in district rabi areas, the largest being Agra, 80 per cent. above normal, Muttra, 58 per cent. and Meerut, 40 per cent. The rabi area in the Bundelkhand districts is 50 per cent. above the normal, and the figures quoted by the Commissioner show a rise of no less than 52 per cent. on those of 1910-11. This last increase is undoubtedly dependent on a very favourable distribution of rain, as it has taken place in unirrigated black soil tracts. Gorakhpur and Pilibhit did not share in the increased rabi area, largely owing to the fact that late kharif was sown in lands that would otherwise have been utilised for a winter crop. The area under hot weather crops remained much the same, but there was a rise of $2\frac{1}{2}$ lakhs of acres and upwards in the double cropped area, which was due to linseed following on the kharif in unirrigated ground.

§6.—Crop areas.

6. The general falling off in the kharif area is reflected uniformly throughout the early and late food crops. Rice shows a decrease of upwards of $7\frac{1}{2}$ lakhs of acres on the returns of the preceding year, though the decrease of $2\frac{1}{2}$ lakhs in the late variety followed on an increase of 82,253 acres in 1910-11, and is only 26 per cent. below the normal. In the Gorakhpur division there was, in fact, a considerable increase in late rice. Similarly the maize area suffered far less in the eastern and central submontane districts where the distribution of rain more nearly approached the normal, and it showed an increase of upwards of 30,000 acres in the Fyzabad division, though the total drop from 1910-11 was more than $3\frac{3}{4}$ lakhs of acres for the provinces as a whole. The most serious fall took place in the area under *juar* which was nearly $8\frac{1}{2}$ lakhs of acres below the preceding year, and is now 35 per cent. below the normal. Even these figures do not represent the total loss, because a great deal that was sown came to nothing. In the black soil of Banda this crop fell from 213,453 acres to 70,463 or 67 per cent., but this ultimately resulted in a gain, as it led to the substitution of wheat and gram.

Among crops of commercial importance sugarcane showed a very marked rise, following steady improvement during the last 3 years. In 1910-11, with a considerable increase of acreage, it was still 13 per cent. below the normal, while the present figures show that it has exceeded the normal by 12 per cent. This increase was most marked in Gorakhpur, which is now the most important cane district, and the produce in that division is reported to have been unusually good. Expectations of an increase in the area under cotton as a result of the high prices obtained for the produce in the previous year were falsified, and for this the unfavourable character of the season, which restricted sowings in the unirrigated tracts, is responsible. The new cotton growing tracts both north of the Ganges and in Bundelkhand show a large decline, and the total area has gone down from 117 to 79 with reference to a normal of 100. The Director points out that the cotton area must fluctuate with the seasons until existing canals are able to provide water for early sowings. *Til*, which is usually sown on the worst soils when unmixed, decreased by 15 per cent., though the area remained 29 per cent. above the normal.

Every variety of rabi crop, with the exception of poppy, shows an increase on the previous year, and is very largely above the normal. Wheat and barley areas

rose by only 3 per cent., and the Gorakhpur and Fyzabad divisions show actual decreases in these crops, but linseed and gram have advanced in a striking manner, the former being 79 per cent. in excess of the 1910-11 returns. This is a crop which is often sown after early rice, and in a year when rice sowings were restricted and late rains were favourable, an increase was to be expected, but there can be no doubt that it is a profitable crop which is growing in popularity, and is much in demand for export. Poppy declined by 64,692 acres and is steadily losing popularity.

§7.—Irrigated area.

7. Irrigation had slightly decreased in the preceding year owing to good winter rains, and, this feature being even more marked in 1911-12, it is not surprising that the gross irrigated area should have fallen by 7 per cent. There was, however, a considerable increase in the irrigation of cotton and fodder crops in kharif as a result of the prolonged drought. The Director notes the extended use of canal water for the early sowing of cotton and the growth of fodder as possible indications of change in agricultural practice. The result of the extremely favourable rainfall during the winter months was a decrease of about a million acres irrigated from wells and other private sources which are used for rabi.

§8.—Sources of irrigation.

8. Half the total irrigation of the provinces comes from wells, while canals and other sources divide the other half between them. The number of new masonry wells constructed was only 8,073 as compared with 9,215 in 1910-11, which was itself a very noticeable drop from nearly 23,000 in 1909-10. Private enterprise lacked the stimulus given by bad seasons, and the facilities afforded by the lower water level which follows on a year of drought, and it must be recognised that the remarkable energy in well construction, which was fostered in the famine of 1907-8, could not continue uninterruptedly. Uniform progress is however maintained, and reference will be made to the subject later in this report. The Director remarks that the small progress made in Rohilkhand is due to a general impression that the Sarda canal scheme will not be much longer delayed. Much attention has been paid to the extension of reservoirs and *bandhis*. In the Jhansi and Mirzapur districts 4,000 acres have come under irrigation from tanks, while Banda returns 1,862 new *bandhis*. There are large numbers of incomplete and ineffective submersion *bandhis* in the Jhansi division, which were originally undertaken as famine works under Government direction, and it is hoped by the Board that a grant will be available to put these into proper working order. Ten new works were undertaken in Hamirpur under the Bundelkhand tank rules, and a draft Act is now before Government dealing with minor irrigation works throughout the provinces. The result of this should be to stimulate and facilitate the construction of both tanks and *bandhis*.

§9.—Calamities.

9. The year was markedly free from calamities of all kinds, and most districts report absolute immunity. There were a few hailstorms in Sitapur, Mainpuri and Budaun, but remissions on this ground were only found necessary in the Jhansi and Hamirpur districts. It is satisfactory that reports are silent on the subject of insect pests which have done much damage to sugarcane of recent years.

§10.—Outturn.

10. On the whole the outturn of the crops was not so good as in the previous year, the inferiority being most marked in the kharif where the only crop that showed any improvement was *bajra*, and that still remained 15 per cent. below the normal. The *bajra* was sown in August at an unusual time owing to the late commencement of the rains. The areas that had good rainfall in the eastern and central submontane districts do not grow *juar*, and this crop was generally indifferent. The general yield of early and late rice, which was good in the Gorakhpur division, was diminished by comparative failure elsewhere. This was the case also with sugarcane, which was unusually good in the eastern tract, but elsewhere only moderate. It is satisfactory to record that among rabi crops, wheat, barley and gram are all returned at exactly the normal, but the Board agree with the Director in thinking that this estimate does not do full justice to a yield which certainly exceeded the normal over a large part of the provinces. The gram was generally excellent, and it is agreed that it is more correctly described as 10 per cent. above the normal. Linseed suffered in places from rust, and only gave 85 per cent. of a normal crop, while rapeseed suffered

somewhat from *aphis*, and fell from 90 to 80 per cent. of the normal. Poppy improved a little after the disastrous year preceding, but it was damaged by blight, and the crop was only a moderate one. Hot weather crops were satisfactory, and the mango crop, though uneven, was a heavy one in most districts, the fruit selling at unusually low prices. Mahua gave a satisfactory yield.

Taking the season as a whole, it must be held that the losses in kharif were compensated by the gains in rabi, which not only produced a good crop, but also over an enormously large area. It is noteworthy that both the last two years have been exceptionally favourable for rabi, while the kharif has suffered in the one case from excessive rain at the end of the season and in the other from a long drought at the commencement. These incidents in the long run balance themselves, and the result has been something very near a normal crop both in area and outturn in each year.

§11.—Monsoon and kharif of 1912.

11. Though light rain fell during June, the arrival of the 1912 monsoon in these provinces dates from the 2nd week in July when ample rain fell everywhere except in the Meerut division and parts of Rohilkhand. By the 3rd week the whole province had received enough for its requirements. In August the rainfall was ample throughout the greater part of the provinces and excessive in certain districts, causing floods in Gorakhpur with destruction of the crops in low lying areas, while in Bundelkhand continuous rain seriously interfered with the sowings. With the exceptions above mentioned, the August rainfall was seasonable and sufficient, with bright intervals for weeding and the preparation of the ground for rabi. There was heavy rainfall throughout the provinces in the early part of September, and during the last week Bundelkhand, Rohilkhand and the greater part of the Doab and Oudh received heavy rain, but the Gorakhpur, Azamgarh, Fyzabad and Allahabad districts received only light rain. The month of October was rainless, with the exception of a few light showers during the first week, of which the heaviest were in the Fatehpur district. Unfortunately a tract of country south of the Gogra and to the east of a line drawn between Fyzabad and Allahabad, including the whole of the Benares division, practically received no rain after the first week of September. Over the whole monsoon period there was a general deficiency of rain, except in the Meerut division. This deficiency was greatest in the Benares division where it amounted to 23 per cent. It is satisfactory to report that owing to the favourable rainfall of July, which came in heavy showers with bright intervals, an unusually large area was sown. The total kharif area has risen from 200 to 223 lakhs of acres, or 12 per cent., the increase being shared by every division, and being most noticeable in Meerut, Agra and Rohilkhand, where it amounts to nearly 25 per cent. The area in which crops failed to come to maturity is 5 lakhs of acres, of which 3 lakhs belong to the Benares and Gorakhpur divisions. There has been an increase of 15 lakhs of acres in rice and of 235,000 acres in cotton, and figures indicate that after two bad years the kharif area has returned to its normal.

Generally, with the exception of the tract abovementioned, the provinces report a good outturn. *Bajra, juar* and cotton were estimated to be 95 per cent. of a normal crop, and only late rice, which suffered in the eastern submontane districts from the rainless October, shows a very poor return with 60 out of a normal 100. There are again indications that the valuable showers received in November have resulted in a very large rabi area.

§12.—Health.

12. All divisions have commented with satisfaction on the great improvement which has taken place in the public health during the year under report. The mortality from all causes has decreased by the enormous figure of 560,882, and the tale of death due to plague fell from 344,087 in 1910-11 to only 120,369. The Meerut division, which has suffered so severely both from fever and plague in the past, reports a decrease of 124,205 deaths in the 4 plains districts, and this in spite of outbreaks of remittent and dengue fever in the Meerut district, the latter malady having appeared after an interval of 30 years. In the eastern extremity of the provinces, the other focus of plague, there has also been considerable improvement though the district of Ballia reports 24,538 deaths from this scourge as against 11,696 in 1910-11. One Collector has boldly attributed this remarkable improvement in the public health "entirely to the good crops of the year. Just as the after effects of famine are a heavy death roll, so the effects of good harvests are the opposite." This view is not supported

by statistics, the absence or presence of epidemic disease being the main factor in the death rate, and it is not proved that a good agricultural season acts as a prophylactic against either plague, cholera or fever. The Board have received from many districts remarks appreciative of the good work done by travelling dispensaries, which are gaining the confidence of the people.

§13.—Trade.

13. It is necessary to note that the statistics of trade are only available up to the 31st March 1912, the close of the financial year, and the full effects of the rabi of 1911-12 on the export trade, which appears to have been on an unprecedented scale during the last hot weather, will be displayed in next year's report. There was an enormous improvement in the export trade during the first six months of the revenue year, which was due to a demand by brewers in Europe for Indian barley, to the prospects of a fine rabi, and to some extent to the needs of the Gujarat districts which were suffering from famine. The total exports increased by 177 lakhs of maunds. The increase in imports was far less marked, being just under 9 lakhs of maunds, but the prosperity of the year is well indicated by the fact that the total rail-borne traffic was the largest on record, and increased from the preceding year by 17·6 per cent. Most district officers have commented in their reports on the inability of the railways to provide sufficient rolling stock for the grain in transit, to the great inconvenience and often loss of the trading community. Owing to the favourable harvests of 1911, the exports of food grains rose from 191 to the unprecedented figure of 345 lakhs. The most remarkable rise was in gram and pulse from 39½ lakhs to 91½ lakhs of maunds. The Collector of Meerut mentions the interesting fact that gram is said to be wanted in Europe for cheap biscuits! Exports of *juar* and *bajra* were trebled and went largely to the famine stricken tracts in India. There is once more a large increase of nearly 10 lakhs of maunds in linseed, the area of which has again been increased in the rabi of 1911-12. The imports of cotton goods, of metals, kerosene and salt, all indications of a prosperous year, continued to increase, but not on the same scale as in the previous two years. There has been a further decline in the imports of gram and pulse as a result of the favourable seasons with which the province has been favoured since 1908-9.

§14.—Prices.

14. As a consequence of the brisk export demand, the feature of the year has been a rise in prices of barley, gram and *juar*, which are important food grains. This will be apparent by a comparison of the average Cawnpore price at the end of September 1911, with the highest and lowest prices recorded in selected markets at the end of September 1912, as shown in the accompanying table in seers per rupee:—

Crop.	Price in Cawnpore, September 1911.	Prices current, September 1912.	
		Highest.	Lowest.
Wheat ...	11·75	11⅘	13¼
Barley ...	18·00	15	17
Gram ...	18·00	15⅝	20
Juar ...	18·00	14½	18½
Rice ...	8·00	* 5	9½
Maize ...	*20·00	20	25½

* October price; September being blank.

The highest price at the end of September 1912 would correspond with the price in the Cawnpore market, so that the upward tendency is very clear. It is noticeable that *juar*, which is usually the cheapest grain, never fell below 20 seers, and this was doubtless due to the export above referred to. In the previous year its price had varied between 21½ to 23 seers. Barley, which has been cheaper than gram for some years past, remained uniformly dearer during the year under report, in spite of the abundant harvest. The upward tendency in prices means prosperity to the agricultural community, but complaints are heard that the cost of living is greatly increased to the classes who are supported by a fixed wage.

§15.—Agricultural stock.

15. Generally speaking the condition of agricultural stock during the year was satisfactory, the only severe outbreak of disease being reported from the Kheri and Lucknow districts. In the former district taqavi had to be given to renew the plough animals, and a

special veterinary assistant was deputed in the latter. The practice of removing the skins of animals which had died of contagious disease was found to have spread the infection in Kheri, and measures were taken to prevent it. There was great scarcity of fodder in the Agra and Meerut divisions, particularly in Muttra and Bulandshahr districts, and in Fatehpur also taqavi was found necessary to replace depleted stock.

§16.—Statistics of holdings. Statements XXXIV-A and XXXIV-B. (1) General.

16. The total holdings area decreased by 187,340 acres in Agra, and by 41,834 acres in Oudh, in consequence of a decline in cultivation owing to the drought of July and August 1911, the cultivated area of the province having dropped by 659,325 acres, or 2 per cent., compared with the preceding year's figures. The decrease in the total holdings' area is shared by all divisions except Gorakhpur, where a slight increase of 2,866 acres took place. The chief variations in classification are the following :—

	Acres.
In Agra.	
Sir	—37,293
Khudkasht, &c.	—19,015
Exproprietary tenants	+10,976
Occupancy	—37,137
Non-occupancy for 12 years or more	+129,945
Non-occupancy on 7 years' lease	+21,538
Non-occupancy for less than 12 years	—254,200
In Oudh.	
Sir	—4,457
Khudkasht, &c.	—4,308
Free of rent	—11,703
Ordinary tenants	—22,745

It should be noted that complete figures for 1911-12 have not been received from the Fatehpur district in consequence of settlement operations, and the figures of the preceding year have been taken to complete the provincial total.

(2) Proprietors' cultivation.

In Agra the area under *sir* shows a general decline, as fresh rights cannot accrue. The decrease in *khudkasht* mainly occurred in the Jhansi division, where the total cultivated area fell off considerably. In the remaining divisions the variations in *khudkasht* area are unimportant.

(3) Occupancy rights.

The increase in exproprietary holdings is almost general but small in amount. The area under occupancy tenants in Etawah increased by 45,021 acres owing to revision of records; elsewhere there is the usual decline in the figures recorded, a consequence of the fact that the patwari cannot *suo motu* change the designation of a tenant from non-occupancy to occupancy. Under non-occupancy tenants for 12 years or more the increase is general, save in Etawah, where a decrease of 47,280 acres was recorded.

(4) Long term leases.

The area held on seven years' leases also shows an increase, which is shared by most districts. Bulandshahr alone shows an important decrease of 9,540 acres, owing to the expiry of existing leases. The decrease of 254,200 acres under non-occupancy tenants for less than 12 years is partly due to the increases under the two heads just mentioned, and partly to the reduction in cultivation already referred to.

(5) Oudh holdings.

In Oudh the decrease under *sir*, *khudkasht* and ordinary tenants is due to the slight falling off in cultivation, while the resumption of land held free of rent, chiefly in Sitapur and Bara Banki, accounts for the decrease under this head.

§17.—Rental demand and collections. Statements XXXIV-A and B.

17. The total rental demand for the United Provinces shows an increase of 40 lakhs of rupees, cash rents having risen by 13 lakhs of rupees, grain rents by 19 lakhs and siwai income by nearly 8 lakhs of rupees. The increase in cash rents is proportionally much the same as in previous years. The rise in grain rents and siwai is attributable to favourable harvests and better prices.

The percentage of total collections (current and arrear) rose from 88 to 93 in Agra, and from 96 to 99 in Oudh. The following table shows by divisions the proportion of recorded collections to the year's demand :—

	1318 F.	1319 F.
Meerut	90	96
Agra	84	92
Rohilkhand	88	94
Allahabad	86	92
Jhansi	86	93
Benares	85	87
Gorakhpur	93	94
Lucknow	95	99
Fyzabad	97	99
Provincial average ...	90	95

Taking the figures by districts, the percentage of recorded collections to total demand in Jhansi fell off from 92 to 91, in Ghazipur from 96 to 93 and in Azamgarh from 95 to 94; in Muttra, Bijnor, Ballia, Rae Bareli, Fyzabad, Gonda, and Partabgarh it was the same as in the preceding year, but in all the remaining districts it was higher. The year was favourable to collections, as the harvests were satisfactory and prices higher than in the previous year.

CHAPTER II.—FINANCIAL.

§18.—Total demand and collections.

18. Exclusive of nominal items, the total demand from all sources of income during the year of report amounted to Rs. 8,46,51,233, compared with Rs. 8,48,97,385 in the previous year. This difference is accounted for mainly by a further decrease of Rs. 1,90,124 in the arrear demand of fixed land revenue, and of Rs. 1,10,095 in the sums due for taqavi under both Acts. The demand has decreased generally, and in canal rates there was a small increase. Collections amounted to Rs. 8,41,59,111, leaving a balance of Rs. 4,87,120, of which Rs. 65,841 are accounted for by suspensions both of land revenue and of agricultural advances.

§19.—Land Revenue. Statements I, II, and III. (a) Demand.

19. Land revenue accounts are shown in the three statements I—III, which deal respectively with the land revenue on the roll, the outstanding arrears and the new items of the year which have not yet been brought on the roll. The gross demand for the year was Rs. 6,49,31,619, consisting of the following items :—

	Rs.
Current demand of land revenue on the roll	6,49,00,001
Arrears from 1910-11	14,845
Land revenue not on the roll	16,773
	6,49,31,619

The real enforceable demand during the year amounted to Rs. 6,48,30,072, being the gross demand minus the reductions made on various grounds during the year which according to rule are shown as nominal items in column 7 of each statement. The largest of these items were Rs. 37,342, a decrease on account of diluvion, and Rs. 26,434, reductions under the Bundelkhand quinquennial assessment rules. Owing to the very small balance of Rs. 16,552 outstanding from previous years, the net demand was Rs. 2,35,921 less than in the previous year, when the balance brought over exceeded two lakhs.

(b) Collections.

The total collections were Rs. 6,46,51,236, leaving apparently a large balance of Rs. 1,78,836 to be accounted for. In reality only Rs. 6,830 have actually to be collected in the succeeding year, the book balance being made up of remissions amounting to Rs. 1,54,678 in the districts of Muttra and Fatehpur and in the Bundelkhand division, and of suspensions amounting to Rs. 17,326 in Muttra and Fatehpur. The Muttra remissions were due to the failure of the kharif and reductions by revision of assessment. In Fatehpur the excessive rain at the end of the year made remissions of Rs. 4,915 and suspensions of Rs. 3,002 necessary. In the

Bundelkhand districts Rs. 27,295 were remitted on the ground of damage caused by drought, hail and fire. The small item of Rs. 2 shown in column 5, statement I, as outstanding in Gorakhpur, is entirely nominal, being the land revenue of a mahal which has been constituted the property of Government. Collections may therefore be considered as practically cent. per cent. on the realisable demand, and testify to a prosperous and easy year. Pilibhit is responsible for Rs. 6,189 out of the total balance of Rs. 6,830, and this is explained as simply due to the late announcement of the demand in mahals that came under periodical revision.

§ 20.—Malikana. Statement IV.

20. The malikana demand was collected in full, as the only balance of Rs. 203 in Allahabad was remitted. There was a trifling increase (Rs. 469) in the amount remaining undistributed, which rose from Rs. 52,015 to Rs. 52,484, but disbursements have improved generally in districts. Aligarh and Gorakhpur are the exceptions. In the former case the balance has risen from Rs. 5,946 to Rs. 10,079 but no less than Rs. 3,238 of this belongs to the one large estate of Awah in the Etah district. In Gorakhpur there is the usual explanation that the doles are so insignificant that it is not worth while to claim them till they have increased by accumulation.

§ 21.—Canal rates. Statements V and VI.

21. The effect of the drought in the early part of the 1911 monsoon is clearly seen in the enhanced demand due as canal rates from both occupiers and owners. The bill of the former increased by Rs. 2,40,981, and of the latter by Rs. 20,650, arrears from the preceding year being in each case included. The increase is most marked in the Meerut* and Agra divisions* where the drought was severest, but there is a decrease in Rohilkhand attributed to the good rains at the end of the monsoon and also in the Jalaun district. The amounts for collection were large, being Rs. 76,12,140 for occupiers' and Rs. 1,66,097 for owners' rates. The Board note with satisfaction that the real balance for collection in occupiers' rates, which for the last two years has exceeded Rs. 40,000, is now down to the insignificant figure of Rs. 1,702, while owners' rates were realised in full. Great efforts were made to achieve this result in Muttra, where the matter received the Collector's personal attention. He has found it necessary to explain to the cultivators, through his tahsildars, the rules for remission of water rate contained in paragraph 208 (17) of the Irrigation Manual, and this procedure might give useful results elsewhere also.

§ 22.—Local rates and cesses. Statements VII–X.

22. The total demand for local rates and cesses (including arrears) was Rs. 69,01,854, which is Rs. 51,030 less than the demand in 1910-11, a small variation which needs no comment. Collections were practically made in full, the nominal balances representing deductions from the demand owing to land acquisition, diluvion, or other causes. Pilibhit only shows a recoverable balance of Rs. 617, which is the necessary concomitant of the land revenue balance above referred to. The balances shown against Ballia and Ghazipur in statement VIII are nominal and have been remitted.

§ 23—State properties. Statement XI. (a) General.

23. The year opened with 610 state properties on the books of the Board. In the previous report the number had been stated as 608, but 2 properties had been wrongly omitted in Banda. During the year 8 were disposed of and 12 acquired, giving a total of 614 on the 30th September 1912. Of these, the Jhansi division contains no less than 275 and the Province of Oudh has 211. The smallness of the Bundelkhand estates may however be judged by the fact that their total rental demand is only Rs. 38,536, or Rs. 140 for each estate. It is obviously troublesome to manage and to keep in touch with the circumstances of so many small units. The total rental demand for the year was Rs. 3,54,181, showing a slight decrease of Rs. 6,015 from the figures of the previous year. The only rise in the current demand which calls for comment is that from Rs. 9,092 to Rs. 15,621 in the Ghazipur district which was caused by the grant of a new lease of the stud farm and lands in Ghazipur to Messrs. Fox and Aitchison and the transfer of the stud lands proper from the Ghazipur municipality to the control of the Board of Revenue. Similarly, the decrease of Rs. 20,868 in the current demand of the Allahabad district was the result of the transfer of the large estates of Khargapur and Holagarh to

* It should be remembered throughout this report, in comparing divisional totals, that Meerut has lost the Aligarh district to Agra, that Agra has lost Farrukhabad and Etawah to Allahabad, out of which the four districts of the new Jhansi division have been taken.

the same gentlemen as lessees. Collections continue to keep at a high level as was natural in a fairly good year, and realizations were 99 per cent. in reference to the current demand and 93 per cent. of the total outstanding demand. Districts with large balances are Ghazipur (Rs. 6,529), Allahabad (Rs. 5,586), Agra (Rs. 3,306), Lucknow (Rs. 2,186) and Gonda (Rs. 1,703). The explanation in the case of the first two is that the bulk of the sums are due from Messrs. Fox and Aitchison, who pay in large instalments. Sanction has been received to the Ghazipur lease money being paid in arrear, because of the delay in registering the instrument which would have enabled the lessees to enhance rents. In Agra and Lucknow the arrears include large sums which are secured by decrees, and in Gonda Rs. 704 are the unsettled rent of an alluvial mahal and Rs. 596 are secured by decrees though some portion may have to be remitted as irrecoverable. The establishment charges fell from Rs. 21,051 to Rs. 15,402. This is mainly due to the economy effected in Allahabad by the handing over of the escheated estates to lessees. There was a similar fall in all charges, improvements going down from Rs. 24,635 to Rs. 21,347. The balance accruing to Government, after meeting all charges and inclusive of credits to cesses and land revenue amounted to Rs. 2,74,720 or Rs. 8,943 more than in the preceding year.

(b) **Dudhi.**

The Board have received the report of a prosperous year from the estate of Dudhi. The crop was a full one at both harvests and the cultivated area increased by 231 acres. The current rental demand was Rs. 24,185, of which Rs. 24,125 or practically cent. per cent. were realized. Out of the Rs. 60 balance, Rs. 55 are classed as irrecoverable. Sayar income increased from Rs. 7,469 to Rs. 8,992, as a result of an improvement in the lac lease. All miscellaneous items of income were realized in full, except Re. 1 on account of house rents. There were Rs. 395 in arrears from the previous year, of which Rs. 300 were remitted by the Commissioner and Rs. 14 have been collected. The small outstanding balance is due from sapurdars in impoverished circumstances, and remissions will probably be necessary. The expenditure on improvements continues to increase, being Rs. 12,148 against Rs. 10,622 of the previous year. Repairs and constructions of bandhs and wells absorbed nearly one quarter of this, and the bridge and the shed at Mundi Semar referred to last year are still under construction. It is satisfactory to find that practically all the money budgetted for improvements was expended. Education charges fell from Rs. 5,458 to Rs. 3,570, the normal figure as the Rs. 2,000 contributed to the mission school building last year was extraordinary. Sixteen schools continued to be supported and the attendance again rose from 466 to 474. Some members of the aboriginal population are also being trained in the Patwari school at Mirzapur. The net income at the close of the year showed again a handsome increase, being Rs. 15,240 as against Rs. 12,538 reported last year. The condition of the estate is therefore most prosperous; health has been good in spite of a slight outbreak of cholera. As the Collector remarks, Dudhi has never been visited by plague. The proposals for extending the Land Alienation Act to tracts held by aboriginals were completed during the year and are now before Government.

§ 24.—**Miscellaneous land revenue receipts.**
Statement XII.

24. Under Miscellaneous Land Revenue Receipts the following items, mutation fines (levied under section 58, Act III of 1901, for failure to report transfers), fines and forfeitures of Revenue courts, and the rent paid by railways for lands and buildings temporarily occupied, are shown as Imperial, i.e. they are divided between the Imperial and Provincial exchequers. Under the head Provincial is included Partition fees only. Out of a total demand of Rs. 1,31,367 under Imperial, no less than Rs. 1,28,121 are due to mutation fines. This troublesome item of account is steadily decreasing, a further drop of Rs. 22,674 being remarked on the figures of last year. Since 1908-9, when the accounts were first separately reported, there has been a drop of just half a lakh. Under the rules, the signatures of the parties concerned in a transfer, if made on the patwari's report count as a formal legal report on their part, but sufficient trouble is not taken to ensure these signatures being obtained. The Board are considering whether means may be adopted to improve the procedure. The Government has recently approved of a delegation to sub-divisional officers of the Collector's power to remit fines. There has been a great improvement in collections, the provincial balance being only Rs. 8,688, 17 districts showing a clean sheet, and 10 others having balances of under Rs. 100. The

balances in Basti (Rs. 1,458), Mirzapur (Rs. 1,359) and Moradabad (Rs. 721) alone call for comment. In Basti Rs. 815 are classed as irrecoverable, in Mirzapur Rs. 941 are capable of being realised, and efforts are being made to collect that amount as soon as possible, while in Moradabad the balance is said to consist mostly of small items. It seems likely that many of these might be subject to remission. Fines and forfeitures amounted to Rs. 2,155 which were collected in full, while there was a balance of Rs. 529 due from the Bengal and North-Western Railway for rent of lands, out of a demand of Rs. 1,091. This sum is realised at the end of the railway half-year.

There has been a slight fall of Rs. 14,472 in the demand for partition fees, which was Rs. 2,55,585, of which Rs. 2,21,806 were recovered. Large balances are inevitable where there are long and complicated cases because half the costs are not leviable till the conclusion of the proceedings.

§25.—Sale of waste lands, &c. Statement XIII.

25. There was no sale of confiscated, escheated or waste land during the year under report and statement XIII of the appendices is therefore blank.

§26.—Agricultural advances. Statements XIV and XV. (a) General.

26. The year opened with an outstanding balance of principal amounting to 60·39 lakhs under Act XIX of 1883, and to 18·45 lakhs under Act XII of 1884. The footnote to column 1 in each statement explains why these figures differ from the balance reported at the end of the previous year. During the year new loans, (including sums taken from the treasury but not disbursed), were advanced to the extent of 7·24 lakhs under Act XIX, and of 22·58 lakhs under Act XII, thus raising the total to be accounted for to 67·63 and 41·03 lakhs under each Act respectively. The new loan figures for the preceding year were 4·52 lakhs for Act XIX and 13·85 lakhs for Act XII, and it therefore appears that there has been a considerably increased demand under both Acts, the causes of which will be discussed below.

The important items of the year's accounts for land improvement loans (statement XIV) may be summarised as follows :—

	Lakhs.
(1) Net demand of instalments due, including interest, (column 9) ...	12·79
(2) Actual collections out of (1) (column 10)	12·08
(3) Balance of (1) over due (column 11)	·71
(4) Surplus or advance collections (column 12)	·62
(5) Total receipts [items (2) and (4)] (column 13)	12·70
(6) Balance of principal outstanding at the close of the year (column 20)	59·10

Similarly summarising statement XV for the agriculturists' loans we have—

	Lakhs.
(1) Net demand of principal due (column 9)...	23·83
(2) Actual collections out of (1) (column 10)...	21·09
(3) Balance of (1) overdue (column 11)	2·74
(4) Surplus or advance collections (column 12)	·20
(5) Total receipts including remissions (Rs. 23,357) and refunds of undisbursed allotments (Rs. 63,275) (column 15)	22·15
(6) Balance of principal outstanding at close of the year ...	18·88

In spite of largely extended dealings under both Acts it is highly satisfactory to note that the outstanding principal under Act XIX has actually decreased, and that under Act XII has only increased by about Rs. 27,000, though the advances made were 9 lakhs more than in the previous year.

(b) Advances under Act XIX.

The Board have in general received much satisfaction from a perusal of reports which show that the liveliest interest has been taken by many district officers in the extension of masonry wells by loans under Act XIX. A special appeal was made in the Board's report last year, and the views of the Government expressed in paragraph 6 of the resolution were further impressed on district officers, with the result that in a year of rather more than normal prosperity, and without the stimulus of bad seasons, advances for permanent land improvements have gone up from Rs. 2,89,933 in 1910-11 to Rs. 5,61,800, a rise of nearly cent. per cent. Oudh on the other hand shows a small decrease, though its position may be said to be fairly well maintained. The three divisions of Meerut, Agra, and Jhansi return remarkable figures ; in the first-named loans have increased by five times, in the second and third they have been more than doubled. The Commissioner of Meerut, (Mr. Holms), responded to the remarks of the Government resolution by reviewing the

whole position in each district, except Dehra Dun, and estimating the amount which might yearly be spent on pakka wells, and in Jhansi Mr. Ferard has considered the whole question of taqavi in its bearings on Bundelkhand at a Collectors' conference. The view at which the Board have arrived after comparing the results attained in each district is that advance in the extension of masonry wells depends mainly on the personal interest taken by Commissioners and district officers in the matter. The result of this personal interest has been strikingly manifested in the figures of Bulandshahr, where Mr. Humphries has raised the loans from Rs. 13,560 to Rs. 1,22,348, in those of Banda where Mr. Swann has most energetically pushed the construction of bandhis and distributed Rs. 1,20,076 against Rs. 32,077 and particularly in those of Muttra, where Mr. Dampier has used taqavi distribution with the deliberate intention of meeting the agricultural and economic needs of a depressed tract. The figures of Budaun, Aligarh, and Etah also indicate interest and energy on the part of district officers. The large rise in the Rohilkhand figures is due mostly to efforts made in Budaun, while Pilibhit is conspicuous by reporting no advances whatever. The Moradabad figures will improve in the next report, as large demands were made at the close of the year, for which the Board were able to make the necessary allotment.

The reason alleged for the small advance in well construction which is apparent in the Oudh figures is that landlords as a class are apathetic or hostile. The real difficulty is no doubt connected with the Oudh Law on the subject of improvements, which makes it possible for landholders to withhold consent to the construction of a well unless the tenant agrees not to claim compensation. Though such an agreement would not be binding in the courts, the tenant does not know this, and his liability to ejectment at the expiry of his statutory period makes it disastrous for him to take any steps against the landholders' wishes. The Board think that the grant of advances for wells in Oudh should be stimulated. This can be done by pointing out to landholders the short-sightedness of the policy which prevents the permanent improvement of their land. The Commissioner of Fyzabad has promised special enquiries into the subject, and the Board await the results with interest. The large number of wells made by tenants in Court of Wards estates shows what can be done when tenants are encouraged. Out of 63 new wells for which advances were made in Rae Bareli, the Court of Wards estates were responsible for 52. It is worthy of note that Partabgarh shows a rise from Rs. 32,815 to Rs. 41,835.

In spite of the large total increase in advances, the number of wells constructed has fallen from 2,019 to 1,583, and of those under construction, from 1,859 to 1,854. Some explanation of this is found in the fact that no less than Rs. 1,09,048, were spent on *bandhiyas* in Banda, no small portion of the increase in the Agra Province. The districts which show a noticeable increase in wells either constructed or under construction, are Etah (231), Basti (133), Kheri (99), Jaunpur (97), Bulandshahr (67) and Aligarh (60).

(c) **Advances under Act XII.**

The effect of the late and deficient monsoon of 1911 was to provoke a largely increased demand for funds to purchase seed and cattle when the season proved so favourable for extensive rabi sowings. The demand for seed made itself particularly manifest in the Rohilkhand division, where Bareilly, Bijnor, and Moradabad all took more than a lakh each. In the four Bundelkhand districts, nearly 3 lakhs were distributed almost equally between seed and cattle, and in Banda particularly the opportunity was taken of ensuring a record rabi area. In the Agra division Muttra stands out prominently with a distribution of 2·70 lakhs for seed and 1·47 lakhs for bullocks. The Board found money for Mr. Dampier's well-organised and carefully-supervised distributions, which aimed at dealing with an agricultural crisis caused by the drought of 1911 and the general depression under which the district labours, but annual distribution on anything like so large a scale is to be deprecated. A clear distinction must be drawn between the long-term advances given for permanent improvements and those made for the purchase of seed and cattle, which are ephemeral but inevitable incidents of agriculture. Act XII taqavi, when distributed on a large scale, means innumerable small items which give great trouble in collection, and owing to the difficulty in obtaining proper security and the hardship that results from realising on a joint security, district officers tend to recommend, and the people to expect, large remissions, which cannot fail to be demoralising. In Oudh it is remarkable that more than 3½ lakhs out of the total distributed was for

the purchase of cattle, the Lucknow division alone taking 2·57 lakhs. There was a large demand for seed in Unao, which took 1·23 lakhs out of a total of 1·24 expended on seed in the whole province. No special reason was given in the district report, but it was no doubt used for rabi seed. Kachcha wells are used extensively in the northern and western districts only, and the necessity for them is felt mostly in a dry rabi season. In the year of report only Rs. 12,190 were spent on this purpose, of which Rs. 10,000 belong to Moradabad. In the same district Rs. 18,000 were advanced for sugar factories and Rs. 10,000 were advanced in each of the districts of Gorakhpur and Partabgarh for sugar cultivation. An interesting item comes from Banda, where Rs. 100 were advanced for an English plough.

(d) **Collections of Act XIX advances.**

Collections under Act XIX were remarkably good, being 94 per cent of the net demand. Twenty districts report collections either in full or practically so, and in spite of large new loans the balance overdue has been decreased from 1·49 to ·71 lakhs, or by more than one-half. Muttra and Agra continue to show large balances, though considerable improvement has been effected The attention of district officers should be directed to the reduction of these arrears, which show up unfavourably among the figures of the rest of the provinces. Budaun still has a large balance due from Gunnaur tahsil, but the reduction effected is quite satisfactory. The balance (Rs. 4,541) in Mirzapur is mostly due from the upland tracts, and some remission may be necessary. In Rae Bareli (Rs. 3,026) suspensions were allowed owing to the bad kharif, while in Bara Banki (Rs. 3,685) and Jaunpur (Rs. 2,505) the slackness of particular tahsildars or changes in the personnel are said to be responsible for large balances.

Surplus collections decreased from Rs. 86,589 in 1910-11 to Rs. 61,517 in the year under report. The major portion of these sums represents refunds exacted for breach of conditions, or because works have not been undertaken or completed, but, as is natural in a good year, a not inconsiderable part is accounted for by voluntary payments in excess of the just due. It is obvious that refunds are only called surplus collections by an arithmetical fiction; it may also be said that in effect the realisable demand of the year is increased by these sums, but the simplest way of dealing with and explaining these items is probably that here adopted.

(e) **Collections of Act XII loans.**

The collections of agriculturists' loans were 88 per cent. only of the net demand, but were a great improvement on the 76 per cent. of the previous year. Generally the realisation of the demand, both current and arrear, has been kept well in view by district officers. Districts which still show balances of over Rs. 20,000 are Kheri (Rs. 1,02,567), Mirzapur (Rs. 34,648), Muttra (Rs. 31,449), Agra (Rs. 25,081), and Sitapur (Rs. 25,009). There has been an improvement in Kheri, where also the above-quoted balance must be reduced by Rs. 16,873 remitted, and the Deputy Commissioner promises further proposals for the remission of irrecoverable arrears from the large famine advances when they have been finally separated from recoverable items. No time should be lost over this, as Kheri is far behind other districts in this respect. In Mirzapur the upland tracts are responsible as above stated, and both in Muttra and Mirzapur the Collectors have proposed remissions which will lighten the balance. The balances in Agra and Sitapur continue high, but they have been satisfactorily reduced during the year.

Surplus collections amounted to Rs. 19,694, of which the largest sums are returned from Bareilly (Rs. 8,946), Moradabad (Rs. 5,086), Bijnor (Rs. 1,256) and Jhansi (Rs. 1,149). In Bareilly Rs. 7,214 were voluntarily paid in from one tahsil, and in Moradabad Rs. 5,076 advanced for kachcha wells and repayable in two instalments were repaid mostly in one, as a result of the good rabi harvested by the borrowers.

(f) **Aided works.**

No new sums were advanced for aided works during the year, and the accounts pending are those of the last famine. The year opened with a balance of Rs. 4,98,465, the difference between this and the closing balance previously reported being due to the subsequent inclusion of Rs. 2,055 in adjustment of a miscredit, and of Re. 1 collected in excess. The net demand during the year was Rs. 1,46,559, out of which Rs. 1,37,722 or 93 per cent. were collected. Surplus collections amounted to Rs. 3,283, and the total available for payment of principal and interest was Rs. 1,41,005, of which Rs. 1,10,582 were credited to principal and Rs. 30,423 to interest, the debt outstanding at the close of the year being reduced to Rs. 3,86,116.

§ 27.—Loans under the Bundelkhand Encumbered Estates Act. Statement XV-A.

27. It is necessary to show separately the liquidation accounts of loans advanced to proprietors under section 21 (*a*) (*b*) of Act I of 1903, in which payment is made by the debtors in fixed equated instalments, and those of estates administered by Government, as though settlement was annulled under section 21(*c*). In the latter case costs of management and payment of Government revenue have to be shown, and the demand figures, items (1) and (2), are those of rent and not of repayments of a loan.

Taking first the loans advanced to proprietors, (columns 1 to 6), there was a net demand under equated instalments of Rs. 2,11,489, after deducting small sums in Banda, Hamirpur and Jhansi which were suspended. Collections amounted to Rs. 2,08,889, of which Rs. 4,869 were voluntary payments made in advance. They amounted therefore to 96 per cent. out of the current demand and are remarkably good. Hamirpur alone has a noticeable balance of Rs. 2,592, the explanation of which is the failure of the kharif. In the Allahabad district collections were in full, as was also the case last year. After the total collections had been credited to principal and interest, as shown in column 7, items 10(*a*) and (*b*), the amount of principal still due on the 1st October 1912 stood at Rs. 11,65,317 as compared with a balance of Rs. 13,07,464 at the opening of the year.

Columns 8 to 13 of the statement give the accounts of estates managed by Collectors. There was a net rental demand of Rs. 1,53,732, out of which were collected Rs. 1,50,821 or 98 per cent. There were also surplus collections of Rs. 1,154 which represent amounts paid in voluntarily by the debtors themselves, and without reference to the income from the estate under management. Adding the balance of Rs. 3,550, which was in hand from the previous year, there were Rs. 1,55,525 available for reduction of the debt and for the expenses of management. The latter item inclusive of the Government revenue, was Rs. 69,423, leaving Rs. 50,387 for credit to principal and Rs. 34,229 to interest, with a small balance of Rs. 1,474 at the credit of the estates in the treasury at the close of the year. The principal outstanding at the close of the year was thus reduced to Rs. 5,59,166.

Generally the statement shows the results of a highly prosperous year, and under both heads the result was to reduce the outstanding balance from Rs. 19,17,017 to Rs. 17,24,483. During the year under report the total principal outstanding was reduced by Rs. 13,851 more than in 1910-11.

§28.—Coercive processes. Statement XVI. (*a*) General.

28. The total number of coercive processes used for the recovery of land and other revenue realisable as land revenue was 1,76,012, a decrease of 19,569 on the number of the preceding year, which was itself 20,967 less than the figures of 1909-10. Such a drop is to be expected in a series of prosperous years, but it is interesting to note that in 1905-6, when the Board took up the question of irregular methods of recovery in tahsils, the total number of processes returned was only 42,544, or about ¼ of the present number. This change is the result of the constant attention which district officers, under the direction of the Board, have been devoting to the subject of substituting legal for illegal and irregular methods. The change is graphically expressed in a phrase used by the late Mr. Morgan and quoted in the Board's report for 1905-6 "The tahsildars have been taught that the zamindars must come to the tahsil and that the tahsil should not go to the zamindars." This improvement has not been effected without a great increase of work devolving on the clerical and probably also on the process-serving staff of tahsils, especially in the eastern divisions, where writs of demand and citations to appear are particularly numerous. The Commissioner of Benares has remarked that the safeguard against a reversion to irregular methods is that there should be a staff adequate for regular methods, and in the Gorakhpur division, where even in the present prosperous year the number of citations has increased by 5,385, Mr. Pike writes "that it will be very difficult to carry out this process if the method of service is not supplemented." He has suggested that citations to appear may be served by affixation at the usual residence, a method at present not allowed. The Board have not followed up this suggestion, because there is an obvious difference between a summons requiring a defaulter to appear at the tahsil and pay his dues, and a summons issued in a civil or criminal case. The process-serving

statistics will, however, be examined, especially with reference to the eastern districts.

(*b*) **Land Revenue and Cesses.**

In the following table the processes used in the recovery of land revenue and cesses only are compared for the last two years:—

Writs of demand.		Citations to appear.		Warrants of arrest.		Attachments of moveable property.		Attachments of immoveable property.		Transfers.	
1910-11.	1911-12.	1910-11.	1911-12.	1910-11.	1911-12.	1910-11	1911-12.	1910-11.	1911-12.	1910-11.	1911-12.
3,042	2,396	83,064	82,910	8,253	8,029	5,078	5,042	157	231	1	3

There is a small decline under every head except in attachments of immoveable property and transfers. There were 93 attachments of immoveable property in Moradabad, which accounts for the large rise, 54 being of villages belonging to one family which is over-burdened with debt, and 21 being necessary to enforce payment from residents in Rampur. These cases are exceptional and only show that the district officer has been paying proper attention to the collection of revenue. In no case was immoveable property brought to sale. Only 1,112 persons, against whom a warrant of arrest was issued, were actually detained. The Board are satisfied that proper attention is being paid to the methods of collecting land revenue, but there seems a growing tendency to resort in the first instance to the citation as exercising a distinct pressure on the defaulter rather than to the writ of demand. The Board agree with the Commissioner of Agra in thinking that the milder form of reminder might be more generally used in the first instance. It is necessary also that the aim of coercive process, especially of the lighter forms, should not be lost sight of, which is that the public being taught lessons of punctual payment may no longer require pressure. The figures for the Gorakhpur division show at present that 32,489 citations were issued to collect the revenue in 30,824 mahals.

(*c*) **Other demands.**

Of other dues which are realisable as land revenue, mutation fines entailed the issue of 34,660 writs of demand and 4,251 citations to appear. As the issue of a writ of demand is essential to the case, and there were no less than 8,823 attachments of property, it appears that the writ of demand is ineffectual in at least one case out of every four.

Arrears of taqavi were realised by citations to appear (9,967), only 381 writs being issued, warrants of arrest (1,112), attachments of moveable property (3,577), attachments of immoveable property (55), transfers (1), sale of moveable property (383) and sale of immoveable property (17). There is a general falling off as compared with the corresponding figures for last year, and district officers report that realisations were easy. Other heads of revenue are trifling and need no separate comment.

§29—**Estates under direct management.**

29. At the beginning of the year 250 estates were under attachment. During the year 361 were attached making a total of 611 under management at some time or other during the year. The total does not vary much of recent years, being 590 in 1909-10 and 584 in 1910-11. Large numbers are attached for a very short time, 443 passing through the accounts in the course of the year and 168 were still under management on the 1st October 1912. Arrears of land revenue in one form or another accounted for 258 of the attachments, and 102 were necessary under section 45, Act III of 1901, for default in appointment of a lambardar. There was one attachment under the Criminal Procedure Code. The only noticeable figures in districts are 93 attachments for land revenue in Moradabad and 34 in Sultanpur. The causes of this action by the Collector are discussed in paragraph 28 above. In Aligarh there were 37 attachments for failure to appoint a lambardar and 19 in Jhansi following on 21 and 16 respectively in last year's figures. In one district it was discovered that this cause had kept a small estate yielding an income of only Rs. 78 under attachment for 6½ years. There were no annulments of settlement during the year.

The total demand was Rs. 1,65,442, out of which 81 per cent. were collected, a marked improvement on the percentages, 73 and 72·7, of the preceding two years. In some districts the percentages of collections were very poor, Lucknow (8), Shahjahanpur (14) and Mirzapur (42), for which no explanation is given.

The cost of management amounted to Rs. 12,106, or 7·3 per cent. of the demand, which is slightly higher than the cost reported last year. Of the net balance Rs. 81,950 were credited to land revenue and cesses, and Rs. 3,713 to the principal and interest of taqavi debts.

§ 30.—Alterations in the land revenue demand. Statement XVII.

30. The land revenue borne on the roll on the 1st October 1912 was Rs. 6,49,07,723, which gives a net increase of Rs. 7,722 accrued during the year under report. The gross increase was Rs. 1,34,586, of which Rs. 10,877 is due to progressive enhancements and Rs. 85,219 to the quinquennial revisions of assessment in Bundelkhand. Against this there was a decrease of Rs. 1,26,864, the chief items of which were Rs. 57,227 due to revision of assessment in Muttra, Rs. 29,714 on account of revision under the Bundelkhand assessment rules and Rs. 39,923 due to diluvion and other causes.

CHAPTER III.—LITIGATION UNDER THE TENANCY LAWS.

§ 31.—Agra litigation. Statements XX-A and XXI-A. (i) General.

31. The total number of new cases of all kinds instituted in the province of Agra during 1911-12 was 385,014, an increase of 48,158 on the previous year's returns. There was a general increase in all classes of cases except those shown in columns 12 and 14 of statement XX-A. In divisions, only Jhansi and Benares show small decreases of 295 and 1,666, respectively, on the mass of litigation, while all others show increases, and these are most remarkable in Rohilkhand (18,228) and Agra (13,385).

(ii) Suits for arrears of rent.

Arrears of rent cases numbered 168,627, and form the largest item of litigation under the Tenancy Act. There was an increase of 1,824 which amounts to a little more than 1 per cent. The increase is not uniform, two divisions, Allahabad and Benares, showing decreases of 2,249 and 2,212, and the three divisions of Gorakhpur, Agra and Rohilkhand showing increases of 2,722, 1,695 and 1,633, respectively. The most marked variations in districts were in Budaun (+2,546), Gorakhpur (+1,972), Allahabad (−1,184) and Mirzapur (−1,074). The general explanation of an increase is that the excellent *rabi* harvest combined with a fair *kharif* gave a better prospect of realising arrears, and of a decrease that no pressure was necessary owing to the good seasons. From Budaun however the increase is said to be due to the indifferent *kharif* harvest and the failure of the cotton crop. It must be recognised that different causes, agricultural and economic, are operative in different districts, and it is largely futile to seek formulæ of general application. In Gorakhpur the increase follows one of 613 in 1910-11, and the Collector is of opinion that there is resistance on the part of the tenants to the attempts of the landlords to realise more than the legal rent as recorded in the papers. It is well known that recorded rents in Gorakhpur and Basti fall much below what is realised in practice, and the fact that 31 per cent. of rent cases are decided in Gorakhpur district with contest as against a general average of 18 for the province as a whole, gives support to the Collector's view. The Board will express their views on illegal and unrecorded rental payments later in this report. On the whole, however, rent cases are largely to be considered as a process of collection which is freely resorted to in a good year. It is reported from one division that as many as 70 cases were disposed of by a tahsildar in one day.

(iii) Ejectment for arrears.

There was an increase of 2,396 in the applications for ejectment under section 59, but the number of ejectments ordered fell from 9,933 to 8,348. This indicates that tenants were able to pay up the arrears. The area affected was 44,382 acres, which was 5,292 acres less than in 1910-11, and shows a large decline from 58,114 acres in 1908-09. The inference is that the position of the tenantry has been strengthened by the good seasons. There was a further fall of 7,176 acres in the area from which occupancy tenants were ejected.

(iv) Distraint.

There were 2,461 suits arising out of proceedings in distraint. This is a rise of 382, but it calls for no comment because the returns for 1910-11 were abnormally low. In 1909-10 the number was 2,649.

(v) Suits for arrears of revenue and profits.

There has been an increase of 1,216 in the number of suits for arrears of revenue and profits. There was a large rise of 451 in Gorakhpur and of 158 in Basti.

(vi) Resumptions.

The number of suits for the resumption of rent-free grants has increased by 40. The total number is only 977 for the province, and the districts showing striking variations from the previous year are Benares (+68), Etawah (+47) and Jaunpur (—55). There were 116 cases in Benares alone, and it is remarkable that they should be so numerous considering that the area of rent-free holdings is only 5,090 acres, while in Gorakhpur, with a rent-free area of 32,996 acres, and in Jhansi with one of 22,748 acres, the number of resumption cases is no more than 5 and 11, respectively.

(vii) Enhancement of rent.

There has been a very large increase of 6,961 suits for enhancement of rent, or 110 per cent. as compared with the preceding year.* The remarkable feature of these statistics is that the increase is practically confined to the three divisions of Meerut (1,653), Agra (2,975) and Rohilkhand (2,103) in the north and west of the province; Allahabad has a moderate increase of 508 and Jhansi of 36, while Benares has a decrease of 289 and Gorakhpur of 20. The increase has followed on a decline in 1910-11, and it is generally to be explained as the result of a very fine *rabi* combined with favourable prospects at the end of September. It is a natural result of a series of good years which have brought prosperity to the tenants that landlords should use their legitimate powers in levelling up rents. Very noticeable increases in the numbers of cases are found in Aligarh (2,030), Bareilly (1,252), Meerut (790), Mainpuri (759) and Saharanpur (737). In Aligarh institutions rose to eleven times, and in Bareilly to four times, the corresponding figures of last year. There is the general economic cause above referred to which is accentuated in the Meerut and Agra divisions by the check which institutions received in the preceding year owing to bad prospects, and also the special reason that in parts of Aligarh, Bareilly and Budaun, ten years having expired since settlement, the restriction imposed by section 41(3) of the Tenancy Act has been removed. It is also an ascertained fact that in the northern Doab, and especially in the Meerut district, the difference between occupancy and non-occupancy rentals is much greater than elsewhere. It is at a minimum in the extreme east. Adverting to the remarkable increase in enhancement cases which has been noticed in Benares division during the last four years, and was the subject of special comment last year, the Board have no confidence that the present year's figures mean more than a temporary check. In Benares district itself the decrease is of three cases only, so that the rise of 124 per cent. which marked the year 1910-11 has been maintained. The Commissioner says, in commenting on the apparent decline, "I very much fear that the reason is that there seems no probability that the courts can deal promptly with these cases." The difficulties under which the Benares staff labour in this matter have already formed the subject of a reference to Government.

(viii) Surrenders.

Applications for service of a notice of surrender on landlords (column 14 of statement XX-A) have decreased again slightly from 13,638 to 13,181. It is worth recording that relinquishments have shown a general tendency to decline in numbers, while ejectment suits have been rising. It is natural to suspect that in some way the statistics of voluntary and involuntary vacation of holdings will be complementary, supposing that the common total remained much the same, but any inference is rendered doubtful by the fact that ejectment cases of all kinds have gone up out of all proportions. The average for the four years ending 1898-99 was 26,405 † relinquishments as against the present year's figures of 13,181, while the

* The figures used for comparison are 13,278 and 6,317, which differ from those shown in the appendices, because the latter are the gross number of institutions and include those cases which, though filed on the first court day in October 1911 and 1910, belong to the previous year's period for filing these cases, the 30th September 1911 and 1910 having been a holiday.

† In calculating this average the abnormally high figures of Jhansi and Allahabad divisions for 1895-96 have been eliminated.

corresponding figures for ejectment proceedings on all grounds are 81,285 and 157,514. In the Jhansi division there has been a decline of 985 relinquishments on last year's figures, and the districts of Cawnpore and Muttra show a fall of 436 and 297, respectively. Noticeable increases are 448 in Mirzapur and 289 in Budaun. Generally it cannot be said that there is any indication of voluntary relinquishment taking the place of the more expensive ejectment by suit. Possibly the agricultural mind is slow to understand the situation.

(ix) Ejectment on other grounds than decree for arrears.

Taking net figures as a basis for comparison, for the reasons explained in reference to enhancement cases above, there has been an enormous increase of 24,449 ejectment suits or 26 per cent. over the figures of 1910-11. The suits filed were 117,055, which is the highest return received since 1900-01. The preceding two years were marked by a decline from the high figure of 105,969 in 1908-09, and the reasons accepted by the Board were a decline in prices or the uncertain agricultural position during the latter part of the monsoon, the period when these suits are filed. These causes were certainly absent, and it will be necessary to invoke others in explaining this remarkable rise. Every division returns an increase, and the noticeable increases are Rohilkhand (8,934), Agra (5,663), Allahabad (4,359) and Meerut (3,817). Rohilkhand not only heads the list in increases, but its total figure of 37,048 is much in excess of any other division and is about one-third of the provincial total. Districts which show an increase of over 2,000 cases are Budaun (2,712), Shahjahanpur (2,528), Agra (2,435) and Basti (2,053). The causes of this almost phenomenal recourse to ejectment may be specified as follows :—(1) the desire to prevent the accrual of occupancy rights which, though always existent, is more in evidence in years of prosperity ; (2) the rise in prices which induces landlords to eject in the hope of getting higher rents among their non-occupancy tenants ; (3) the special desire to prevent any danger of occupancy rights being claimed at the approaching settlements in Muttra, Agra, Allahabad, Fatehpur, Etawah and Basti ; and (4) the rumoured revision of the Tenancy Act which has been referred to by the Collectors of Shahjahanpur and Aligarh. It is apparently thought that a measure will be introduced which will make it much more difficult in the future to get rid of a tenant. The Board accept all these causes as contributory, and unfortunately until landholders will differentiate between good and bad tenants, and allow the former to acquire occupancy rights whilst disallowing the latter, there seems no prospect of this burdensome volume of litigation permanently decreasing. It represents, together with enhancement suits, the measure of the conflicting interests of landlord and tenant. One noteworthy feature in the year's figures is the decrease in Gorakhpur (−1,076) and Azamgarh (−160). The division as a whole would have shown a decrease, had not the Basti returns increased by 2,053. Of recent years the constant rise in ejectment suits, which swamp with work the sub-divisional courts of the Gorakhpur division, has been viewed with some concern, and there was no expectation of a fall. The Collector of Gorakhpur finds no full explanation, but suggests that former figures were swollen by suits of tenants against sub-tenants, and that this class of case has now found its limit. The cause alleged for the increase in Basti is the approaching settlement, one which, as the Commissioner remarks, should have been still more operative in Gorakhpur.

(x) Area affected by ejectment suits.

Though the number of ejectment suits for disposal was so much greater in the year under report than in 1910-11, the number of ejectments actually ordered was 75,831 against 76,744, or 913 less, and there was a corresponding drop of 24,160 acres, or 13 per cent., in the area from which tenants were actually ejected. The reason for this is doubtless to be found in the fact that the number of cases actually decided in the year under report was 1,972 less than in the preceding year.

§32.—Protection afforded by the Agra Tenancy Act.

32. There is again a slight rise from 14,019,468 acres to 14,133,662 acres in the gross area protected from arbitrary ejectment by the growth of occupancy rights, or by the grant of long-term leases of seven years and upwards. This protected area, which was 12,457,697 acres in 1900-01, has continued to rise steadily during the eleven years since the Tenancy Act came into force, and recorded occupancy tenancies now cover 9,158,002 acres against 8,800,543 in 1900-01.

§33.—Litigation in Oudh. Statements XX-B and XXI-B.

33. The total volume of litigation in Oudh remains fairly constant, there being a small rise of 364 cases only, which is less than 1 per cent. There are variations in the classes of

suits which require some comment, but the general drop is assigned by both Commissioners to widespread prosperity. Arrears of rent suits have again fallen by 2,364, and this follows on a similar drop of 2,462 recorded last year. Applications for relinquishment have increased by 961 following on a drop of 936 in 1910-11. The explanations offered for the sudden increase of relinquishments are not convincing. In Lucknow it is said to be due to the good wages offered at the various works in progress, and elsewhere the large mortality from plague and cholera is stated as the cause. On the whole there has been a fall of 1,251 cases of ejectment under both sections 55 and 61, and a fall of 838 in ejectments under section 55 only. But districts show varying results. Hardoi (617), Kheri (524), and Fyzabad (552) show large increases in ejectments under section 55. As usual these variations can often be explained by the action of individual estates, but satisfactory explanations have not in all cases been received, and the Board desire that district officers will note this for the future. Both Commissioners remark that the ejectment procedure is used by landlords with the object of extorting enhanced rents and *nazrana*, on payment of which ejected tenants are immediately readmitted. In Hardoi, despite the large increase in cases, the area of actual ejectment fell from 12,160 to 10,618 acres. This subject of *nazrana* is important enough in the opinion of the Board to claim a separate reference at the close of this report. The only other class of suit which calls for comment is resumption of rent-free grants (column 5 of statement XX-B), which has gone up from 680 to 3,258. This is due to the approaching period of limitation under section 107E(*a*) and the numbers will undoubtedly increase next year, in consequence of which the Commissioner of Fyzabad contemplates the necessity of temporarily strengthening the staffs of districts.

§ 34.—Litigation in Kumaun Statements XX-A and XX-C.

34. The number of suits under the Kumaun rules increased from 446 to 474. In Garhwal there was an increase of 54 under arrears of revenue and profits. Cases instituted under the Tenancy Act in the Naini Tal district (using net figures) were 654 against 745 in 1910-11. The Commissioner remarks with satisfaction that the introduction of this Act into Kashipur has not led to more extensive litigation.

§ 35.—Work in courts of original jurisdiction. (*a*) Agra. Statements XX-D and XXI-A.

35. The year opened with a pending file of 93,210 suits and applications under the Tenancy Act in the province of Agra; during the year there were 385,014 new institutions and the total for disposal was 478,224 as contrasted with 438,920 (revised figures) of the preceding year. At the close of the year 126,870* cases remained pending, but this is not the net balance of the year's work because it includes ejectment cases (99,457) and enhancement cases (13,734) which of necessity stand over for enquiry and disposal after 30th September. Deducting these, the pending arrears are 13,679, or 1,363 more than the corresponding figure of 1910-11. Even after making full allowance for the all-round increase in litigation which has been noticed above these results cannot escape criticism. Twelve districts show pending files of more than 500 in the classes which admitted of disposal during the year, and in Benares (1,016), Gorakhpur (811), Meerut (764), Cawnpore (696), Budaun (679) and Aligarh (660), the figures are noticeably high. In Benares the pending arrears have increased by 298, and this in spite of the fact that the outturn of work was better by 304 cases. The Commissioner deplores the insufficiency of the existing staff to cope with the work which is blocked by enhancement suits. No explanation is given in Gorakhpur of the large rise of 303 in pending arrears, but it may be concluded that the large rise in institutions hampered the courts. In Cawnpore and Meerut the state of the file remains much the same, but in Budaun it is satisfactory to note that the staff has risen to the occasion and reduced the large arrears by no less than 250. An increase of 205 in the outstanding file of the Aligarh courts is due to the large number of institutions, and to a decline of about 4 per cent. in the amount of work turned out during the year. The explanation of the arrears in Farrukhabad, which have grown at a bound from 278 to 590, an increase of 312, is doubtless that institutions increased by 2,269. The Board draw the attention of district officers to these figures which demand the special efforts of all concerned towards their improvement. On the other hand the reductions of the pending file in Basti by 241, Mirzapur by 217, Etah by 117 and Bijnor by 102, show that exertions are being made to deal promptly with litigation. The number of cases of all classes pending

* This is exclusive of applications for ejectment, the balance of which is not returned.

for more than three months is 1,074 as against 1,322 of 1910-11. Good results have been obtained in Budaun, where the number of protracted proceedings has fallen from 587 to 134, but in Benares there is an increase from 150 to 406.

(*b*) Oudh. Statements XX-D and XXI-B.

In the province of Oudh the year opened with a pending file of 1,560, and 94,285 new cases were instituted. The balance left over, excluding applications for ejectment, was 2,344, an increase of 805 on the corresponding figure of the previous year. The increase is almost entirely confined to the Lucknow division, and Unao returns the very high figure of 607, the reason for which is that, under the Deputy Commissioner's orders, 582 resumption cases have been held over for a fixation of rents after local enquiry during the cold weather. The same explanation accounts for the 187 cases pending in the abovementioned district for more than three months.

§ 36.—Execution of decrees. Statement XXX-B.

36. The statistics of the work of courts in disposing of applications for execution of decrees during the year are satisfactory, and show that attention is being devoted to this branch of judicial work which too often escapes close supervision. The number of new applications was 136,121 or 1,289 more than in 1910-11. In spite of this the pending file was reduced from 15,700 to 12,613. The total amount involved in the 139,208 cases disposed of was Rs. 56·85 lakhs, of which Rs. 26·04 lakhs were actually recovered. The staying of proceedings by the civil courts necessarily delays executions, but there are only two cases pending since 1909 and detailed comment is unnecessary. The Collector of Bijnor has continued to scrutinise execution results in tahsil and other inspections, with the result that pending cases have gone down from 346 to 171, and the interest of courts has been stimulated to improve their returns. In Meerut the Collector has examined cases with reference to the amount of interest decreed, and reports six instances in which the interest exceeded by eight to fourteen times the original debt. Such decrees of civil courts must obviously affect the prosperity of the agricultural community. The Board in quoting these instances of the attention given to this subject desire that district officers generally will interest themselves in furthering the intelligent and prompt disposal of execution cases of all kinds.

§ 37.—Appeals to Collectors. Statement XXII.

37. The total number of appeals preferred in the courts of Collectors during the year was 5,885, an increase of 803, or 16 per cent., on the year preceding. There were therefore, including the pending arrears, 6,454 for disposal. The pending file at the close of the year was 625 showing an increase of 55 and 89 on the corresponding figures of the two previous years. The total number of appealable cases was 118,059 so that about 5 per cent. were taken up to the higher courts, and out of these 3,488 or 60 per cent. were entirely unsuccessful. The heaviest appellate files are found in Gorakhpur (379), Ballia (327) and Budaun (317) for the province of Agra, and in Sultanpur (245), Hardoi (212), Unao (184) for Oudh. Generally the work has been disposed of in a prompt and satisfactory manner, the only district showing a heavy pending file (64) being Moradabad, where also 8 cases have been pending for more than a quarter.

§ 38.—Appeals to District Judges. Statement XXIII.

38. The number of cases appealable to District Judges from the decrees of Collectors and Assistant Collectors of the first class decided within the year was 13,842, and the number of appeals actually filed was 1,872 or 14 per cent. as compared with 11 per cent. in 1910-11. The percentage of completely unsuccessful appeals fell during the year under report from 58 to 56, and the Board note that the standard has dropped again to that on which the Government adversely commented in reviewing the 1908-09 report. There remained 694 cases pending on the civil court files at the close of the year.

§ 39.—Appeals to Commissioners. Statement XXIV.

39. There was a small increase of 269 in the number of appeals filed before Commissioners during the year. The total number was 7,055 out of 71,459 appealable cases decided by subordinate courts, or 9 per cent., which is much the same as in the preceding year. This percentage is low, but is nearly double that of the appeals presented to Collectors, the reason being found in the greater complexity and importance of the cases tried by the higher courts of first instance. Including the pending file of 1,286 the total number for disposal was 8,341, of which 6,922 were decided, leaving a slightly increased balance of 1,356 for the

succeeding year. In considering the statistics of appellate work for divisions in detail the Board fully recognise that mere totals are misleading. Gorakhpur and Rohilkhand have by far the largest number of institutions with 1,375 and 1,312, respectively, and these are in excess of the reasonable limit of 1,100 which is recognised as a fair tale of work for a Commissioner; but the intricacy of the cases dealt with by the Commissioners of Fyzabad and Benares more than outbalance the smaller number (1,069 and 985, respectively) of institutions. Mr. Holms, with experience of both divisions, has said that three Meerut appeals can be tried in the time it takes to try two Fyzabad appeals, and the Board go so far as to say that one Fyzabad case is certainly equal to two Meerut or Rohilkhand cases. This being so, the increase of 251 appeals in Benares and 221 in Fyzabad is serious, and produces a congestion of work which can only be met by the appointment of additional Commissioners during the cold weather. In spite of the fact that the Commissioner of Benares disposed of 245 more cases than in 1910-11, the closing balance increased from 19 to 73, and he points out that the revisional work done as Political Agent for the Benares State is not included in these returns. The result is that inspection and other highly necessary work has begun to be crowded out by appellate work. In Fyzabad the pending file has risen from 74 to 306, and Mr. Holms writes that the file is "more than any Commissioner can dispose of without detriment to his other work." It was found necessary to appoint an additional Commissioner in Rohilkhand at the close of the year under report to clear off the large pending arrears which had increased from 405 to 599 in the absence of Mr. Cobb on leave, and it may be expected that the congestion in that division will have disappeared by next year. In Gorakhpur it is satisfactory to note that the balance is lower than it has been for several years, the Commissioner, Mr. Pike, having disposed of no less than 1,600 cases. The number of appeals transferred to Collectors under section 189 of the Tenancy Act fell from 152 to 67, but the file pending at the close of the year rose from 3 to 5. No appeals were transferred by the Commissioner of Meerut, but one appeal pending before the Collector of Bulandshahr was decided.

The percentage of appeals in which after trial the orders of lower courts were upheld rose from 67 to 70 which is the same percentage recorded in 1909-10. The standard of work is therefore, on the whole, a high one and remains fairly constant. Generally Commissioners comment favourably on the work of subordinate courts, and it is recognised that cases are tried as well as the time at their disposal permits. From the Rohilkhand report it would appear that light criminal work improves the standard of rent and revenue decisions. Hardworked sub-divisional officers would, however, do well to bear in mind what Mr. Holms writes that "more attention paid to the examination of parties and the settlement of precise issues at the start would save time in the end."

§ 40.—Appeals to the Board.

40. Including the arrears of the preceding year there were under the Agra Tenancy Act 875 cases, and under the Oudh Rent Act 586 cases for disposal in appeal before the Board. Out of these, 995 were decided, leaving a balance of 466. Similarly, there were 885 applications for revision under Act II of 1901, of which 728 were decided, leaving a balance of 157. Ten cases were decided under the Kumaun Rules. Out of a total number of 1,733 cases decided in appeal or revision under the various Acts, the orders of the lower courts were disturbed in only 247 instances or 14 per cent. The highest percentage of disturbances was nearly 26 in Fyzabad division.

§ 41.—Honorary Assistant Collectors.

41. No less than nine new appointments of Honorary Assistant Collectors were made during the year against two resignations. The number has therefore increased to 33, of whom 22 are retired Deputy Collectors, and one is a retired Deputy Commissioner. The system has been extended during the year to Oudh where seven appointments were made. The honorary work done by these gentlemen is generally appreciated, and continues to grow in bulk and importance. The Board desire in future that district officers will give detailed returns for each court in the body of their reports, so that this work may be properly estimated. In Moradabad Munshi Muhammad Jan and Saiyid Aulad Husain, Assistant Collectors of the 2nd class, decided no less than 1,081 and 1,074 cases, respectively. The acknowledgments of Goverment are due to these gentlemen for devoting so much time

to the public service. In Bijnor Munshi Muhammad Alamgir Khan decided 774 cases, and in Saharanpur the Collector has again brought to notice the enormous amount of work cheerfully done by Babu Durga Prasad and the great assistance he has been to the district staff.

CHAPTER IV.—SETTLEMENT AND REVISION OF RECORDS.

§ 42.—Regular settlement.

42. The regular revision of the Etawah and Fatehpur settlements continued during the year. The cis-Jumna portion of the Auraiya tahsil in the Etawah district and the Fatehpur tahsil, comprising parganas Fatehpur and Haswa, in the Fatehpur district, were inspected by the Settlement Officers. The rent-rate reports of parganas Auraiya and Fatehpur were received and dealt with by the Board. The assessment statements of Auraiya are under consideration. Satisfactory progress was made with the correction of the maps and the attestation of the records. In the Allahabad district map correction was commenced and the attestation of the records in the Handia tahsil was undertaken: the Settlement Officer joined the district shortly after the close of the year.

Proposals were submitted to the Government regarding the regular revision of the settlement of the Muttra district. The Government, however, have now decided that the revision shall be postponed until the period of the current revenue is about to expire. Map correction has been completed in two tahsils and is in progress in two more, and the question of bringing the records up to date is under consideration.

A proposal to revise the assessment of the Kashipur tahsil in the Naini Tal district was also submitted to the Government and has been sanctioned during the current year. The revenue of the settled villages in the Bhabar has been extended for a year.

The question of resettling the Agra district has been referred for the orders of the Government, while the Board are considering the resettlement of the northern portion of the Pilibhit district.

The Moradabad settlement was brought formally to a close.

§ 43.—Quinquennial revisions in Bundelkhand and the trans-Jumna tahsils of Allahabad.

43. The postponed quinquennial revision of assessment under the special rules for Bundelkhand was effected for the following areas during the year under report :—

Lalitpur sub-division of Jhansi	... Parganas Talbehat, Bansi and Banpur.
Jhansi proper	... Pargana Garautha.
Banda	... Parganas Banda and Pailani.
Hamirpur	... Parganas Hamirpur, Sumerpur Jalalpur and Maudaha.
Jalaun	... Pargana Kalpi.
Allahabad	... Pargana Khairagarh.

It was found that in some cases the rules were not altogether understood. The Commissioner is proposing amendments which will simplify procedure and clear up doubtful points. The net result of the revision was an increase of Rs. 55,505. Revisional operations in parganas Mahroni and Maraura of the Lalitpur sub-division which were due during the year were postponed with the approval of Government.

§ 44.—Miscellaneous.

44. The revision of the revenue in certain deteriorated tracts in the Muttra district was ably carried out by the Collector and his assistants, and reductions aggregating Rs. 57,014 were sanctioned by the Government with effect from the *rabi* demand. The terms of a number of jungle grants in the Gorakhpur district expired during the year, and jamas aggregating Rs. 17,916 against a previous demand of Rs. 10,538 were imposed.

The term of the Markham grant in the Dehra Dun district expired in June. The revenue has been assessed at Rs. 5,850, the expiring demand being Rs. 2,166.

The revenue of the Ambhapur Gandara estate in the Bahraich district, for which an engagement was taken for fifteen years at the last regular settlement, was revised and the demand fixed for the rest of the settlement at Rs. 32,172, an increase of 42·36 per cent.

Steps were also taken to revise the assessment of mill rents in the Kumaun division and the results are awaited.

The revision of the record of rights in pargana Kaswar Raja in the Benares district, which formerly was a part of the Family Domains of His Highness the Maharaja of Benares, was in progress during the year. The attestation of the papers in two taluqas in the Ghazipur district was also undertaken.

§ 45.—Case work. Statements XXVI-A and XXVI-B.

45. Eight hundred and forty-five cases were pending on the 1st October 1911, and 16,000 cases were instituted during the year, or a total of 16,845. Thirteen thousand one hundred and eighty-eight were disposed of and 3,657 remained pending at the close of the year. Of the latter 2,558 cases belong to the Etawah district, where the number of cases instituted has been heavy. Three hundred and sixty appeals were filed, 328 in the courts of the Settlement Officers and 32 before the Commissioner. Two hundred and eighty-five were decided, leaving a balance of 75 to be heard this year, 54 by Settlement Officers and 21 by the Commissioner.

§ 46.—Cost of settlement operations. Statement XXV.

46. The expenditure during the year aggregated Rs. 1,75,421.

CHAPTER V.—LITIGATION UNDER THE REVENUE ACT.

§ 47.—Summary recovery of revenue for lambardars. Statement XVIII.

47. Including 652 cases pending from the previous year, the total number of applications from lambardars under section 184 of the Land Revenue Act for disposal amounted to 2,895. New applications were 35 less than in 1910-11, and some decline was to be expected in a year of prosperity. The amount to be recovered was Rs. 1,03,363, or about Rs. 36 on every application. In the previous year the average worked out to Rs. 40. The percentage of cases disposed of was nearly 80 as compared with 79 in 1910-11, and they are dealt with entirely by the district officers themselves. In the province of Agra the number of applications made during the year decreased from 1,675 to 1,576, but there was a small increase from 603 to 667 in Oudh. Detailed district figures do not vary greatly; Aligarh heads the list with 325, as compared with 282 in 1910-11. In spite of this increase it is satisfactory to find that the closing balance was reduced from 92 to 36. There was an increase in Farrukhabad from 137 to 183, which is explained as the result of separate applications being filed for each item of default instead of one against several defaulting co-sharers. This is the correct procedure, and the Board take this opportunity of reminding Collectors in case it should not always be observed. In Basti the numbers rose from 88 to 129 for which no explanation is given. Of Oudh districts the increase from 50 to 121 in Unao is attributed to the trouble which the Deputy Commissioner has taken to assist lambardars by this section, and the same view is held by the Deputy Commissioner of Rae Bareli, who regretfully remarks that "it is unfortunate from the Collector's point of view that the more efficiently he performs this work the more he has to do!"

§ 48.—Summary recovery of under-proprietary rents in Oudh. Statement XIX.

48. There was a small rise from 2,559 to 2,640 in the number of applications made by superior proprietors for the Collector's assistance under section 185 for the recovery of rents from under-proprietors. The total number for disposal, including a pending file of 205, was 2,845, involving the recovery of no less than Rs. 2,31,734. This gives an average of nearly Rs. 82 on every application, showing that these sums are more important than the arrears of land revenue dealt with in the preceding paragraph. No less than 93 per cent. of the cases were disposed of during the year, and 185, involving Rs. 24,056, were left over. The work is therefore done promptly and the pending balance is noticeable only in Sultanpur (98), the explanation being that considerable difficulty has been experienced in many cases because of the large number of co-sharers and complexity of tenures involved. It is obvious from statement XIX that the taluqdars of the Fyzabad division find the assistance of the Collector much more necessary than those of Lucknow, the number of applications being 2,536 and 104 respectively, and for this the larger number of sub-proprietors in the former division is doubtless an adequate explanation. The Fyzabad district as usual heads the list with 1,199 as compared with 1,032 in 1910-11, and no less than Rs. 10,108 were collected from 152 defaulters in the one estate of Thakurain Sri Ram Kunwar. It would appear that sub-proprietors are more recalcitrant in the Fyzabad division than elsewhere, and most recalcitrant in the Fyzabad district itself.

§ 49.—Mutations in registers of proprietors. Statement XXVII.

49. The total number of changes in proprietary rights recorded during the year, exclusive of the Fatehpur district where figures are not available owing to settlement operations, shows a remarkable rise of 30,135 cases as compared with a fall of 9,927 referred to in last year's report. All classes of transfer except those by private sales of land share in this increase, and in order of numerical importance they are as follows:—Succession (+16,530), mortgage (+8,865) redemption of mortgage (+2,571), and under orders of court (+1,199). The very large increase in changes by succession is perhaps explicable partly from increased mortality in some districts, but it is more the result of special measures which have done much to improve this portion of the annual record during recent years. In Moradabad reference is made to the better reporting of patwaris as the result of enforcing residence in their circles. In Fyzabad sub-divisional officers have made special efforts to secure prompt information, while in Gorakhpur and Basti an amnesty from pains and penalties was proclaimed in order to induce patwaris to report transfers which had been omitted. This resulted in the large increase of 3,580 cases in the Gorakhpur district only. The addition of pargana Kaswar Raja naturally caused an increase in Benares. Lastly, there is the recent change in the rules which now permit parties concerned to sign the patwaris' report of mutations in place of making separate reports themselves. This concession has no doubt increased reports under all classes, but particularly under succession. The large rise in mortgage cases is accounted for mostly in the Gorakhpur district which returns 8,055 out of a total increase of 8,865. The preparation of the subsidiary *khewat* which was mentioned in paragraph 52 of last year's report explains these figures, which have no bearing on the economic state of the district. Elsewhere mortgage statistics call for no remark. The increase of 2,571 in redemption of mortgage cases is indicative of improved conditions, and only two divisions—Allahabad (−75) and Agra (−41)—show a falling off under this class of transfer. Adverting to Oudh figures alone there is a marked difference between a rise of 2,285 only in Lucknow division on all classes of mutation, and one of 6,914 in the sister division. Mr. Holms has examined the figures of mutations for the past three years in the Fyzabad division, and points out that they indicate great differences between the districts, which are due to permanent causes: thus in Fyzabad and Sultanpur, where there is a large body of under-proprietors, mutations average 11,000 or 12,000 per annum, while in Bahraich with its large proprietors they average only 500. Doubtless the reason of the difference between the divisional figures in Oudh is the comparative lack of under-proprietors in Lucknow referred to in the preceding paragraph.

§ 50.—Partitions. Statement XXVIII.

50. The partition file of the provinces has continued to increase considerably during the year under report. There was a large pending balance of 5,662 cases from 1910-11 (revised figures) and 4,509 new applications have been received, raising the total for disposal to 10,171 or 785 more than the corresponding figure in the previous year. Taking each province separately Agra shows a rise of 511 in the total number for disposal, and Oudh of 274. Noticeable increases in new applications in the Agra province are Meerut (+134) and Rohilkhand (+98), while a decrease is found only in Allahabad (−43) and Jhansi (−15). In both Agra and Oudh the bulk of the increase is in imperfect partitions, no less than 476 out of the total of 491, to which Agra contributes 337 and Oudh 139, belonging to this class. As a percentage the increase in the number of imperfect partitions instituted during the year is 17. Viewed as a whole the outturn of work is an improvement on that of 1910-11, since 2,893 partitions were carried out or an increase of 212. The divisions of Allahabad (−85) and Meerut (−23) alone show a falling off in completed partitions. In spite, however, of an increase in cases disposed of, the balance at the close of the year was 6,149, which is 487 in excess of that pending on 30th September 1911. It thus appears that the courts have been able to do no more than just keep pace with their enhanced task. Large pending files are inevitable in partition work, and no less than seven districts have a closing balance of more than 200 cases, the largest being in Gorakhpur (521), but the outturn here has been in every way satisfactory as the pending file has been reduced by no less than 141. Cases undisposed of have increased noticeably in Azamgarh (75), Gonda (70) and Budaun (65). An unsatisfactory year's working is acknowledged in Azamgarh, and it is attributed to the inexperience of

sub-divisional officers, a decided improvement being promised during the current year. In Gonda it is said that a partition inspector is needed, and the Board are prepared to consider formal proposals to this effect. The Collector of Budaun points out that rent and revenue litigation is so heavy in the district that as a rule the pargana officer finds little or no time for partitions.

The Board consider that the courts of the provinces have dealt satisfactorily with partition work as a whole during the year, and since the Government in paragraph 7 of its resolution on last year's report acknowledged that the staff of sub-divisional officers was not so strong as it should be, the necessity for insisting on further explanation of the growing burden of partition arrears is removed. In districts like Budaun and Moradabad, and in those of the Gorakhpur division (to mention only obvious examples), where other case work is overwhelming, the only solution of the difficulty would seem to be that increase in staff which is adumbrated in the Government order above quoted. There has been a careful consideration of the change in system by which sub-divisional officers now do their own partition work, and the Board have received interesting opinions from all district officers and Commissioners. Unanimity was not to be expected, especially as the partition officer for each district had become a settled institution, and there was much to be said in his favour, but in spite of natural conservative tendencies and the real difficulties of effecting the change, the Board have pleasure in reporting that 32 district officers in the provinces think that partitions are better carried out by sub-divisional courts than by one officer for the whole district. One result has certainly been the attention which Collectors have given to the subject in order to direct and instruct courts which were found to be inexperienced. There has been a much closer scrutiny of the work and Messrs. Pert in Unao, Whittle in Sultanpur, Lambert in Bijnor and Hussey in Bara Banki, have devoted much pains to putting the partition file into good order. The Board themselves, though at first doubtful of the effect of change, are now firm believers in the sub-divisional officer system. They agree with Mr. Lambert in thinking that partition work when heaped on one officer must become mechanical, while the local officer can take an interest in the cases of his own pargana. It is necessary in the first place that partition work should be recognised as of the utmost importance, being the creation practically of a new settlement record, and in the second place, that courts should be induced to take the interest in partitions which would necessarily follow on the effort of attention by which the procedure is comprehended, and raised above the dull sphere of mere mechanical routine. The joint village community in its history and various forms is involved in each partition case, and this in itself should be sufficient to redeem the work from the charge of dulness which is so frequently made. Lastly, the Board are aware that one difficulty arises from the divided control of the amin and ahlmad staff. This is a matter which may be remedied by suitable orders in each district, and the temporary attachment of amins to certain courts while work is in hand could be arranged, and, what is of great importance, court readers must be made to take the same interest in partitions as in the other work which they put up.

As is usual reports have been received of ridiculously small pattis formed by imperfect partition during the year. The smallest was ·03 acre in Moradabad, and it is satisfactory to note that the Rule 13 Committee on the Land Revenue Act propose to limit the pattis or sub-divisions of a mahal in such partitions to an area of at least five acres. Partition work done by patwaris continues to be unsatisfactory, and only three districts, Mainpuri, Partabgarh and Agra, report favourably upon it.

51. Corresponding to the general increase in litigation which has characterised the year, the number of new appeals instituted before Collectors under the Land Revenue Act and Kumaun Rules has increased from 5,675 to 6,639, or by nearly 17 per cent. The number of pending cases also has gone up from 876 to 989, and of cases pending over three months from 159 to 203. The following districts show the largest increases in the pending file:—Moradabad (+ 89), Cawnpore (+ 34) and Mirzapur (+ 29). It is satisfactory to find that in the Gorakhpur division, despite a much greater number of institutions, the pending balance has been actually decreased, the cases disposed of in Gorakhpur and Basti being no less than 652 and 415 as compared with 350 and 342 of the

§51.—Appeals under the Land Revenue Act and Kumaun Rules. Statement XXIX.

previous year, respectively. The Board recognise these as the returns of a good year's work. In Commissioners' courts there has been a small increase of 101 in the year's institutions, and with the arrears there were 2,490 appeals for disposal. Out of these, 2,159 were decided, leaving a pending balance of 331, which is less by 51 than the corresponding balance of last year.

§ 52.—Appeals to the Board.

52. Inclusive of the pending file and new institutions the total number of appeals for the Board's disposal under Act III of 1901, was 539, of which 382 belonged to Agra and 157 to Oudh. Of these, 395 were decided, leaving a balance of 144. In 39 cases, or 10 per cent., the orders of the lower courts were disturbed. There were 102 applications for revision, 95 from Agra and 7 from Oudh, of which 87 were decided, leaving a balance of 15. In 7 cases only was it necessary to disturb the orders of the lower courts. There was still one case pending from the Family Domains at the close of the year, which has since been decided.

The total judicial work of the Board during the year was 3,017 cases for disposal, of which 2,231 were decided, leaving a pending balance of 786.

CHAPTER VI.—GENERAL.

§ 53.—Action taken to avert sale in execution of civil and rent court decrees.
Statement XXX-A.

53. With effect from the 1st January 1912 civil court decrees involving the sale of ancestral land have been made over to the Collectors in Oudh for action under Schedule III of the Civil Procedure Code, and the procedure is now uniform in both provinces. Section 20 of the Oudh Laws Act of 1876 has also been amended so that self-acquired land is no longer protected from sale in execution of decrees. An amalgamated Statement XXX-A relating to civil court decrees for both provinces has therefore replaced in the appendices to this report the separate statements which have hitherto been printed. In Agra, inclusive of the pending file, the total number of sale cases went up from 6,804 to 6,938, and 4,402 were completely disposed of, the sale of the entire property being found inevitable in 1,585 cases or 36 per cent. This is a slightly better result than in 1910-11 when the percentage was 39. In 99 cases it was found possible to satisfy the decree-holders by only partial sales, in 35 cases liquidation was arranged for by postponement, in 8 cases the property was farmed, and in 9 it was let on payment of a premium or mortgaged. There were 2,536 cases pending at the close of the year which is an increase of 91 on the opening balance, though less than the extra number of cases received from the courts. Proportionally the figures remain much the same, and the Meerut division has a far larger file of sales than any other.

In the province of Oudh, where there was no pending balance, 1,174 cases were received and only 402 or 34 per cent. were completely disposed of, leaving a large balance of 772. This is of course explained by the fact that the transfer to Collectors took place after the expiry of one quarter of the revenue year. The percentage of cases in which sale was found inevitable was 17 only. In 8, all from the Fyzabad division, a farming lease was arranged, in 1 the decree-holder was satisfied by a postponement, and in 4 the property was let on payment of a premium. The result of the action taken to avert sale of ancestral property in execution of rent court decrees under amended section 20 of the Oudh Laws Act is that sanction was given to sale in 157 out of 334 applications, inclusive of the outstanding balances, and that sales actually took place in 84 cases or 53 per cent. The Board have at present under consideration the question whether it is expedient to move the Government of India to make Schedule III of the Civil Procedure Code applicable to ancestral property which is attached for sale in execution of rent court decrees in the province of Agra.

§ 54.—Acquisition of land.
Statement XXXI.

54. The work of acquiring land for public purposes was very heavy this year as compared with that of the two years preceding, when acquisitions amounted to 7,912 and 7,790 acres only. During the year under review 10,313 acres of land were acquired under the Act, and 339 acres by private negotiations at a cost of Rs. 14,11,811 and Rs. 36,752 respectively. Of the total area 4,594 acres were acquired for railways. 2,852 for canals and 3,206 for other public purposes. The principal railway projects, for which acquisitions were made, were (1) the new Jumna bridge at Saharanpur for the North-Western Railway, (2) the Agra-Bayana line, (3) the Dhaki-Sambhal line, (4) the Pilibhit-Shahjahanpur extension of the Rohilkhand and Kumaun Railway, (5) the Cawnpore-Banda Railway, and (6) the Thawe-Captainganj

extension of the Bengal and North-Western Railway. Large areas of land were acquired for the Canal department in Muttra (Ganges and Agra canals), Jhansi and Jalaun (Betwa and Dhasan canals), and Mirzapur (Sukhra and Ghosi canals). The other miscellaneous works for which land was taken up were chiefly the construction of roads in the Allahabad, Partabgarh and other districts and the agricultural farms in Bareilly, Shahjahanpur, Cawnpore and Allahabad.

As a rule very high prices had to be awarded for the acquisition of lands in the large towns (Aligarh, Agra, Cawnpore and Allahabad). The largest amount of compensation was disbursed in the Lucknow district where considerable improvements to the city were undertaken. Special land acquisition officers were entertained in several districts, notably Meerut and Allahabad, and the Board found no reason to be dissatisfied with the character of work done by these officers, or by the Deputy Collectors who did the work in addition to their ordinary duties. The area relinquished and sold was 257 acres and the price realized Rs. 25,385.

§ 55.—Total work in district offices. Statement XXXII. (a) Correspondence in the Revenue Department.

55. There has been a remarkable decrease of 27,015 in the indexed correspondence received and issued by the English departments of district offices during the year. Since 1910 the heads of offices under the instructions of the Board have been endeavouring to introduce order and uniformity into these returns, and it is instructive to note that the total bulk of correspondence would appear to have been nearly halved since 1908-9. In the year under report many of the labour-saving devices suggested in para. 29 of Mr. Pike's report on district establishment have been adopted so that much ephemeral correspondence and many vernacular papers now pass through the English office without being indexed, files are exchanged unofficially in the same station between different departments and routine matters are being generally dealt with less elaborately. The result is however only an apparent decrease in work and it must be remembered that the exclusion of much that formerly appeared in this statement but was unconcerned with the departments under the Board's control has not done away with it in reality. To take only one instance quoted from Lucknow, the licensing and registration of motor cars has greatly increased work as in fact does each new Act of legislation and each improvement in the detail of the machine of administration.

(b) Cases in vernacular departments.

The statistics given in the statement include all judicial cases which have already been discussed. They have been mostly responsible for the very large rise of 47,370 in the new institutions of the year. Leaving these out of account there was a total of 1,088,959 cases for disposal during 1911-12 as compared with 1,075,886 during 1910-11, the balances from the year previous being in each case included. The cases disposed of were 982,868 as against 947,578 showing an improvement of 35,290, and the pending balance has been correspondingly decreased. In eight districts the new institutions have increased by 2,000 or upwards, and in five there has been a similar decrease, but the only very striking figures are those of Gorakhpur, where new institutions decreased by upwards of 5,000, and in Basti, where they increased by nearly 6,000. No explanation of these figures, which are independent of judicial cases, has been given. The outturn of work in Gorakhpur has been particularly large, and the pending balance is now down to 3,970 or upwards of 12,000 less than it was at the commencement of the year. Mr. Hope Simpson remarks that "These results reflect great credit on the staff, but it is scarcely fair on them to demand a tale of work of this magnitude. All the courts are overworked, and it is not surprising that applications for leave are frequent and a general desire is felt for transfers." In Basti, despite the large increase of institutions, the pending balance was reduced by 937. Azamgarh also shows a marked decrease of 1,101, Farrukhabad of 886 and Shahjahanpur of 833, but on the other hand the pending file has gone up in Almora by 1,217 and in Naini Tal by 1,101, and no explanation has been given in the report.

§ 56.—Assignments, &c., of Land Revenue. Statement XXXIII.

56. The total land revenue of the property assigned or alienated at the close of the year under report is Rs. 2,60,325 as against Rs. 2,58,555 shown in the previous year. The difference is due to additional assignments and to the resumption of a few life muafis on the death of grantees.

§57.—Payment of Government dues by money-order.

57. Information is received by the Board annually on the number and value of land revenue money-orders received in payment of land revenue, local rates and canal rates and also

separately of the number and value of miscellaneous revenue money-orders under which head come remittances which consist mostly of taqavi and excise. The land revenue money-orders have declined from 321,509 to 318,183, and the value remitted has fallen by nearly 2½ lakhs. All divisions in the Agra province show a decrease except Allahabad where there is a small rise of Rs. 26,505. The Commissioner remarks that he is "always sorry to see an increasing tendency to remit revenue dues in this way." On the other hand there has been a small rise of Rs. 9,447 in the value of remittances from Oudh, though the number has dropped from 40,187 to 39,396. The figures show that the average money-order is for just under Rs. 20 in land revenue remittances, and for about Rs. 12 in miscellaneous remittances. The Deputy Commissioner of Bahraich reports that he has introduced the money-order system for the remittance of school fees and pound receipts in order to save school masters and pound muharrirs the journey to and from the tahsil. This seems a useful reform.

§ 58.—Rental money-orders.

58. The rent remitted to landlords by special money-orders increased to Rs. 18,14,292, or Rs. 88,828 more than the previous year's remittances, and reached a higher figure than in any year since the introduction of the system. Rental money-orders are generally recognised as growing in popularity, and, though in some cases their use may be an indication that the relations of landlords and tenants are strained, there can be no doubt that the facility by which a perfectly valid and clear receipt for payments made is obtained through the post office is a sufficient explanation. Rohilkhand division heads the list with 5·60 lakhs, Agra is next with 2·70 lakhs, and Meerut is third with 2·64 lakhs. Among districts Bijnor, Moradabad and Cawnpore are the three where remittances exceed a lakh, and all show an increase this year. The largest variations are in Cawnpore (+Rs. 16,030), and Fyzabad (—Rs. 14,171), while five other districts show differences of more than Rs. 10,000 from the returns of 1910-11. Complete explanations of these variations have not been furnished, and the Board desire that district officers will ascertain in future and report causes where there are large fluctuations.

§ 59.—Maps.

59. At the close of the last revenue year the Thomason College Press had in hand for publication the district map of Ballia and five tahsili maps, viz. one of the Etah, one of the Farrukhabad and three of the Agra district. During the current revenue year five more tahsili maps (one in Farrukhabad and four in the Agra district) were taken in hand, making a total of eleven. All these maps were prepared and issued during the year.

§ 60.—Working of the Bundelkhand Alienation of Land Act.

60. The working of the Bundelkhand Alienation of Land Act will in future be the subject of brief comment in the Board's revenue administration report in accordance with the wishes of the Government of India. It has not been thought necessary to add schedules to the already large number of appendices, on the ground that the Act has been in force 10 years, has fully justified itself, and close examination of detailed statistics is now superfluous. A series of questions which cover the whole ground has been approved by the Board for discussion by Collectors in their annual revenue administration reports.

During the year agricultural tribes have gained from outsiders land paying revenue of more than Rs. 3,000. It is reported that there were two cases in the Jalaun district in which Bania money-lenders secured the property of Brahmans, who had become Bairagi, under the cloak of gifts to religious institutions, and in 3 cases non-agriculturists acquired land from agriculturists by means of pre-emption decrees. This last device for evasion will be impossible if the suggested amendments to the Act submitted during the year are carried into effect. During the year the Board have also made formal proposals to extend legislation restricting the power to alienate land to certain tribes in Mirzapur, and the question of similar action in respect of parts of the Etawah district is under consideration.

§§ 61-62.—Conclusion.

61. There are two administrative questions of great difficulty and so important that the Board desire at the close of this report to give some prominence to an expression of their views thereupon. These questions are:—

(1) the taking of *nazrana* from tenants in Oudh and Gorakhpur on the renewal of non-occupancy leases in lieu of ejectment; and

(2) the present state of the law of alluvial accretion.

With regard to the first problem Mr. Hope Simpson in quoting instances of concealed rent and *nazrana*, estimates that the recorded rental of non-occupancy holdings is not more than half the total income which the zamindar receives from them, and in Oudh the practice of taking periodically a large *nazar* on renewal of statutory periods has long been known, and both Commissioners draw attention to it in their reports. The Board think that the amount of rental concealed in Gorakhpur is overstated, but the *nazrana* is undoubtedly intended to keep the annual rent low, and so affects the interests of Government at resettlement. Beyond this, however, there is something particularly injurious in the character of this method of collecting enhanced sums from tenants. The money has to be borrowed, and a burden is imposed on the tenant out of all proportion to the advantage reaped by the landholder.

It is a condemnation of the Oudh law with its statutory limit of enhancement that it tends to promote such a system of collections. From the point of view of settlement the dilemma is that such *nazrana* is clearly assessable income, but, if it is so treated, the objectionable practice is tacitly legalised, and the Board can say no more at present than that the question of how best to deal with these exactions will call for careful consideration both on behalf of the tenant and the Government.

Turning to the second point Mr. Molony has referred to the "infinite mischief" worked in the Ballia district by the law of alluvial accretion. Proposals have already been submitted to Government regarding the need for boundary marks in alluvial tracts, and the time has come when the entire subject of the law of alluvion should be reviewed by the Imperial Government. As it stands it is a survival of a time when accurate survey was impossible, and land once diluviated on the great rivers of the provinces could not afterwards be accurately identified. Though the question is one which will call for detailed and lengthy consideration, the Board see no reason why legislation should not at once be invoked to exclude from the scope of the alluvial law lands in which there has been no change of ownership in the past.

62. In brief conclusion, the Board present with much satisfaction for the fourth time in succession the record of a prosperous year. The recovery since the famine of 1907-8 has been constant, and even in the seriously depressed district of Muttra the Collector shows that "signs of recovery are manifesting themselves." The feature of the year has been a most excellent rabi harvest which more than made up for a deficiency in the kharif, and the grain has found a ready market owing to an extremely brisk export trade. Prices have ruled high and agricultural profits have been correspondingly great. The results are shown in full and easy collections of land revenue, taqavi and other dues, and by a large increase in litigation.

There has been normal advance on industrial and economic lines. The Rohilkhand division has led the way of recent years in sugar and milling ventures, and this year Bareilly reports the opening of a flour mill and match factory. The sugar manufactures of the provinces should be stimulated upon right lines by the advent of the Government expert, whose assistance has been invoked both in Rohilkhand and in Gorakhpur. In the latter district he has advised both Government and the Hon'ble Mr. F. Mackinnon, who is inaugurating a large enterprise which will be called the United Provinces Sugar Factory. Government has advanced a large part of the capital, and the result should be the organisation and improvement of sugar culture in the Eastern districts. From Lucknow it is reported that a cigarette factory has been started, while a European firm is said to be planning a large tobacco concern. Lastly, improvements in communications are reported generally, and the opening of a new line from Unao to Rae Bareli, of the Gajraula-Chandpur branch in Bijnor, and the survey of a line from Dehra to Rajpur shows that railway extension is not being overlooked.

I have the honour to be,

SIR,

Your most obedient servant,

J. E. GOUDGE,

Secretary.

(a) Correct date shown this year.
(b) Columns 8 and 17 include 28 and 45 cases, respectively in which proceedings were stayed owing to settlement operations.
(c) One less, two cases being treated as one.
(d) Two cases of perfect partition transferred to the file of imperfect partition.
† There were also three cases for union of mahals, one of which remained to be disposed of and in the other two, 4 mahals were united into two.

UNITED PROVINCES).

for the revenue year 1911-1912.

Number of mahals		Imperfect partitions.							Number of pattis.	
Before partition.	After partition	Number of cases pending at the beginning of the year.	Number of new applications filed.	Total for disposal.	Number of partitions actually carried out.	Number of applications otherwise disposed of.	Remaining for disposal.	Date of oldest case pending.	Before partition.	After partition.

Bara Banki	3	1,514	2,845
Total, Oudh ...	160	51,604	76,805
Total, U. P. ...	3,886	2,37,704	2,60,325

NOTE.—(*a*) All the above grants, except 9 acres with land revenue of Rs. 8 assigned to 5 grantees representing the remission of revenue on Goraits' jagirs in jungle grant Keotali in Gorakhpur and coming under the class "For the maintenance of public servants", were made "on other grounds."

(*b*) Difference in figures as shown in this statement and in that for the previous year is due to resumption of a few muafis and to additional assignments.

STATEMENT XXXIV-A.—(PROVINCE OF AGRA).

Statement showing classification of holdings and rental statistics for 1319 *fasli or* 1911-1912.

District.	Area of holdings.					
	Held as sir.	Held by zamindars other than sir, and thekadar's cultivation.	Held free of rent.	Held by permanent tenure-holders and fixed rate tenants.	Held by ex-proprietary tenants.	Held by occupancy tenants with occupancy rights.

a greatly reduced area owing to the character of the season. The area under poppy has also declined and the cultivation at present prices has serious competitors.

4. The trade of the province has been very brisk. Imports of cotton goods, metals, kerosene and salt continued to increase, whilst owing to favourable harvests here combined with a keen demand in Gujarat, exports of food stuffs attained to the record sum of 345 lakhs. A shortage of railway wagons caused considerable inconvenience to the trading public.

5. In paragraph 6 of the resolution on last year's report the Local Government called attention to the need for encouraging the construction of masonry wells and other permanent improvements. His Honour is extremely pleased to see that in the year under report, without any special stimulus, such as might be given by bad seasons, advances for land improvements have risen from Rs. 2,90,000 in the previous year to Rs. 5,62,000. A great part of the increase is accounted for by the construction of small irrigation works in Bundelkhand and especially in Banda, where activity in this direction has been specially marked. While recognizing that the conditions favouring the construction of pakka wells must vary considerably from one locality to another, Sir James Meston is of opinion that in many districts development has been slow. He would be glad to see in those districts an extension of the same interest and energy as has been exhibited in Bulandshahr, Banda, Muttra, Budaun, Aligarh and Etah.

6. Though the total volume of litigation under the Oudh Tenancy Act has remained fairly constant, that under the Agra Act has increased to an enormous extent. Suits for enhancement of rent have increased by 110 per cent. and suits for ejectment (on grounds other than a decree for arrears) by 26 per cent. Largely owing, no doubt, to this increase in institutions the balance of pending cases in courts of original jurisdiction has risen from 93,210 to 126,870. Since the close of the year sanction has been received to an increase in the cadre of deputy collectors, and with a reduction in the pressure of work the Lieutenant Governor hopes that this increase of pending work will not be allowed to continue. The progressive rise in ejectment cases is however a serious matter, and the Lieutenant Governor is disposed to think that the existing provisions of the law require consideration. His Honour is pleased to read that in spite of increasing business the standard of rent and revenue decisions is, on the whole, a high one. In this connection he wishes to thank those gentlemen who as honorary assistant collectors have done so much to relieve the labours of the regular staff. It is to be regretted that partition work continues to increase and that the courts, though showing a larger output, have been unable to reduce the number of pending files. It is observed that the introduction of the system under which sub-divisional officers decide cases arising within their sub-divisions has met with success, though doubts were at first expressed as to its value.

7. In conclusion, the Board have presented an interesting note on the subjects of *nazrana* and the law of alluvial accretion. It appears that the practice of taking fines on renewing or opening a tenancy has spread from Oudh to the district of Gorakhpur. As pointed out by the Board it operates to saddle the tenant with a load of debt and also

prevents the State from obtaining its just dues. Sir James Meston would be grateful to the Board if they would place before Government proposals for the prevention of the evils arising out of the *nazrana* system. The question of altering the law relating to land subject to alluvion and diluvion is already before Government.

8. The Lieutenant Governor desires to thank the officers connected with the revenue administration of the province for their patient and unremitting toil, and is indebted to the Board for an interesting record of the year's progress.

ORDER.—Ordered that a copy of this resolution be forwarded to the Secretary to the Board of Revenue, United Provinces, for the information of the Board.

Ordered also that a copy of this resolution be published in the *United Provinces Government Gazette.*

By order of the Hon'ble the Lieutenant Governor, United Provinces,

R. BURN,

Chief Secy. to Govt., United Provinces.

Report by the Board of Revenue

ON THE

59–60.	Conclusion	30—32

ORDERS OF GOVERNMENT.

No. 1189/I—208 OF 1914.

RESOLUTION.

REVENUE DEPARTMENT.

Dated Allahabad, the 11th May 1914.

READ—

Letter from the Secretary to the Board of Revenue, United Provinces, no. 849/XII—149B, dated the 7th March 1914, being the Board's report on the revenue administration of the United Provinces for the year ending 30th September 1913.

OBSERVATIONS.—For the fifth time in succession the Board's report on the revenue administration of the province reveals the record of a year of prosperity. The monsoon of 1912, though somewhat tardy in its arrival, was accompanied by bright intervals of sunshine which facilitated kharif sowings over a large area. Subsequently there was well distributed rain throughout practically the whole of the province, except the Benares division, where the rice crop suffered considerably from lack of moisture. The damage so caused was intensified by the absence of rain in October. Rabi sowings were delayed and the situation in Mirzapur became such as to justify the opening of test works. Towards the end of November, however, ample rain fell and removed all cause for anxiety. The subsequent rabi, though not so good either in respect of acreage or of outturn as in the previous year was distinctly favourable, more especially in Bundelkhand and Agra, and thus provided in the two areas where it was most wanted an excellent standby for the period of adversity which was to follow.

2. Owing to the nature of the seasons the increase of the rabi at the expense of kharif areas, which has been a progressive feature of the previous four years, did not continue. Kharif sowings showed an increase of 2,629,160 acres over the area of 1911 and were only 2 per cent. below normal while rabi sowings showed a decrease of 2,996,267 acres and exceeded the normal by only 4 per cent. Of particular crops maize and juar showed large increases and bajra a large decrease as compared with the figures of 1911. The new cotton growing tracts, both north of the Ganges and in Bundelkhand, continued to decline, but on the whole there was an increase in the cotton area, and excellent prices were obtained for the crops. The sugarcane area, on the other hand, showed a substantial increase, being now 19 per cent. above normal; and further extension was checked only by the low price of *gur*. As the Director of Agriculture suggests, it is probable that sugarcane has absorbed some of the area which has gone out of poppy cultivation. The rising commercial importance of hemp *(san)* owing to demands for export, has led to increased cultivation of that crop. If the cultivators would take more care about the preparation of this material for the market profits would be still greater. In the case of linseed there was a fall of 352,803 acres. This crop had sprung into great popularity in 1911, especially in the eastern districts, on account of the demand for export, and the result of the increased supply has been a sharp drop in prices so that agriculturists are temporarily abandoning its cultivation.

3. The trade of the province has shown a most remarkable expansion. As compared with the figures of 1911-12, itself a record year, the total volume of rail borne traffic in 1912-13 showed an increase of 24·4 per cent. in volume and 19·7 per cent. in value. The rise in the import trade was especially marked and the imports of cotton goods were the largest on record. An indication of expanding industrial activity is given by the imports of coal and coke which were greater by 7,200,000 maunds than in the previous year. Amongst exports those of grain and pulse were the highest on record, amounting to 52,950,000 maunds, and in the case of sugar there was a further increase of 1,300,000 maunds over the previous maximum. The advance which occurred in exports of raw cotton represented an increase in value to producers of no less than 236 lakhs. The level of prices throughout the year was high and fairly stable until the end of September when there was a sharp rise owing to the poor prospects of the coming harvest. These high prices have brought much benefit to the cultivator but have been accompanied by increasing expenses. The price of cattle in particular has risen to such an extent that in some districts the financial position of the small cultivator is reported to have been seriously disturbed. Unfortunately the past year was an unhealthy one for cattle and rinderpest visited the province in a particularly severe manner. The present scarcity of fodder also will add largely to the mortality. The Lieutenant-Governor trusts, however, that these misfortunes will induce landholders to reserve and develope grazing areas in imitation of the example which has been set by Government in Bundelkhand and in Etawah.

4. The gross irrigated area rose considerably as compared with the previous year. Of this area 57 per cent. drew its supply from wells, a fact which shows how important a place is occupied by well irrigation in the rural economy of the province. In this connection His Honour is glad to see that advances taken for permanent agricultural improvements, most of which are wells, have increased from Rs. 6,99,444 in the previous year to Rs. 8,38,096 in the year under report, and he takes this opportunity of thanking the officers, more especially Mr. Holms, Commissioner of the Fyzabad division and Mr. Humphries, Collector of Bulandshahr, who have contributed to this gratifying result. In Bundelkhand the question of permanent improvements is especially important and it is hoped that the work of scientific embankment will be extended to Jalaun in view of the results which have been obtained in Banda. The question of mechanical pumping has lately occupied the attention of Government and funds have been provided for the construction of two experimental wells and the erection of the necessary machinery.

5. In Agra the flood of litigation under the Tenancy Act abated by about 5 per cent. as compared with the previous year, but ejectment suits, which have increased in number continuously since 1900-01 showed a slight rise over the previous maximum of 1911-12. Of the total of 98,230 ejectment suits for the whole of Agra no less than 14,588 were filed in the district of Gorakhpur alone. As pointed

out by the Board this feature is very probably connected with the concealment of rent and the *nazrana* system, since, in order to secure effective concealment of *nazrana* tenants must be prevented from securing the occupancy status. In Oudh the volume of litigation as usual showed but little change. Arrears of rent suits as in Agra decreased considerably, but there was a large increase in the number of suits for resumption of muafi grants owing to the impending expiry of the period of limitation and the desire to prevent the accrual of under proprietary rights to the tenant. In respect of appeals to Commissioners there has been a general increase throughout the province and no less than six Commissioners have now more than the 1,110 appeals which has hitherto been accepted as a reasonable limit. Some relief was obtained by transfers to Collectors, but Government agrees with the Board that this device is liable to abuse and should be exercised with care. Considerable assistance was given to the courts of original jurisdiction by the Honorary Assistant Collectors, who decided 18,805 cases between them, and the Lieutenant-Governor tenders to these gentlemen his cordial thanks for their good work. The question of extending the system of Honorary Assistant Collectors is now occupying the attention of the Government.

6. In conclusion the Board have presented some interesting remarks on the subject of the protection of tenants from ejectment and from the infringement of their prescriptive rights in the common land of villages, and have also touched again upon the evils of the *nazrana* system and the methods by which such exactions may be prevented. The amendment of the Rent and Revenue Acts is now receiving the attention of Government and it is hoped that some remedy may be devised for these evils.

7. Finally the Lieutenant-Governor wishes to thank all the revenue officers of the province for the zeal with which they have pursued their arduous labours throughout the year. Two of these officers, namely the Hon'ble Sir Duncan Baillie, K.C.S.I., I.C.S., and the Hon'ble Mr. G. A. Tweedy, I.C.S., will during the current year retire from Government service inflicting an almost irreparable loss upon the land revenue administration of the province.

ORDER.—Ordered that a copy of this resolution be forwarded to the Secretary to the Board of Revenue, United Provinces, for the information of the Board.

Ordered also that a copy of this resolution be published in the *United Provinces Government Gazette*.

By order of the Hon'ble the Lieutenant Governor, United Provinces,

H. C. FERARD,

Chief Secy. to Govt., United Provinces.

REPORT

ON THE

REVENUE ADMINISTRATION

OF THE

UNITED PROVINCES OF AGRA AND OUDH

FOR THE REVENUE YEAR 1912-13, ENDING 30TH SEPTEMBER 1913.

No. 849 / XII—149B (4) OF 1914.

FROM

J. E. GOUDGE, ESQ., I. C. S.,
SECRETARY TO THE BOARD OF REVENUE,
UNITED PROVINCES,

TO

THE CHIEF SECRETARY TO GOVERNMENT,
UNITED PROVINCES.

Dated Allahabad, the 7th March 1914.

Present: THE HON'BLE SIR D. C. BAILLIE, K.C.S.I., AND THE HON'BLE MR. G. A. TWEEDY, I.C.S.

SIR,

§§1—3.—Introductory.

I AM directed by the Board to submit to the Government their report on the revenue administration of the province for the year ended on the 30th September 1913.

2. Sir Duncan Baillie and Mr. Tweedy continued in permanent charge during the year. Mr. Broun held officiating charge as Junior Member until Mr. Tweedy returned from leave on the 20th October 1912. The office of Senior Member was held by Mr. Tweedy from the 17th August to the 30th September during the absence of Sir Duncan Baillie, first on leave and then in temporary charge as Lieutenant-Governor, Mr. Brownrigg officiating for that period as Junior Member.

3. Only the Oudh and Kumaun reports and divisional reviews reached the Board on the prescribed date. The Gorakhpur review did not arrive until after the Christmas holidays, a delay for which the Gorakhpur district was responsible, but with this exception all material was received during the course of December. I am desired to acknowledge particularly interesting and careful reports from the Collectors of the Rohilkhand division, from Muttra, Sultanpur, Farrukhabad, Etawah, Gorakhpur, Jalaun and Banda. In a few cases, on the other hand, the impress of the District Officer's thought and care was somewhat faint.

§4.—Seasons.
(i) Monsoon.

4. The monsoon of 1912 did not manifest any strength throughout the province as a whole until the end of the third week of July. In compensation for its tardy arrival it came accompanied by bright interval of sunshine, which facilitated sowings over a large area. In parts of Bundelkhand, however, the falls had been too continuous to permit of sowing on the black soils. Throughout August the greater part of the provinces received ample rain, and, indeed, Gorakhpur suffered some damage from floods. On the whole, therefore, the outlook was much better than at the end of August in the preceding year when there was grave foreboding. During September there were two storms, one at the beginning and the other at the end of the month. It was the latter which removed all cause for anxiety except in the Benares division, which it missed entirely. There was disappointment also in the Gorakhpur division which only received light showers insufficient for an area of late rice larger than usual, which at one time seemed likely to yield a very fine crop. As October was practically rainless late rice continued to suffer in the eastern districts, except where irrigation was practicable.

(ii) Cold weather.

The cold weather opened with apprehensions for the future rabi as there had been no seasonable October rain. This was particularly the case in the Benares division, parts of south

Oudh and the Allahabad district. Taqavi was distributed on a large scale and test works were opened in the south of Mirzapur. Fortunately most useful rain fell over the greater part of the provinces in the third week of November, and most liberally in those tracts which wanted it most. It is remarkable that more than one inch fell in all eight reporting stations of the Allahabad district, and in fifteen out of the nineteen in the Benares division. This enabled cultivators to make up the deficiency in their sowings, and greatly benefited standing crops. No further rain was received till February when the fall was thrice the normal; March, too, was unusually wet, and also May. There were hailstorms with high wind in March, the damage from which was not so serious as was anticipated.

Generally, therefore, the rainfall was irregular in distribution and somewhat abnormal in the time of its appearance. In parts of the province it was much in defect. At critical moments storms came to dissipate anxiety, and to improve prospects.

§ 5.—Cultivated areas.

5. There is again a slight increase of 1·6 per cent. in the cultivated area over the accepted normal cultivated area. For these figures, and indeed for all the statistics contained in the first chapter of this report the Board are indebted to the Director of Land Records and Agriculture. The character of the seasons just described is faithfully reflected in the fact that only the Allahabad and the Benares divisions show a decrease of 0·6 per cent. and 1·5 per cent. respectively on normal areas. The favourable season for kharif sowings resulted in an increase of 2,629,160 acres over the area of 1911, and instead of being 14 per cent. (as in that year), it was only 2 per cent. below the normal. On the other hand the exceptional facilities for rabi sowings which have been contributing to increase so much the winter cereals of late years were not present, and there was a decrease in area of 2,996,267 acres, and the total rabi area now exceeds the normal by only 4 per cent. In kharif the Jhansi division and the Muttra district return an acreage much below the normal, a result which is due in the former case to an excess, and, in the latter, to a lack, of rain at sowing time. If, however, there was a shortage of kharif in the Jhansi division it was made up by a large rabi area, continuing what has been so marked a feature of Bundelkhand during the past four years. Though there was an actual decrease of 268,233 acres on the remarkable figures of 1911-12, the rabi area of the year under report was still 17 per cent. above that of 1910-11 while during the last decade there has been a rise of 383,652 acres. There was a general increase in the rabi area of the western districts which the Director attributes, in part, to abundant rain in late September which caused considerable areas to be brought under secondary rabi crops. Hot weather crops show an increase, and were 10 per cent. above the normal, but the double-cropped area fell from 8 per cent. above, to 9 per cent. below, the normal, owing to a general decline in linseed which is usually sown on such land.

§ 6.—Crop areas. (a) Kharif.

6. As a result of the favourable conditions for sowing the kharif area under all classes of crops was fairly full. Compared with the normal, *juar* gives the lowest percentage which is, however, no lower than 86, and actually there was an increase of 536,600 acres under this important crop over the area of 1911. The Director calls attention to the growth in the rice area which reached its highest figure since 1907, and shows an increase of $7\frac{3}{4}$ lakhs of acres as compared with 1910. Late rice has much extended during a series of fairly good monsoons, and is now 99 per cent. of the normal, and early rice is 91 per cent. It is reported from Jaunpur as the generally received opinion among cultivators that *jarhan* fails once in every three years. There was a very large rise of 413,828 acres in maize which is now 5 per cent. above the normal, but *bajra* shows a decrease of 262,035 acres. The area under this last named crop in 1911 was much inflated owing to the exceptional nature of the season, and it has now fallen from 42 per cent. to 29 per cent. above the normal. The kharif crops of commercial importance are cotton, sugarcane and *til*. The previous year had been unfavourable to cotton sowings in unirrigated tracts, and there has been a considerable rise of 218,198 acres in 1912. Compared, however, with the area in 1910 there is still a fall of 213,582. The Director points out that the deficiency is most marked in what is called the new-cotton tract north of the Ganges. In these districts particularly in Budaun, Moradabad, Bareilly and Hardoi there is

little or no canal irrigation, and they are on the border line of the good cotton-growing tract. The result is that an unfavourable season, such as 1911, makes the cultivator, who has a large variety of possible crops to choose from, cautious about repeating an experiment. There has also been a further fall in Bundelkhand owing to a succession of unfavourable seasons. It is again pointed out that no permanent increase in the cotton area can be looked for until the existing canals are able to provide water for early sowings. It is obvious that the new-cotton tract is likely to benefit greatly by the projected Sarda canal scheme.

The sugarcane area showed a large increase which was general throughout the provinces, the Gorakhpur district being the only exception. In 1911 this district showed the largest increase. Further extensions were checked by the low price of *gur*. Sugarcane is now only 50,000 acres short of the record area for the provinces, and is 19 per cent. above the normal. The Director suggests that it has absorbed some of the area which has gone out of poppy cultivation.

The *til* area was about normal, Bundelkhand, as usual, producing the greater part of the crop.

The Director has called attention to the interesting fact that hemp, a minor commercial crop, is rising rapidly into importance. It is being grown mainly for export purposes in the Benares, Jaunpur, Allahabad and Fatehpur districts, to which may be added Partabgarh. The total area rose from 94,000 acres to close on 140,000 acres. Some attention to the processes of extracting the fibre and preparing it for the market seems to be called for. Retting in foul muddy water has led to depreciation in the colour and value of the fibre, and the industry is threatened with a still greater danger from dishonest practices by which the fibre is wetted before it is sold, and a large part of the woody centre of the plant is intentionally mixed up with the fibre. The result is that dealers have to undertake a cleaning and drying process when the fibre is delivered, and the price ordinarily given has fallen to less than half the price that would be paid for clean dry fibre.

(b) Rabi.

There were striking variations in individual rabi crops from the previous year owing to the fact that the preceding monsoon had resulted in more normal kharif sowings, such as *juar* and late rice which necessarily restrict the possible rabi area, and in a less degree to the late arrival of the rain in November. There was a fall of 1,365,054 acres in gram and of 352,803 acres in linseed. Both of these crops had been swollen much above the normal in 1911, the latter on account of the demand, for export. The eastern districts had responded much to this demand, and the result of the boom has been a sharp drop in prices, so that cultivators are temporarily abandoning the crop. The Director is not able to fully account for the decline in gram, which is most marked in the Agra division. There has been little change in wheat which remains 7 per cent. above the normal, but barley has dropped by 571,350 acres and has returned to the figure of 1907-8. During the interim there has been a large stimulus to barley cultivation by the demand for export; it still remains 10 per cent. above the normal.

§7. Irrigated area and sources of irrigation.

7. The gross irrigated area rose by 22 per cent. from the previous year. This is the result of a much greater demand during the rabi season. There was a rise of 42 per cent. in the area irrigated from wells, and of 13 per cent. in that from canals, statistics which show how important well irrigation is to the provinces as a whole, and how complete protection from the results of drought, if possible at all, must be realized through an increase in the number of wells. Actually 57 per cent. of the area irrigated drew its supply from a subterranean source. The total number of masonry wells in use in the provinces now stands at 650,000 as compared with 561,000 in 1906-7. Roughly, as the Director points out, this may be said to represent an increase of 300,000 acres in the area protected. This is actually a little less than 1 per cent. of the total cultivated area of the province. The total irrigated area, taking the figures of the year under report, is now 27 per cent. of the total cultivation, a good proportion though it is by no means equally distributed. Divisions vary between Agra with 80 per cent. and Rohilkhand with 15 per cent. There has been an increase during the year in the number of wells constructed, which amounted to 9,277 as compared with 8,073 in 1911-12. In 1910-11 the number was 9,215, so that it may again be said that satisfactory and uniform progress is maintained in

the absence of the spur which is given by exceptional drought. It may be expected that the present deplorable famine in Bundelkhand will result in a large increase of the permanently protected area. At present only 7,649 acres are commanded by reservoirs in the Jhansi and Hamirpur districts, and there is room for great expansion of tanks as a source of irrigation. To this the attention of Government has been given, and the Board have recently approved the financial statements of novel schemes for collecting water in the steep catchment area of the Vindhyan scarps in the south of Banda. It is probable that success in these first experiments will lead to many other similar projects. The circumstances of the year have drawn special attention to the Sarda canal project and the landholders of the districts which would be benefited by the alignment following the natural slope of the country are now united in asking for protection by means of a Sarda canal.

§8.—Calamities.

8. The year was again free from any general widespread calamity with the exception of the drought in the south-eastern districts. Hailstorms of great violence caused purely local damage. During March the Anupshahr tahsil in Bulandshahr was visited by a storm in which the standing crops were so beaten down as to be rendered useless even for fodder purposes, and a similar case was reported from Budaun. In Bulandshahr it was necessary to remit Rs. 20,920 and in Budaun Rs. 20,900 of land revenue, while taqavi was liberally distributed. In Banda there was a hailstorm in November 1912 which, combined with drought and the ravages of insects, necessitated the remission of Rs. 27,011. Fires are curiously prevalent in the Moradabad district, and during the year 105 villages were affected, 17 human beings and 35 cattle lost their lives, while the damage amounted to Rs. 60,455.

§9.—Outturn.
(a) Kharif.

9. The Director's estimated outturn for the principal kharif crops shows a considerable improvement on 1911, except in regard to rice. The deficiency of rain in September and October resulted in almost a failure of late rice in the Benares division, and the crop was indifferent in Gorakhpur. Early rice did better and its outturn is estimated at 80 per cent. of a normal yield of 100, but late rice had fallen to 60 per cent. *Juar* and *bajra* were almost everywhere good, and particularly so in the western districts and Bundelkhand. Sugarcane and cotton are estimated at 90 per cent. and 95 per cent. of the normal, but these estimates hardly do justice to either crop. In the main cotton-growing tracts the yield was above normal, and the lint unusually good. The Commissioner of Agra draws attention to the remarkable profits which the people derived from their cotton throughout the division, compensating them for the loss in other kharif crops. Owing to the rain in November sugarcane profited greatly and in the western districts it was regarded as one of the best for some years past.

(b) Rabi.

The rabi outturn was on the whole good, though not quite equal to that of the previous year. It also occupied a smaller area. Linseed is the only crop that showed a superior yield owing to the absence of rust, from which it had suffered in 1911-12. In the Bundelkhand districts the outturn was distinctly good and above the average, a fact which is of no little importance in view of the present condition of things there. Poppy suffered from blight and hail and produced only a moderate crop. Hot weather crops yielded satisfactorily. Mango suffered from the high winds and hail in March, and the *mahua* was estimated to give a twelve anna outturn.

Taking the year as a whole the outturn must be viewed as a very fair one indeed, though neither harvest in itself came quite up to the normal. There was a much better kharif outturn than in 1911, and it was not to be expected that the exceptional area of the 1911-12 rabi would be repeated, seeing that this was the result of specially favourable rains at the end of the monsoon, and of efforts made by the cultivators to retrieve losses in the foregoing kharif. It is matter for congratulation that the year was a good one and followed on a series of good years. From every division the Board have received reports of the excellent heart the people have to meet the calamity which has meanwhile come upon them. Conditions varied throughout the provinces, but both Bundelkhand and Agra were particularly fortunate. Mr. Hose states of the latter division that "the year was one of astonishing prosperity."

§ 10. Monsoon and kharif of 1913.

10. The autumn rains of 1913 commenced earlier than usual in the second week of June, and the total rainfall of this month was generally above normal; some districts receiving as much as 8 and 9 inches. The falls were heaviest in the submontane tracts; in the western districts and in Bundelkhand the rain was very partially distributed and insufficient for general sowings. The rainfall of July was throughout the provinces much below normal. Speaking generally the Meerut, Benares, Gorakhpur and Fyzabad divisions received sufficient rain for agricultural purposes. On the other hand the rainfall was inadequate in the Agra (except Aligarh), Rohilkhand, Allahabad, Jhansi and Lucknow divisions. The last week of July and beginning of August were for the most part dry with high temperatures, and the crops in places suffered severely and began to wither. Except in the Benares division and the Gorakhpur and Azamgarh districts, the rainfall of August was scanty and ill-distributed, and taken as a whole was about 50 per cent. in defect. In the first week of this month most districts received a certain amount; in the second and third weeks very little rain fell; in the last week rather more was received, but not sufficient to make up for the prolonged break. The rainfall of September also was very scanty and inadequate, except in the Benares and Gorakhpur divisions (excluding Basti), a number of districts having received less than one inch during the whole month. The failure was most pronounced in the western and southern districts. In most of the Oudh districts light rain fell during the first three weeks of the month which was sufficient generally to keep the crops alive, though in some districts the amounts received were very small. Light rain also fell during the earlier part of October in the eastern districts, but in insufficient quantities for the late rice. Elsewhere the month was practically rainless. The deficiency of rain in each division for the whole monsoon period—from 1st June to 31st October 1913—is shown in the following table:—

Divisions.	Average actual rainfall.	Average normal rainfall.	Defect in inches.	Defect expressed as percentage of normal.
	Inches.	Inches.		
Kumaun (with Dehra Dun) ...	36·98	58·89	21·91	37
Meerut (exclusive of Dehra Dun)	17·14	26·84	9·70	36
Agra	10·36	25·43	15·07	59
Rohilkhand	17·29	38·06	20·77	55
Allahabad	17·35	31·63	14·28	45
Jhansi	14·48	34·94	20·46	59
Benares	38·19	38·62	0·43	1
Gorakhpur	35·85	42·74	6·89	16
Lucknow	22·17	35·16	12·99	37
Fyzabad	26·89	39·39	12·50	32

The total kharif area fell off slightly from 226 to 221 lakhs of acres or 2 per cent. and the area on which the crops failed to come to maturity amounted to over 16 lakhs of acres, of which the Rohilkhand division contributed four lakhs of acres and the Jhansi division five lakhs of acres. An increase of 437,000 acres occurred under cotton, and of 61,000 acres under *til*. The autumn pulses also were sown on a somewhat extended scale, but all the other kharif crops exhibit decreases.

The eastern divisions of Benares and Gorakhpur and some districts of the Fyzabad division have been fortunate in securing a fairly good harvest; in the rest of the province, which suffered from short rainfall, it has been highly disappointing. The irrigated crops did well, but in unirrigated tracts they withered, or suffered severely. The cotton on irrigated land has been a very fine crop and, as the area this year is the largest on record, the total outturn of cotton is better than last year by 14 per cent. The rice crop ordinarily occupies about one-third of the total kharif area of the province; in the eastern districts the yield of early rice was satisfactory and of late rice moderate. In Rohilkhand the rice crop, both early and late, has practically been a failure, while in Oudh the yield of early rice has been moderate and of late rice poor. The condition of the principal kharif crops

is given below for the province as a whole on the average of the figures furnished by district officers, 100 denoting a normal crop :—

Early kharif crops.		*Late kharif crops.*	
Rice, early ...	... 55	Rice, late ...	... 50
Maize ...	... 70	*Juar* ...	... 40
Small millets ...	... 70	*Bajra* ...	... 50
Indigo ...	... 80	Pulses ...	... 50
		Cotton ...	... 75
		Til ...	... 35

§ 11.—Health.

11. The great improvement in the public health of the provinces, which the statistics of the previous year disclosed, continues to be fairly well maintained in the revenue year 1912-13. Actually there was a rise in the deaths from all causes of 27,676 which is less than 2 per cent. There has been a small decline in mortality from plague and fevers, and the rise is due to an outbreak of cholera which visited Oudh and the eastern districts. This epidemic raged from April till the end of the year, and in May and June it claimed no less than 16,510 and 15,044 victims, as compared with 4,844 and 2,589 in the corresponding months of 1912. The total increase in deaths from cholera was 25,335. It is satisfactory to note that there was a decrease of 68 per cent. in the deaths from plague in the Ballia district. District Officers continue to report appreciatively on the work of travelling dispensaries and the Collector of Gorakhpur, who has had to deal with an exceptionally bad outbreak of cholera, writes of them that "their popularity is increasing. Besides bringing relief to the sufferers they tend to inspire confidence in the intentions and methods of Government among a people prone to view every novelty with suspicion. From this point of view they have a moral and educative value."

§ 12.—Trade.

12. The Director's report on the Inland Trade of the province for the year ended March 31st 1913 records most remarkable expansion. In the previous year the total rail-borne traffic had reached a maximum, which has again been exceeded in volume by 303 lakhs of maunds or 24·4 per cent. and in value by 1,263 lakhs of rupees or 19·7 per cent. The import trade increased by 67 lakhs of maunds in weight and by 238 lakhs of rupees in value, and the export trade by no less than 235 lakhs of maunds and 1,025 lakhs of rupees. The rise in the import trade is especially marked, and denotes an increased demand for luxuries, and a brisker industrial activity. Thus the imports of cotton goods, mostly foreign piece goods, are the largest on record; those of sugar, salt and kerosine also show substantial increases. The amount of coal and coke imported for railways, mill industries, &c., increased by 72 lakhs of maunds. On the other hand grain and pulses were less needed, and their import declined by 17 lakhs of maunds. Statistics of export tell the same tale of prosperity; those of grain and pulse were the highest on record, and amounted to 529½ lakhs of maunds, and in the case of sugar there has been a further increase of 13 lakhs of maunds over the figures of 1911-12, which were the highest on record. It is important to notice the large advance of raw cotton exports from 4½ to 14¼ lakhs of maunds. This represented an increase in value received of no less than 236 lakhs of rupees which the producers must have received. The resources of the province have also been enriched by the demand from outside which has sprung up for grain foods other than wheat. The Director points out that the result has been to place a new value on the secondary crops, which have hitherto been used mainly for local consumption.

§ 13.—Prices.

13. The year opened with fairly high prices for all food crops. Taking the mean between the highest and lowest recorded rates wheat stood on September 30th 1912, at 12½ seers, barley at 16, juar at 16½, bajra at 15¾, gram at 17¾ and maize at 22¾. The price of wheat remained fairly steady throughout the year. At the end of June the highest rate recorded was 10$\frac{2}{7}$ seers owing to the tardy establishment of the monsoon, but even then the lowest price was 13 seers, only ¼ of a seer worse than the rate when the year began. Prices ruled somewhat easier throughout the monsoon, but as prospects began to look gloomy in September there was a sharp rise, and the highest recorded price at the end of the year was 9⅔ seers though the lowest was 14¼ seers or 1 seer better than the best price at the end of September 1912. Other grains show the effect of the failure of the monsoon

more clearly in their closing prices, *juar* having risen to 14⅝, *bajra* to 14½ and maize to 20 seers per rupee. The effect may be expressed graphically as a diminution of 2 seers in the purchasing power of the rupee for each of these kharif food crops. The causes which have affected the price of barley during recent years are more economic than seasonal. The demand in Europe for this staple somewhat fell off during the year, and in the first fortnight of June its mean price was 17⅝ seers or more than 1½ seers cheaper than at the commencement of the year. The sudden drop to a mean of 14 in September 1913 for barley and to one of 13 for gram, which stood at 17¾ in September 1912 is eloquent testimony to the quick response of the markets to the unfavourable agricultural prospects which then prevailed. Some district officers point out how prices are becoming more and more the product of the world's supply and demand, so that prices which are still accepted as normal are of little real use in interpreting the economic situation. From all sides comes the report that prices are constantly rising and that the agriculturist finds himself reaping great and often unexpected profits.

§ 14.—Agricultural stock.

14. The year is generally reported to have been an unhealthy one for cattle. All the various cattle diseases were more or less prevalent, and rinderpest visited the provinces in a particularly severe manner. The Fyzabad and Gorakhpur divisions suffered more lightly, and the Jhansi, Lucknow and Meerut divisions, more severely, than others. The Collector of Banda draws attention to "the extraordinary rise in the last few years of the price of plough cattle, a rise which has already seriously disturbed the financial position of the small cultivator." He fears that the result of the scarcity of fodder now subsisting will be a further rise in the price. Similarly a notable increase in the price of plough bullocks is reported from the Fyzabad division. The fodder famine, which is the most serious feature of the present situation, has given special importance to a question which has for some time occupied the attention of the Government, whether the resources of the province cannot be materially increased by conservation and partial afforestation of the great ravine areas which occupy a large part of many districts. The Commissioner of Kumaun reports that the Government cattle farm near Kashipur continued to be most successful.

§ 15.—Statistics of holdings. Statements XXXIV-A and XXXIV-B.

(1) General.

15. In consequence of settlement operations, figures for 1912-13 were not received for four parganas of Fatehpur, six parganas of Allahabad and one pargana of Naini Tal, for which the figures of the preceding year have been taken to complete the provincial total.

In Agra the total holdings area rose by 120,232 acres as a result of an extension in cultivation which had fallen off in the preceding year. The increase is shared by almost all districts, the exceptions being Mirzapur, where there was a slight decline in cultivation, Fatehpur and Naini Tal; complete figures were not, however, available for these two districts. In Oudh there has been a slight decrease of 6,935 acres chiefly in consequence of resumption of land held free of rent. The principal variations in classification are the following:—

	Acres.
In Agra.	
Sír	—28,900
Khudkásht, &c.	—29,859
Exproprietary tenants	+14,673
Occupancy	+98,088
Non-occupancy for 12 years or more ...	—10,368
Non-occupancy on 7 years' lease	+66,869
Non-occupancy for less than 12 years ...	+11,047
In Oudh.	
Sír	—4,832
Khudkásht, &c.	—12,038
Free of rent	—18,600
Ordinary tenants	+25,360

(2) Proprietors' cultivation.

Owing to revision of records an increase of 8,260 acres under *sír* was recorded in Fatehpur; elsewhere there has as usual been a general decline, which for the province amounts to 28,900 acres. The decrease in *khudkásht* occurred mainly in Fatehpur and was in part the consequence of transfer of land to *sír*.

(3) Occupancy rights.

Exproprietary holdings exhibit in most districts an increase—a tendency which has been noted in previous years. Occupancy holdings on the other hand have declined except in Etawah and Fatehpur where the revision of records increased the latter area by 51,995 and 119,869 acres respectively, with a corresponding reduction in the area held by non-occupancy tenants for 12 years or more. The remaining districts exhibit a general increase under the last named head.

(4) Long term leases.

The area held on seven years' leases also shows an increase in most districts, due to an extension in cultivation.

(5) Oudh holdings.

In Oudh area held rent-free has decreased owing to resumptions, while the increase in the area held by ordinary tenants was caused by extended cultivation.

§ 16. Rental demand and collections. Statements XXXIV-A and B.

16. The total rental demand for the whole province rose by nearly 27 lakhs of rupees, cash rents having increased by 34 lakhs of rupees, but the grain rents fell off by nearly six lakhs of rupees and the *siwai* income by over one lakh. These decreases are not of great significance having regard to the total demand. The decrease in grain rents is largely due to the transfer of land to cash rents in the Meerut and Rohilkhand divisions. The percentage of total collections (current and arrear) to demand fell from 93 to 89 in Agra and from 99 to 97 in Oudh. The following table shows by divisions the proportion of recorded collections to the year's demand:—

Divisions.	1319 F.	1320 F.
Meerut	96	88
Agra	92	94
Rohilkhand	94	89
Allahabad	92	84
Jhansi	93	91
Benares	87	80
Gorakhpur	94	91
Lucknow	99	97
Fyzabad	99	97
United Provinces of Agra and Oudh...	95	91

The collections of 1319 fasli were abnormally high owing to realization of arrears. In 1320 fasli the arrears appear to have been substantially reduced, and percentage of collections was about normal.

CHAPTER II—FINANCIAL.

§17.—Total demand and collections.

17. The total demand on account of all sources of income dealt with in this report was, in round figures, 854 lakhs against *848 lakhs in the previous year. There was thus an increase of rather more than 6 lakhs, which is more than accounted for by a rise in canal income from occupiers' rate of 11 lakhs. Agricultural loans, however, show a decrease of 5 lakhs. The real demand under all heads was nearly 853 lakhs, and collections amounted to 847 lakhs, leaving a balance at the close of the year of $4\frac{3}{4}$ lakhs, of which upwards of $1\frac{1}{3}$ lakhs are on account of suspensions of land revenue.

§18.—Land revenue. Statements I, II, and III. (a) Demand.

18. The gross land revenue demand for the year is found by adding together the demand under the 3 heads of land revenue on the roll (statement I), outstanding balance of land revenue on the roll (statement II), and land revenue not on the roll (statement III). This amounts to Rs. 6,49,55,837, but, in order to ascertain the net enforceable demand, the so-called nominal items in column 7 of each statement must be subtracted. These nominal items are composed of reductions ordered in the assessment during the year, either from a regular or temporary settlement, diluvion, land acquisition, or other causes, and will be incorporated in the roll of the succeeding year. The real demand thus arrived at is Rs. 6,48,57,189, which is Rs. 27,117 more than the corresponding item in 1911-12, the increase

* It should be noted that in paragraph 18 of last year's report only the real demand was mentioned.

being due to the larger amount of outstanding arrears and current demand. Diluvion (Rs. 33,461) and quinquennial settlements in Bundelkhand (Rs. 29,927) contribute the lion's share to nominal items, and it is noteworthy that the Ghazipur and Ballia districts in the lower Ganges-Gogra doab account for Rs. 25,722 of the losses from diluvion, or $\frac{3}{4}$ of the provincial total.

(*b*) Collections.

The actual collections were Rs. 6,46,10,524, leaving the apparently large balance of Rs. 2,46,665, but actually, as I shall point out, the demand was realized in full, with the exception of the trivial sum of Rs. 2,055. The details given in columns 5 and 6 of the statements, together with the explanations at the foot of the statements, explain this. Suspensions or postponements amounted to Rs. 1,33,644, out of which Rs. 85,838 belong to the Mirzapur district, as a result of the failure of the harvests of the year. Remissions on account of damage by hail, flood or insect pests were Rs. 1,10,966, the largest items being reported from Budaun (Rs. 20,837), Allahabad (Rs. 21,717) and Banda (Rs. 27,011). In Allahabad the trans-Jumna tahsils suffered from drought, but in the other two districts remissions were rendered necessary by special local calamities. The actual balance of Rs. 2,055 thus obtained is made up of Rs. 1,906, shown in statement III, of which Rs. 1,904 is the increase of jama in Pilibhit, sanctioned too late for collection, and Rs. 2 in Almora, realized after the close of the year, and of Rs. 149 shown in statement I, of which Rs. 81 were actually collected after closing accounts, so that the only sum really outstanding is Rs. 68 due from Government estates in Jalaun. The balance sheet therefore testifies eloquently to a prosperous year.

§19.—Malikana. Statement IV.

19. The Malikana demand opened with no arrears and was Rs. 1,80,009. This was collected in full, as the Rs. 77 shown in the statement as outstanding in Allahabad is a nominal item owing to reductions of land revenue on which the malikana is calculated, and Rs. 42 were remitted in Ballia. The unpaid balance has increased by Rs. 26,792 during the year, and for this Gorakhpur and Allahabad are mainly responsible. The explanation of this is that disbursement depends on the will of the payees. It is troublesome to have the accounts running on, and during the year the appointment of lambardars to receive payments on behalf of groups has been sanctioned in Ballia in order to facilitate distribution. The existence of the lambardari system in Gorakhpur has not prevented the accumulation of Rs. 37,008 and things might certainly be improved if the growing balance were brought to the Collector's notice at intervals, so that timely and suitable measures might be adopted to quicken dilatory lambardars. On the other hand the balance in Aligarh has been reduced from Rs. 10,079 to Rs. 5,995 out of which (as in former years) no less than Rs. 3,238 belongs to the one estate of Awa.

§ 20.—Canal rates. Statements V and VI.

20. There was a very large rise in the current demand (i. e. excluding arrears) for occupiers' and owners' rates as compared with the preceding year. The former increased from Rs. 75,69,569 to Rs. 87,01, 574, and the latter from Rs. 1,65,085 to Rs. 1,84,410. This increase of more than eleven lakhs followed on an increase of $2\frac{1}{2}$ lakhs chronicled in last year's report. In each case the result is due to the use of canal water to supplement the special deficiencies of the rainfall. In the year under report it is due to the late arrival both of the monsoon and of the winter rains. All divisions show a rise, but it is most marked in Meerut where the difference is nearly 6 lakhs, and in Allahabad where it is upwards of 2 lakhs. The Board note with satisfaction an increase of nearly one lakh in the occupiers' rate for the Jhansi division. Though, as the Commissioner explains, this is mainly due to the absence of cold weather rains in December 1912 and January 1913, it has brought increased experience of the utility of canal irrigation to the people, and will so tend to remove the disinclination to pay for it, or to take the first step in new paths, both of which hamper the department in Bundelkhand. Collections have again been particularly good. The real balance of occupiers' rate (column 7) was Rs. 1,935 and of owners' rate one rupee only. The largest outstanding items were Rs. 832 in Jhansi and Rs. 646 in Fatehpur ; out of the former Rs. 658 have been recommended for remission and Rs. 151 are still under objection, while the latter has been realised in full since the close of the year. It may therefore be fairly said that canal rates show a clean balance sheet.

§ 21.—Local rates and cesses. Statements VII–X.

21. The total demand under the local rates and cesses including arrears is made up as follows :—

	Rs.
The 10 per cent. local rate in Agra	44,35,348
Acreage and other rates in permanently-settled tracts ...	5,19,764
Consolidated local rate in Oudh	9,30,123
Rural police rate in Oudh	10,28,500
	69,13,735

This total gives a small increase of Rs. 11,881 on the demand of the previous year. It was practically collected in full, the only remarkable item in train of liquidation being Rs. 7,695 on account of the rural police rate in Rae Bareli. This is an arrear demand due from the nominally enhanced revenue of permanently-settled villages on which the rate had never been assessed since its introduction. The Board ordered in July 1913 that it should be realised in full, and it is the subject of correspondence. The apparent arrears in statement VIII are nominal and have been remitted on account of deductions made necessary by land acquisition, diluvion, or other causes. The balance of Rs. 190 in statement VII for Pilibhit is the enhanced demand due to settlement, which was announced too late for recovery during the year, and the Rs. 63 in Cawnpore have been suspended.

§22.—State properties. Statement XI. (a) General.

22. The year opened with 614 estates as the property of Government under the management of the Board. During the year 17 were disposed of, of which 12 were restored to the proprietors after liquidation of the loans under the Encumbered Estates Act in Bundelkhand, and 9 new estates were acquired leaving at the close of the year 606. Most of these are very small agricultural properties and the Jhansi division accounts for 263 and the Oudh districts for 209. The only very large units are found in Allahabad, Mirzapur, Ghazipur, Agra and Gonda. The total rental demand was Rs. 3,46,523, which gives a small decrease of Rs. 7,658 on the figures for 1911-12. The collections continued to be good, being nearly 94 per cent. of the total gross demand, which included Rs. 19,541, the arrears of the preceding year. The real balance for recovery, exclusive of Rs. 1,091, which are nominal was Rs. 22,237. The collections would have been much better if it were not for the large items of Rs. 8,077 in Ghazipur and Rs. 3,338 in Allahabad. These are postponements of lease money due from Messrs. Fox and Aitchison, lessees of Khargapur and Holagarh in Allahabad and of the Stud lands in Ghazipur. The Ghazipur arrears are to be paid by March 1914. In Gonda over Rs. 800 out of the balance of Rs. 1,610 were explained as due to a dispute between the nazul departments of Gonda and Fyzabad. This explanation appeared unsatisfactory to the Board and further enquiries are being made. The management charges shown in the statement as 'establishment' and 'contingencies' were Rs. 36,714 which is rather more than 11 per cent. of the rent-roll. Strictly speaking all of the items classed as contingencies should not be debited to management, and attention is merely drawn to this to explain that many detailed heads are lumped together in column 11, which would be separated in the stricter accounts of Court of Wards management; thus, in Dudhi the Rs. 8,403 includes Rs. 4,900 for education and medical charges. Actually it is only necessary to maintain separate management in 18 out of the 39 districts where properties are found, as elsewhere the ordinary district revenue staff is sufficient for the superintendence. During the year Rs. 22,015 or 6·4 per cent. of the rent-roll was spent on improvements, being an increase of Rs. 668 on the corresponding item of 1911-12. The actual balance accruing to Government under all heads, i.e. inclusive of credits to cesses and land revenue amounted to Rs. 2,64,466 or Rs. 10,254 less than in the preceding year.

(b) Dudhi.

The Board receive a separate report for the interesting estate of Dudhi in Mirzapur district. The year was an unfavourable one as this was one of the tracts where there was a very short kharif owing to the cessation of the rains in September. It was necessary to suspend Rs. 5,999 and to remit Rs. 4,553. The actual demand exclusive of the remissions and including arrears was Rs. 35,736 of which only Rs. 29,537 were realised, or Rs. 9,859 below the actuals of 1911-12 and Rs. 7,878

below the estimate. The outstanding balance of Rs. 6,199 is composed of Rs. 59 classed as recoverable under rental demand and manorial dues, Rs. 5,999 the suspended rents and Rs. 141 the arrears of former years. Under all other heads the demand was fully realised. Expenditure on improvements was Rs. 10,730 which is Rs. 1,418 less than in the preceding year but well up to the average. Out of this, Rs. 5,268 have been spent on bandhs and irrigation works which will be of permanent benefit, and Rs. 1,566 laid out on shops and auction sheds in Munri Semar Bazar will be of immense advantage to the tenants of the estate. Mr. Wyndham who has been identified with a very successful and enthusiastic administration of Dudhi for a long series of years writes that "this bazar has changed the status of the Dudhi tenant. He can now get cash for his til and other seeds instead of a mere book credit." The Board endorse the policy for the future administration of the estate which he has left on record. This should be "to spend money liberally on improvements, to educate the aboriginal, help him to protect himself, and to make him fit to take part in the administration and to hold all subordinate posts in the estate". Education continues to gain in popularity, the number of scholars being 608 against 474 of the preceding year. Two new schools are projected, and everything, including books and slates, is entirely free. On the whole the year, considering the failure of the rains, has been a satisfactory one, and the net loss on estimates was only some Rs. 4,700. The proposed extension of legislation to prevent land alienation has received the general approval of Government during the year and a draft bill will shortly be submitted.

§23.—Miscellaneous Land Revenue Receipts. Statement XII.

23. There are two parts to statement XII which deals with Land Revenue Miscellaneous receipts; in the first part are included fines and forfeitures of revenue courts, rent of lands temporarily occupied by railways and mutation fines, and in the second part, partition fees only. This division is necessary because the receipts are differently credited, the former being shared between the Imperial and Provincial exchequers, and the latter being merely provincial. In part 1 the principal item is mutation fines, which are levied under section 38, Act III of 1901, for failure to report transfers. They account for Rs. 1,13,036 out of a total demand of Rs. 1,16,008; rent of railway lands (Rs. 1,167) is due only from the Bengal and North-Western Railway in the Gorakhpur, Basti and Gonda districts, and the fines and forfeitures of revenue courts amounted to Rs. 1,806. The collections under the last two heads need no comment, but much trouble is experienced by the local officers in realising promptly mutation fines. It is satisfactory to find that there is a drop of Rs. 15,085 in the demand, and this followed on a decrease of Rs. 22,674 recorded last year. Collections were Rs. 1,02,597, leaving a balance of Rs. 10,439, which is not a good result. In Mirzapur, Hardoi and Gorakhpur the *arrears still due are Rs. 2,443, Rs. 1,055 and Rs. 737 respectively. The Collector of Mirzapur is enquiring into the cause of this large balance; in Hardoi there has been a large rise in the demand owing to the discovery from the examination of khewats of many cases of transfer in which no application was filed within time. Many cases were instituted also in August and September. No explanation is given for the pending balance in Gorakhpur which should have certainly been reduced considering that the demand decreased from Rs. 10,907 in 1911-12 to Rs. 4,399 in the year under report. The balances in Basti and Moradabad, which were high last year, have been reduced.

The total demand for partition fees, including the arrears from the previous year, was Rs. 2,73,156, which gives an increase of Rs. 17,571 over the demand of the year preceding. These fees depend on the number of institutions which will be discussed in a later paragraph. It is customary to find large variations in the demand, owing to the class of cases which are dealt with, and they call for no detailed comment. Collections amounted to Rs. 2,32,164, leaving a balance of Rs. 40,992, out of which Rs. 38,993 are in train of liquidation. The large balance of Rs. 12,905 shown against Ballia represents the second half of fees to be adjusted after the completion of the partition. During the year under report several large suits with high costs were instituted in that district.

§24.—Sale of confiscated, escheated and waste lands. Statement XIII.

24. During the year under report nothing was realised from the sale of confiscated, escheated or waste lands, and statement XIII is therefore blank.

* The figures in columns 4—7 of statement XII, part 1, are different, as they include the 3 Imperial heads of receipt.

§ 25.—Agricultural advances. Statements XIV and XV. (a) General.

25. A little general explanation of the long detailed statements which are necessary for taqavi accounts may be useful before I pass to consider the loans under each Act in detail. The year opened with an outstanding balance of 59·03 lakhs under Act XIX and of 18·90 lakhs under Act XII, or 77·93 lakhs in all. During the year new loans of 8·38 lakhs under Act XIX and of 21·82 lakhs under Act XII were issued. The amounts which were actually to be accounted for were 67·53 lakhs under Act XIX and 41·04 lakhs under Act XII, or 108·57 lakhs in all, in which figures are included the sums shown in column 5 of each statement which, though drawn from the treasury were not actually disbursed. These undisbursed items are shown as refunds in columns 18 and 14 of the statements, but in some cases they are not finally adjusted till the end of the financial year, so it is necessary to include them in the gross loan accounts. Actually the net demand for realization during the year, after deducting suspensions and postponements, was 12·13 lakhs and 18·96 lakhs respectively, or between $\frac{1}{3}$ and $\frac{1}{4}$ of the total outstandings. In the Act XIX demand is included interest by the equated instalment system, but in that of Act XII only principal is included. The gross collections during the year, including surplus collections, were 12·22 lakhs (Act XIX) and 17·61 lakhs (Act XII), the actual balances uncollected out of the net demand for the year being Rs. 52,570 (Act XIX) and Rs. 1,41,702 (Act XII). The close of the year, after credits to principal and interest, left an outstanding balance of 59·16 lakhs under Act XIX and 22·48 lakhs under Act XII, a total of 81·64 lakhs, or 3·71 lakhs more than the opening balance. This increase is due to poorer collections during the year under report and not to any very great increase in loans. Actually in 1912-13 advances under both Acts exceeded those of 1911-12 by about 1·27 lakhs. I now pass on to consider the operations under each Act in detail and with reference to districts.

(b) Advances under Act XIX.

It is again a source of much satisfaction to the Board to be able to report that advances taken for permanent agricultural improvements have increased from *Rs. 6,99,444 in the previous year to †Rs. 8,38,096, or by Rs. 1,38,652. The improvement noticed last year has been well maintained, and the province of Oudh shows a small increase of Rs. 29,128. The only divisions in which there has been a decrease in the sums advanced are Agra (—Rs. 29,764), Jhansi (—Rs. 23,306) and Kumaun (—Rs. 975). The largest increase is one of Rs. 90,620 in the Benares division, which now stands second to Meerut. The stress of the drought in Benares resulted in the people taking Rs. 90,620 more than in the previous year, a clear indication of the way in which activity in well construction is stimulated by circumstances which bring home to the cultivating classes the need for fuller protection. The next largest increase is found in the Fyzabad division where the subject of well construction has engaged the special attention of Mr. Holms, as it did last year in Meerut, with the result that advances have gone up from Rs. 65,441 to Rs. 1,13,300. Among districts Bulandshahr once more easily heads the list with Rs. 1,40,415, and the Board recognise that this is due to attention bestowed on the subject by Mr. Humphries. They are able to see no reason why, even after making allowance for less favourable conditions, the figures in other districts of the Meerut division should contrast so completely with those in Bulandshahr. In the Hamirpur district it is noted with satisfaction that advances have risen from Rs. 6,450 to Rs. 23,095, the object of the loans being the making of 105 *bandhis*, 39 wells and the extirpation of *kans* in two villages. Banda, which is the district where the construction of *bandhis* most flourishes, records 1,444 new ones made or under construction by taqavi during the year. The Collector of Jalaun explains that the cultivators do not want *bandhis* because they prefer to raise kharif crops. The results obtained in Banda by the aid of the Public Works Department indicate that if the matter were really taken up the work of scientific embankment would be found equally profitable in Jalaun. The Board hope that Jalaun will not continue to remain behind the other districts of the division in pressing on works of improvement. The district of Agra shows very poor returns, and the Board desire that the Collector should make a special study of the possibilities of well construction in his district, a matter which the Commissioner describes as "of vital importance" to it.

* Includes Rs. 6 on account of transfer, which may be ignored.

† Includes Rs. 70 on account of refund of surplus collections, &c. which may be ignored.

In the province of Oudh the marked difference between the advances made in the two divisions, the Fyzabad figures being more than double those of Lucknow, requires some comment. The subject of well construction has received attention in both divisions but in Lucknow the local officers betray in their remarks lukewarmness and hesitancy, which explain their lack of success. The Board do not accept the view expressed from Rae Bareli that wells are not successful, because they are too expensive to construct and to work. There are certainly parts of the Lucknow division in which the rainfall is so considerable and so secure that the necessity of wells is less felt than elsewhere, and there are parts in which wells cannot be constructed except at a prohibitive cost, but there is no district of the division in which wells are not possible, and of value in certain areas, while, in the southern districts, wells are everywhere of great value and almost everywhere possible. The true difficulty in connection with the expansion of wells in Oudh is connected with the attitude of the zamindars, who refuse to give the written permission which the law requires in order to secure to a tenant the benefit of any improvement he may make. It is indeed possible for a Deputy Commissioner to give permission to a tenant, but the result, as is pointed out in the Hardoi report, is that the tenant loses the "good will" of the zamindar, and has a most precarious tenure of his holding. In this matter as in others the uncertainty of a tenant's position in Oudh prevents a full economic development. The only districts in Oudh where well construction was not encouraged by Act XIX loans, were Gonda and Bahraich, though in the former 1,046 and in the latter 118 wells were made by landlords unassisted. These figures do not bear out the Deputy Commissioner's statement that in Gonda wells have not "proved a remunerative investment in a large number of cases." Mr. Moreland's recently published review of the agricultural condition of the provinces finds Gonda suitable for wells, and it is suggested that the "cost of construction is so low that probably it would be sound business to make masonry wells instead of digging temporary ones whenever wanted."

Before leaving this interesting subject, I am desired by the Board to bring to notice an important suggestion made by Mr. Hose, Commissioner of Agra, a suggestion which goes to the root of the great difficulty of extending irrigation from wells in those very areas which need it most, because of the extreme physical obstacles and the prohibitive cost. He writes "where wells are difficult to locate and expensive to make, it is the duty of the Government to do more than lend money and provide borers. It is for Government to make costly experiments and bear the loss if any occurs." The Board are informed that the question of constructing large wells worked by mechanical power in areas where the water level is very low, and of charging a water rate is now before Government, and they need only say that any such scheme has their hearty approval. Pumping from rivers also would provide another important sphere for experimental work.

(c) Advances under Act XII.

Questions which affect the permanent protection and improvement of the agriculture of the province are not raised in connection with loans under Act XII, which aim at financial assistance for ordinary agricultural operations. Fluctuations in the demand are determined mainly by the character of the seasons; it diminishes with good and timely rainfall, and increases with drought and calamity. Owing to this and the improvement in means of quickly learning the needs of distribution it is almost impossible to budget accurately for the year's needs. During 1912-13, *Rs. 21,82,200 were advanced, which is a slight decrease of Rs. 11,843 on the 1911-12 figures. Both years were very similar. In 1911-12 the demand was in Agra, Rohilkhand and Lucknow, as a result of the failure of the rain and the desire for extended rabi and sugarcane sowings, while in 1912-13 it had shifted to the Benares and the Fyzabad divisions, in the former of which there was an enormous rise of Rs. 7,49,659, and in the latter of Rs. 2,20,242. It is remarkable to notice the growing demand throughout the provinces for assistance in the purchase of plough cattle. Actually Rs. 11,51,057, or more than half the total advances were for this purpose, and only Dehra Dun, Shahjahanpur, Benares, Jaunpur, Naini Tal, Almora, Sitapur and Gonda report no loans. It is not the same with seed taqavi for which the whole divisions of Meerut and Lucknow had no demand during the year under report. The total sum advanced for purchase of seed was Rs. 8,93,286. The greatest demand for seed was evinced in Mirzapur, where

* Includes Rs. 238 on account of refunds of excess collections, &c., which may be ignored.

Rs. 3,60,910 were taken, and the same district heads the list for cattle with Rs. 1,75,215. The digging of *kachcha* wells absorbed Rs. 56,826, of which Rs. 21,953 went to Basti. The remarks made above on the advisability of making masonry instead of *kachcha* wells in Gonda would apply to Basti also. The remaining item of Rs. 80,793 went for miscellaneous purposes, sugarcane, agricultural implements, well fittings, chain pumps and the rebuilding of houses destroyed by fire.

In Muttra the efforts to revive agricultural depressions by means of well supervised advances were continued by Mr. Dampier who distributed Rs. 2,14,221, the second largest item in the provinces. The Board adhere to the opinions expressed in last year's report, and, while cordially acknowledging the care and interest which he has expended on the subject, they cannot agree with him in viewing the annual distribution of agricultural loans as a means of "freeing the tenantry from their economic servitude to the baniya, and of preparing them through the educative training of the joint security system for the establishment of co-operative village banks." The Board doubt whether in point of fact it has, or is likely to have, this result.

(*d*) Collections of Act XIX loans.

Collections under Act XIX were again remarkably good, being 96 per cent. of the net demand. Efforts have clearly been made to improve matters. The large pending balance of Rs. 21,950 in Muttra has now entirely disappeared, and the district shows a clean slate, but the condition of things in Agra where the overdue balance is Rs. 16,623 continues to be unsatisfactory. This is said to be due from two tahsils, and the Board desire that no further time be lost in bringing order into these accounts. There are indications in the sale statements that come to the Board from the Agra district, that loans were made without adequate enquiry, and the subject generally seems to demand the close attention of the district officer. Districts with overdue balances of more than Rs. 4,000 are Bara Banki (Rs. 5,289), Shahjahanpur (Rs. 4,888), Budaun (Rs. 4,341) and Gonda (Rs. 4,298). The attention of the Deputy Commissioner is necessary in Bara Banki, where the arrears have jumped from Rs. 3,685, most of which is due from one tahsil. In Basti collections were not good, and the balance rose from Rs. 629 to Rs. 3,634. Surplus collections were Rs. 61,676, differing only by a few rupees from last year's figure. Bara Banki and Agra are responsible for Rs. 10,682 and Rs. 9,420 respectively. As these surplus collections are very largely composed of loans called in because of the breach of some condition, or the non-completion of the work within a fixed time, they give grounds for inferring that loans were injudiciously sanctioned.

(*e*) Collections of Act XII loans.

The balance sheet of loans under Act XII continued to improve in a most satisfactory manner, and collections amounted to 92 per cent. of the net demand, or 4 per cent. better than the preceding year. Twenty-two districts show an absolutely clean sheet, and only two districts, Kheri (Rs. 55,925) and Agra (Rs. 24,931), have arrears of more than Rs. 20,000, where there were five districts in 1911-12. The arrears in Kheri show satisfactory reduction, and Rs. 35,248 were remitted during the year, so that only Rs. 20,677 remain to be collected. This comes down from loans made in the last famine of 1907-8, and the Board recognise the difficulties which have been encountered. It was in consequence of Mr. Campbell's representations last year that orders have been issued for the granting of formal receipts by all naib tahsildars deputed on collection work, or by any collecting officer. It is suggested that many small sums may have been collected by patwaris, who gave no receipts and thus were able to embezzle the money. It is probable that the arrears in Agra need very careful and detailed enquiry, with a view to the remission of irrecoverable items. Here too the loans come down from 1905-6 in some cases. The Mirzapur balance has been most satisfactorily reduced from Rs. 34,648 to Rs. 3,779, a result towards which liberal remissions contributed. Surplus collections under Act XII were very small and call for no comment.

(*f*) Aided works.

The account of partly recoverable advances for aided works opened with a balance of Rs. 3,86,292, the difference between this and Rs. 3,86,116, reported last year as the closing balance, being due to subsequent adjustment. There were no further advances during the year, the net demand for collection during which was Rs. 1,34,678, out of which Rs. 1,24,775 or 93 per cent. were collected. The overdue balances were in Jaunpur (Rs. 2,325), Agra (Rs. 1,995) and Budaun (Rs. 1,720). No explanation

has been given by the first two districts, but the Collector of Budaun reports that part of the Rs. 1,720 is due for works which have been unsuccessful, and some remission may be recommended.

§ 26.—Loans under the Bundelkhand Encumbered Estates Act. Statement XV.-A.

26. There are two branches of accounts maintained in liquidation of loans advanced under Act I of 1903, those, namely, in which the borrowers are in possession of their estates and pay by equated instalments, and those in which the Government has assumed complete control and management. The former deal with loans under section 21 (a) and (b), and the latter with those under section 21 (c). As the footnotes to the statement show, transfers between the two heads are sometimes found convenient.

There was a net demand from proprietors of Rs. 1,92,697, of which Rs. 1,85,424 or 96·2 per cent. were collected. As usual there were surplus payments which rose to the considerable figure of Rs. 13,779 in the Hamirpur district. The bulk of this represents voluntary payments made by debtors to clear off their liabilities. The uncollected balances were trivial, except in Jalaun where Rs. 6,465, out of the total of Rs. 6,816 shown in the statement, were due from Court of Wards estates that at present have no funds.

The net demand due from estates managed by the Collector was Rs. 1,27,675, which simply represents the rent-roll. The collections were Rs. 1,26,984, or 99 per cent., and adding to this the small surplus collections of Rs. 85 and Rs. 1,446, the balance in the personal ledger at the beginning of the year, there were Rs. 1,28,515 for division. The cost of management, including the Government revenue, absorbed Rs. 64,303, and Rs. 30,230 were credited to interest and Rs. 33,608 to principal.

Taking the loans as a whole, it is found that the year opened with an outstanding balance due for principal of Rs. 17,24,151, and that it closed with a balance of Rs. 15,48,309, the total credits to principal having been Rs. 1,75,842. This is again the record of a highly successful year, the deficiency of Rs. 16,692 in the final credits to principal, as compared with 1911-12, being simply due to a fall in the rental demand of the properties under management.

§ 27.—Coercive processes. Statement XVI. (a) General.

27. The total number of coercive processes issued in the course of collecting the land revenue and cesses demand, and all other revenue realisable under the law as land revenue, was 166,121, or a decrease of 9,891 on the figures of the preceding year. There has been a steady decrease since 1909-10, when the total was no less than 216,548. This result has been partly brought about by reforms in the use of the various processes which have been fully referred to in former reports, but the need for pressure of any kind would naturally be felt less in the recent good years with which we have been favoured. There is a falling off in each column of the statement except in column 4 "citations to appear." To this I shall recur later. It is highly satisfactory that attachments of moveable property decreased by 4,332, or nearly 21 per cent. while attachments of immoveable property fell from 331 to 161, or by more than 51 per cent. Warrants of arrest decreased by 1,305, and it was only necessary to detain in custody 1,087 persons against 9,951 warrants which were issued. The figures fully reflect the character of the year under report, in which collections have been full and easy.

(b) Coercive processes issued for arrears of land revenue and cesses.

The following table gives the processes which were issued for recovery of the arrears of ordinary land revenue and cesses :—

Writs of demand.	Citations to appear.	Warrants of arrest.	Attachments of moveable property.	Attachments of immoveable property.
2,789	81,369	7,326	4,863	112

The entire absence of the last three severer processes is highly satisfactory. The only head under which there is a slight increase is that of writs of demand, which have gone up from 2,396 to 2,789. This is an indication that the

ORDERS OF GOVERNMENT.

No. 1164/I—181.

RESOLUTION.

REVENUE DEPARTMENT.

Dated Naini Tal, the 26th May 1913.

READ—

Letter from the Secretary to the Board of Revenue, United Provinces, no. 1191/XII—149B., dated the 13th March 1913, being the Board's report on the revenue administration of the United Provinces for the year ending 30th September 1912.

OBSERVATIONS.—The Board's report on the revenue administration of the province for the year which ended on the 30th September 1912 discloses for the fourth time in succession the record of prosperous seasons. In Gorakhpur the Commissioner remarks two such bountiful harvests have not been gathered for many years; while even in the depressed district of Muttra signs of recovery are manifesting themselves. The monsoon of 1911, it is true, did not appear in full force until the end of July, and both area and outturn of *kharif* were considerably below normal. The heavy and well-distributed rain in October however enabled *rabi* crops to be sown over an enormous area, and these crops subsequently attained to an excellent maturity. The deficiency of *kharif* being thus balanced by a good *rabi*, the total produce of the two seasons was well up to normal.

2. Throughout the report, therefore, are found all the incidental indications of prosperity. The collections of land revenue and canal rates were excellent; while those of taqavi were distinctly better than usual. Out of a total demand of nearly 6½ crores for land revenue only Rs. 1,79,000 remained uncollected and this balance included Rs. 1,72,000 remitted or suspended. There was a corresponding falling-off in the issue of coercive processes; and a large number of tenants by paying up their arrears of rent were able to escape unfavourable orders in ejectment suits. Owing to the series of excellent harvests, the surplus available for export was considerable and trade was stimulated by a brisk demand in Europe for grain and oilseeds which kept prices high. With few exceptions outturns of crop were good and there were remarkably few cases of serious damage by storms or pests.

3. The general tendency of the autumn crop to decrease and of the spring crop to increase in area has continued during the year under report and is due not entirely to the characteristics of the seasons but has been brought about, in part at any rate, by economic causes such as the great demand in the export markets for oilseeds, wheat and barley. Sugarcane, happily escaping damage from insect pests, has again shown an increase in both quantity and quality. As a result of this, activity has been displayed in the development of small factories, and one large factory, the proprietors of which have received a loan from Government, is now under construction in the Gorakhpur district. In view of the keen and scientific competition of foreign sugar, the introduction of modern methods of refining must be regarded as a valuable help to the growers of sugarcane. It is hoped that the government expert will be able to give effective aid to these pioneer factories. Cotton was sown on

Board's plea of last year in behalf of the initial use of the more gentle reminder has not been overlooked by Collectors. There is, however, a tendency in the district reports to extol the superior efficiency of the citation to appear as compared with the writ of demand. Thus, from Etah and Bulandshahr we are told, "citations have almost entirely replaced writs." The actual increase in the number of citations in the year under report for the recovery of all kinds of arrears is 1,849, and considering that everywhere else there was a small decrease, the prevalent opinion in favour of their use has clearly been operative. The Board wish to protest against the idea that writs of demand are likely to go out of use. The collecting officer must discriminate. Citations are improper for people of a certain status, and should not be resorted to for pressure on a revenue payer of any status who is, as a rule, reasonably punctual in his payments. The contrary opinion, if it gets abroad, is likely to lead to cases in which the issue of a citation will be very rightly resented. During the year the form of the citation has been amended, so that it now presents the alternative "to pay *or* to appear." This removes the possibility of misconception which existed before. In Gorakhpur only do the citation figures call for comment, and the Collector has been asked to explain the remarkable rise of nearly 2,000. Moradabad is responsible for 30 attachments of immoveable property out of 112 for the provinces in general, but these are directed against habitual defaulters, and show a satisfactory decline from the 93 which were necessary in like cases of the preceding year.

(c) Coercive processes issued for the recovery of other demands.

As usual the bulk of the writs of demand were issued for the recovery of mutation fines in the course of which they are obligatory. Actually 27,777, or nearly $\frac{7}{8}$ of the total shown in statement XVI are appropriated to this head of demand and there is some reason in the altogether disproportionate number issued for land revenue recoveries for the opinion that the writ is falling into disuse. Arrears of taqavi called for 721 writs, 13,824 citations, 850 warrants of arrest, 3,614 attachments of moveable, and 34 attachments of immoveable property and no less than 12 out of the 13 sales of immoveable property which took place in the provinces. Out of these, 9 belong to Agra, another indication that loans have been granted without due caution, as I have pointed out above. The only other sale was on account of canal rates in Muzaffarnagar.

§28.—Estates under direct management.

28. Estates come under direct management by the Collector, or "*kham tahsil*," either after annulment of settlement, or attachment for arrears of revenue, and all arrears similarly realisable, for failure to appoint a lambardar, or while partition is pending; there may also be attachments under the Criminal Procedure Code. A separate report on the annual management is received by the Board. The year opened with 168 properties on the books and 213 more were attached during the year; from these two items 268 were released, and the year closed with 113 still under management. The majority of the attachments were for land revenue, or arrears similarly recoverable, 75 cases being due to failure to appoint lambardars, four to partition proceedings and one being the result of the order of a criminal court.

The total demand was Rs. 1,89,125, out of which less than 68 per cent. were recovered. The cost of management amounted to Rs. 10,878, or rather more than 5 per cent. of the demand. Out of the net balance, Rs. 84,371 were credited to land revenue and cesses, and Rs. 1,242 to the principal and interest of taqavi debts. Shahjahanpur with an overdue balance of Rs. 20,850, and Sultanpur with one of Rs. 14,419, were largely responsible for the poor result in collections. In Shahjahanpur the probable explanation is that both the two estates were attached too late in the year to allow of collections, and in Sultanpur a large amount is due from under-proprietors necessitating proceedings under section 185. A very large proportion of the balance is secured by decrees.

§29.—Alterations in the land revenue demand. Statement XVII.

29. During the year under report there was a net addition of Rs. 1,07,130 to the demand of the land revenue of the provinces borne on the roll, and the year closed with a demand of Rs. 6,50,14,853. The increase was mainly due to a net enhancement of revenue in the Etawah settlement of Rs. 71,773, and of Rs. 18,198 on account of items of progressive enhancement in Moradabad. In the Jhansi division the gross increase of Rs. 34,332, mostly due to quinquennial revisions of

assessment, was counterbalanced by a decrease of Rs. 29,012. The remaining decreases, shown in column 8 of the statement, were the result of diluvion and other miscellaneous causes.

CHAPTER III.—LITIGATION UNDER THE TENANCY LAWS.

30. The number of suits and applications of all kinds received by the courts of the province of Agra under Act II of 1901 during the year amounted to 327,455 as compared with 385,014 in 1911-12. This apparently gives a very large decrease of 57,559. In reality there is not so great a difference, as a large number of ejectment and enhancement cases which really belong to the year under report were filed in the current revenue year, because the 30th September 1913 was a holiday. Making the necessary adjustments, there is still, however, a net decrease of 19,487 cases in the mass of litigation, or upwards of 5 per cent. Only the three divisions of Gorakhpur, Benares and Jhansi show net increases of 2,600, 1,130 and 961 respectively. In Allahabad there is a net decrease of 7,580, in Rohilkhand of 7,377, and in Agra of 5,677. All the more important classes of case except formal ejectment suits (+3,820) share in the general decrease. Increases are found in the miscellaneous suits of columns 12 and 13, statement XX-A (+1,628), in suits for resumption of rent-free lands (+317), in suits for compensation (+66), and in those for abatement of rent (+13).

§30.—Agra Litigation. Statements XX-A and XXI-A. (i) General.

Suits for arrears of rent numbered 153,515 as compared with 168,627 of the previous year. This is a decrease of 15,112, or nearly 9 per cent., and it is common to all divisions except Benares (+336). The decrease is largest in Allahabad (—5,321), or 18 per cent.; Rohilkhand and Agra follow with (—4,067) and (—3,135) respectively. In district figures the fall of 1,942 in Budaun, of 1,592 in Cawnpore and of 1,417 in Farrukhabad are noteworthy. The Board do not propose to offer any explanation of the temporary diminution of arrears of rent suits. It is explained as due to a good year in Rohilkhand, but other Commissioners and most district officers refrain from comment. As pointed out in last year's report, causes must vary from place to place and from time to time. Generally speaking, the year was a remarkably good one, and it may not be without significance that suits increased only in the Benares division where the stress of drought was felt. Taking the normal years 1895-96 to 1898-99, i.e., prior to the introduction of the present Rent Act, it has been assumed that the average number of arrears of rent suits in Agra (excluding Kumaun) is 103,231. Compared with this the year's returns show an increase of 49 per cent and the statistics of recent years show that this arbitrary standard is regularly exceeded. During the last fourteen years only once, in 1901-02, has the total been less; there was a relative decrease of 5,000 in the last famine of 1907-08 on the figures of the preceding year, but the inference seems to be that the general trend is towards increase, though from one cause or another the figures may occasionally stand still or even fall.

(ii) Suits for arrears of rent.

Applications to enforce decrees of arrears of rent by ejectment under section 59 decreased by 6,367, the total number filed being 34,092. The fall in the number of cases in which ejectment was ordered was 1,520, proportional to the decrease in total applications, but it is satisfactory to note that the fall in the area concerned (column 21 of statement XXI-A) was much more marked. Expressed in percentages, the total number of applications declined by 16 per cent., of ejectments ordered by 18 per cent., but the area from which ejectment was ordered fell by 35 per cent. These statistics are favourable, and may be attributed to the continued prosperity of the tenant class. There was again a fall of 13,244 acres in the area from which occupancy tenants were ejected being the difference between columns 21 and 23 in statement XXI-A.

(iii) Ejectment for arrears.

There were 2,175 cases arising out of proceedings in distraint. This is a decrease of 286, which is of no particular significance.

(iv) Distraint.

It is natural in a year of generally easy conditions that the mutual claims and obligations of co-sharers should be discharged without difficulty, and suits for arrears of revenue and profits decreased by 763. The large rise of 451 noticed in Gorakhpur last year was followed by a decrease of 411.

(v) Suits for arrears of revenue and profits.

(vi) Resumptions.

There was an increase of 317 in the number of suits for resumption of rent-free grants, to which the district of Farrukhabad contributed 275. The reason for this is that the twelve years' period of limitation prescribed under section 154 (2) (*a*) of Act II of 1901 was about to expire. Government has been asked to sanction extra staff on this account with effect from 1st February 1914.

(vii) Enhancement of rent.

Last year a very large increase of 110 per cent. in enhancement suits was recorded, and this was explained as the natural result of prosperous years in affording landholders an opportunity to level up the rents of their tenants. This increase has been maintained with a small net diminution of 55. The total number of suits in the year under report was 13,223 as compared with 13,278 in 1911-12. These figures differ from those contained in column 6 of statement XX-A for the reason given above in the general remarks on the litigation of the province. There was a rise of 335 in Rohilkhand and of 210 in Agra, of 69 in Jhansi and of 18 in Gorakhpur. Among districts the only noticeable increases are 787 in Aligarh and 479 in Bareilly. In both these cases the cause is the expiry of ten years since the settlement came into force, as was noted last year. The Collector of Aligarh also draws attention to a tendency on the part of landholders to file suits by holdings instead of by mahals. There were decreases of 600 in Meerut, of 537 in Mainpuri, of 310 in Budaun and of 246 in Farrukhabad. These are generally to be explained by a return to normal conditions after the enhancements made possible by the expiry of limitation from the last declaration of *jama*, but in Farrukhabad the Collector mentions the opposite tendency to that noted in Aligarh, namely that landholders filed suits by mahals and not by holdings. It is satisfactory to note that there has been a palpable decline of 197 enhancement suits in the Benares district and of 90 in the division as a whole. Last year also it was noticed that there was a temporary check in the number of institutions, but the Collector gets small comfort out of the fact, which he explains as due to his having told the manager of the Maharaja's estate that it is useless to file any more at present because so many cases are still pending. He anticipates many more as soon as the existing file is cleared. There is now hope that cause of complaint will be removed as a covenanted civilian and a deputy collector have been specially appointed by Government, on the Board's recommendation, to not only dispose of accumulated arrears but also *pari passu* to frame suitable pargana rates which will simplify future procedure. It is not the overwhelming mass of such litigation in Benares which causes the difficulty, as the total number of cases is small compared with Rohilkhand, Meerut or Agra, but the fact that there is no standard soil classification for the permanently settled areas. Mr. Gracey records an opinion that it is necessary to make some very radical change in enhancement procedure with a view to improve results, and to give sub-divisional officers more time for their other multifarious duties; he therefore proposes that enhancement of rents should be taken up wholesale, once every ten or fifteen years, in a manner similar to settlement. This is not altogether a new proposal, but the Board are not prepared to give it their support. It is undesirable that special attention should periodically be aroused to the subject of enhancement by such revisions which would be likely to involve a much larger number of tenants than are now sued for enhancement. The ideal is to bring about the habit of amicable settlement. Mr. Gracey's proposal would tend to make enhancement more and more a concern of the administration.

(viii) Surrenders.

The number of voluntary relinquishments on the part of tenants (column 14 of appendix XX-A) has again shown a considerable decrease of 2,717. Since 1909-10 these applications have decreased from 14,979 to 10,464. The introduction of formal procedure by suit for ejectment has doubtless had much to do with the gradual decline in relinquishments, which are now less than half what they were before the passing of the present Tenancy Act. Tenants have learnt that their position is somewhat stronger, but along with this must be considered the effect of recent good years. This is the reason given for the noteworthy fall of 778 in Moradabad and of 688 in Cawnpore. The figures in Muttra are very satisfactory. In 1909-10 there were 1,122 surrenders, and in the year under report the number is 320. Mr. Dampier draws the inference that the "district is on the upward curve again." There has been

a large increase of 670 relinquishments in the Jhansi division which was unexpected after the good seasons, but is explained as due to spread of *kans* in consequence of abundant rains, and the desire of tenants to get rid of unprofitable holdings. Actually the figures for 1911-12 were much in defect if compared with the average of the three years preceding.

(ix) Ejectment on other grounds than decree for arrears.

Next to suits for arrears of rent, ejectment suits form the largest item of the judicial work of our rent courts. In column 10 of statement XX-A the number of the institutions during the year is given as 98,230 and this apparently reveals the remarkable fall of 27,849 from the corresponding figures of 1911-12. Actually this is not so, because an exceptionally large number of institutions took place on the first working day of October 1913 for the reasons above explained, and instead of a decrease there has been a net increase of 3,820 in suits belonging to the year under report. The flood of this litigation, which last year had reached a maximum since 1900-01, has therefore continued to rise. The increase on the year's figures is one of only 3 per cent., but there is no betterment of the condition of things which Government, in its resolution on last year's report, considered as serious and as giving reason to doubt whether the existing provisions of the law do not require consideration. There have been decreases in Rohilkhand (—1,222), Meerut (—832), Agra (—443) and Kumaun (—127); on the other hand the increases in Gorakhpur (+3,451) and Benares (+1,330) are in excess of any decrease, and the rise in Jhansi and Allahabad of 832 and 831, respectively, are in continuation of large increases during 1911-12. A rise was to be expected in the Gorakhpur division on account of the approaching settlement, but the Commissioner inclines to the view that the fluctuations mainly depend on the number of holdings which fall due for the accrual of occupancy rights, and the relations existing at the time between landholder and tenant. In the opinion of the Board, ejectment in Gorakhpur is closely connected with the concealment of rent and the *nazrana* system, as, in order to secure effective concealment or *nazrana*, tenants must be prevented from acquiring the occupancy status. Moreover, there is an enormous pressure of population on the densely cultivated soil, and tenants are at the mercy of their landholders. In Rohilkhand the decrease is probably due to the unsatisfactory prospects at the close of the monsoon. In the district of Gorakhpur the increase was one of 2,055, and in Basti of 1,288. The two divisions of Rohilkhand and Gorakhpur between them account for 63,599 cases, which are upwards of half the provincial total. The Collector of Aligarh accounts for a rise of 783 by the corresponding rise of 787 in enhancement suits, but there is nothing to show that the agreement in the figures is not fortuitous, and this explanation would not apply elsewhere. In Jhansi the growing recourse to ejectment is attributed to good harvests, the desire to increase rents, and to competition for land. The last reason has not hitherto been generally applicable in Bundelkhand. The subject of explanations is worn threadbare, and the Board need do no more than refer to their summary of the four contributory causes which were enumerated in their last year's report. There can be no doubt that in enhancement of rent and ejectment of tenants, our agrarian administration is brought into close touch with economic forces, which affect not only the agricultural system but the whole life of the country. The effects of these forces cannot be entirely controlled by rules or by legislation, but it should be possible to insure by these means that the manifestation of the economic forces may become less irksome to the administration and be accompanied with less friction between contending interests. In considering the effect of ejectment proceedings on the agricultural situation generally, it must always be remembered that occupancy holdings in the Agra province comprise roughly 65 per cent. of the total tenants' holdings, and in spite of all that is done in the remaining 35 per cent., where alone ejectment is operative, occupancy rights continue on the whole to expand, the total increase since 1901-02 being 503,517 acres.

(x) Area affected by ejectment suits.

The number of ejectments actually ordered was 93,490 or an increase of 17,659 on the previous year's figures, and there was a corresponding rise of 40,363 acres in the area affected. These statistics depend not on the number of institutions, but on the number of cases actually decided in any year.

§ 31.—Protection afforded by the Agra Tenancy Act.

31. The gross area protected from arbitrary ejectment either by accrual of occupancy rights, or by potential occupancy rights owing to twelve years' continuous holding, or by the grant of long-term leases, has increased from 14,133,662 acres to 14,288,498 acres; but for the first time since 1903-04 there has been a drop of 10,187 acres in the area of land held by persons recorded as non-occupancy tenants for periods of twelve years or more. This is the natural result of the enormous increase in ejectment proceedings during the last two years.

§ 32.—Litigation in Oudh. Statements XX-B. and XXI-B.

32. Two small changes have been made by the Board in the statements showing Oudh litigation whereby in statement XX-B particulars as to enhancement and ejectment are shown separately, and are not lumped together as heretofore, and in statement XXI-B particulars as to applications for assistance to eject under section 60 (1), Act XXII of 1886, have been given in columns 28 to 30.

As usual, the total volume of litigation in the two Oudh divisions shows little change, there being a small total decrease under all heads of 49 cases only. There are, however, some marked variations under different classes of suits and applications which call for brief comment. Arrears of rent suits as in Agra decreased considerably. The decrease was one of 3,981 following on a decrease of 2,364 in the year preceding. This is generally attributed to a year of prosperity, but Mr. Holms points out that a truer reason is found in the cessation of the rush to secure arrears by decree which had come down from the last famine. There was also a corresponding decrease of 1,245 in the applications under section 61 to eject for an unsatisfied decree of arrears, but on the other hand ordinary applications for ejectment by notice under section 55 went up by 2,061, and now amount to 27,450. This figure is only 235 below the maximum recorded, which was reached in 1909-10. It is interesting to note that a large increase in ejectments in Oudh was synchronous with the passing of the Agra Tenancy Act. In 1900-01 the number of cases went up from 14,011 to 22,860, and only in the famine year of 1907-08 has there been anything like a return to the level of the previous figures. The Deputy Commissioner of Bara Banki points out that ejectment procedure is used by the landholders "for the purpose of obtaining enhanced rents or substantial *nazranas*. Whenever a holding is vacant there are four or five applicants for it. The tenants are in this respect largely at the mercy of their landholders." The largest increase (+720) in ejectment cases was reported from Unao, but no reason was assigned. Suits to contest enhancement and ejectment (column 8 of statement XX-B) increased by 903, a natural result of the rise in ejectment notices. Relinquishment cases dropped by 221 in the year under report. This is an item subject to violent fluctuations. In the previous year there had been a rise of 961, and in the year before that there had been a drop of 936. These cases may be said in Oudh to depend upon the landholders' action in raising the rent; if tenants do not agree they either voluntarily relinquish or are ejected. The only other noticeable feature in Oudh litigation is the large number of resumption cases, which has now reached 5,867. All districts except Unao, Gonda and Bahraich show an increase. The Commissioner of Fyzabad has already addressed Government for the assistance which is considered necessary for the disposal of these cases, the increase in which is due to the impending expiry of the period of limitation under section 107E(*a*), and the desire to prevent the accrual of under-proprietary rights to the tenant.

§ 33.—Litigation in Kumaun. Statements XX-A and XX-C.

33. The total litigation under the Kumaun Rules decreased from 474 to 399. Arrears of rent cases went up by 46, and arrears of revenue and profit suits went down by 110. Other variations call for no comment. There was a similar decrease in the institutions under the Agra tenancy law, which is applicable to the Kashipur sub-division. Using net figures, there were 487 cases against 654 in 1911-12.

§ 34.—Work in courts of original jurisdiction. (*a*) Agra. Statements XX-D and XXI-A.

34. The year opened with a pending file of 133,874 suits and applications under Act II of 1901 in the province of Agra. The difference between this figure and 126,870 shown in last year's statements, is due to the exclusion of 152 cases erroneously shown therein, and to the inclusion of the pending balance of 7,156 applications under section 59, which formerly was not available. Statement XXI-A

has now been amended so as to show in columns 9 and 17 the total number of ejectment suits and applications respectively which were actually disposed of during the year instead of merely the total number for disposal. During the year 327,455 new institutions were filed, so that the total for disposal was 461,329 as contrasted with 478,224 of the preceding year. The pending balance on 30th September 1913 was 106,541, which gives a substantial decrease of 27,333 cases on the corresponding total last year. This is commensurate with the net decrease in institutions relating to the year in question, which was 19,487. If enhancement and ejectment suits are left out of account, because all those that are filed during the year have to be disposed of in the following revenue year, there is still a reduction of 2,224 in the balance left for disposal. There are 18 districts which return pending files of more than 500 in the classes which can be disposed of during the year. The number has apparently gone up since last year, but this is due to the inclusion of applications for ejectment under section 59. If the same basis of comparison had been used there would have been 19 and not 12 districts as reported last year. The only noticeable balances are 1,185 in Budaun, 1,033 in Meerut, and 1,021 in Shahjahanpur. These results are unsatisfactory, considering that institutions decreased and in each case the work to be carried over to the next year has increased. The largest increase in the pending balance is one of 299 in Ghazipur, and this is explained by there having been a considerable increase in institutions. It is highly satisfactory to note that in Benares there has been a large reduction of 606 in the balance, which indicates a good year's work. Young officers were sent to the district for training and assisted in clearing off arrears. Similarly Agra, Cawnpore and Gorakhpur have effected reductions of 629, 376 and 280 respectively in the balance of cases. On the other hand, there has been a large addition during the year in some districts to the number of cases pending for more than three months, and in this comparison all classes of suits and applications are included except applications for ejectment under section 59, for which particulars are not available. The total number is 2,192 as compared with 1,074 of 1911-12. Enhancement suits account for the bulk of this increase, Benares showing 770 and Aligarh 376. Circumstances are special in Benares, but as the Commissioner of Agra remarks, enhancement cases should be settled, as far as possible, while officers are on tour. Protracted cases have risen from 134 in Budaun to 236, for which 100 ejectment suits are responsible, but no adequate explanation has been given by the Collector. Bijnor continues to show a clean sheet in this respect, and for this the Collector's careful scrutiny of periodical returns is responsible. The Board desire that greater attention may be paid everywhere to the prompt disposal of cases, and that courts may be called on to account for all long delays. On the whole the year's work is a satisfactory one; there was less work before the courts for disposal, and they have done somewhat to reduce the burden of arrears.

(b) Oudh. Statements XX-D and XXI-B.

The year opened in the province of Oudh with a pending file of 2,365 cases. This includes the figures shown in column 3 of statement XX-D and in columns 28 and 31 of statement XXI-B. The number was reduced by 98 only, and the balance was 2,267 on the 30th September 1913. The large balance of 776 in Unao was reduced to one of 264 only owing to the disposal of resumption cases. The postponement of these suits for cold weather inspections along with enhancement suits has not been approved. The largest balances are found in Sitapur (317), Hardoi (315), Bara Banki (301) and Sultanpur (286). The explanation seems to be a large number of resumption cases in Sitapur, but in the other three districts the largest pending items are arrears of rent suits, and no sufficient reasons to justify such large balances have been given. There has been a notable reduction from 478 to 262 in the number of cases pending for over three months, for which the Unao resumption cases are mainly responsible. The Fyzabad division shows good results in reducing long pending proceedings from 93 to 63 during the year.

§ 35.—Execution of decrees. Statement XXX-B.

35. The work of the courts in dealing with applications for the execution of decrees continues to expand. During the year under report there were 138,949 new cases brought on the file, or an increase of 2,828. Since 1910-11 the increase in this item has been 4,117. Including the arrears from the preceding

year there were 151,786 cases for disposal, out of which 138,534 were consigned to records. The result of the year's work was 674 disposals less than in 1911-12, and the pending file at the close of the year went up from 12,837 to 13,252. One case of 1909 continues to be reported from Aligarh, the civil court from which orders are awaited being responsible for the delay. The very large number of execution proceedings which are returned from Rohilkhand is noticeable, and particularly from Budaun and Moradabad. These are doubtless much inflated by executions in ejectment cases, as the amount for recovery is less in Rohilkhand than in Agra, though the number of applications is not far short of double. The pending file in Budaun is 1,217, and has increased by 90. These figures indicate the need of detailed scrutiny by the revenue superintendent, and measures should be taken to impress on the courts the duty of the prompt disposal of executions which is enjoined in the Board's circulars. The total amount involved in the cases disposed of was Rs. 52,99,373, of which Rs. 26,02,445 or about 50 per cent. was actually recovered. The results are not quite so good as last year, and only the Agra, Jhansi and Lucknow divisions show small reductions in the pending file.

§ 36.—Appeals to Collectors. Statement XXII.

36. There has again been a rise in the appellate work of Collectors, though only of 492 cases or 8 per cent. as compared with one of 803 or 16 per cent. in the previous year. The rise is mainly confined to the two Oudh divisions and to Rohilkhand, Lucknow returning an increase of 338, Fyzabad one of 184, and Rohilkhand one of 126 appeals. This serious addition to the district officer's work during the year in Oudh is attributable to the merely temporary increase in the number of resumptions to which attention has already been directed. The heaviest appellate file for the provinces is found in Moradabad (397), where however the pending file has been reduced satisfactorily from 64 to 48. The largest number of institutions was in Ballia (338), and the pending file has gone up largely from 22 to 78. There are only three districts, Moradabad, Budaun and Ballia where the total for disposal during the year exceeded 300. It was lowest in Dehra Dun, where there were only 3, and the Collectors of the Jhansi division are lightly worked in this respect with an average of about 42 per annum as compared with one of 146 for the provinces as a whole. The total number of appealable cases decided by subordinate courts was 111,811 and 5·7 per cent. of these were taken up on appeal— a proportion slightly in excess of last year's. The percentage of appeals which were totally unsuccessful was a little more than 60, which is slightly superior to last year's results.

§ 37.—Appeals to District Judges. Statement XXIII.

37. During the year the number of cases decided by Collectors and Assistant Collectors of the 1st class which were appealable to the District Judges was 12,102. Appeals were filed in 1,968 cases, or 16 per cent. which is again a rise from the 14 per cent. of the previous year and the 11 per cent. of 1910-11. The percentage of the completely unsuccessful cases, as shown in columns 6, 7, 8 and 12 of the statement, remains at 56 as last year. The number of cases remanded, the result of which is therefore uncertain, rose from 127 to 167. The improvement which was noted in last year's report as necessary in the work of the Assistant Collectors of the first class, is not yet apparent in results. There remained 810 cases pending before the Judges at the close of the year.

§ 38.—Appeals to Commissioners. Statement XXIV.

38. There was a very considerable rise of 2,115 in the number of appeals preferred to Commissioners during the year, and the total file for disposal went up from 8,341 to 10,526. Notwithstanding this very large increase, the pending file showed a comparatively small increase of 622 at the close of the year. The appealable cases decided by subordinate courts during the year was 71,498, and the percentage of appeals presented rose from nine to upwards of twelve. The Commissioner of Meerut, where the increase was very marked, attributes this to sheer litigiousness, the result of prosperous seasons, especially as in that division 81 per cent. of the decisions were upheld. There has been a general increase throughout the provinces of the judicial work thus thrown upon Commissioners, only Gorakhpur returning a decrease of 272 cases. The numbers for disposal are noteworthy in Rohilkhand (2,284), Gorakhpur (1,392), Fyzabad (1,389), Benares (1,306), Agra (1,294) and Meerut (1,238). It thus appears that six of the Commissioners have now

more than the reasonable limit of 1,100 appeals which has hitherto been accepted. During the year Mr. Allen acted as Additional Commissioner in Rohilkhand, with the result that the pending file has been reduced from 599 to 325. The highest pending balance is 478 in Fyzabad, as against 306 at the beginning of the year. The number of institutions in this division continued to be very heavy, 1,083 being equivalent, by reason of the complexity of the issues involved, to a much larger number in an Agra division. Mr. Holms has made a special representation to the Government for the appointment of an Additional Commissioner, and the Board strongly support him in this matter. In Benares there has been a remarkable rise in the pending file from 73 to 363, and this in spite of the fact that 371 appeals were transferred to Collectors as compared with 67 in the previous year. The Commissioner actually disposed of 595 himself during the year. The case of the growing file in Benares was referred to in last year's report, and measures have since been taken to give the Commissioner necessary help. The Board desire to draw attention to the fact that the transfer of appeals to Collectors during the year under report attained a maximum. This matter was referred to in the Board's report for 1910-11, and it is necessary again to point out that this power is intended to be exercised in exceptional circumstances, and that transfers should only be made to experienced Collectors.

In reference to appellate work generally, Mr. Cobb again deprecates the lack of leisure which he finds for other equally important duties, and points out that a great deal of superfluous litigation "is caused by cases of tenant's right being fought twice over by so-called *durusti jamabandi* proceedings under Act II of 1901, and again by regular suit under section 95."

The percentage of appeals which were upheld after trial was 70, which is a very satisfactory result and maintains the high standard reported last year. In Agra Mr. Hose finds occasion to comment on the summary manner in which enhancement and ejectment cases are often dealt with, but with a few exceptions the work of subordinate courts is found good by Commissioners.

§ 39.—Judicial work of the Board of Revenue.

39. Under the tenancy laws of Agra and Oudh 1,475 new appeals were instituted in the courts of the members of the Board, which with a pending balance of 465 (revised figures) made up a total of 1,940 appeals for disposal. During the year 1,303 were decided, leaving a balance of 637. In revision under the Agra Tenancy Act 1,124 applications were filed, and there were 1,281 for disposal, out of which 1,027 were decided, leaving a balance of 254. The orders of the lower courts were disturbed in 22 per cent. of the cases in appeal, and in 10 per cent. of those in revision. The highest percentage of disturbances was 37 for appeals and 21 in revision, from the Agra and Benares divisions respectively. Ten cases were decided under the Kumaun Rules.

§ 40.—Honorary Assistant Collectors.

40. There were 28 honorary assistant collectors, by 22 of whom valuable assistance was given to the district staff in disposing of cases. The substantial nature of the aid given by these gentlemen may be judged from the fact that 18,805 cases were decided by them, the number in one court, that of Rai Jagannath Singh Bahadur, retired deputy collector in Moradabad, being no less than 3,121. Saiyid Imdad Ali in Moradabad, and Saiyid Mazhar Ali in Budaun decided 2,475 and 2,061 respectively, and Babu Durga Prasad of Saharanpur just exceeded 1,000. Commissioners and district officers acknowledge the voluntary and conscientious labours of all these courts, and the work has been found of commendable quality. In the Rohilkhand division there are no less than 8 honorary assistant collectors, and the Commissioner remarks that in Moradabad where there are 4, they deserve to be accommodated with rooms in the kutcherry. From an ideal point of view they doubtless deserve it, but the necessary expansion and improvement of kutcherrys for the permanent staff at present outruns the funds that can be made available. Mr. Hose remarks that there is room for the appointment of more honorary assistant collectors in the Agra district.

CHAPTER IV.—SETTLEMENT AND REVISION OF RECORDS.

§ 41.—Regular settlement.

41. The revision of the Allahabad settlement was undertaken during the year, the Settlement Officer joining the district towards the end of October 1912. In the Etawah and Fatehpur

districts the revision of the settlement continued. The parganas of Mah and Kiwai in the Allahabad district were inspected, the rent-rate report of Kiwai being submitted shortly after the close of the year. The Settlement Officer of Etawah inspected tahsil Bharthna and the trans-Jumna tracts of parganas Auraiya and Etawah. A rent-rate report for the whole of the trans-Jumna tract in the district was submitted and the rates were sanctioned by the Board. The assessment proposals for the cis-Jumna tract of pargana Auraiya were reviewed by the Board and the new revenues were declared. In Fatehpur the Settlement Officer inspected the Khajuha tahsil comprising parganas Bindki, Kutia Gunir, Tappa Jar, and Kora, while the Assistant Settlement Officer, who joined the district in October 1912, inspected parganas Ghazipur, Aya Sah, and Muttaur in tahsil Ghazipur. Rent-rates were sanctioned in parganas Haswa, Bindki, Kutia Gunir, Ghazipur, Aya Sah, and Muttaur, and the assessment proposals of parganas Fatehpur, Haswa, Kutia Gunir, and Aya Sah were examined by the Board. The Assistant Settlement Officer left the district in August last on transfer to the Datia State.

Progress in the correction of maps and the attestation of records was maintained. The attestation of records in the Fatehpur district was completed, and the work in Etawah will be finished during the current year. The work in Allahabad is well in hand. Map correction was completed in four tahsils in the Muttra district, but was postponed in the head quarters tahsil. The revision of the records has been postponed until the resettlement of the district is undertaken.

The revision of the settlement in the Kashipur pargana of the Naini Tal district was sanctioned during the year, and the sub-divisional officer was appointed to the charge of the work. The correction of the village maps was taken in hand and the soil classification in certain villages carried out. Settlement operations, however, have been recently postponed for a year owing to the unfavourable nature of the season and the illness of the Assistant Settlement Officer.

Sanction was accorded by the Government to the Board's proposal to resettle the Pilibhit and Jahanabad parganas of the Pilibhit district and to extend the existing settlement in the Puranpur pargana for fifteen years. The current settlement of the Agra district has been extended for a further term of five years. The sanction of the Government of India has been received to the inception of settlement operations in the Gorakhpur district. During the year under review a training class for patwaris was held in the Maharajganj tahsil preparatory to the correction of the maps during the present cold weather.

§ 42.—Quinquennial revisions in Bundelkhand.

42. Revisional operations were carried out in pargana Jhansi of the Jhansi district and parganas Mahroni and Mahraura of the Lalitpur sub-division. The assessments of pargana Jalaun of the Jalaun district, Muskara and Rath of the Hamirpur district, and Baberu and Kamasin of the Banda district were also revised. The result of the revision was a net increase of Rs. 21,473 on an existing revenue of Rs. 7,85,152. Necessary amendments of the rules were considered during the year, and will shortly be submitted to the Government for sanction.

§ 43.—Miscellaneous.

43. The assessment of mill rents in the districts of the Kumaun division was revised during the year. The new assessments will yield an increase of Rs. 24,238 on the present demand of Rs. 17,259. The proceeds of the rents are credited to the district funds of the districts in which they accrue.

The revision of the record of rights in pargana Kaswar Raja in the Benares district was brought to a conclusion in May, and the Board are at present considering the report of the Record Officer and the extension of certain provisions of the United Provinces Land Revenue Act and the Agra Tenancy Act to the pargana.

§ 44.—Case work. Statements XXVI-A & XXVI-B.

44. The number of cases instituted during the year agregated 23,640, while 2,958 were pending at the end of the previous year. Of the total number of 26,598 cases for disposal, 19,167 cases were dealt with and the balance pending at the close of the year was 7,431. The number of appeals filed during the year was 967 and the total number for disposal was 1,042, of which 612 were in the courts of the Settlement Officers and 430 in those of the Commissioners. Nine

hundred and nineteen appeals were decided, 525 by Settlement Officers and 394 by Commissioners. The balance pending at the close of the year was 123.

CHAPTER V.—LITIGATION UNDER THE REVENUE ACT.

§ 45.—Summary recovery of revenue for lambardars. Statement XVIII.

45. Lambardars filed 2,191 applications during the year for summary assistance from the district and sub-divisional officers under section 184 in the recovery of arrears of revenue from co-sharers. It may here be noted that these proceedings were erroneously referred to as "suits" from one district. Including 563 cases which were pending from the previous year, the total number for disposal was 2,754, which is a decrease of 141 on the returns of 1911-12. The total amount of arrears to be dealt with was 93,661, giving an average incidence of Rs. 34 per application. This incidence has decreased from Rs. 40 in 1910-11, and the inference is that courts are admitting fewer applications for summary recovery of arrears from groups of co-sharers; but it seems likely that the Board's instructions of last year to the effect that each application should refer to the recovery of a definite amount from an individual defaulter are not fully observed. In Ballia there was only one application for the recovery of Rs. 356, and the report makes it clear that several co-sharers were being dealt with in the same proceeding. Recourse to this section varies much in popularity throughout the provinces. The number for disposal exceeded 100 in the following instances :—Farrukhabad (226), Meerut (206), Basti (203), Banda (178), Aligarh (173), Hardoi (159), Unao (153), Sultanpur (144), Gonda (135) and Muttra (111). In the Benares division on the other hand there were only four applications. The work was satisfactorily disposed of during the year.

§46.—Summary recovery of under-proprietary rents in Oudh. Statement XIX.

46. Clear indication of a prosperous year is seen in a decrease of 503 applications from superior proprietors in Oudh to recover rent from under-proprietors by the aid of the Collector and sub-divisional officers in Oudh, under section 185. The total number for disposal was 2,322 as compared with 2,845 in the previous year. The bulk of these applications comes from the Fyzabad division where 2,044 were filed against 93 in Lucknow. Kheri is the only district in the province which does not use the section, as the number of sub-settlement-holders is very small. In the Fyzabad district the number of applications fell from 1,199 to 942, which is largely explained by a decrease from 60 to 7 in the cases filed by the Ajudhya estate, as a consequence of improved administration. The pending balance has gone up from 146 to 306 in the Fyzabad division for which adequate reasons are not in every case given. The largest balance is 114 in Sultanpur, which is an increase on that of last year, in spite of a large drop in the new institutions. The explanation is that some cases present considerable difficulties owing to the large number of co-sharers and complexity of tenure. It is often necessary to attach and manage the properties and where defaulters live in different districts delay is inevitable. It is also reported that in Gonda and Sultanpur, which between them account for two-thirds of the pending file, cases were filed too late in the year for disposal. The Board draw attention to the rise in the pending file in the Fyzabad division in which every district shares except Partabgarh. In Sultanpur the Deputy Commissioner continues to keep this work entirely in his own hands.

§47.—Mutations in registers of proprietors. Statement XXVII.

47. The returns of mutations of proprietary right recorded during the year show a total decrease of 40,083. The actual figures under the various heads are 8,704 as the result of orders of the courts which is a small rise of 140, cases of private transfer (columns 9 and 11) 33,789 or an increase of 41, succession cases 127,551 or a decrease of 36,846, mortgage cases 29,108 or a decrease of 6,661, redemption of mortgage cases 20,017 or an increase of 2,422 and other unclassified cases 21,912 which shows a small increase of 821. For the provinces as a whole these returns are those of a year of prosperity. The decrease in succession cases is the result of respite from the ravages of plague and malaria, while the rise in redemption of mortgage and decline in new transfers by mortgage show clearly that there was not only less financial embarrassment but capital to spare. The slight variation in the number of transfers depending on judicial proceedings calls

for no comment. When the statement is examined in detail it is seen that the only division which shows a rise in succession cases is Kumaun, and for this rise Almora is mainly responsible. This is the result of measures which have recently been taken to bring the *phants* up to date in connection with a general scheme to bring into agreement with actual facts parts of the settlement record, which goes back to the sixties of last century, the last revision having been based upon Mr. Beckett's record. The subject of mutation in the hill portion of Kumaun has received attention during the year, and a new set of rules was discussed at a conference in Naini Tal of the Junior Member and the local officers. The smallness of the holdings in the hills may be judged from the figures in columns 9 and 10, where 3,560 mutations are shown for property which paid revenue of Rs. 8,210, or an average of about Rs. 2-4 per holding. The nearest result to this in the plains is found in the Fyzabad district where the average revenue involved in each of 699 transfers was between Rs. 6 and Rs. 7. There has been a large decrease in succession and mortgage cases in the Gorakhpur division from 38,952 and 16,264 to 26,901 and 9,722, respectively, which is the sequence of the amnesty proclaimed in this division during recent years, in order to induce patwaris to furnish belated information. Arrears have now been overtaken. On the other hand, the large rise from 1,775 to 4,162 in mortgage cases recorded in Basti is due to the introduction during the year of a *zamima khewat* in which temporary small hypothecations hitherto neglected have been shown. Last year the large increase in Gorakhpur district from 3,789 to 11,844 cases under mortgage was mentioned as due to the *zamima khewat*, and the figures have necessarily fallen this year, when only the normal annual changes without arrears were recorded.

§48.—Partitions. Statement XXVIII.

48. There has been a small rise in the number of new applications for partition throughout the provinces, and though there has been a slight all round improvement in the outturn of work, the pending file at the close of the year went up from 6,147* to 6,630. This is a result which cannot be viewed with satisfaction.

There were, 2,048* perfect partitions on the file at the beginning of the year, and 1,174 new applications were received, or 2 less than in 1911-12. The number of cases disposed of fell from 1,125 to 1,077 with the result that the balance to be carried over had increased by 97 cases. The year opened with a balance of 4,099* imperfect partitions, and new institutions were 3,506 against 3,333 in the previous year. The number of cases disposed of in this class increased from 2,897 to 3,120, but nevertheless the pending balance at the close of the year was 4,485, or an increase of 386.

The Board are constrained to bring to notice that one reason for the increase of the pending file which grows yearly is the undermanning of districts. This is the cause given for the rise of 23 perfect and 27 imperfect partitions in the closing balance for the Meerut district, and of 18 perfect and 39 imperfect partitions in that of the Gorakhpur district. The Collector of the last-named district writes that "for some months during the hot weather it was so understaffed that partition work in accordance with the Commissioner's instructions had almost to be held in abeyance." In the Gorakhpur division where the partition work, particularly imperfect, is very heavy, the burden of arrears is severely felt. The pending file has been reduced in only 18 districts in the provinces, and in no case by any large amount. In one of these, Allahabad, the work is partially held up by settlement, so a decrease would naturally be expected. The best returns are received from the Rohilkhand division where, in spite of a very large file, especially in imperfect partitions, the balance has been reduced in four out of the six districts. The Board consider that the Collectors of Bareilly, Bijnor, Moradabad and Pilibhit deserve credit for these results.

During the year the members of the Board have given attention to partition work on their tours, and instructions have from time to time been issued to point out how work may be accelerated. Certain amendments have also been made in the register submitted monthly for the Collector's scrutiny which should assist him in detecting unwarranted delays. In last year's report the Board touched on difficulties which arise in partition, and suggested means for lessening them. To these remarks

*Revised figures.

attention is again directed, and some causes which contribute to poor results are here briefly indicated. Firstly, there is the lack of intelligent interest on the part of many assistant collectors. It is essential that this defect should be removed; its result is to make the standard in partition cases lower than that of any other branch of revenue case work. Secondly, neglect is caused by frequent changes in sub-divisional officers. They have to take over cases at every stage, in many of which it is hard to pick up the thread, and the lack of any apparent urgency makes evasion of effort easy. The consequence is that the case does not advance as it should, and becomes more intricate for the successor. Thirdly, delay is caused by bad arrangements for the employment of amins. It has been found by the Junior Member in two districts that 31 and 18 partitions were indefinitely suspended for want of amins. For this there is no necessity, because extra men may always be obtained on application to the Board, and where a temporary staff has been provided, a rush of work may often be met by employing double the number of men for half the time sanctioned. The best hope of improvement in the quantity and the standard of partition work is based on closer supervision by Collectors and Commissioners, which should bear fruit not only by removing defects in subordinate courts, but also in lessening the burden of appellate work which is extremely difficult and absorbs much time. The proposal mentioned in one report to call for a statement of the number of personal enquiries on the spot into partition disputes by sub-divisional officers is useful, and may be commended for general adoption.

There is a general question of much importance in connection with the present method of making partitions, which the Board wish to mention. It is nominally recognised that there is a great advantage in having continuous *chaks* after partition, but this is usually ignored in practice, either because of a previous partition or in deference to the wish of the co-sharers, and the result is that the *mahals* formed consist of plots scattered all over the village. The economic disadvantages of this are so great that it has become a matter for consideration whether a radical change in the partition law is not required to make compactness essential. Such a change would involve difficulties because, in order to be really effective, possession according to previous *khetbat* partitions would have to be ignored in a partition which aimed at constituting continuous *chaks*. Moreover, it must be recognised that the change would be repugnant to the feeling of most *zamindars*, who trust neither each other nor the partition staff enough to lead them to believe that a *chakbat* partition will be fair, but whilst other countries are taking vigorous measures to secure compactness, we cannot in India continue to go on doing away with it.

There is no indication that the employment of patwaris in the place of amins finds further favour with the parties to partition suits, and their work is generally much inferior to that of the regular amin.

§ 49.—Appeals under the Land Revenue Act and Kumaun rules. Statement XXIX.

49. The general decrease in litigation has not produced a corresponding decrease in the appellate work in Collectors' courts under the Land Revenue Act. The number of new institutions was 6,896 or an increase of 257 on the previous year. Out of a total of 7,884 on the file, 6,706 or an increase of 180 were disposed of and the pending balance was 1,178 at the close of the year as against 988 at the commencement. The courts have therefore kept pace fairly well with the increased work. Balances are inevitable owing to the large number of partition appeals which come into this statement. In Azamgarh out of 285 appeals decided, no less than 142 related to partition. The work in divisions is somewhat unequal. Gorakhpur is easily first with 1,393 new institutions, and Fyzabad (908), Rohilkhand (900) and Meerut (841) have each over 800. Jhansi had only 224. There was a marked falling-off in Allahabad due to settlement, and in Pilibhit which is partly attributed by the Collector to better work on the part of the original courts, and to his refusal to allow disappointed candidates for patwariship to appeal, that right vesting only in the nominating co-sharers.

In the courts of Commissioners there was an increase of 202 institutions, and the total for disposal was 2,642 as compared with 2,490 in the previous year. Of these 2,245 were decided, which is 86 more than in 1911-12, and the pending file at the close of the year had increased by 66.

§ 50.—Appeals to the Board.

50. The year opened with a pending file of 143* cases under the Land Revenue Act, and during the year 523 new institutions were received, giving a total of 666, out of which 487 or an increase of 92 on the previous year's figures were decided. The undisposed of balance was 179 cases. In 77 cases or 16 per cent. the orders of the lower courts were disturbed. On the revisional side there was a total of 157 cases, 143 from Agra and 14 from Oudh, out of which 96 were decided, leaving a balance of 61. It was necessary to disturb the orders passed in 19 cases from Agra and in 3 from Oudh.

Including judicial work of all kinds, the Board decided 2,924 cases out of a total file of 4,058 during the year.

CHAPTER VI—GENERAL.

§ 51.—Action taken to avert sale in execution of civil and rent court decrees.
Statement XXX-A.

51. There has been a considerable increase in the action imposed on Collectors under Schedule III of the Civil Procedure Code to avert sale of ancestral land in execution of civil court decrees. The year opened with a pending file of 3,308, and 5,947 new cases were received, or 280 more than were received in 1911-12. The increase was confined to Agra where only the Jhansi division shows a small decrease of 32, and the net increase was no less than 654 cases. In Oudh the number fell from 1,174 to 800, the decrease in the Fyzabad division being 219 and in the Lucknow division 155. The decrease in Oudh is explained as connected with the enforcement of the new amalgamated rules for the execution of decrees by sale of ancestral property which took effect from 1st January 1912. The result of the year's work was that 5,760 executions were disposed of and the balance pending on September 30th was 3,495. In Agra it slightly increased from 2,536 to 2,789; but, considering the very large increase in the cases received, the courts have dealt with this branch of work promptly and efficiently. The proportion of the number of cases in which sale was found inevitable shows no rise, the percentage of such cases to the total number of disposals being 34 both in the year under report and in 1911-12. In 104 cases decree-holders were satisfied by partial sales only, in 30 cases liquidation was arranged by leasing to a farmer or by direct management, and in 10 cases the amount of the decree money was raised by lease on payment of a premium or by mortgage. Though on the whole the results show improvement, the Board think that the amount of property that might be saved from entire sale would increase if more general attention were paid to the matter. One important point is to ensure that the official valuations are really full and adequate.

In Oudh action is taken under section 20 of the Oudh Laws Act to safeguard ancestral property from sale in execution of rent court decrees, the result of which was that 380 applications were preferred (inclusive of outstanding cases), and that sanction was given in 214 instances. Sales actually took place in 85 cases, or 39 per cent.

§ 52.—Acquisition of land.
Statement XXXI.

52. During the year under report land acquisition operations continued to greatly increase, the area acquired being 16,859 acres at a cost of Rs. 14,75,718 as compared with 10,652 and 8,180 acres at a cost of Rs. 14,48,563 and 11,80,461 respectively in the two, preceding years. The increase is due to recent activities in acquiring land for reafforestation and for the new Imperial city. Only 265 acres were acquired by private negotiation on payment of Rs. 28,893, the remaining 16,243 acres were acquired under the Land Acquisition Act for Rs. 14,41,213. This does not include 351 acres acquired temporarily for Rs. 5,612. The railway projects took up 1,047 acres, over 400 acres being for the Thawe-Captainganj extension of the Bengal and North-Western Railway. The bulk of the land was taken up in Meerut, for the new capital (6,364 acres for Rs. 2,76,554) and in Hamirpur, for *babul* forest (4,444 acres for Rs. 54,063), the other important projects being Majhgawan tank in Hamirpur (1,480 acres permanent for Rs. 62,523), Mirzapur municipal water works (810 acres for Rs. 11,010), and the Almora forest reserve (571 acres acquired by exchange with other Government land and 98 acres on payment of compensation of Rs. 228). The Bareilly municipality paid

*Revised figures.

half a lakh as the price of 124 acres for the expansion of the city, and the Oudh and Rohilkhand Railway's 28 acres for the Bholaganj siding in Shahjahanpur cost over Rs. 44,000. An instance of very high prices paid in urban areas is Rs. 7,835 for only 34 poles in the city of Benares for the extension of a local school. A special Land Acquisition Officer was employed in Meerut only. It is reported from the Rohilkhand division that there is a growing tendency to make exorbitant claims, not to accept Collectors' awards, and to refer to the civil court. If however the Collector's awards are well considered, and are consequently upheld by the civil courts, this tendency must disappear.

The area relinquished was only 224 acres, the price realized being Rs. 21,167.

53. The results of recently introduced labour saving devices and more accurate methods of classification are again apparent in a considerable reduction of the issues and receipts shown in the English department of Collectors' offices.

§53.—Total work in district offices. (*a*) Correspondence in the Revenue department.

It must however be remembered that only such correspondence is dealt with in the last two columns of statement XXXII as falls within one or other of the departments comprised within the Board's Book Circulars. The total number of issues and receipts was 197,177 as compared with 203,043 of the previous year, or a decrease of 5,866. The principal changes which have brought about the large reduction in the returns of this branch of the Collector's office work are the exclusion of reminders, numerous enquiries on half margins and vernacular papers received under English endorsements. All divisions show a decrease, except Meerut (+2,028), Jhansi (+1,774), Benares (+224), and in Lucknow (—2,877), Kumaun (—1,966), and Gorakhpur (—2,219) the decrease is a marked one.

The total number of institutions of all kinds in the vernacular departments of the district offices, including judicial cases shown in statement XX-D. which have already been discussed, *taqavi* files, and all miscellaneous items, amounted to 1,284,324 which is a substantial decrease of 86,169 on the figures of 1911-12. There was a pending balance of 236,253 at the beginning of the year and 1,304,341 were consigned to records leaving a pending balance of 216,236. This balance is of course largely composed of items dealt with elsewhere, particularly of enhancement and ejectment cases. The return shows a satisfactory outturn of work. In most cases the pending balances have been substantially reduced, and decreases of 2,545 in Moradabad, 2,135 in Azamgarh, and of 2,086 in Shahjahanpur, bear witness to the assiduity of all concerned. On the other hand Gorakhpur shows an increase of 2,755, Basti of 1,856, and Etah of 1,198, in spite of a decrease of 17 and 5 per cent. in the number of new institutions for Gorakhpur and Basti respectively. The explanation given for this in Basti is frequent changes among the Deputy Collectors, and the fact that the district remained without its full sanctioned staff.

(*b*) Cases in vernacular departments.

54. The total land revenue of the property assigned or alienated at the close of the year is Rs. 2,60,167 as against Rs. 2,60,325 shown in the previous year. The difference is due to the resumption of a few life muafis on the death of grantees and to additional assignments, which are mostly made to Indian non-commissioned officers for meritorious service.

§54.—Assignments, &c., of land revenue. Statement XXXIII.

55. The utilisation of money-orders to pay land revenue, local rates and canal rates which are classed as "land revenue," and for other remittances, mostly *taqavi* and excise, known as "miscellaneous" money-orders, shows an increase. Under the former head 330,717 orders were issued as compared with 318,183 in 1911-12, and the average amount was for Rs. 19, an average which appears to be fairly constant. Miscellaneous money-orders went up from 98,573 to 108,204, and the average amount per order was Rs. 11. In the previous year it was Rs. 12. The increase in land revenue money-orders proper is most marked in the Gorakhpur division, particularly in the Basti district, which accounts for nearly $\frac{1}{6}$ of the total number for the provinces. This is the natural result of the small items which *pattidars* have to pay, making remittance through the post office a welcome relief from the expense and trouble of a journey to the tahsil. It is only necessary to watch these returns when money-orders are issued from a post office in a tahsili town; this may indicate that revenue payers are put to some inconvenience which might be removed.

§ 55.—Payment of Government dues by money-order.

§ 56.—Rental money-orders.

56. The amount of rent which was paid by money-orders rose during the year from Rs. 18,14,292 to Rs. 19,62,044. This now represents 1·37 per cent. of the total cash rents for the provinces as shown in statement XXXIV. This is the largest increase which has been recorded since 1908-09. In Oudh there was a fall of Rs. 6,408 in the remittances, but in the Agra divisions it rose by Rs. 1,54,160. The largest increase (Rs. 72,900) was found in the Agra division, next to which was Rohilkhand with Rs. 48,673. It is inevitable that recourse to this means of paying rent should grow in popularity as it becomes more widely known. Though variations here and there may indicate that tenants and landlords are not on the best of terms, or the reverse, which are the reasons generally assigned, it must be recognised that it is a real convenience to the people and is being more and more utilised as such.

§ 57.—Maps.

57. During the year under report three tahsili maps of the Jaunpur district and the map of the Allahabad district were taken in hand by the Thomason College Press, Roorkee. All these maps were prepared and issued.

§ 58.—Working of the Bundelkhand Alienation of Land Act.

58. The Board have received interesting reports from the Jhansi and Allahabad divisions on the working of the Land Alienation Act. Collectors have in all cases furnished full and adequate comments.

In the trans-Jumna portions of the Allahabad district, agricultural tribes sold to outsiders land paying an aggregate revenue of Rs 140, and gained from them an exactly equal amount. There was one case of mortgage by an agriculturist to an outsider of land paying Rs. 11. There were four applications under section 3 for permission to alienate, and in three of these permission was given, and seven cases of decrees on mortgage were transferred from civil courts, in all of which decree-holders accepted usufructuary mortgages in satisfaction for various periods. There were four cases of attempted evasion of the Act, which were detected in the course of mutation proceedings and necessary action was taken. The Act is said to be popular, and the Collector quotes, with some reserve, figures which would go to show that the safeguards introduced have actually enhanced the value of agricultural land instead of decreasing it.

In the Jhansi division where the Act applies universally, the results are highly satisfactory. Agriculturists acquired from others land assessed at Rs. 9,626 as against Rs. 570 alienated by them to non-agriculturists, the chief gainers being Musalman Rajputs, Thakurs, Brahmans and Kurmis. On the other hand agriculturists mortgaged land paying a revenue of Rs. 1,757 as against land paying Rs. 1,135 mortgaged to them. Forty-seven applications were made for permission to alienate, sanction being given in 19 only and 30 decrees were received from the civil courts all of which were satisfactorily dealt with. Evasions of the Act were attempted in some four cases, in two of which mutation was refused, one is under enquiry and one was referred to the Board and found too petty to be interfered with. The Act is said to be popular by all Collectors, and a striking proof is the keenness with which Dakhani Brahmans in the Jalaun district successfully pressed their claims during the year to be reckoned as agriculturists. There is unanimity in reports that the price of land is rising, but the Collector of Banda holds that one result of the Act has been a contraction in credit which has shown itself in an increased demand for *taqavi*. This increased demand might be explained by the favourable season for rabi sowings, and the Board do not therefore fully endorse the Collector's opinion. The Act is well administered by all Collectors. During the year various necessary amendments in the Act were submitted to Government and most have received approval. A draft amending bill is shortly to be submitted, which will also provide for the extension of the Act to the trans-Jumna tracts of Etawah and to aboriginal tribes in Mirzapur.

§§59 60.—Conclusion.

59. There are certain problems of revenue administration in these provinces which are of immediate importance and in regard to which the Board consider that reference is desirable in this report. Of these by far the most important is the continued disturbance and unrest as well as the unceasing litigation connected with ejectment of tenants both in Agra and in Oudh. The subject is in Oudh even of greater importance than in Agra inasmuch as a large proportion of the Agra tenants are protected and in that province ejectment affects only a small proportion of the land in the

majority of villages. In Oudh, however, no length of occupation confers any right whatsoever, and cases in which tenants who have held without disturbance of possession since annexation are being sued for ejectment, constantly come to the notice of the Board. A detailed discussion of the remedies to be applied cannot find space in this report, but the Board may indicate their opinion that the remedy certainly does not lie in the direction suggested in various quarters of simplifying the process of ejectment, or of rescinding provisions of law designed to facilitate acquisition of occupancy rights amongst tenants who have long continuously cultivated in the same village. As an instance, a strong body of opinion has been formed that sections 13, 14 and 15 of the Tenancy Act should be repealed. The Senior Member has recently had prominently brought to his notice the value of the provision securing continuance of occupancy rights in land given in exchange in the Pilibhit district where in many villages it is customary to grow sugarcane in compact blocks. This implies that tenants who hold more land than they can put down under cane in these blocks are induced to give up such surplus land, and to receive in exchange land in another part of the village, or to receive it back when the cane crop has been grown. This custom in itself is sufficient to make it necessary to maintain the provisions of the sections just referred to. There of course exists still more urgent reason for the retention of these sections in the shuffling of tenants' lands which become customary under the Rent Act in certain districts.

Insecurity of tenure amongst tenants is closely associated with the second subject on which the Board desire to make certain general remarks, namely, the concealment of rent, the tendency to which is, in Agra, a consequence of the present system of assessment upon assets, a system which in the opinion of the Board affords to zamindars a guarantee against over-assessment and which it is in every point of view desirable to maintain. In Oudh, preparation for settlement by concealment of rents is by no means the sole or even the main motive for concealment. Here it is to a large extent due to a desire to obscure enhancements which under the provisions of the Oudh Rent Act are illegal. The concealment takes the form not only of incorrect entries in regard to the annual rent, but is also effected by substituting for periodical enhancement, a system of payment of recurring premia, a system which imposes a heavy burden on tenants without corresponding advantage to the landholders. Deliberate concealment of assets with fraudulent intent appears to the Board to be a practice which must be dealt with rigorously. They can see no means of making it for the future impossible except by securing when it is proved to occur that the tenants should remain in possession at rents fixed by authority. In the past a system of 5-years' settlement was adopted in such cases, but there can be no doubt that it was ineffective, and that, as a matter of fact, it had the effect of involving the tenants in recurring increases of the rental.

A third matter to which the attention of the Senior Member has been recently directed is the rapid disappearance of the lands hitherto held for the common purposes of the residents of a village, such as the threshing floors, the open land around the village on which manure is stacked, the open spaces on which the cattle are tied up, and the small patches of grazing lands the use of which the tenants have by prescription enjoyed in common. It has been recently found that landlords made use of their power to infringe such prescriptive rights in order to bring pressure upon their tenants. In one village that the Senior Member recently visited, the tenants alleged that cultivation had recently been extended to the walls of the houses in order to force them to withdraw from an application for commutation which they had presented in the settlement officer's court. A committee of which the non-official members were for the most part zamindars recently by a majority passed a resolution in favour of legislative action to secure the maintenance of such common lands, and Sir Duncan Baillie desires to record his opinion in favour of this suggestion.

In regard to irrigation the Board would advocate that in the future construction of remunerative canals fuller attention should be paid to their protective value, and efforts should be made to bring water into tracts where wells are difficult, even at the cost of some reduction of the surplus revenue anticipated. It seems to the Senior Member that canals are frequently taken through country which contains a good supply of wells, tracts where wells cannot be constructed being left out because the work would be more expensive. One great irrigation

system needful to complete the utilization of our big rivers is the one known as the Sarda scheme in favour of which there is now a strong consensus of opinion both official and non-official in the Oudh districts. Its utility in a season like the present is obvious seeing that it would cover a large part of the Rohilkhand and the Lucknow divisions which would be greatly benefited by protection.

Another point to which attention may be drawn is the need throughout the provinces of improved communications both by rail and road, and particularly by road. This has been referred to in previous reports, but there is a general complaint which was most clearly expressed in Rohilkhand and Meerut that communications have been neglected. One Commissioner goes so far as to say that there is more need for improved communications than for extended education! There can be little doubt that the administration has not kept adequate pace with the general change which has taken, and is still taking place in the method of carriage. Carts are everywhere replacing pack animals, at least wherever there are possible roads or tracks. Cart traffic should be encouraged as economically advantageous but at present it is everywhere unduly restricted by want of roads and the bad condition of existing roads.

60. In conclusion, it is not possible to ignore the condition of famine and scarcity which prevail at the present moment in Rohilkhand, Bundelkhand and parts of the Doab. It is matter for gratitude that a series of five remarkably prosperous years has put all concerned in a most favourable position to meet the strain now put upon their resources to meet calamity. It is particularly gratifying to find district officers reporting that the severity of the losses caused by the failure of last year's monsoon has been everywhere mitigated by the good yield and high prices of previous seasons, so that agriculturists are in a far better position to make a quick recovery than was the case in the last famine of 1907-8. The temper of the people is one of confidence, and their voluntary efforts have been liberally seconded by grants of *taqavi* in order to obtain the largest possible area of *rabi* sowings, though the lack of timely winter rain was severely felt. If normal conditions prevail during the ensuing year, complete and speedy recovery of lost ground is to be expected.

During the year the important line of railway communication between Cawnpore, Hamirpur and Banda has advanced materially and the bridge over the Jumna should be ready by July next. The necessity of further developments of railway construction in South Bundelkhand between Lalitpur and Mau Ranipur is mentioned and deserves attention. In Bahraich jute experiments continue to be made, but it has not been possible to conduct them on any very large scale. So far the prospect is very hopeful; the Deputy Commissioner reports that the profit on an acre of jute worked out to Rs. 122, as compared with one of Rs. 25 on an acre of hemp, which is the crop it would replace. Interesting accounts have been received from the Gorakhpur division of continued activity in developing the sugar industry and there are now three large factories. These industrial developments in so agricultural a district are of much importance, and already there is a talk of a metalled road from one factory to the railway for the motor transport of sugarcane.

I have the honour to be,

SIR,

Your most obedient servant,

J. E. GOUDGE,

Secretary.

STATEMENT XXXIII.

Showing the value of assignments or alienations of land revenue in favour of grantees for the revenue year 1912-13.

District.	Number.	Area in acres.	Land revenue assigned or alienated.
			Rs.
Dehra Dún	4	2,902	2,100
Saháranpur	1	323	580
Meerut	1	403	600
Bulandshahr	9	26,921	28,438
Muttra	1	8	15
Agra	1	525	584
Mainpuri	5	1,558	1,762
Bareilly	9	12,216	27,971
Bijnor	3	71,700	27,994
Budaun	1	1,019	1,437
Moradabad	2	7,559	4,073
Sháhjahánpur	2,874	10,061	19,667
Pilibhít	642	12,721	13,004
Etáwah	5	6,559	12,650
Cawnpore	22	383	984
Fatehpur	48	691	983
Allahabad	82	25,212	34,877
Jhánsi	1	224	37
Gorakhpur	6	652	608
Almora	6	...	3,300
Garhwál	2	3,716	1,200
Total, Agra ...	3,725	185,353	1,82,864
Rae Bareli	2	370	801
Hardoi	42	16,875	23,260
Kheri	1	8,985	878
Fyzabad	47	14,441	27,013
Gonda	24	5,239	10,733
Sultánpur	4	951	1,640
Partábgarh	36	4,190	10,133
Bara Banki	3	1,514	2,845
Total, Oudh ...	159	52,565	77,303
GRAND TOTAL, U. P. ...	3,884	237,918	2,60,167

NOTE.—(*a*) All the above grants, except 9 acres with land revenue of Rs. 8 assigned to 5 grantees representing the remission of revenue on Goraits' jagirs in jungle grant Keotali in Gorakhpur and coming under the class "For the maintenance of public servants", were made "on other grounds."

(*b*) Difference in figures as shown in this statement and in that for the previous year is due to resumption of a few muafis and to additional assignments.

STATEMENT XXXIV-A.—(PROVINCE OF AGRA).

Statement showing classification of holdings and rental statistics for 1320 *fasli or* 1912-13.

District.	Area of holdings.					
	Held as sír.	Held by zamindars other than sír, and thekadar's cultivation.	Held free of rent.	Held by permanent tenure holders and fixed rate tenants.	Held by ex-proprietary tenants.	Held by occupancy tenants with occupancy rights.

REPORT

ON THE

REVENUE ADMINISTRATION

OF THE

UNITED PROVINCES OF AGRA AND OUDH

FOR THE REVENUE YEAR 1913-14, ENDING 30TH SEPTEMBER 1914.

No. $\frac{638}{\text{XII—149B (5)}}$ OF 1915.

FROM

J. E. GOUDGE, ESQ., I. C. S.,
SECRETARY TO THE BOARD OF REVENUE,
UNITED PROVINCES,

TO

THE CHIEF SECRETARY TO GOVERNMENT,
UNITED PROVINCES.

Dated Allahabad, the 4th March 1915.

Present : THE HON'BLE MR. J. M. HOLMS, C.S.I., AND THE HON'BLE MR. J. S. CAMPBELL, C.S.I., C.I.E.

SIR,

§§ 1—3.—Introductory.

I AM directed by the Board of Revenue to submit to the Government their report on the revenue administration of the provinces for the year ending on the 30th September 1914.

2. The permanent members of the Board throughout the twelve months remained Sir D. C. Baillie, K.C.S.I., Senior Member, and Mr. G. A. Tweedy, Junior Member, but there were two changes for short periods owing to the absence of the Senior Member. Mr. F. W. Brownrigg held charge till the 19th November while Sir D. C. Baillie was officiating as Lieutenant-Governor, and Mr. J. M. Holms officiated from the 11th July to the 9th August while he was on leave. On each of these occasions Mr. Tweedy officiated as Senior Member.

3. The district reports and divisional reviews were all received during the first half of December 1914, but only those from Gorakhpur and Allahabad arrived on or before the prescribed date, which is the 1st December. The standard of the district reports was generally higher than in the year preceding, and I am desired to acknowledge, as very carefully written and interesting, those submitted by the District Officers of Kheri, Jalaun, Allahabad, Muttra, Banda, Moradabad, Etawah, Farrukhabad, Gonda, Meerut, Etah and Bulandshahr.

§ 4.—Seasons.
(i) Monsoon.

4. The character of the monsoon of 1913 was responsible for the many unfavourable features of the year under review. The rainfall was generally abnormal. In May and the early part of June there was an excess, but during the usual monsoon period between July and October there was a marked deficiency everywhere. This is explained by the almost complete failure of the Arabian Sea current to penetrate into the provinces. The deficiency of rain, though general, was far less marked in the eastern divisions of Gorakhpur, Benares and Fyzabad than in the southern, central and western tracts. Jhansi, Agra and Rohilkhand were most in defect, and in the order enumerated. Meerut in the extreme north-west was appreciably better off than its neighbour Agra. The monthly distribution of the rain and its effects were fully discussed in paragraph 10 of the Board's report for the preceding year.

(ii) Cold weather.

The rabi season opened with a practically rainless October and November. The total rainfall in December was very close to the normal, but it was unequally distributed, and was too tardy and insufficient to compensate for the lack of the showers which facilitate sowings. January was not only rainless, but was marked by serious damage to

arhar and gram from frost in parts of the provinces. February and March brought ample showers, but, unfortunately, they did more harm than good to the standing crops, as they were accompanied by hail. The season was therefore most adverse for sowing, and lacked the good rains of November which have been so marked a characteristic of the winter seasons during the preceding quinquennium, and the cause of so large an increase in the rabi' area.

The remarkable deficiency of the rainfall and its unequal and unfavourable distribution have combined to make both seasons of the year quite abnormal. The results will become apparent when the crop areas and outturns are considered.

§ 5.—Total cultivated area.

5. The Director's report shows that the total cultivated area has decreased by 22 lakhs of acres from the accepted normal, or by 6 per cent. The Jhansi and Agra divisions show decreases of 28 per cent. and 16 per cent. respectively. There has been a considerable decrease in the Allahabad division also, but owing to settlement operations in Etawah, Fatehpur and Allahabad, the districts most affected by drought, current returns were not available and the 1907-08 figures have been substituted, giving a divisional decrease of 9·6 per cent. On the other hand there was a small increase of 2·5 per cent. in Gorakhpur, and Benares was 23,000 acres above the normal. Rohilkhand in spite of the severity of the drought only records a deficiency of 1·9 per cent. and in the district of Bareilly the full normal area was maintained. In Oudh, the Fyzabad division was slightly better than Lucknow, the percentages of decrease being 2·7 and 3·1 respectively. Except perhaps in Rohilkhand these statistics correspond closely with the relative severity of the drought in each division.

§ 6.—Crop areas. (a) Kharif.

6. The total area of kharif crops fell by 3 per cent. or 618,605 acres below the preceding year, while it was 5 per cent. below the normal. Owing to the early arrival of the monsoon, conditions were generally favourable for sowing, but in parts of the Agra and Bundelkhand divisions there was shrinkage owing to insufficient moisture in unirrigated land. In Bundelkhand generally the kharif area was actually in excess, and so also in the Benares and Gorakhpur divisions. A portion of the increase in Benares is due to the inclusion of pargana Kaswar Raja for the first time in Government land records. Large tracts of cotton sown with canal irrigation in the Doab districts kept the areas above normal.

The statistics of the principal crops in detail show that *juar* and rice, both early and late, were 82, 86 and 82 respectively as compared with a normal area of 100. In each case they show a decline from the figures of the year 1912. Late rice fell by 17 per cent. the reason being that it was impossible to transplant the seedlings in the drought of August. The fall in this crop amounted to 200,000 acres for the Basti district alone, or nearly half the total decrease for the whole provinces. The last triennium has seen a succession of bad or indifferent years for *jarhan* rice. On the other hand the percentage of cotton (136), sugarcane (116), small millets (108), *bajra* (108) and maize (102) were above the normal. Only cotton, however, showed an increase on the 1912 figures, and this amounted to 428,338 acres. *Bajra* had been much inflated in that year owing to the excellent August rain and, though still above normal, shows an actual decline of 430,456 acres as compared with the year preceding. The season was particularly unsuitable for this crop.

While, therefore, the food crops of the kharif season generally declined, the returns of the important commercial crops of cotton and sugarcane are more favourable. The cotton area reached a record for the provinces, and amounted to 1,547,717 acres. The causes of this expansion are explained by Mr. Hailey in his Season and Crop Report as due partly to the favourable seasonal conditions which enabled the land to be prepared early, and partly to the high prices of 1912, which had given great profits. The rise was most marked in the Agra division where in the three districts of Aligarh, Agra and Muttra it amounted to nearly 100,000 acres. In the six districts of Bijnor, Budaun, Moradabad, Bareilly, Hardoi and Unao, which have been called the new cotton tract, the increases are particularly interesting, and amount in the aggregate to 109,974 acres. These two areas account therefore for nearly half of the total increase in cotton. It is reported that owing to the stimulus which cultivators had received from the high price of cotton the crop was being irrigated from wells,

while previously irrigation had been confined to canal districts. The Director remarks that "if irrigation from wells becomes at all general, and does not prove to be beyond the capacity of the cattle, it will add greatly to the stability of the area under the crop and to the all-round yield". This development will be temporarily affected by the restriction of the market owing to the war in Europe, but it will be watched with interest. The percentage of cotton which was irrigated during the year was nearly 42 per cent.

Sugarcane, though well above the normal, somewhat disappointed expectations by a net decrease of 34,717 acres. It increased throughout Rohilkhand where one of the measures taken to improve the agricultural outlook after the failure of the 1913 kharif was to stimulate sugarcane sowings by liberal advances during the favourable weather in March. The decline in the Gorakhpur division continues, but when the new sugar factories commence full operations the area will no doubt increase. For the present the low price of *gur* is said to be making sugarcane cultivation unpopular. It is interesting to note that sugarcane and cotton represented 13 per cent. of the total kharif crops of the provinces.

There was a further increase in the area under hemp from 138,467 to 187,763 acres and it is now said to be one of the important commercial crops of the Benares division, though it received no notice in any of the district reports. It has continued to increase in Partabgarh also, and is now nearly 5 per cent. of the total kharif area against 2·31 per cent. in 1913. Baling presses are being put down, and the fibre is exported to Europe whence, however, complaints continue to be received of its inferior quality owing to faulty retting methods and the admixture of mud.

The area of *til* increased largely as a result of drought. It is sown on inferior and outlying patches of soil, mostly in Bundelkhand, which accounts for more than two-thirds of the provincial total.

(b) Rabi'.

While the kharif area was very little below the normal that of the rabi' suffered a very serious decline. Owing to extremely favourable rains during the retreating period of the monsoon a constant rise in the rabi' area from 68 per cent. of a normal in 1907-08 to 120 in 1911-12 was chronicled. In 1912-13 it fell to 104 owing to the absence of October rain, and in the year under report it is only 82, which is lower than it has been in any year since 1907-08. In actual figures there was a decline of 44 lakhs of acres on the previous year, and of 35 lakhs on the normal area. Only the Gorakhpur and Benares divisions, which have been so fortunate during the general drought, show small increases. Leaving out Allahabad, for the reason mentioned above in paragraph 5 and Kumaun, the decreases are 54 per cent. in Bundelkhand, 21 per cent. in Agra, 20 per cent. in Lucknow and Rohilkhand, 17 per cent. in Meerut and 15 per cent. in Fyzabad. With regard to Bundelkhand it is worthy of note that the rabi' area is still 172,877 acres more than it was in 1907-08 after the last serious drought, and this in spite of the fact that, as the Commissioner writes, the drought of 1913-14 was "one of the worst that has ever been experienced" in that unfortunate tract. This testifies to the steady progress which has been made in the resisting power of the division, and may be taken as the measure of what has been done in the interim. The Director points out that sowings were practically impossible outside the irrigated area, a fact which is supported by the large falling off of half a million acres in gram, which is largely sown on the dry black cotton soils. It is an interesting coincidence that the excess of rabi' over the 1907-08 figures is counterbalanced by a decrease of 180,387 acres in kharif. The inference which is made from the Bundelkhand statistics is justified for the whole provinces, where the percentage of the rabi' area to the normal was only 68 in 1907-08 as compared with 82 in the year under report. The comparatively large area sown is largely the result of the constant attention which has been paid to improvements and also, as Mr. Hailey writes, "is a high tribute to the energy of the cultivators and the efficiency of the measures taken for their assistance".

Barley and rapeseed were the only crops with a percentage above the normal. Gram fell from 97 to 53 in reference to a normal 100, and linseed from 100 to 46, but it is satisfactory to find that wheat was only half a million acres below the

normal, and that compared with the figures of 1907-08 it was nearly two million acres in excess. Special note may be made of the fact that the irrigated wheat area of 1913-14 fell very little short of the entire area which was under that crop in 1907-08.

§ 7.—Irrigated area and sources of irrigation.

7. The effects of the drought are written large on the statistics of irrigation. The total irrigated area exceeded by close on two million acres that of 1912-13, and of this nearly 1½ millions were due to wells. The Government canals supplied an additional demand of 423,000 acres and, comparing the two years of drought, the total area commanded by this latter source was practically the same as in 1907-08. The feature of 1913-14 was therefore the greatly enhanced recourse to wells, and particularly to masonry wells. Mr. Hailey gives an interesting review of the statistics in paragraphs 19—22 of his Season and Crop Report. He shows that 23,398 more masonry wells were worked in 1913-14 than in 1907-08 and that there was a large falling off in non-masonry wells, due to one lakh less being dug in Oudh. During the year, however, the number of non-masonry wells in use were increased by 4½ lakhs, and in Rohilkhand alone by upwards of 2 lakhs. The construction of masonry wells increased by 2,026, every division sharing therein except Gorakhpur. The area commanded by reservoirs has gone up from 45,700 to 57,660 acres, which is due to an expansion of 12,705 acres in the Mirzapur district. The remark of the Director that more use might be made of the small rivers flowing through the Rohilkhand and Lucknow divisions by the use of pumping power is commended to the attention of district officers. Generally the statistics of the year bear out in a remarkable manner the Board's opinion expressed in last year's report that "complete protection from the results of drought, if possible at all, must be realised through an increase in the number of wells". Interesting accounts were received from Meerut of the introduction of an improved mechanism for Persian wheels which might possibly be introduced elsewhere, and Mr. Humphries (Bulandshahr) discussed the question of the use of mechanical power for raising water in reference to the increasing price of bullocks and the cost of their upkeep. The Board receive a special report from the Collectors of the Jhansi division on the working of the rules for construction of embankments and their maintenance which were issued with Government Order No. 278/I-311, dated 7th February 1911. These rules continue to be applied with more or less success, but Collectors refer to the difficulties which were summarised by the Board in my letter No. 1379N/IV-297 of the 4th July 1912, submitting a draft Act to deal with these and similar minor irrigation works throughout the provinces.

§ 8.—Calamities.

8. The year was characterised by a drought which caused famine in the districts of Jalaun, Banda, Hamirpur and parts of Etawah, and scarcity in Jhansi, Muttra, Allahabad, Agra, Budaun, Moradabad, Fatehpur, Bareilly and Shahjahanpur. The most serious feature of this drought was the failure of fodder supplies which was unprecedentedly severe in the Bundelkhand, Agra, Meerut and Rohilkhand divisions. Reference to this will be constant throughout the report and it dwarfs all minor calamities. Floods were reported from Unao which caused a remission of Rs. 7,166 land revenue, and also from Muzaffarnagar. Numerous hailstorms occurred throughout the provinces, mostly in the north and west, which damaged the rabi' crop and the mango blossom, but were nowhere of exceptional severity. In Moradabad fires caused losses aggregating no less than Rs. 2,95,464. The number of villages affected was 219, thirty-four cattle were killed and five human beings lost their lives. It is reported that the weed known as *baisuri*, which was noted in 1908-09, continues to spread throughout the middle Doab, and has become a serious nuisance in Etawah where it had previously attracted little notice.

§ 9.—Outturn. (a) Kharif.

9. The Director's estimated outturn of the kharif in terms of a normal yield of 100, without taking into account the area sown, shows that all crops were considerably below normal, but that cotton with 75, and early millets and maize with 70, were considerably better than the others. Sugarcane only gave 60, early and late rice 55 and 50, while *juar* was as low as 40. It is probable that the outturn of the cotton crop was underestimated, and it certainly saved the situation in parts of the Agra and Rohilkhand divisions where the drought was serious. In Mainpuri the outturn of

this crop was estimated at 18 annas and in Etah at 14 annas. Sugarcane was disappointing. Special efforts, especially in Rohilkhand, had been made to secure a fine crop, but dry hot weather in July spoiled it, and the conditions under which it was originally sown were not fully favourable. The rainfall of the year was only suited to the light and early cereals, and where these were sown very early the outturn was good. Rice must be considered a failure except in the eastern divisions; in Rohilkhand, where it is a great feature of the cultivation, it was only 20 per cent., and in Lucknow only 35 per cent., of a normal yield. There were complaints throughout the Doab districts that the canal water was received too late and irregularly, though every effort was made to meet the situation. Bundelkhand suffered more than any other area, and, though the area was a full one, the outturn was only 4 annas in Jhansi and Banda, 3 annas in Jalaun, and 2 annas in Hamirpur.

(b) Rabi'.

The rabi' crop from which the greatest profits are expected over the major portion of the provinces was disappointing in outturn as well as curtailed in area. Wheat and barley yielded 75 of a normal 100 as compared with 90 in the previous year, linseed yielded 70 and gram only 50. Both wheat and barley failed extensively where sown on unirrigated lands, but as pointed out above, special efforts were made to irrigate them in this year; the outturn of wheat was also favourably effected by the fact that it is largely grown on the *tari* and *kachchar* lands, which in a dry year are often more extensive than usual owing to the lower level of the rivers, while barley is a favourite crop in the eastern divisions where the outturn was good. Gram was a poor crop except in the Gorakhpur, Benares and parts of the Fyzabad divisions.

Considering as a whole the agricultural statistics, which have been briefly reviewed in the preceding paragraphs, it must be acknowledged that the year was a particularly bad one except for the favoured tracts in the east of the provinces. The kharif which provides food for man and fodder for beast was poor, even when it was not a failure, and the lack of seasonable rains made it impossible for the cultivators to recoup their losses by sowing an extended area in the rabi'. But owing to the exceptionally good years which have blessed the agriculture of the provinces since 1908-09 acute distress was nowhere visible. Even in Bundelkhand there was ample demand for labour and the average cultivator had no lack of resources. The strong position of the agriculturist was aided by prompt taqavi distributions on a large scale and well organised relief measures, and it may in consequence be confidently expected that, under normal conditions, the provinces will recover very rapidly from the temporary depression.

§ 10.—Monsoon and kharif of 1914.

10. The rainfall in May was above normal in most parts of the provinces. It was heaviest in the Oudh districts, where maize and *kodon* crops were sown in the submontane tracts. The rainfall for the month of June was about half of the normal. It was lightest in the Fyzabad, Lucknow and Allahabad divisions and heaviest in Gorakhpur, which received an average of a little more than 4 inches. The early sown crops suffered from the high temperatures prevailing, and towards the end of the month were reported to be withering. Ample and well distributed rain fell at the beginning of July which extended over the whole of the provinces. The lowest average fall was 8 inches in the Agra division, while some districts in the east of the provinces received over 20 inches. In Bundelkhand sowings were retarded by continuous rainfall. Abundant rain fell during the first three weeks of August throughout the provinces. It was excessive in the eastern districts, and sowings were interfered with in the Benares and Jhansi divisions. In the last week of the month there was a break over the western districts and a large part of Oudh, the Gorakhpur division and adjoining districts continuing to receive heavy falls. The break was very beneficial at the time in bringing on the crops, while it also rendered late sowings possible. Hot winds then set in over Bundelkhand and the western districts, and the crops began to suffer from lack of moisture. Except in the eastern submontane districts there was little rain during the first two weeks of September. In the third week there was most abundant rainfall over the whole of the Doab and Rohilkhand, some districts receiving from 10 to 15 inches, and considerable damage was caused from floods in riparian areas. The Oudh districts and

Bundelkhand received sufficient for their requirements; but there was deficiency in the Benares and Gorakhpur divisions. Fortunately most of this area received some rain towards the end of the month, but not in sufficient quantities for the late rice. Light showers fell in the second week of October in the western divisions, but in the east the rainfall was greatly in defect. Taking the whole monsoon period from 1st June to 31st October 1914, the variations from the normal were not large, as shown in the following table :—

Division.	Rainfall data for the season from 1st June to 31st October 1914.			
	Average actual rainfall.	Average normal rainfall.	Excess or defect in inches.	Excess or defect expressed as percentage of normal.
	Inches.	Inches.		
Kumaun (with Dehra Dun)	66·37	57·41	+8·96	+16
Meerut (exclusive of Dehra Dun)	35·91	26·38	+9·53	+37
Agra	23·79	24·62	−0·83	−3
Rohilkhand	37·88	37·21	+0·67	+2
Allahabad	27·68	31·13	−3·45	−11
Jhansi	31·62	33·83	−2·21	−7
Benares	36·96	37·37	−0·41	−1
Gorakhpur	36·51	42·11	−5·60	−13
Lucknow	31·46	33·89	−2·43	−7
Fyzabad	38·64	38·01	+0·63	+2

With favourable rains the kharif crops were sown on an extensive scale, the total area rising from 220½ to 235 lakhs of acres or by 6·6 per cent. The Benares and Gorakhpur divisions where sowings were interfered with by excessive rains, showed a decrease of 4 and 2 per cent. respectively; in the remaining divisions there has been an increase, which for the provinces amounts to 14½ lakhs of acres. A slight decrease occurred under cotton and *til* crops, which showed large increases in the preceding year, but the other kharif crops, rice, *juar*, *bajra*, maize and small millets were sown on a larger scale. In some parts of the Agra division where the crops suffered from the long break, and in the Benares and Gorakhpur divisions, where insufficient rain was received for the late rice, the outturn of the kharif harvest has been moderate; elsewhere it has been a good one. Maize, early rice, *juar* and *bajra* have been nearly everywhere good crops. Late rice was disappointing in the eastern and south-eastern districts, where the rain ceased early. The cotton crop was seriously damaged by the high winds and rain of the third week of September and the *til* crop by the early cessation of the rains in tracts where it is largely sown. The outturn of these two crops was therefore somewhat deficient. On the whole the harvest is one of the best the provinces have enjoyed for some years past. Prices for food crops went abnormally high, but there was a serious fall in the price of cotton which was less than half that of the previous year. The condition of the principal kharif crops is given below for the provinces as a whole on the average of the figures furnished by district officers, 100 denoting a normal crop :—

Early kharif crops.		*Late kharif crops.*	
Early rice	90	Rice, late	75
Maize	90	*Juar*	90
Small millets	90	*Bajra*	90
Indigo	80	Pulses	80
		Cotton	80
		Til	75

This remarkably good outturn coupled with fair rabi' prospects inspires hopefulness in all reports and the Commissioner of Jhansi is able to say that the result of the 1914 monsoon will be "almost entire recovery from the year of famine".

§ 11.—Health.

11. The mortality returns for the provinces up to the 30th September 1914 indicate that on the whole the year has been a healthy one, the total number of deaths showing a slight decrease of 9,154 on that of the year preceding. One district officer has remarked that "a year of scarcity and high prices is always unhealthy". He argues that cheap and insufficient food reacts on the poor, the infirm and the infants. It is remarkable to find that in the Jhansi division, where scarcity was most severe, deaths went down by 9,000, and the Agra and Allahabad divisions were also considerably healthier. There were few epidemics and cholera was much less severe in the eastern part of the provinces where, however, a serious recrudescence of plague took place which caused 26,961 deaths in Ballia against 7,886 in 1912-13 and 14,855 in Gorakhpur against 8,598. The Board note the splendid work done in inoculation in these districts. Ballia reports 32,681 cases and Gorakhpur 17,878. There was a rise of mortality in the Rohilkhand and Lucknow divisions, the cause of which is somewhat obscure. Mr. Cobb remarks in regard to a large increase in the death rate of Bijnor and Moradabad that it is attributed "to a fatal type of fever suspected to be relapsing fever if not pneumonic plague". With regard to cholera interesting testimonies are received from the Deputy Commissioners of Bahraich, Gonda and Kheri as to the efficacy of permanganating wells. Vaccinators and patwaris are employed most successfully.

§ 12.—Trade.

12. The statistics of the Inland Trade recorded in the Director's report for the year ending March 31st, 1914, reflect faithfully the unfavourable character of the year. There has been a constant rise in trade during the last quinquennium which in most items has received a temporary setback. The total rail-borne traffic declined by 11 per cent. or 172 lakhs of maunds. Owing to the shortage of crops in the provinces there was a large increase of 152 lakhs of maunds in imports representing a value of 715 lakhs. This increase was caused by grain and pulse, *i.e.*, all the food cereals, which rose from 34½ lakhs of maunds to 187 lakhs. Fodder also was imported very largely, without taking into account the 20 lakhs of maunds of hay which Government introduced from the provincial forests into the areas affected by fodder famine. On the other hand coal and coke, cotton goods and salt were imported in less quantities, the result partly of the high prices of grain and lack of resources, and partly of previous overstocking.

The gross export trade declined by 324 lakhs of maunds in weight and 938 lakhs of rupees in value. The chief cause of the decline is the retention of grain and pulse which were in great deficiency and required for the local demand. In the previous year they had been exported on the heaviest scale hitherto recorded, and it was not until the second quarter, when the failure of the kharif was pronounced in some parts of the provinces, that the trade fell off. The deficiency from the figures of 1912-13 was 320½ lakhs of maunds under this head alone. On the other hand the export of raw cotton and cotton seed increased by 7 lakhs and nearly 3½ lakhs of maunds respectively. This was the result of the record area under cotton of 1913 and its excellent outturn. The value of the raw cotton exported was 475 lakhs of rupees as against 354 lakhs in 1912-13, and this addition to the pecuniary resources of the people when beset with so many difficulties is most important. There was a decrease in the export of sugar and it is interesting to note that *ghi* could not be purchased by the people to its usual extent owing to the high prices of all necessities, with the result that export increased by 21,971 maunds.

§ 13.—Prices.

13. The revenue year which is the one under consideration in this report opened in October 1913 with a heavy rise in prices, which was the result of the knowledge that the kharif would be a failure. Wheat ranged between 9⅕ and 11¼ seers per rupee, the cheaper rate being in the east of the provinces. It improved a little in November, but dropped again in December, and, with small variations, remained just above 10 seers as the mean price for the provinces till June, when the apprehensions of another bad monsoon brought it to 10, the extreme limit of price being 9¼ seers seers. From then on to the end of the year it fluctuated between 9 and 10 seers, and by September the dearest rate was $8\frac{2}{16}$ and the cheapest 9⅝ seers. In spite of the results of the declaration of war, which seems to have immediately affected prices, it is satisfactory to note that wheat never fell

so low as 8 seers to the rupee, which was the average price in 1907-08. The price of barley followed much the same course. It began the year with a mean of $13\frac{3}{4}$ seers per rupee, the highest price being $11\frac{7}{8}$ seers in Agra and the lowest $15\frac{13}{16}$ in Benares, the chief market of the large producing areas. At the end of the year the mean price was $12\frac{7}{16}$ seers per rupee in spite of good prospects. The severity of prices is most clearly shown in the case of *juar* and gram. The former was selling at a mean price in October 1913 of $13\frac{1}{2}$ seers, and the latter at a mean price of $12\frac{3}{7}$ seers per rupee. By June 1914 *juar* had risen to $10\frac{1}{6}$ seers and gram to $10\frac{1}{20}$, and at the end of September *juar* was $12\frac{1}{5}$ seers and gram $9\frac{1}{8}$. The cause of the exceptionally high prices of these two foods is the shortage of stocks, due, in the case of juar, to the failure of the kharif, and in that of gram, to the impossibility of sowing a normal area. It is a remarkable fact that in June 1914 the price of *juar* and wheat at Cawnpore should have differed by only $\frac{3}{4}$ of a seer on the rupee. The normal prices recognized in that bazaar are 15 seers for wheat and 24 seers for *juar*.

Almost all district reports contain some reference to the entire inapplicability of the normal, warning and scarcity rates prescribed in G. O. No. 328/S—77-1905, dated the 15th March 1906. This schedule no longer provides a basis for any safe inferences. In the Gorakhpur division where there was actually no approach to scarcity the Commissioner points out that all the principal cereals fell at some time during the year below scarcity rates, and were never far above them. In the present year economic conditions were greatly disturbed by drought and unsettled by the declaration of war, and no deductions for general application are justified. It would seem desirable, when things are more normal, to revise these standards if they are to be of any practical utility.

§ 14.—Cattle.

14. The year was one of intense hardship to cattle over a great part of the provinces, particularly in the Jhansi, Agra, Rohilkhand, Allahabad and Meerut divisions. The shortage of fodder led to the death, sale and exportation of many animals. As a natural result of the unhealthy and arduous conditions of animal life rinderpest and other epizootic diseases prevailed largely. Bundelkhand suffered most severely, but heavy losses are reported also from the Meerut division, and a severe outbreak of rinderpest took place in the Garhwal Bhabar. The Board desire to bring to notice the frequent mention made by district officers of the inconvenience felt from the want of a supply of serum from Muktesar, which very seriously handicapped inoculation work. No less than 10 reports deplore this insufficiency. The general mortality of cattle from lack of proper food was no doubt great. Estimates have been received on which absolute reliance is impossible. The Collector of Jhansi puts the losses of stock at one-third, and generally somewhat pessimistic views have been expressed as to the present condition of the cattle population of the provinces and the means of its repletion. Another point of view has been forcibly presented by Mr. Cobb who writes :—"It is a remarkable fact that although heavy cattle mortality was reported to have been caused by the fodder famine no difficulty whatever seems to have been experienced over ploughing for rabi'. Takavi presumably enabled cultivators to replace losses in plough oxen, where these occurred, but the mortality must have been represented largely by the useless surplusage of village animals which ekes out a precarious existence on a surfeit of green stuff in the rains, a modicum of kharif stubble and dry grass in the winter, and the contemplation of a bare *maidan* in the hot weather"! Mr. Pert also takes the same view, and the economic loss is not great if excess and useless stock have mostly suffered.

§ 15.—Statistics of holdings. Statements XXXIV-A and XXXIV-B. (1) General.

15. Owing to settlement operations figures have not been received for the whole districts of Etawah, Fatehpur and Allahabad, and for two parganas of Pilibhit, one pargana of Gorakhpur and Naini Tal. For these tracts figures of the last year have been repeated to complete the divisional and provincial totals.

In Agra the total holdings area shows a slight decrease in all divisions, except Benares and Gorakhpur. The latter division shows a slight increase, but a large increase occurred in Benares owing to the inclusion of the figures of pargana Kaswar Raja, which have been received for the first time after settlement. The net decrease for the province amounts to 17,040 acres. In Oudh also there

has been a slight decrease of 22,744 acres chiefly in consequence of resumption of land held free of rent. The principal variations in classification are the following :—

	Acres.
In Agra.	
Sir	−26,808
Khudkasht, &c.	−26,787
Permanent tenure holders and fixed rate tenants	+29,817
Exproprietary tenants	+14,507
Occupancy ,, ...	−30,653
Non-occupancy for 12 years or more ...	+1,23,327
,, ,, on seven years' lease ...	+61,926
,, ,, for less than 12 years ...	−1,65,454
In Oudh.	
Sir	−4,396
Khudkasht, &c.	−11,095
Free of rent	−18,800
Ordinary tenants	+2,621

(2) Proprietors' cultivation.

The decrease under *sir* is shared by all districts, as fresh rights cannot accrue; the only exception being Benares, which shows an increase of 6,821 acres for reasons just stated. The area under *khudkasht* also fell off in all divisions, except Benares and Gorakhpur, owing to a falling off in cultivation due to drought; the decrease being specially marked in the Agra and Jhansi divisions.

(3) Occupancy tenures.

The increase under permanent tenure holders and fixed rate tenants is due to inclusion of the figures of pargana Kaswar Raja. Exproprietary holdings exhibit the usual small increase, and occupancy holdings a general decrease, except in Benares, which shows an increase of 10,520 acres under the latter head.

(4) Long term leases.

The areas held by non-occupancy tenants for 12 years or more, and on seven years' leases, show general increases by transfer from land held by non-occupancy tenants for less than 12 years. The area held by occupancy tenants, and non-occupancy tenants of all kinds, comprises respectively 32 and 41 per cent. of the total area of holdings.

(5) Oudh holdings.

In Oudh also the areas held under *sir* and *khudkasht* show a general decrease. The area held rent free declined substantially in consequence of resumptions. Under the other heads there have been slight increases. In Oudh the area held by ordinary tenants comprises 81 per cent. of the whole.

§ 16.—Rental demand and collections.

16. The total rental demand of the year for the whole provinces was practically the same as in the preceding year. The cash rents increased by nearly 24 lakhs and the *siwai* demand by 5 lakhs of rupees, but the grain rents fell off by 29 lakhs of rupees owing to the transfer of land to cash rents chiefly in Meerut, Agra, Rohilkhand and Oudh divisions.

The percentage of total collections (current and arrear) to the demand fell from 89 to 67 in Agra, and from 97 to 90 in Oudh. The following table shows by divisions the proportion of recorded collections to the year's demand. In Benares alone the percentage of collections was higher than in the past year; elsewhere it was lower, specially in Agra, Rohilkhand and Jhansi, where the drought was worst.

Divisions.	1320 F.	1321 F.
Meerut, ...	88	78
Agra	94	59
Rohilkhand	89	54
Allahabad	84	72
Jhansi	91	13
Benares	80	86
Gorakhpur	91	87
Lucknow	97	85
Fyzabad	97	95
Provincial average	91	74

CHAPTER II—FINANCIAL.

§ 17.—Total demand and collections.

17. The total demand on account of all sources of revenue dealt with in this report amounted in round figures to 912 lakhs, or an increase of 57 lakhs on the preceding year. This is due chiefly to enormous taqavi advances. The real demand was 911 lakhs of which 47 lakhs were remitted and 766 lakhs were collected, leaving a balance of 98 lakhs. In this balance the principal items are 45 lakhs of land revenue and 34 lakhs of taqavi which were suspended, and 13 lakhs due under Act XII taqavi.

§ 18.—Land revenue. Statements I, II and III. (a) Demand.

18. The gross demand under land revenue for the year was Rs. 6,51,68,717, from which must be deducted Rs. 61,581 and Rs. 25, the nominal demands in column 7 of statements I and III, in order to arrive at the net enforceable demand of Rs. 6,51,07,111. These nominal items represent permanent reductions of the demand due to revision of settlement, diluvion, assignments and acquisition of land, and will be removed from the gross demand on the roll in the year following. The net demand is nearly 2½ lakhs more than in 1912-13, the main item of increase being the enhanced land revenue in the Allahabad division, due to the revision of settlement.

(b) Collections.

The actual collections were Rs. 5,59,38,973, leaving the apparently huge balance of Rs. 91,68,138. The real balance was Rs. 50,737, as the circumstances of the year necessitated suspensions and postponements of Rs. 45,08,592, and remissions of Rs. 46,08,809, which must be deducted from the gross balance.

This real balance is made up of numerous uncollected items, the most considerable being Rs. 11,160 in Pilibhit, which represents enhanced land revenue, sanctioned too late to be realised during the year. The actual percentage of the net enforceable demand realised was 99·9 per cent.

*(c) Suspensions and remissions.

It will be convenient to summarise here the measures of relief in regard to land revenue, which were found necessary in consequence of the drought. Early in the year the scale of remissions and suspensions was carefully considered by Government and district officers were thus enabled to formulate promptly their proposals. It is interesting to compare the provincial statistics of remissions and suspensions with those of 1907-08, and they are shown in the following table:—

1907-8.		1913-14.	
Suspensions.	Remissions.	Suspensions.	Remissions.
Rs.	Rs.	Rs.	Rs.
92,08,229	76,24,197	49,68,254	47,89,289
Total Rs. 1,68,32,426		97,57,543	

The famine through which the provinces has just passed was not so widespread or severe as its predecessor, and the total amount of relief found necessary indicates this. The comparative figures are interesting, in showing that, while suspensions were largely adopted in the earlier period, and were much in excess of remissions, relief under both heads was kept fairly equal in 1913-14, and the result is that districts will not be crushed unduly by a burden of debt during the time of recovery. Full information as to the famine administration of the Government is available elsewhere, and it is only necessary here to briefly summarise the amount of relief which was given in each division. In Jhansi, which suffered most, Rs. 27,41,434 or 85·3 per cent. were remitted out of the total current demand of Rs. 32,13,975. The whole relief took the form of remissions. In the Allahabad, Agra, Lucknow, Meerut and Rohilkhand divisions, remissions were only 7, 6·8, 6·7, 3·2 and 1·2 per cent. respectively of the current demand. Rohilkhand, however, headed the list for suspensions with 28·2 per

* Sanctioned and not actual suspensions and remissions are referred to in this section.

cent. of the current demand, Agra followed with 15·2 per cent., and Allahabad with 12·8 per cent., while in Meerut and Lucknow suspensions were just over 1 per cent. The percentage of the suspensions outstanding at the close of the year on the total current demand amounted to 6·8 for the provinces as a whole.

§ 19.—Malikana. Statement IV.

19. The malikana demand was Rs. 1,80,000, of which practically the whole was collected. The Board note with satisfaction that the unpaid balances have gone down from Rs. 78,899 to Rs. 39,033; in Gorakhpur there has been a large reduction from Rs. 37,008 to Rs. 15,130 and in Allahabad from Rs. 15,447 to Rs. 2,251. In consequence of last year's figures the Board drew the attention of the Commissioner of Gorakhpur to the necessity on the part of Collectors of watching these distributions, and it was suggested that special efforts should be made to quicken dilatory lambardars. The usual explanation that payees will not come forward to receive small items is not sufficient, and it is hoped that Collectors generally will see that these small sums are not allowed to accumulate. The present statement shows that unpaid items have increased in Muttra, Etah, Bijnor, Farrukhabad, Etawah, Jhansi and Basti. The increase in the last named district is Rs. 555, and no effort has been made there to improve matters in spite of the Board's explicit instructions.

§ 20.—Canal rates. Statements V and VI.

20. A year of drought stimulated the demand for irrigation from all sources, and there has been a total increase of Rs. 11,33,055 on the 1912-13 figures in the demand for occupiers' rates. There has been a slight decrease of Rs. 6,729 in owners' rates. All canal irrigated divisions, except Kumaun and Rohilkhand, share in the increased occupiers' rates, and in Allahabad the bill for water went up from 18·11 to 23·41 lakhs, or by 5·30 lakhs. The explanation of the decrease in Rohilkhand is that water was not available at the critical times when it was wanted, because the canals, not being snow-fed, are liable to run dry. The figures for the Jhansi division are not altogether satisfactory. The large rise of Rs. 65,000 in Jhansi and Hamirpur was almost counterbalanced by the fall in the demand in Jalaun and Banda, where the supply of water from the canals fell short of requirements when it was most needed. This indicates a defect in the Bundelkhand protective system, and it is understood that additional storage reservoirs for each of the three canals are under consideration. It is not extraordinary to find that collections were irregular, and that the outstanding balance increased very largely. Leaving out the nominal items which are made up of claims subsequently remitted by the department, the realizable balance of occupiers' rate increased during the year by Rs. 58,876, and of owners' rate by Rs. 1,144. The district figures show that in spite of the enormous demand in the Meerut division, which pays nearly half the total rate of the provinces, collections were on the whole good, while in the lower parts of the Doab, Agra and Allahabad they were distinctly bad. The Collector of Etawah gives voice to a general complaint, that the supply of water tended to fail as it went further from the source of supply. Cultivators also tried to irrigate more than the area that was really commanded, with the result that they had only themselves to blame if the resulting benefit was small. Some discontent at the large demands in a year of financial stress, and the real difficulty experienced by lambardars in collecting the money explain a growth in the arrears. The figures of Muttra (Rs. 31,987), and Fatehpur (Rs. 12,212), are remarkably high in comparison, and no satisfactory explanation has been submitted. There is some tendency to refer to canal rates as though they ought to be remitted in a year of drought on some corresponding scale to land revenue remissions. It is scarcely necessary to point out that the demand for payment for water supplied stands on an entirely different footing from the demand for land revenue. It is noteworthy that Muttra is also responsible for the bulk of the arrears of owners' rates.

§ 21.—Local rates and cesses. Statements VII—X.

21. The total provincial demand under local rates and cesses, including arrears, is made up as follows:—

	Rs.
The 10 per cent. local rate in Agra	44,44,964
Acreage and other rates in permanently settled tracts ...	5,19,689
Consolidated local rate in Oudh	14,24,813
Rural police rate in Oudh for first half year ...	4,83,372
Total ...	68,72,838

There is a decrease of Rs. 40,897 on the corresponding total of the preceding year. This is due to changes in Oudh, owing to the introduction of the amended United Provinces Local Rates Act, I of 1914, which came into effect from the 1st April last. The consolidated local rate is now 5 per cent. on the annual value, instead of $2\frac{1}{2}$ per cent., and the rural police rate, as such, has been abolished. Collections of the 10 per cent. rate in Agra were not good, and there were very large balances of Rs. 6,772 in Rohilkhand, Rs. 5,670 in Jhansi and Rs. 2,389 in Allahabad. These divisions were all affected by the drought, but there is no reason why Agra should show almost a clean sheet, and Rohilkhand should have greater arrears than Jhansi. Applications made to the Board during the year showed that local officers had the idea that cesses should be remitted or suspended along with the revenue. This is impossible except in most exceptional circumstances as the whole of this income is now appropriated to district boards. The balances shown in statement VIII are really nominal, as they have been remitted under the Commissioner's sanction, and in statement IX the large balances due from Lucknow, Rae Bareli and Bara Banki are the result of the enhancement made on the assumption that the local rate would be increased by 5 per cent. on land revenue as in other districts of Oudh, but under notification no. 250/I—243, dated the 29th January 1915, the increase in local rate corresponds exactly to the rural police rate which has been abolished. Hence the balances are nominal, and will be adjusted in the current year. The balance of Rs. 7,210 in Rae Bareli, on account of the rural police rate is, as explained last year, an arrear due from the nominally enhanced revenue of permanently settled villages, whereon the rate had never been assessed since its introduction. Final orders have now been received, and the amount was expected to be realized in October 1914.

§ 22.—State properties. Statement XI. (a) General.

22. The year opened with 606 estates as the property of Government under the management of the Board. None but purely agricultural lands come under this category. During the year 17 passed out of Government's possession, of which 11 were restored to the proprietors or their representatives after liquidation of loans under the Bundelkhand Encumbered Estates Act. New acquisitions numbered 14 and 603 estates remained on the registers at the close of the year, out of which 251 belong to the Jhansi division, and are largely those dealt with under the Encumbered Estates Act, and 211 are the small scattered state properties coming down from the kingdom of Oudh. The total rental demand, including current and arrears, was Rs. 3,52,658 which is an increase of Rs. 6,135 on the previous year. Collections, however, fell off very considerably, and were only Rs. 2,71,530, or 77 per cent. as compared with 94 per cent. collected in 1912-13. The actually realisable arrears are considerably less than the Rs. 81,128 shown in column 9, as this sum includes rents which were remitted in consequence of remissions of land revenue sanctioned by Government. For example in the four districts of the Jhansi division, the whole balance for Jhansi and Jalaun consists of remitted items, while in Hamirpur only Rs. 480, and in Banda Rs. 50 remained to be collected. Similarly, in Allahabad the large leased estates of Holagarh and Khargapur lay in a tract where revenue was remitted and suspended, and the lessees have been allowed a reduction in the demand for the actual amount of rent which they did not realise owing to these remissions and suspensions. In Ghazipur the arrears due on the stud lands have been collected, and the outstanding balance of Rs. 2,029 is simply suspended rental to be collected in future years. There is a large balance of Rs. 10,398 in the Agra district, which, however, comprises Rs. 6,328, due to remissions and suspensions, and Rs. 3,729 are reported to be in train of liquidation. This large increase in the balance due requires attention. In Oudh the balance due has gone up from Rs. 3,447 to Rs. 9,117, and steps must be taken during the current year to collect these arrears. In Gonda they amount to Rs. 3,418, out of which Rs. 1,221 relate to four villages which have been transferred to the nazul management in Fyzabad, and owing to disputes the items could not be realised. It has been necessary to have recourse to litigation. The remainder of the Gonda balance is due to neglect in watching the progress of collections. The large balances in Unao and Kheri comprise remissions for the most part. The expenditure on improvements fell from Rs. 22,015 to Rs. 19,408 which is the result of a necessary curtailment of expenditure in a bad year. The cost of management, so far as it can be ascertained

from the reported figures, was Rs. 39,372, which is about 11 per cent. of the total rental as in the previous year.

(b) Dudhi.

The year has been a particularly prosperous one in the estate of Dudhi, and the Collector has been commended by the Board for his successful administration. The crops were good, particularly the kharif, and, with the exception of a small outbreak of cholera which did not spread, the health both of men and cattle was good. The current rental demand was Rs. 24,204, and for the first time in the history of the estate it has been collected in full. The total demand of all items of income was Rs. 47,583 which included Rs. 5,998 the suspended rent of last year. All was collected except Rs. 20. The sanctioned expenditure during the year was Rs. 27,069, but actually only Rs. 20,544 were spent. This was due to a decrease of Rs. 6,323 in the expenditure on improvements below the budgetted amount, and was intentional, because Government had asked for the exercise of economy. On education Rs. 3,754 were spent as against Rs. 3,690 of the last year. Schools now number 18, with 665 scholars, a slight increase on previous figures. The policy of training local men of aboriginal castes for the administration of the estate continues. During the year 3 scholars were reading in the training school at Dudhi, and 2 aboriginals were sent to the patwari school in Mirzapur. The Collector is endeavouring to find a local man to train as a veterinary assistant. Owing to the war the trade of the new bazar, now known as Wyndhamganj, has been much disorganised. Not only has the demand for lac and other forest produce almost ceased, but the trade in ghi, which was exported to Calcutta in large quantities, has been much injured. During the year the management has been improved by the appointment of a naib tahsildar instead of the estate sazawal. The draft bill for the extension of the Bundelkhand Land Alienation Act to this and some other parts of the provinces was submitted by the Board to Government during the year.

§ 23.—Miscellaneous Land Revenue Receipts. Statement XII.

23. The portion of statement XII which is called Imperial comprises three items of income, which require separate notice. The largest item is mutation fines levied under section 38, Act III of 1901, which account for a demand of Rs. 1,01,538 out of a total of Rs. 1,03,673. The second is fines and forfeitures of Revenue courts, with a demand of Rs. 1,210, and the last is a small sum of Rs. 923 due from the Bengal and North-Western Railway in Gorakhpur, Basti and Gonda, for rent of lands which have been temporarily occupied. There has been a large decrease of Rs. 11,498 in mutation fines. This is satisfactory, and is the third decrease in succession referred to in these reports. It is an indication that reporting of transfers is more regular and punctual, and the procedure which allows a mutation case to be instituted by the signature of the person succeeding to, or obtaining possession of, the property on the patwaris' report of deaths and transfers, has effected much improvement. Tahsildars should take measures to keep all concerned apprised of this.

The collections of mutation fines were Rs. 91,431 leaving a balance of Rs. 10,107. There is a balance of Rs. 2,005 in Mirzapur, the greater part of which has since been written off by the Collector as irrecoverable. Other large balances are Rs. 862 (Allahabad), Rs. 684 (Saharanpur), Rs. 622 (Sultanpur), Rs. 574 (Moradabad) and Rs. 528 (Hardoi). In every case, except Hardoi, it is explained that irrecoverable items have been written off, but in Saharanpur and Moradabad rather large sums still remain for collection and call for prompt disposal. The Gorakhpur balance which was high in 1912-13 has been satisfactorily reduced.

The total demand for partition fees was Rs. 2,67,056, which is a small decrease of Rs. 6,100 on the previous year's figure. Collections amounted to Rs. 2,21,057, leaving a balance of Rs. 45,029, in train of liquidation to be compared with an opening balance of Rs. 39,533. These balances are scarcely a fair index of the work of collection, because, under rule 48 of the partition circular, the whole cost of the partition is estimated when the proceeding is drawn up, but only half the fees are levied. Mr. Hose has criticised the propriety of showing as arrears the fees which are not actually in demand at the time, and the Board are enquiring into the matter. The large balance of Rs. 11,963 in Ballia is largely due to these second instalments of fees estimated for pending cases.

§ 24.—Sale of confiscated, escheated and waste lands. Statement XIII.

24. During the year a property called Bidauli Tewari Kalan, with an area of 20 poles, which had escheated to the Crown was sold for Rs. 21.

§ 25.—Agricultural advances. Statements XIV and XV. (a) General.

25. The year has been characterised by an enormous demand for loans under both of the taqavi Acts, and it will be useful to sum up the results before dealing with the administration under each Act separately. The year opened with an outstanding balance of 59·11 lakhs under Act XIX and of 22·48 lakhs under Act XII. New advances were 42·93 lakhs and 148·71 lakhs respectively; so that, on the 30th September 1914, there was a sum of 273·23 lakhs loaned throughout the provinces. The magnitude of these dealings may be realised by pointing out that this sum is about 42 per cent. of the annual demand of the land revenue. The actual amount due for collection in the course of the year, after excluding postponements and suspensions, shown in column 8, was only 43·21 lakhs, of which 10·46 lakhs were under Act XIX and 32·75 lakhs were under Act XII. The proportions due for collection within the year of the full amounts outstanding under each group of loans were, therefore, roughly about $\frac{1}{10}$ of the Act XIX and between $\frac{1}{5}$ and $\frac{1}{6}$ of the Act XII money. The former is collected under an instalment system, and the individual debts are comparatively large, so that the demand for collection in any one year is always a small proportion of the total outstandings; the latter, on the other hand, should ordinarily be collected within the course of immediately succeeding harvests, and if we include the 30·44 lakhs, which it was necessary to suspend owing to the drought, the net demand would have been nearly $\frac{1}{3}$ of the total loans issued up to date.

The gross collections during the year, which include the item shown as surplus collections, were 8·46 lakhs under Act XIX, or nearly 81 per cent. of the net demand. It is necessary to take account of surplus collections under this Act, because in the majority of instances these represent money which was returned, or recalled, when the borrower failed to carry out the projected improvement. The collections out of the net demand under Act XII amounted to 19·63 lakhs, or only about 60 per cent.

The year closed after credits to principal and interest with a total outstanding balance of 96·37 lakhs under Act XIX, and of 151¼ lakhs under Act XII. There had been distributed during the year nearly 161 lakhs more than in the year preceding.

(b) Advances under Act XIX.

It is the direct result of the year's drought that advances for permanent agricultural improvements have gone up from 8·38 lakhs to 42·93 lakhs. The Board have pleasure in acknowledging that this increase is due not only to the demand of landholders and cultivators, but largely to the great interest taken in the matter by district officers. There has been great activity in improving irrigation by wells, and district statistics show that out of these advances 6,581 new wells were constructed, 9,290 were under construction during the year, and 8,840 were repaired. In the matter of bandhs, 22,256 were constructed, out of which the Jhansi division is responsible for 21,980 completed, and 2,698 under construction; and lastly, there were 149 new tanks excavated, and 88 are in progress. These figures are quite commensurate with those of 1907-8, when similar large advances were made with the result that 26,682 masonry wells were constructed and under construction, and 4,883 were repaired. There was greater activity shown over embankments in 1913-14, as only some 6,000 were constructed in 1907-08, or less than a ¼ of the number now reported.

A decrease is shown only in the Benares (−Rs. 57,939) and Gorakhpur (−Rs. 45,510) divisions. This is not a matter for much criticism, as these divisions, especially Gorakhpur, have no constant and pressing need for Act XIX taqavi, and, while the distributions of 1912-13 had been inflated by a shortage of rain, they did not suffer like the rest of the provinces from the recent drought. At the same time the pressure on the soil in these areas renders intensive cultivation more and more necessary, and endeavours to stimulate the construction of wells should be constant. How much, however, has been done during the last 10 years may be estimated from the fact that, in 1902-03, in the Benares division, only Rs. 950 were advanced, and in the Gorakhpur division only Rs. 137. There

was a rise in Jaunpur of Rs. 16,024 on last year's figures, which is attributable to Mr. Walker's energy and interest. He promises a special report on well-sinking in his district. The divisions in order of the increases are as follows :—Jhansi and Agra with the phenomenal rise of 15·44 and 11·10 lakhs respectively, Rohilkhand, +2·39 lakhs, Allahabad, +2·15 lakhs, Meerut, +1·97 lakhs, Lucknow, +1·25 lakhs and Fyzabad, +1·24 lakhs. Kumaun took Rs. 5,200 as against nothing in the year preceding. Good work has been done throughout the Jhansi division, but particularly by Mr. Swann in Banda, where distributions of 7·04 lakhs were made, of which 5·55 were devoted to field embankments. In the previous year 1,389 were constructed as compared with 18,805 in the year under report. Each of these should represent a more or less assured rabi' crop for the future, and, provided that the number was not too great for proper supervision, the results are admirable. Jalaun spent only 1·53 lakhs, and only 21 bandhis were constructed. The Board draw attention to the remarks in last year's report, and consider that there is no adequate reason for this district being so far behind the rest of Bundelkhand in the desire for permanent agricultural improvements, particularly field embankments. In Agra the great feature of the year was an outburst of well-sinking activity in Etah and Mainpuri, for which Messrs. Fawcett and Rai Radha Raman Bahadur deserve credit. These are districts protected by canals, but Mr. Fawcett points out that a well is recognized as the best means for really complete protection against drought In Muttra Mr. Dampier has been directing attention to the construction of a cheap well, which consists in putting a wood facing on a *kachcha* cylinder, and the results seem satisfactory. In Rohilkhand the distribution of Rs. 2,15,510 by Mr. Ingram in Budaun, as compared with Rs. 33,035 in the preceding year, continues the good work which Mr. Pearson initiated in 1907-08. The opportunity of the drought was used most successfully by Mr. Fremantle in Allahabad, where loans rose from Rs. 14,757 to Rs. 1,03,279, and special measures were taken to ensure that no delay occurred in the grants reaching the applicants. In the Meerut division, Bulandshahr with Rs. 2,07,356 and Meerut with Rs. 1,46,142, easily head the list, and the Board acknowledge once more the activities of Messrs. Humphries and Pearson. In Bulandshahr the services of co-operative societies in superintending the construction of wells by taqavi grants have been utilized, and the idea is one which may be commended for general adoption.

In Oudh there has been great improvement, and particularly in the Lucknow division. Partabgarh, Unao, Hardoi, Sultanpur, Rae Bareli and Bara Banki show the best returns, and Mr. Muhammad Hadi has particularly interested himself in stimulating the construction of wells. Fyzabad is the only district where there is a small decrease. It is recognized by the Board that the pushing of taqavi loans for improvements meets with peculiar difficulties in Oudh, owing to the effect of sections 24 and 25 of the Rent Act, which is that a tenant, who has constructed a well without obtaining his landlord's permission, may lose the whole of his investment on being ejected. In the Board's opinion the sections as to improvements are among those of the Oudh Rent Act which are most unfair to the tenant. A defect in the present rules will be supplied by making it a routine preliminary to the grant of a loan to a tenant in Oudh that he shall file either the landlord's written consent, or an order under section 25 along with his application. While, however, frequent instances have been reported of the opposition placed by landlords in the way of the tenants' initiative, there is no doubt that enlightened landlords themselves assist in well construction. From Kheri Mr. Campbell deplores the apathy of cultivators toward well irrigation. Even during the drought efficient wells were not used, and this is characteristic of submontane tracts where in ordinary years the rain is plentiful and water is near the surface. When a year of drought comes, the cultivators being unused to the labour of irrigation do not employ wells freely.

The only general comment needed on the year's work is that the stimulus given by drought should not be allowed to die away. The extension of wells and permanent improvements is the best safeguard against famine, and constant effort is necessary to induce agriculturists to prepare themselves against bad seasons, even though at the time there may appear no urgent necessity. This was the moral inculcated after the 1907-08 famine, and it may fitly be repeated now.

(c) Advances under Act XII.

The distributions under Act XII were devoted to the immediate exigencies created by the drought, and out of a total of nearly 1½ crores the purchase of seed accounted for 55·89 lakhs, the purchase of cattle for 56·47 lakhs, the sinking of *kachcha* wells for 16·28 lakhs and miscellaneous items for 20·07 lakhs. Under the last head come 8·45 lakhs for fodder in various forms, and 3·41 lakhs for subsistence. There was a constant demand from district officers during the year, so that all forecasts became nugatory, and the Board were compelled to appeal to Government for special grants of 75 lakhs in the quarter ending December 1913, and of 60 lakhs in May 1914. Though the estimates were carefully scrutinized and cut down, the demand for seed, both in rabi' and kharif, had to be met, and, owing to the acute fodder famine, district officers made special efforts to ensure that the shortage of cattle should be made up by fresh purchases, in time for the agricultural operations of the present rabi'. The economic aspects of this enormous output of loans under Act XII, have already been presented to Government in a separate report, and it is certain that the objects in view have been attained. Advances for seed made it possible to sow full areas in both harvests, cattle were replaced on such a large scale that it is said bullocks were practically unsaleable in certain parts during October and November 1914, and lastly the people were saved from all anxiety by the knowledge that the utmost resources which Government could command were being placed at their disposal. The good effect of these measures cannot be overestimated; but the Board do not view without some misgiving the lavish use of these grants. The increases in the various divisions on the previous year's figures, which may be taken as a full demand in ordinary circumstances, are as follows :—

Rohilkhand	...	+ 43·07 lakhs.
Agra	...	+ 30·18 „
Jhansi	...	+ 17·34 „
Lucknow	...	+ 16·84 „
Allahabad	...	+ 15·31 „
Meerut	...	+ 5·48 „
Fyzabad	...	+ 2·89 „
Gorakhpur	...	+ 1·52 „
Kumaun	...	+ ·70 „

Rohilkhand took upwards of 26½ lakhs for seed only, being nearly half the total demand of the provinces. It is true that in ordinary years Rohilkhand has established a regular demand for seed and the advances are always collected, but this year's statistics bear no relation to former figures. Luckily the kharif and the present rabi' give hopes that the people will be able to meet their huge burden of debt, but the reports show that very little could be realized on the outturn of the rabi' of 1914. There appears to be something inconsistent in the fact that Moradabad took nearly 9 lakhs for seed, cattle, *kachcha* wells and sugarcane, while the Collector writes in comment on the large amount of building operations which were in progress despite the famine that "the people are everywhere pulling down old work and putting up masonry houses, or erecting entirely new solid buildings on new sites". The Jhansi and Agra divisions head the list in cattle advances with 13·08 lakhs and 12·58 lakhs respectively. In respect of this demand, the Board think that there are indications that certain local officers lacked the knowledge which was necessary to keep it within reasonable bounds, and though efforts were made to ensure that cattle should be purchased with the money advanced for that purpose, any complete check was impossible. It has already been pointed out in paragraph 14 above, that the economic result of the disappearance of many useless cattle is not an unmixed evil, and the conclusion to which the Board have come after considering the mature opinion expressed in many reports after the time of stress was over is that advances of this nature were given too liberally. It is necessary to insist on the need, even in times of widespread drought, of using discrimination in admitting demands for Act XII loans. There is always uncertainty as to the outturn of the particular crop which is the source of repayment, and if it fails, the cultivator emerges with a load of debt. There is also the important consideration that loans on so large a scale must greatly disturb the ordinary machinery of local finance. Perhaps the most useful criticism of the year's work in respect of Act XII loans is, that insufficient weight was given to the conditions of the years preceding, which had placed the better class of cultivators in a position strong enough to bear a temporary strain on their resources.

(d) Collections of Act XIX loans.

There has been a great falling off in the collections of the Act XIX demand, in spite of suspensions of nearly 2½ lakhs. In the previous year the collections were 96 per cent. of the net demand, and they are now only 76·8 per cent. There are only 12 districts which show a clean balance sheet, and this, in the case of Muttra, Jalaun, and Rae Bareli, is due to the very large suspensions which were allowed. The results in Partabgarh are remarkably good; only Rs. 1,204 were suspended, and a demand of Rs. 27,548 was collected in full. The districts with balances of more than Rs. 4,000 now number 11 as against 5 in 1912-13. The largest balance is Rs. 85,859 in Agra, and the Collector reports that a large portion of this was postponed for collection with the kharif *kist*. In Hardoi, with a balance of Rs. 36,998, no attempt was made to collect owing to agricultural distress. The only explanation given from Budaun for a balance of Rs. 18,977 is, that collections were "practically at a standstill." In Bara Banki Rs. 11,409 out of Rs. 14,964 are the overdue balance from tahsil Ramsanehighat, which was responsible for large arrears in the previous year. The district officer's attention to affairs in this tahsil is urgently required. Generally the figures in columns 8 to 11 of statement XIV show that where large balances are due, the question of making necessary suspensions had not been considered. It is not a sufficient explanation to say that collections were at a standstill. The demand which could reasonably be enforced should have been fixed by eliminating what it was necessary to suspend.

(e) Collections of Act XII loans.

The balance sheet under Act XII points to considerable demoralization due to the special conditions of the year. Forty-eight per cent. of the demand falling due was suspended in spite of which only 60 per cent. of the net demand was collected leaving an overdue balance of *13·12 lakhs to carry over for the next year. Thirteen districts (or 15 including Muttra and Shahjahanpur where the overdue balances were remitted), show a clean sheet; but this is largely the result of suspensions, Bijnor being a clear example where out of a total demand of 2·07 lakhs no less than 2·02 lakhs were suspended. Agra has the enormous balance of 6·88 lakhs, out of which Rs. 13,724 were remitted, and this is an indication that postponements were not systematically undertaken. In Kheri the Deputy Commissioner merely stopped collections with the result that 1·65 lakhs are shown as a balance out of a net demand of 1·86 lakhs. It is clear that district officers have devoted insufficient attention to the state of these balances. Possibly more suspensions were necessary, but the tendency has been simply to relax efforts to get in the money with the result that many debtors, who could easily have paid, have escaped notice. It is not apparent why in Moradabad it should have been necessary to suspend so much as 8·15 lakhs out of a demand of 8·32 lakhs. The explanation given is that the rabi' largely failed. During the year the Board issued clear instructions to district officers as to the principle which should underlie the collections of Act XII loans. There was a tendency to regard remissions in much the same light as remissions of land revenue. It should be understood that the whole system of these advances depends on their being realized promptly and firmly. It is essential that the present unsatisfactory state of the balance sheet should be remedied by detailed enquiry and speedy recovery of all outstandings which can be liquidated.

(f) Aided works.

Advances for aided works were made in six districts, as a result of the scarcity and to meet the need for employment, and the balance due was increased from Rs. 2,83,577 to one of Rs. 4,33,691. The Allahabad district took Rs. 1,07,966 and Mr. Fremantle's remarks may be quoted.—"The works were all of a useful character. The area affected by them (the greater portion of which consists of fields actually enclosed by small banks) has been carefully recorded, and amounts to no less than 14,350 acres or nearly 22 square miles. In many localities these field embankments have completely changed the face of the country....the grant of this form of taqavi to groups of tenants and small zamindars was a new departure in this district and was highly appreciated by those concerned." The net demand for collection was Rs. 88,295, out of which Rs. 71,715, or 82 per cent. were collected. The overdue balance was Rs. 16,580 and there were balances of over Rs. 1,000 in the following districts:—Agra, Rs. 3,271, Jaunpur, Rs. 3,435, Hardoi, Rs. 2,708, Allahabad, Rs. 2,593, Basti, Rs. 1,644 and Bara Banki, Rs. 1,148. Efforts

*Out of this Rs. 20,992 have also been remitted, vide the footnote in statement XV.

should be made to realize these balances which are not satisfactorily explained in all cases. The total outstanding now amounts to Rs. 3,73,097.

§ 26.—Loans under the Bundelkhand Encumbered Estates Act. Statement XV-A.

26. The demand for the principal of loans issued under the Bundelkhand Encumbered Estates Act had been reduced to Rs. 15,48,418 at the beginning of the year under report. It stood at Rs. 26,25,034 at the end of September 1908 when the liquidation of debts was completed. It was only possible to credit Rs. 20,439 to principal and Rs. 18,092 to interest, as against Rs. 1,75,842 and Rs. 89,803 respectively in 1912-13. This poor result was due to the large suspensions and remissions which were necessary in the rental demand of all the estates, in consequence of the drought and the relief in land revenue which had been given by Government.

The total demand in estates held by the proprietors themselves under section 21 (*a*) and (*b*) of the Act was reduced from Rs. 1,81,068 to Rs. 38,689 by suspensions, and similarly in estates managed by Collectors remissions brought the demand down from Rs. 1,11,914 to Rs. 14,972 only. Collections were only 85 per cent. of the net demand in the first group of estates, and 93 per cent. in the second, leaving balances outstanding of Rs. 5,909 and Rs. 640 respectively.

§ 27.- Coercive processes. Statement XVI. (a) General.

27. The total number of coercive processes of all kinds issued for the collection of arrears of land revenue and cesses, and of all other demands realisable under the law as arrears of land revenue, was 162,550, or a decrease of 3,571 during the year. This is so far satisfactory and continues the steady decrease since 1909-10. It is a proof of constant improvement in the routine of collection, especially in a year when over a great part of the provinces payments were made with some difficulty. This difficulty was, however, compensated by the liberal suspensions and remissions which reduced the demand of land revenue and taqavi. In respect of the latter item, particularly, the returns show how little coercion there has been under all heads. There was a decrease of 2,117 in citations to appear, and of 1,842 in the writs of demand which are the largest items in the statement. Attachments of moveable property increased by 195 and of immoveable property by 13, but these are small variations and follow a noticeable decrease in the year preceding. Sales of immoveable property fell from 13 to 7 and sales of moveable property after attachment give a decrease of 97. There was a small increase of 185 in the number of warrants of arrest, and of 261 in the cases where persons were actually detained.

(b) Coercive processes issued for arrears of land revenue and cesses.

The following table shows with reference to the figures of 1912-13, the processes which were used for the recovery of arrears of ordinary land revenue and cesses :—

Writs of demand.	Citations to appear.	Warrants of arrest.	Attachments.		Sales of immoveable property.
			Moveable property.	Immoveable property.	
4,086	82,271	7,763	7,309	137	3
+1,297	+902	+437	+2,446	+ 25	+ 3

For the collection of land revenue proper, therefore, it was found necessary to increase all processes, and there has been a large rise in the attachments of moveables, though the number in which sales took place was decreased. There has been a larger comparative rise in writs than in citations to appear, which is an improvement, and shows that Collectors have borne in mind the Board's orders on the subject. It will be noticed that writs of demand issued for land revenue bear a small proportion to the total number in statement XVI, while citations are 78 per cent. of the total number. This is due to the fact that writs of demand must be issued free of charge under rule 35 of Board's circular 20-II in all cases of mutation fines. There is still room for improvement in the discretion exercised by tahsildars in the use of these two processes. It is not clear why 9,304 citations should have been issued in Azamgarh, while only 6,096 were issued in Basti and 7,329 in Gorakhpur. Both these districts have a larger revenue than Azamgarh. While the proportion between the two processes for the provinces as a whole is about 1 to 20, it is only about 1 to 7 in the Allahabad division. Citations are

very much more frequent in the eastern parts of the provinces and in Rohilkhand. There is no apparent reason why Rohilkhand should differ so much from the Agra division, but in the eastern districts the large amount of sub-division among co-sharers is a sufficient explanation. Attention has been drawn by Mr. Pike to irregularities in the serving of writs and citations when the defaulter is not found. There is a difference between the service of a summons in such cases under section 195 of the Land Revenue Act and of a process for recovery of arrears under rule 15, Board's circular 2-III, in that the latter cannot be served by affixing a copy to the defaulter's house. The three sales of immoveable property took place in Moradabad, and consisted of houses belonging to defaulters in tahsil Sambhal.

(c) Coercive processes issued for the recovery of other demands.

The most important miscellaneous demands which call for pressure in their realisation are mutation fines, taqavi and canal rates. It is noticeable that taqavi defaulters have been treated with leniency. Under writs there was a decrease of 526, under citations, of 3,833, under warrants, of 184, under attachments of moveables, of 1,895, under attachments of immoveable property, of 5, and under sales, of 8. As usual the bulk of the sales of immoveable property are necessitated by taqavi arrears, which accounted for 4 out of the provincial total of 7. On the other hand there has been an increase of 2,874 in processes issued to recover canal rates which were realised with some difficulty.

§ 28.—Estates under direct management.

28. The Board receive a special report of the management of estates which it has been found necessary to attach under the Land Revenue Act, either for failure to appoint a lambardar (section 45), pending partition (section 115), and for arrears of land revenue or other demands so realisable. The year opened with 113 mahals and pattis on the register and 177 were added during the year, giving a total of 290, out of which 171 were released after liquidating the dues for which they were attached, and 119 still remained. Of the 177 estates newly attached, 150 were so dealt with for arrears of land revenue, 5 being in Oudh for under-proprietors' dues, 20 were for failure to appoint a lambardar, and 2 were taken under management during the currency of a partition. One estate of which the settlement had been annulled in the Agra district was under management, but owing to scarcity there were no collections.

The total demand was Rs. 2,24,156, out of which only Rs. 1,56,043 were collected, being 69·6 per cent. This is slightly better than last year. It is not possible to ensure full collections in these cases because estates are taken over at all times of the year, and the balances are due to causes beyond the Collector's control. The cost of management accounted for Rs. 12,939, and out of the net balance, Rs. 1,08,840 were credited to land revenue and cesses, and Rs. 183 to principal and interest of taqavi debts. The large balances outstanding in Sultanpur, Bara Banki and Shahjahanpur have been satisfactorily explained.

§ 29.—Alterations in the land revenue demand. Statement XVII.

29. There was a net increase in the land revenue on the roll during the year under report of Rs. 80,375, and the year closed with a demand of Rs. 6,50,95,228. The increase was made up of Rs. 64,151, due to the revision of pargana Bharthna (cis—Jumna tract) in the Etawah district, and of Rs. 21,444, due to progressive enhancements, and of Rs. 26,525, due to alluvial and quinquennial assessments, resumption of rent-free tenures, relinquishment of land held for public purposes, and other various causes. The decreases were for miscellaneous reasons, mainly diluvion.

CHAPTER III.—LITIGATION UNDER THE TENANCY LAWS.

§ 30.—Agra Litigation. Statements XX-A, XX-D and XXI-A. (i) General.

30. The total number of suits and applications filed during the year in the province of Agra was 370,113. There is an apparent increase of 42,658 in the entire mass of litigation over the returns of 1912-13, but actually, owing to the fact that September 30th, the last statutory day for the filing of ejectment and enhancement cases, was a holiday in each year, it is necessary to deduct 27,690 cases filed on the 1st October 1913 and to add 8,396 filed on the 1st October 1914 in order to arrive at the exact net figures for the year. Comparing this with the corresponding figures for 1912-13 we find that there has really been

a slight decrease of 4,326 cases, or a little more than 1 per cent. The four divisions of Gorakhpur, Allahabad, Benares and Meerut show net increases of 7,234, 3,246, 2,593 and 4, respectively, while in the Rohilkhand, Agra, Jhansi and Kumaun divisions there have been decreases of 7,490, 5,234, 4,621 and 58, respectively. The two years' returns show constant increase in the Gorakhpur and Benares divisions, but in the Allahabad division the increase of 3,246 followed a large decrease of 7,580 in 1912-13. Ejectment cases have decreased by 13,264, enhancement of rent cases by 2,312, and suits for arrears of revenue and profits by 864, while there have been noticeable increases of 5,946 in resumption suits, of 4,381 in suits for arrears of rent and of 1,548 in applications for relinquishment. The detailed statistics under each head will now be discussed.

(ii) Suits for arrears of rent.

Arrears of rent suits numbered 157,896 as compared with 153,515 in 1912-13. The increase is one of less than 3 per cent., and the total is still below what it was in any of the four years ending 1911-12. The following divisions show increases : Meerut, (+ 3,485), Allahabad, (+ 2,274), Benares, (+ 2,031), Gorakhpur, (+ 1,548) and Rohilkhand (+ 463), and the following show decreases: Agra, (− 3,214), Jhansi, (− 2,176) and Kumaun, (− 30). The arbitrary nature of these statistics from year to year may be judged from the fact that in the Allahabad and Meerut divisions increases of 2,274 and 3,485 follow on decreases of 5,321 and 1,597 respectively, the absolute variation being therefore considerable. In the Agra division during the last two years the total fall amounts to 6,349. All that can be safely said is that there is a general upward tendency in this class of litigation, which is much more marked in some divisions than in others. In divisions Rohilkhand heads the list with 35,869, and in districts, Budaun with 10,295 suits. It is a fair inference that the decreases in the Agra and Jhansi divisions are due to bad prospects and the remission of so much revenue. The same causes seem also to have been operative in Rohilkhand where three districts show a decrease, the net increase being mainly due to the returns from Pilibhit. The Allahabad division suffered also from drought, but every district shows a rise except Allahabad itself, and there is a large relative increase of 1,462 in Farrukhabad. In Ballia the rise of 1,853 is the result of a large number of institutions by the Dumraon estate under new management. It appears on the whole probable that a decrease which might have followed on the measures of revenue relief given during the year was compensated by a desire on the part of landholders to press for rents when the kharif prospects turned out to be so favourable.

(iii) Ejectment for arrears.

Applications for ejectment under section 59 of the Tenancy Act show only a nominal increase of 366, the total number being 34,458. Ejectment was actually ordered in 6,054 cases, or 774 less than in the preceding year, and there was also a small but satisfactory decrease of 1,278 acres in the area from which occupancy tenants were ejected. Non-occupancy tenants were ejected from 9,952 acres as against 4,969 in 1912-13. This large increase is, however, caused by the inclusion of 6,397 acres, the area covered by an individual case of ejectment from two villages in the Bulandshahr district.

(iv) Distraint.

Distraint cases fell by 451, and the largest decrease is one of 206 cases in the Benares division. There had also been a decrease of 286 in the preceding year. Failure of crops obviously explains these figures.

(v) Suits for arrears of revenue and profits.

Suits for the adjustment of claims between lambardars and co-sharers, or between co-sharers among themselves, show rather a large decrease of 864 which followed one of 763 chronicled last year. There were increases of 191 in Meerut and of 108 in Moradabad, and the explanation offered by the Collector of the latter district is that there was a want of straightforward dealing between lambardars and co-sharers. This feature however cannot be peculiar to the year under report.

(vi) Resumptions.

There has been a very large increase of 5,946 cases of resumption of rent-free grants, due, as was explained last year, to the expiry of the 12 years' period of limitation prescribed under section 154 (2) (*a*) of Act II of 1901, a limitation which was erroneously understood in many cases to apply to clause (*b*) also of that section. In Farrukhabad alone there were 4,670 cases out of the provincial total of 7,240.

It is a natural result of the unfavourable season that suits for enhancement should have declined by 2,312 or about 17 per cent. There was an enormous rise in 1911-12 from 6,317 to 13,278, and the latter figure was maintained in 1912-13. The present check is of course due to the fact that prospects looked their worst towards the close of the monsoon in 1913, when the cases for disposal in the year under report were filed. The improvement of conditions from July to September 1914 provoked a rush of institutions as will be seen from the unadjusted figures which are given in statement XX-A, where in Agra alone there is found a rise of 2,776. This is, however, an anticipation of what will have to be discussed next year. On the net figures of the year under report we find divisional decreases of 1,302 in Agra, 968 in Meerut, 409 in Rohilkhand, 376 in Allahabad, 117 in Jhansi and 113 in Gorakhpur. The returns from Budaun with an increase of 271, and from Agra with one of 178 cases are inconsistent with a nearly general decrease, and the Board draw attention to the fact that the Collector of Budaun omitted to make the proper adjustment of institutions by taking account of holidays before comparing the statistics of the two consecutive years. He has therefore been misled into the statement that institutions fell off in 1913-14, and a point on which explanation would have been useful has escaped him. The Collector of Agra explains the increase as due to the filing of 262 cases out of the total of 434 on the 30th September when prospects had improved. Benares is the only division which shows an increase and this is considerable, being one of 973 cases or 69 per cent. The anticipation mentioned in last year's report that the rise in institutions which have suffered a temporary check since 1911-12 would be again manifest has been realised, and 922 cases out of this increase are due to the Benares district. The majority of these have been filed by the Maharaja of Benares. The important work of soil classification and ascertainment of prevailing rates is being continued, and reports of the work done by Mr. Stewart in the course of the year are now under the consideration of the Board. Institutions of enhancement cases in the Benares district for the year under report were 1,520; there are only two districts in which this number is exceeded, viz., 1,980 in Bareilly, and 1,615 in Aligarh.

(vii) Enhancement of rent.

Mr. Gracey has continued to give attention to this very troublesome branch of the sub-divisional officer's work, which, as he points out, takes up so much time that it seriously hampers his efficiency. He urges that "the only sound reason for enhancing rents now existing is a change in prices subsequent to the date on which the present rent was fixed," and would prescribe an automatic rule. This suggestion is quite impossible. Prices fluctuate, as the present year abundantly shows, quite independently of rents, and data drawn from them would raise so many other difficult economic problems, such as the cost of labour, and standard of comfort (to mention two only), that it has been thought desirable to omit altogether a rise in prices from the grounds of enhancement in the new Tenancy Act. This was originally introduced as a reason of enhancement from Bengal, and has never been worked with success. Sir Duncan Baillie has had the enhancement rules under consideration, and before leaving India he submitted proposals to Government for their amendment with the object of making them more automatic, and the present Board endorse his recommendations.

The number of voluntary relinquishments of holdings on the part of tenants was 12,012 as compared with 10,464 in the preceding year. A rise was only to be expected in the unfavourable circumstances of the year, but it is somewhat remarkable that in the Jhansi division where there was a large rise in 1912-13, there was a decrease of 704 in the year under report. In Muttra the decrease still continues, and the number is now only 166 as compared with 1,143 in 1910-11. The approach of settlement operations accounts for the large rise of 1,174 in the Gorakhpur division, out of which 1,110 cases belong to the Basti district.

(viii) Surrenders.

After making the necessary adjustment explained above in the general remarks on rent litigation of the province, ejectment suits show a satisfactory decrease of 13,264 institutions or nearly 11 per cent. on the previous year's figures. This decrease is shared by all divisions except Gorakhpur, and the

(ix) Ejectment on other grounds than decrees for arrears.

detail is as follows:—Rohilkhand, (−8,265), Meerut, (−2,780), Allahabad, (−2,625), Benares, (−1,146), Jhansi, (−918) and Agra, (−834). Gorakhpur shows a very large increase of 3,366. The falling off in ejectment proceedings is clearly due to the conditions of scarcity which prevailed during the year as landholders postponed all but the most urgent cases on financial grounds. Ejectment suits have, however, increased noticeably in Pilibhit, (+1,925), Agra, (+302), Muttra, (+225) and Jaunpur, (+221). In Pilibhit the increase is due to friction between the tenants and zamindars owing to settlement operations, and is confined to one tahsil. The Collector of Agra attributes the rise to an improvement in prospects during the last monsoon, and there is said to have been an idea in Muttra that a re-settlement was at hand. In both these districts the high prices of cotton had probably something to do with it, as the landholders wished to obtain a larger share in the profits made by cultivators. No explanation has been given of the figures in Jaunpur. In last year's report comment was made on the large rise of ejectment suits in the Gorakhpur division. This is undoubtedly due to the settlements which have been commenced in Basti and Gorakhpur, seeing that Azamgarh, the other district of the division, shows a decrease of 458. Landholders desire to get land recorded in their proprietary cultivation in order to secure favourable terms of assessment. Mr. Pike draws attention to the large proportion of ejectment cases which end in a decree for the plaintiff, and remarks that "from the landlord's point of view the litigation seems warranted." Out of the total number of 115,628 which were disposed of during the year, 62 per cent. were decreed either on confession or *ex parte*, and out of the total number which were contested the plaintiff landholders were successful in 7·0 per cent. It is for the protection of the interests involved in the comparatively small balance of cases decreed to the defendant that the elaborate machinery of our tenant law in this respect is put in motion.

(X) Area affected by ejectment suits.

The number of cases in which ejectment was actually ordered during the year was 90,631 or 2,859 less than in the preceding year. The area affected went up from 245,178 acres to 256,896 acres.

§ 31.—Protection afforded by the Agra Tenancy Act.

31. The continued protection against arbitrary ejectment which is afforded by the tenancy law is indicated by a rise of 155,756 acres in the area held by occupancy tenants, by tenants of more than 12 years who have a potential occupancy right and by long term lessees. This increase has been constant since 1901-02.

§ 32.—Litigation in Oudh. Statements XX-B and XXI-B.

32. Owing to the rush of resumption suits the total volume of litigation under Act XXII of 1886 has increased very largely. The institutions during the year under report were 118,411 or 24,175 in excess of the 1912-13 figures. The items which show an increase are resumptions under section 108 (5A), (+ 25,187), arrears of rent, (+ 2,440), relinquishments, (+ 2,228), ejectment suits, (+ 202), and miscellaneous cases, (+ 240). The remaining classes of cases show unimportant decreases and only suits to contest enhancement or ejectment, (−994) call for mention. The enormous increase in resumption suits was inevitable owing to the expiry of the term of limitation under section 107E(*a*), and temporary deputy collectors were appointed to meet the extraordinary rush of work. All districts share in the increase, but Unao, (+ 5,859) and Sultanpur, (+ 5,344) are specially noteworthy. In the latter district it is explained that landholders were under a misapprehension in thinking that the limitation applied to assessment as well as resumption. It is noted by the Deputy Commissioner of Unao that few of the defendants employed legal assistance and cases were imperfectly presented in court. Considerable latitude has therefore been allowed to them both in original and in appellate courts. The Board have found this to be the case in other districts also. There is nothing remarkable in the rise of 2,440 in the arrears of rent suits. It follows a decrease of 3,981 in the previous year, and the figures for Oudh in this respect remain fairly constant. The cause is probably to be found in the action taken by large landholders for various reasons. In Gonda a rise of 682 is largely accounted for by suits which were filed by the Court of Wards. The increase in relinquishments is general, only Fyzabad, (−39), and Kheri, (−10), showing decreases. The largest increases are in Bara Banki, (+713), where the causes are found in bad seasons and the ravages of plague, and in Rae Bareli, (+341), where also the failure of the crops induced tenants to leave their fields

in search of other employment. The Deputy Commissioner of Lucknow notes that labour was attracted to Lucknow city and elsewhere. The rise in ejectment suits under section 108 (4) was nowhere very marked and calls for no comment. On the other hand, notices of ejectment under section 55 went down by 3,697, the largest fall being of 1,541 in Hardoi, where the previous year's figures had been inflated by the action of certain large estates. There is consequently a decrease of 1,477 cases of applications for assistance to eject tenants. Ejectments of statutory tenants on account of unsatisfied arrears went up by 428 cases. The decline of 994 in suits to contest enhancement or ejectment is a natural consequence of the figures which have just been discussed.

§ 33.—Litigation in Kumaun. Statements XX-A and XX-C.

33. Litigation decreased slightly in Kumaun under the Kumaun Rules and under the Agra tenancy law, the latter being applicable only to the Kashipur sub-division of the Naini Tal district. Under the Kumaun Rules institutions fell from 399 to 376. Arrears of rent suits were 63 less than in the preceding year, but an increase of 41 is recorded in suits for arrears of revenue and profits. Other small decreases call for no comment. Under the tenancy law there was a fall from 487 to 429 institutions. The total number of cases in Kumaun was therefore only 805 throughout the year.

§ 34.—Disposal of work in courts of original jurisdiction. (a) Agra. Statements XX-D and XXI-A.

34. The year opened with a pending file of 101,081 suits and applications, to which must be added 4,772 applications for ejectment under section 59 of Act II of 1901, making a total of 105,853. Adding the gross number of new institutions which were 370,113 we have 475,966 as the total number for disposal, or an increase of 14,637 on the corresponding figures for the previous year. Enhancement of rent and ejectment suits which are filed between the 30th June and 1st October must, however, be left out of account in order to obtain the net cases which can be disposed of during the year. These amounted in all to about 137,000* so that the possible year's work was confined to some 338,966 cases, out of which 314,463 were disposed of, leaving a net balance of about 24,503. Instead therefore of the net reduction of 2,224 in the pending file which was achieved in the preceding year we have an increase of 3,211 (revised figures). Districts which show balances of more than 500 disposable cases are now 20 in number of which Budaun with 1,930, Farrukhabad with 1,456, Meerut with 1,228, Aligarh with 1,115, Shahjahanpur with 1,093 and Jaunpur with 1,032, call for special remark. Of these Budaun, Meerut and Shahjahanpur were mentioned unfavourably in last year's report and in each case there has been a still further increase in the pending file. In Budaun this increase is no less than 745. All these districts, except Jaunpur, suffered more or less from drought and much miscellaneous executive work necessarily hampered sub-divisional and other courts. The Collector of Budaun writes that "there were periods in the year when it was not possible for officers to attend to revenue work except to a very limited extent," and the Board accept this as a satisfactory explanation. In Aligarh the Commissioner points out that the work done was satisfactory in quantity when the changes in the staff by which it was considerably weakened are taken into account. No explanations are given from Meerut and Shahjahanpur, but these districts may have the benefit of the general explanation of the increase of taqavi distribution and other relief work. In Farrukhabad a satisfactory explanation is found in the large number of resumption cases, 726 of the pending balance being of this class. Frequent changes among officers which resulted in the district being below strength for part of the year caused the large rise of 314 in the pending file for Jaunpur. The balance in Ballia has considerably increased, (+643), and calls for the district officer's attention. This is due largely to the rise in institutions, particularly of arrears of rent suits. In Bijnor, where the prompt disposal of work has called forth commendation by the Board of recent years, the pending file has gone up from 196 to 396. Here again, however, the demands of executive work is a satisfactory explanation. Districts which show marked reductions in the pending file are Muzaffarnagar, (−270), Ghazipur, (−192), Mainpuri, (−109), and Allahabad, (−101).

Cases pending for more than three months have gone up from 2,192 to 4,275 which is far from satisfactory. In 1911-12 the number was only 1,074 so that

*Approximate figures are given owing to the inclusion of a few suits under section 57 (columns 3 and 4 of statement XXI-A).

they have been nearly quadrupled in the two years. Enhancement of rent accounts for 2,378, ejectment for 327, and resumption for 777 of these. The necessity for greater promptness in securing decisions in enhancement suits should be impressed on sub-divisional officers. They should be settled as promptly as possible after the inspection of the locality which should be made during the cold weather. Aligarh has 126 and Budaun 108 protracted cases under arrears of rent and arrears of revenue and profits, for which no good reason can be alleged. It is so far satisfactory that Fatehpur, Jalaun, Ghazipur and Naini Tal have no long-pending cases, while Bijnor and Jhansi have only 1 each. The Board again draw attention to the necessity of the careful scrutiny of periodical returns by which alone subordinate courts are kept up to the mark. Taking into consideration the exceptional features of the year the Board think that a satisfactory tale of work has been presented.

(b) Oudh. Statements XX-D and XXI-B.

In Oudh, the year opened with a pending balance of 2,269 cases, and closed with one of 7,766. This enormous increase is attributable entirely to resumption cases, to which reference has already been made. Excluding 6,247, the number of these which remained for disposal, the pending balance is only 1,519. It is satisfactory to find that in Bara Banki and Sitapur, in spite of 2,278 and 1,963 institutions under resumption, respectively, pending balances have been reduced by 153 and 156. The largest increases are in Sultanpur, (+ 2,851), and Lucknow, (+ 1,066). In Lucknow it is said that the resumption cases will be disposed of by the end of March 1915, but in Sultanpur it has been necessary to fix dates far ahead, and 2,905 cases, which will probably have to be fully tried out, remain for disposal. Resumption suits are frequently of an intricate and troublesome character and in the past year have taken up much of the time of the courts.

The balance of arrears of rent suits are high in Hardoi, (142), Sultanpur, (112), Sitapur, (111), and Gonda, (108). There are 76 arrears of rent cases pending for more than three months in Sultanpur and 41 in Gonda, and in all classes of litigation, mainly as the result of resumption cases, the number of protracted proceedings has gone up from 262 to 5,946.

§ 35.—Execution of decrees. Statement XXX-B.

35. There has been a further increase in proceedings for the execution of decrees, under which head it may be noted are included all decrees which are framed by revenue courts under rule 34 of Board's circular 6—II. It is probable that in all cases the returns are not correct, and from time to time the Board have discovered omissions. The returns should not be confined to merely money decrees. Constant correction of this statement may account for the yearly increase. There was a pending balance of 13,575 cases and 145,213 new applications were received, so that the total for disposal was 158,788 as compared with 151,786 in the preceding year. The result of the year's work was to increase the pending balance by 2,727 cases. This is scarcely satisfactory, and the balance of work has only been reduced by small amounts in 18 districts of which five belong to Oudh. There have been large increases of outstanding work in Budaun, (+ 801), Moradabad, (+ 418), Etah, (+ 330), Meerut, (+ 267), and Cawnpore, (+ 280), for which a satisfactory reason is found in the leniency which courts showed to judgement-debtors because of the bad season. It is, however, necessary to draw attention once more to the need for special attention to this branch of court work which tends to be neglected and to fall into arrears. The amount which has still to be recovered in pending applications has gone up by nearly 2 lakhs of rupees during the year.

§ 36.—Appeals to Collectors. Statement XXII.

36. The number of appeals filed before Collectors under Act II of 1901 decreased considerably from 4,562 in 1912-13 to 4,047 in the year under report, but this decrease was counterbalanced by an increase from 1,769 to 2,568 in Oudh. Including appeals under the Kumaun Rules, which also decreased, there was a net increase of 249, the total of 6,626 being higher than it has ever been before.

Resumption cases in Oudh account for the total increase. In normal circumstances the result of unfavourable seasons is a decrease in appeals, a considerable portion of which may be regarded as tentative or litigious. When funds are short litigants hesitate to incur expenditure on doubtful issues. There was a large increase in the total number of appealable cases decided by subordinate courts, which went up from 111,811 to 128,258, and

5·17 per cent. of these were subject of appeal, which is practically the same result as in the year preceding. The percentage of appeals which were totally unsuccessful was 62 which is a slight improvement on the preceding year's percentage of 60. The heaviest files for disposal were in Ballia, (419), Sultanpur, (405), Fyzabad, (343), Unao, (327), and Basti, (314). It is unusual to find such a large cause list for district officers in Oudh, and reason is of course to be found in the resumption cases. Long pending cases have gone up from 23 to 68, Oudh being mainly responsible for the increase. It is noticeable that protracted cases number 8 in the Benares division, and 7 each in the Agra and Allahabad divisions out of the total of 25 for the whole province of Agra.

§ 37.—Appeals to District Judges. Statement XXIII.

37. The total number of cases appealable to the District Judge was 12,220 which is slightly in excess of the 1912-13 figure. On the other hand the number of appeals filed decreased from 1,968 to 1,887. The percentage of appeals has therefore fallen from 16 to 15 but this is probably due to scarcity, and does not show any improvement in the quality of the work. The percentage of totally unsuccessful cases, ignoring 139 which were remanded and the issue of which is uncertain, was 57 which is slightly better than was recorded in the preceding year.

§ 38.—Appeals to Commissioners. Statement XXIV.

38. The appellate work in Commissioners' courts shows a decline from 9,170 to 8,424. Including the arrears of former years the total for disposal was 10,402 as compared with 10,526 in 1912-13, but in spite of this fact the pending balance at the close of the year was increased by 221. In three divisions only, Fyzabad, (—238), Agra, (—18), and Jhansi, (—9), have the pending balances been reduced. In Fyzabad there was a slight fall in institutions, but the above good results were achieved by a very heavy tale of work, no less than 1,268 appeals having been decided, of which the Additional Commissioner appointed a few weeks before the year closed had time to decide only 118. Gorakhpur shows a rise of 259 in the pending file, which is partly explained by appeals having come in rather later than usual. Mr. Pike adds that owing to the appointment of Mr. Hope Simpson as Additional Commissioner appeals were at their lowest possible by the end of the first week in November. The rise in Benares has continued and the balance undisposed of now amounts to 410, as against 73 only in 1911-12. There were fewer institutions and Mr. Allen was appointed as Additional Commissioner for about 12 weeks. Actually 809 appeals were decided by the Commissioner and Additional Commissioner as against 595 in the previous year. There is a large number of 183 pending for more than three months. In Allahabad there was a rise from 39 to 105 in the pending file and other divisions show unimportant variations. In spite of considerable assistance in Benares and Fyzabad, where it was most needed, the year's returns show that Commissioners are not always fully able to cope with their appellate work, and there is always the difficulty of finding sufficient time for inspection and other responsibilities. Since the end of the year under report Additional Commissioners have been appointed to various divisions, and the results should be apparent in the next year's returns.

The attention of Collectors in the Rohilkhand division is again drawn to Mr. Cobb's criticism that there is a tendency to cause superfluous litigation by dealing under section 39 of the Revenue Act with cases which should be brought under section 95 of the Tenancy Act.

The percentage of appeals which were upheld after trial was between 69 and 70, not counting those which were remanded. The standard of work in subordinate courts remains therefore fairly high.

§ 39.—Judicial work of the Board of Revenue.

39. Under the tenancy laws of Agra and Oudh the Board received 1,411 new appeals, or 64 less than in 1912-13. There was a total file of 2,048 for disposal, and during the year 1,413 were decided, or 110 more than in the preceding year. The pending balance was 635. New applications for revision under the Agra Tenancy Act numbered 1,174, or 50 more than in 1912-13, and with the pending file the number for disposal was 1,428. Of these 1,265 were decided, which shows an improvement of 238 on the previous year's returns, and there was a balance of 163 left over. The orders of the lower courts were disturbed in 23 per cent. of the cases in appeal, and in 14 per cent. of those in revision, which are slightly worse results than were recorded last year, when the percentages were 22 and 10, respectively. The Benares

division shows the worst results with 40 per cent. of disturbances on appeal, and 29 per cent. of disturbances in revision. Out of 25 appeals for disposal under the Kumaun Rules 11 were decided, leaving a pending balance of 14.

§ 40.—The judicial work of Honorary Assistant Collectors.

40. The number of honorary assistant collectors, including three who were newly appointed during the year, remained at 28, and they continued to give very valuable assistance to the regular staff by deciding no less than 24,374 cases which is an increase of 5,569 on the returns of 1912-13. Noteworthy results were obtained by Munshi Imdad Ali (3,858) and Rai Jagannath Singh Bahadur (3,206), both of the Moradabad district, and by Munshi Hamidullah (3,160) in the Gorakhpur district. In four other instances these public-spirited gentlemen decided upwards of 1,000 cases each. There are now seven courts of this kind in Oudh where they have been recently introduced. The Commissioners of Meerut and Gorakhpur bear independent testimony to the effect of leisure on the character of the work done by honorary assistant collectors. Mr. Saunders writes that though "they are apt to be a little weak on the procedure side, their cases are tried with care and deliberation, and are free from the marks of hurry and scramble which the stipendiary courts, not altogether by their own fault, are wont to show."

CHAPTER IV.—SETTLEMENT AND REVISION OF RECORDS.

§ 41.—Regular settlement.

41. Parganas Pilibhit and Jahanabad in the Pilibhit district came under settlement operations, and the Settlement Officer joined the district on the 4th October 1913. The revision of the settlements in Etawah, Fatehpur and Allahabad continued during the year, while operations in the Kashipur pargana of the Naini Tal district remained in abeyance. The cis-Jumna portion of the Etawah tahsil in the Etawah district was inspected by the Settlement Officer and the Bidhuna tahsil by the Assistant Settlement Officer who arrived in the district in October 1913. Rent-rate reports were received for both these parganas and also for the northern portion of the Bharthna tahsil which had been inspected in the preceding cold weather. Assessment proposals were submitted for the Bidhuna tahsil and for the cis-Jumna tracts in the Etawah and Bharthna tahsils, and were sanctioned by the Board during the current year. The revised revenue was declared in the part of the Auraiya tahsil lying north of the Jumna. In Fatehpur the Settlement Officer inspected the parganas forming the Khaga tahsil and submitted rent-rate reports for parganas Kora, Tappa Jar, Kotila, Hathgaon, Ekdala and Dhata. Assessment proposals were submitted for the Bindki, Muttaur, Ghazipur, Tappa Jar, Kora and Kotila parganas and for the alluvial mahals lying in the Khajuha and Ghazipur tahsils. The new demand was declared in seven parganas (Fatehpur, Haswa, Kutia Gunir, Ayah Sah, Muttaur, Ghazipur and Bindki). Six parganas were inspected in Allahabad, Soraon, Nawabganj and Chail by the Settlement Officer, and Sikandra, Jhusi and Mirzapur Chauhari by the Assistant Settlement Officer who joined his appointment in October 1913. Rent-rates were sanctioned in parganas Mah, Mirzapur Chauhari, Soraon and Sikandra, and assessment proposals were formulated in parganas Kiwai, Mah and Mirzapur Chauhari. In the Pilibhit district the entire area under assessment was inspected, and the rent-rate report of the Jahanabad pargana was submitted.

Good progress has been made in the correction of maps and the attestation of records. The work of attestation was completed in Etawah, and very little remained to be done in the Allahabad district at the close of the year. Record operations were begun in the Gorakhpur district in July. No attestation of records was undertaken in Pilibhit, but during the course of his inspection the Settlement Officer found that an enquiry would be necessary regarding the amount of land really held by occupancy tenants owing to the change of holdings caused by the nature of sugar cultivation in the district and a Deputy Collector was deputed to assist in the investigation.

The re-settlement of the Bhabar was sanctioned during the year, a Deputy Collector being appointed to revise the rates of rent both in the *kham* and settled villages, and to revise the revenue demand in the latter. The rent-rates have been sanctioned and the proposals for the revision of the revenue have recently been reviewed by the Board.

Proposals were submitted by the Board for the re-settlement of the Bulandshahr and Basti districts. In both cases the revision has been sanctioned, and operations will be undertaken next October in the Basti district and in October 1916 in Bulandshahr.

§ 42.—Quinquennial revisions in Bundelkhand.

42. The quinquennial revision of assessments in Bundelkhand under the special rules was postponed during the year under review owing to the famine. The rules relating to these assessments were revised during the year.

§ 43.—Miscellaneous.

43. The question of extending the provisions of the Revenue and Tenancy Acts to the pargana of Kaswar Raja in the Benares district engaged the attention of the Board during the year and definite proposals were submitted to the Government in November.

§ 44.—Case work. Statements XXVI—A and XXVI—B.

44. The number of cases pending from the preceding year was 7,431, while 26,996 cases were instituted during the year. The total number thus aggregated 34,427. Of these 24,734 cases were disposed of during the year, leaving a balance of 9,693 cases to be heard. The largest arrears occurred in Etawah where a large number of suits for the resumption of rent-free grants had been brought. 1,202 appeals were filed and the total number for disposal was 1,325. Of these 1,052 were in the courts of the Settlement Officers and 273 in those of the Commissioners. 960 appeals were decided, 720 by Settlement Officers and 240 by Commissioners. The balance pending at the end of the year was 365, of which 235 belonged to the court of the Settlement Officer of Allahabad : the appellate work in this court has been extremely heavy.

CHAPTER V.—LITIGATION UNDER THE REVENUE ACT.

§ 45.—Summary recovery of revenue for lambardars. Statement XVIII.

45. There was a considerable increase in the number of applications filed by lambardars under section 184 of the Revenue Act for assistance in the recovery of revenue paid by them for co-sharers in arrears. In the province of Agra the increase was 97, and in Oudh 143, the total number for disposal being 2,936 and the sum involved Rs. 1,07,619, as compared with 2,754 and Rs. 93,661, respectively, in the preceding year. There was thus an average incidence of between Rs. 36 and Rs. 37 on each application.

The increase in the use of this procedure was due to financial pressure arising out of bad harvests, though in the Jhansi division the decrease from 309 to 160 in the new applications was caused by the liberal remissions of revenue. The Meerut, (+113), Agra, (+159), and Lucknow, (+104), divisions show the largest increase, and Aligarh heads the list of districts, being nearly 100 ahead of Meerut which comes second. The pending balance went up from 504 to 860, and the only division which shows a clean sheet is Benares where, however, there were only 2 cases for disposal. The work has been well done in Oudh, where in each division over 70 per cent. of the applications were finally disposed of. The ideal in this branch of work is, as Mr. Turner points out, to collect the arrears as punctually as arrears of revenue, and this ideal should be kept in view. The Board desire me to correct a mistake which was made in the 1911-12 report, where they directed that each application should refer to the recovery of a definite amount from an individual defaulter. Rule 3, Order 1 of the Civil Procedure Code makes a joinder of defendants quite legal, as the liability, though not arising out of the same act, arises out of the same transaction, viz., the payment of revenue for the mahal by the lambardar. District officers are requested to note this, as it simplifies the procedure, and reduces the costs for the lambardars.

§ 46.—Summary recovery of under-proprietary rents in Oudh. Statement XIX.

46. The Lucknow division, where under-proprietors are less numerous, shows a fall from 93 to 75, and the Fyzabad division a large rise from 2,044 to 2,226 in the use by superior proprietors of section 185 of the Land Revenue Act. The rise is largest in Sultanpur, (+126), exceeds 100 in Bara Banki, and is just under 100 in Gonda. The Sultanpur increase is due to the action of the Amethi estate, and in Bara Banki to cases filed by the Raja of Ramnagar. The pending balance has gone up from 312 to 550. Considering that at the end of 1911-12

this balance was only 185, the results are scarcely satisfactory. With the return of normal agricultural conditions, collections by proprietors should become easier, and next year's returns should show improvement. Large undisposed of balances are generally due to applications being filed late in the year. The disposal of 844 applications in Fyzabad, a considerably larger number than the total file of any other district, testifies to a good year's work.

§ 47.—Mutations in registers of proprietors. Statement XXVII.

47. The statement appended to this report presents proprietary mutations in two classes, those, namely, which take place under the orders of a court by sale or otherwise, and those which are due to private transactions by sale or mortgage, by the ordinary course of inheritance and by unclassified means. Mutations due to sales by the order of courts increased by 32, which is not remarkable in a bad year, and is less than the increase of 178 recorded in the year preceding. Changes due to private sales actually decreased by 27, and only in Kumaun, (+1,024), do the figures call for notice. In this division the work of bringing the proprietary register up to date has continued, and no economic factor is involved. There has been a total increase of 5,047 in the number of succession cases, but only three divisions, Kumaun, (+12,181), Meerut, (+590), and Lucknow, (+326), contribute to this. The reason for the large increase in Kumaun is as stated above, and it is satisfactory to know that the bulk of the work which was undertaken by Mr. Peters is completed. It is hoped that the introduction of new rules will prevent the work again falling into arrears. In the Meerut division, plague in the Meerut district, and increased mortality among proprietors of the Bulandshahr district who held shares in many villages, are the explanations offered. There is a large decline of 2,360 in the Gorakhpur division, which is largely due to the efforts made in 1911-12 to bring mutation work up to date, but it is noticed by the Commissioner that the present figures are 8,963 or nearly 27 per cent. less than those of 1910-11 which was a normal year. In Azamgarh it is noticed that though plague was much worse than in 1912-13 the reports have dropped by 1,583. The Board agree that there is some indication of slackness in recording successions, and the matter should receive attention. I am further to call attention to the constant fall in succession cases in the Jhansi division; these were 6,529 in 1910-11 and they are now 4,428. The causes of this should be ascertained, and the obvious inference is that the reporting agencies are at fault. On the whole, the explanation is accepted that the decrease, which seven out of the ten divisions show, is due to a healthy year. Mutations arising out of mortgages increased by 1,002. No explanation is given for the rise of 634 in the Gorakhpur division, but it is satisfactory to note that redemption of mortgage cases increased in much the same proportion. Other divisions show increases which are no more than ordinary fluctuations, and do not indicate that there has been great recourse to the money-lender. The distribution of taqavi mitigates such a tendency in a year of drought. On the other hand, redemption of mortgages, which is a sign of prosperity, has accounted for 50 more cases in the year under report than in 1912-13. In the latter year the increase of 2,422 had been remarkable, but it is satisfactory to find that debtors have been able slightly to improve their position. The rise of 424 in the Agra division shows that money was plentiful, the result doubtless of profits made on the cotton crop.

§ 48.—Partitions. Statement XXVIII.

48. It is satisfactory that in two respects the statement of partition work has improved. In the first place the number of new applications, 1,014 for perfect and 3,156 for imperfect partitions, has decreased by 510, and in the second place the pending file has been reduced by 394 which is about three-fourths of the decrease in institutions. The total file for disposal was 10,800 as against 10,827 in 1912-13, and the pending file at the close of the year was 6,236 as against 6,630. The only divisions which do not share in this decrease are Gorakhpur, (+107), Benares, (+31), Allahabad, (+19), and Kumaun, (+3). In the Gorakhpur district the balance contains about 47 cases which have been postponed owing to settlement operations. The provincial returns would have been remarkably good but for the Gorakhpur division, where it may be noted that in Basti there is an increase in the pending file of 22 in spite of the fact that the total cases for disposal fell by 112. The explanation given in the Basti district is that work was hampered by frequent transfers, and Mr. Pike is

inclined to blame the new system of giving this work to sub-divisional officers. He writes "In theory this has everything to commend it, but in practice it results in the partition work being shelved in favour of unforeseen and more urgent work." The Board have already expressed approval in their 1911-12 report of the transfer of partitions to sub-divisional officers. Each year's returns show that the work is getting more systematic, and now that the initial difficulties have been overcome, the good effects of sub-divisional officers' work, particularly from local inspections, should make themselves apparent. What can be done by a district officer who is interested in partition work is strikingly exemplified in Muzaffarnagar, where Mr. Moore has reduced the pending file from 342 to 88. It has been suggested by Mr. Hose that a rough standard for the pending file should not be more than one year's disposals. At present the actual facts are far from this, as disposals were 4,564 during the year, and the pending balance is 6,236. The Board think that the ideal to be aimed at should be the reduction of the pending balance to a number not greater than the year's institutions, which in this case would be 4,170. The outturn of work is most irregular from district to district, which indicates that the supervising officers are by no means equal in the interest which they take in this important branch of judicial work. Leaving Kumaun and Dehra Dun aside, the percentage of pending partition cases disposed of during the year is 70 or upwards in the following districts only :—Bijnor 92, Muzaffarnagar 90, Kheri 86, Moradabad and Muttra 81 each, Bulandshahr 79, Fyzabad 72 and Bahraich 71. It goes down as low as 32 in Azamgarh, 30 in Banda and 19 in Ballia. While making all allowances for the fact that the complexity of the cases differs from district to district, the Board think it necessary to appeal to district officers to endeavour to improve the standard of outturn, and to make it more uniform.

The Board have received more or less useful comments from district officers' reports, to some of which reference may be profitably made. Mr. Pearson is of opinion that work would be better done if officers of the naib-tahsildar class were available for local enquiries. Naib tahsildars are fully empowered by law to conduct enquiries and attention is drawn to section 229 of the Land Revenue Act, which may have been overlooked by some courts. He also reports that in big partition proceedings he has directed sub-divisional officers to frame proceedings in one touring season, and dispose of objections in the next. Provided this arrangement is limited as in Meerut to big partitions, this would have good results in keeping the courts in close touch with the parties and the facts at the important stages of the case. The Board indeed attach the highest importance to local inspections, and it is noted with satisfaction that in Bara Banki the objections in 26 cases were decided on the spot. Notice of this procedure is also found in the reports from Mainpuri, Sultanpur, Bahraich and Partabgarh. District officers should mention in next year's report the number of cases in which sub-divisional courts made local inspections while deciding contested cases.

The scrutiny of the register of partition cases prescribed in rule 66 of Board's circular 21-II is not always carried out, as the Collector of Bareilly reports that he discovered at an annual inspection that monthly statements of cases had not been submitted.

Lastly, I am desired to draw attention to the convenient distribution of work which is reported from Aligarh, and which probably obtains elsewhere. One officer at head quarters is appointed to have charge of the amins, and a report is made to him by each sub-divisional officer when a case is ready and an amin is detailed. Similarly, the partition ahlmad prepares the cases at head quarters under the partition officer and sends the file when ready to the sub-divisional officer's court reader to be put up. The result of this arrangement obviates divided control over amins, and enables the staff to be used effectively and economically.

§ 49.—Appeals under the Land Revenue Act and Kumaun Rules. Statement XXIX.

49. There was a very small decline in the appellate work of the Collectors' courts under the Land Revenue Act, corresponding to that already noted in paragraph 36 above. New institutions numbered 6,861 as compared with 6,896 in 1912-13. Including a pending file of 1,178 there was a total of 8,039 for disposal, out of which 6,696, or 10 less than last year, were decided. The pending file was 1,343, which shows an increase of 165. This pending balance tends to

increase. It was only 988 at the close of 1911-12. The most noticeable increase is in the Gorakhpur division, where the balance has gone up by 96 cases. In the Basti district it has increased by 76, in explanation of which it is said that many appeals were filed at the end of the year. The institutions in this district show rather a remarkable rise. In 1909-10 they were 284, and they now stand at 500. Probably the approach of settlement accounts for this. Divisions showing a noticeable decrease in the file are Agra, (−21) and Rohilkhand, (−35). There is a similar rise from 330 to 471 in long protracted cases. The attention of district courts will no doubt be directed to the clearing up of these increased arrears for which during the year under report press of administrative work may be pleaded.

In Commissioners' courts new institutions decreased by 133 during the year. In spite of this fact the pending balance increased by 29 cases and 96 cases less were decided in 1913-14 than in 1912-13.

§ 50.—Board of Revenue's judicial work.

50. There were 179 appeals under the Land Revenue Act pending from the previous year, 106 from Agra and 73 from Oudh. During the year new institutions were filed to the number of 520, a slight decrease on the 1912-13 figures, and there was a total file of 699 out of which 519, which is again an increase of 32, were decided. The year closed with a balance of 180 cases. The orders of the lower courts were disturbed in only 9 per cent. of the appeals heard against 16 per cent. in 1912-13. On the revisional side new applications numbered 143 and the total for disposal was 204 of which 176 belonged to Agra, and 28 to Oudh. Disposals numbered 182 against 96 of last year, which is an increase of 86, or 90 per cent. on the previous year's work. The percentage of cases which were wholly or partially successful was 25.

Including the statistics of paragraph 39 above, the Board decided 3,390 cases of all kinds during the year under report, as compared with 2,924 in 1912-13.

CHAPTER VI.—GENERAL.

§ 51.—Action taken to avert sale of ancestral land in execution of decrees.
Statement XXX-A.

51. The number of cases received for execution of civil court decrees which affect ancestral land and are dealt with by Collectors under Board's circular 25—II, was 5,196 in Agra and 824 in Oudh. This was an increase of 73 on the preceding year's figures, and the total for disposal amounted to 9,517; out of these 5,595 were finally dealt with, and the year's work shows a decrease of 165 cases. The pending file has gone up from 3,497 to 3,922. There is a very noticeable increase of 246 cases in the balance of the Rohilkhand division. The explanation of this increase, furnished by the Collectors of Budaun and Shahjahanpur, is that postponements were freely allowed when it seemed probable that the judgment-debtor would be able to pay with the return of more prosperous agricultural conditions. The number of cases in which sale of the whole property was found to be inevitable rose during the year from 1,982 to 2,035, and the percentage of these on the total number of disposals was just below 36, a slightly worse result than has been recorded of recent years. It is noteworthy that Collectors were able in one case or another to make use of every means of averting sale which is allowed by law, and the number of cases in which sale was averted increased from 158 to 193. The best results were obtained in Rohilkhand, where partial sales numbered 42 and postponements 14. Cases of execution by farming or managing the property decreased by two only. The district officers of Allahabad and Kheri refer to the importance of checking the official valuation of land on which the Board laid emphasis in last year's report. Mr. Fremantle remarks that the adoption of a stereotyped multiple of the difference between recorded rent and revenue for the purpose of valuation gives very uneven results, and Mr. Campbell's practice of personally checking official valuations is commended to all Collectors as likely to influence very favourably in the interest of debtors the price actually realised.

Under section 20 of the Oudh Laws Act, there were 395 applications for sanction to sell, which was given in 266 cases. Actually sale took place in 88 cases, or 33 per cent.

During the year the Board have been considering the adequacy of the rules for safeguarding execution by sale of ancestral lands in decrees of rent courts in Agra, and enquiries have been made with the object of clearing up the situation.

§ 52—Acquisition of land. Statement XXXI.

52. Only 6,819 acres were acquired at a cost of Rs. 9,00,783 for public purposes during the year under report as compared with the abnormal figures, (16,859 acres at a cost of Rs. 14,75,718), in the previous year, chiefly due to the land required for the new Imperial city. The area acquired by private negotiation amounted to 1,284 acres at a cost of Rs. 71,069. Of the total, 815 acres were acquired for railways, 1,193 acres for canals, 2,644 acres for afforestation in Hamirpur and Garhwal, and the rest for miscellaneous purposes. The area of land restored was 296 acres and the price realized amounted to Rs. 25,946.

The forms prescribed by the executive rules relating to the acquisition of land contained in Board's circular 1—VIII which were issued tentatively in 1911 were found to require extensive revision. While revising them opportunity was taken to revise circulars 1 and 1A also where two years' practical working showed this to be necessary. The whole case is being separately reported to Government for approval of the amendments proposed.

§ 53.—Total work in district offices. Statement XXXII.

53. The advantage of the gross returns of work in district offices is to enable a rough estimate to be made of the mass of miscellaneous correspondence and vernacular work which is not definitely dealt with elsewhere in this report. There has been a total increase of 2,281 in the issues and receipts of English correspondence, which is negligible. The only remarkable variations are +2,417 in the issues of the Allahabad division, and +1,262 in the Kumaun division. The very large increase both in receipts and issues reported from the Allahabad district is unexplained, and the probability is that some error has again crept into the classification. The present return under issues is in excess of any other district in the provinces. The year brought a heavy burden of extra work on English offices which cannot be expressed merely in terms of issue and receipt, and the Board think it only fit and proper to acknowledge this. There have been large compilations of returns and statements connected with scarcity, remissions and suspensions of revenue, and taqavi distribution, which have been punctually and correctly submitted.

The total of all new cases instituted during the year in the vernacular departments has gone up from 1,284,324 to 1,418,994, an increase of about 10½ per cent. Ignoring purely judicial returns, which have already been explained, we find that taqavi cases have gone up from 22,278 institutions in 1912-13 to 112,925 in the year under report, but that there has been a decrease of miscellaneous vernacular work from 922,475 to 895,378 cases during the same period. Press of work in taqavi accounts is more or less automatically provided for by the appointment of assistant accountants according to a prescribed scale, so that it appears that there has been no undue strain placed upon the general clerical staff throughout the year. The pending balance has however gone up, from 216,236 to 263,130, and increases of more than 5,000 are found in the following divisions: Gorakhpur, (+10,334), Agra, (+10,054), Allahabad, (+5,240), Kumaun, (+5,626), and Jhansi, (+5,373). Mr. Pike points out that the increase in Gorakhpur, where maps are being corrected prior to settlement, is due to the institution of cases relating to boundary stones. Taqavi cases account for the large increases in Agra and Jhansi, and in Kumaun there has been a constant rise since 1911-12, owing to the mutation work in Almora. On the whole work appears to have been satisfactorily dealt with, but taqavi and certain matters connected with the general administration have increased the labour all round, particularly in tahsils.

§ 54—Assignments &c. of land revenue. Statement XXXIII.

54. The total land revenue of the property assigned or alienated at the close of the year is Rs. 2,58,763, as against Rs. 2,60,167 shown in the previous year. The difference is due to the resumption of a few life muafis on the death of grantees, and of a conditional muafi in the Gonda district, and to additional assignments, which are mostly made to Indian non-commissioned officers for meritorious service.

§ 55.—Payment of Government dues by money-order.

55. The number of money-orders issued for payment of land revenue was 313,507, to the value of Rs. 53,22,997, as compared with 330,717, valued at Rs. 63,40,584 in 912-13. It may be said roughly that about $\frac{1}{10}$th of the total land revenue demand is now paid in this way throughout the provinces. There was an increase in the Benares and Fyzabad divisions, but a large falling off in Jhansi, Allahabad and Rohilkhand. In the Agra division there was a slight increase in the number of money-orders, but a falling off in the value. Generally the decrease may be ascribed to the fact that the realisable demand was so much decreased by remissions and suspensions. There was, on the other hand, a slight increase from 108,204, valued at Rs. 12,26,782 in 1912-13, to 115,953, valued at Rs. 13,09,195 in the miscellaneous revenue money-orders, which cover remittances for taqavi, excise and district board payments. The divisions showing an increase are Meerut, Allahabad, Benares, Gorakhpur, Kumaun and Fyzabad. The explanation given of the increase in some cases is that there were many new taqavi accounts opened, but this is not universal as Jhansi and Agra show decreases. Realisations were not pressed, or probably there would have been a much greater increase. In Bulandshahr the Collector took special means to publish the fact that payment might be made by money-order for pound receipts, school fees and taqavi, and it is remarked from the Benares division, that the receipt of remittances for incorrect amounts or with incomplete reference to the item of account throws a burden on the tahsili staff. The system is, however, a convenient one which must grow in popularity, and each year of its use will familiarise the people with the procedure and prevent mistakes.

§ 56.—Rental money-orders.

56. The amount of rent paid by money-order decreased from Rs. 19,62,044 in 1912-13, which was the recorded maximum, to Rs. 15,24,644 in the year under report. We have to go back to 1907-08 to find a smaller total than this, and it is interesting to note that similar circumstances, viz., difficulty in paying rent and large remissions, and suspensions of revenue affecting the rental demand, produced in that year also a fall of nearly 5 lakhs in the amount remitted. The fall is largest in Rohilkhand, where it amounted to upwards of 2½ lakhs. The only divisions which show an increase are Benares, (+Rs. 29,605), Gorakhpur, (+Rs. 27,479) and Fyzabad, (+Rs. 11,406). The fact that only the eastern portions of the provinces, which enjoyed fairly normal or even in some cases prosperous seasons, show an increase, is conclusive proof that the fall elsewhere is due to scarcity. In spite of the large decrease in the present year, it is interesting to find that Rohilkhand still heads the list in the use of rental money-orders.

§ 57.—Maps.

57. During the year under report, the Thomason College Press took in hand for publication five district maps and two tahsil maps. Of these the Jhansi, Aligarh and Shahjahanpur district maps, and both tahsil maps which related to the Jaunpur district, were published and issued, leaving two district maps to be completed.

§ 58.—Working of the Bundelkhand Land Alienation Act.

58. The reports from the Jhansi and Allahabad divisions show that the Bundelkhand Land Alienation Act continues to be well and intelligently administered. In the Jhansi division there has been a net gain by agricultural tribes of land paying a revenue of Rs. 3,531 in which each district shares. In the previous year the net gain was of land paying Rs. 9,056 and a fall is only to be expected in a year characterised by severe famine. On the other hand mortgages with possession resulted in a net loss of land paying Rs. 1,108 revenue. Collectors sanctioned permanent alienations to other tribes in 26 cases, in all of which there was nothing contrary to the objects of the Act. Sanction was refused in 19 cases. There were 73 applications for the amendment and substitution of mortgage deeds, as against 106 in the previous year. These were all correctly dealt with. Attempts to evade the provisions of the Act were brought to light in four cases, of which three belonged to Banda. In one of these a mortgage had been ordered in 1909, but the judgment-debtor executed a sale deed, and a civil court decree was obtained. The irregularity was detected when mutation proceedings were instituted, and the attention of the civil court was drawn to the provisions of the Act. During the year it has been necessary to ask the High Court to direct subordinate courts to act under section 17 in all cases. It had been discovered that they were in the habit of appointing the Collector as receiver instead of

transferring the decree to that officer for execution. The question of whether credit has been contracted by the Act need no longer be discussed. Mr. Swann continues to urge that it has been contracted, and the Commissioner is inclined to agree with him. No specific instances are adduced, and the Board consider that in normal years the agriculturist can offer quite adequate security under the restrictions imposed by the Act to meet all reasonable needs. One main object of the Act is to prevent him getting into debt beyond his means. Mr. Swann makes a further suggestion that the creditor should be given some defence against the vicissitudes of Bundelkhand seasons, by being allowed in exceptional circumstances to get his term of mortgage extended. The Board doubt whether any action on these lines will be feasible, and await a report which is promised by the Commissioner.

The Commissioner of Allahabad reports that the Act is working well in the three trans-Jamna tahsils of the Allahabad district. The fact that no attempts are made to evade its provisions shows that it is popular; the price of land is steady, and the credit of reliable people seems good. Mr. Ferard, who has much experience of the working of the Act in Bundelkhand, promises a full enquiry and report when he has been able to personally examine the tracts concerned. There has been a slight gain of land to agriculturists by alienation and no loss by mortgage. Three applications for permanent alienation were sanctioned, and mortgages were amended or substituted in four cases.

§§ 59-60.—Conclusion.

59. As was noticed in the Government resolution on the Board's last administration report there had been up to 1912-13 a succession of five years of remarkable prosperity. The effects of this period have been apparent in all branches of the administration, and it was in consequence of a series of good years that the people of the provinces were able to meet the severe strain of the crop and fodder failure. The check to their prosperity is only temporary, it may be hoped, and with the exception of parts of the eastern divisions, where late rice was a failure, all districts point with satisfaction to the excellent kharif of 1914, and the promising rabi' now in the ground. Recent rain over the whole of the provinces has removed all need for present anxiety. At the close of the year under report, the declaration of war introduced a new and uncertain factor into the economic position, and this, combined with preceding bad harvests and probably low stocks, kept prices high which would ordinarily have fallen to something like normal. It cannot be denied that though the agricultural classes are likely to reap large profits on their crops, both in store and on the fields, difficult and perplexing problems are raised by the increased price of food grains. These matters will, however, be better understood when the next report comes to be written, and do not much affect the year which has closed. One result of high prices has certainly been to improve the resources of the agricultural classes. Mr. Tyler, the Collector of Cawnpore, has summed up the features of the year in the following way: "That famine conditions were never actually established is to be attributed, firstly to a series of successive good harvests which had resulted in the accumulation of stores of grain. We hear a good deal in these days of the growing impoverishment of the Indian ryot, and the experience of the past year should go a long way to refute this theory. There was little or none of that movement among the people which is one of the first signs to be expected of serious distress. Throughout the worst period labour was in demand, and it was impossible to secure workers in any numbers at what are generally regarded as remunerative rates at any distance from their homes. Even those who came to work on district board roads departed in a body to celebrate festivals." The second cause of the ease with which calamity was met is found by Mr. Tyler in the amount of dairy produce which the people now raise to supplement their incomes, and lastly he lays stress on the good effects of the timely distribution of taqavi. The Collectors in Bundelkhand and the Allahabad division all agree in pointing out that there was a demand for labour in the villages throughout the year. In the Agra division there was plenty of money owing to the high prices and the excellent outturn of the cotton crop.

60. In the paragraph devoted to the economic features of their charges district officers have made some interesting comments to which, in conclusion, passing notice may be given. The opening of the Jamna bridge on the Cawnpore-

Banda railway will greatly improve communications and facilitate trade through the Hamirpur district with Central India. Bundelkhand is receiving great benefits from new and improved roads, and the Karra dam on the Dhasan river promises irrigation to the central portions of the Hamirpur district. The recent policy of Government in reserving for climatic reasons *babul* forests in Hamirpur has already provided a most useful addition to the fodder resources of the district, and similar work is being undertaken in Etawah, which will also arrest the growth of ravines by erosion. The Commissioner of Kumaun urges strongly that a Deputy Director of Agriculture should be specially appointed for the hil tracts, where agricultural conditions are so different from elsewhere. The intrloduction of new and improved staples is said to be a pressing necessity. Lastly Mr. Cobb refers to the deplorable condition in which so many of our revenue offices are housed. This is a subject which the Board have much at heart, and they would willingly give him support, but the present financial stress unfortunately hampers and delays many urgent schemes for building and communications.

I have the honour to be,

SIR,

Your most obedient servant,

J. E. GOUDGE,

Secretary.

GRAND TOTAL, U. P. ...	3,881	237,266	2,58,763

NOTE.—(*a*) All the above grants, except 9 acres with land revenue of Rs. 8 assigned to 5 grantees representing the remission of revenue on Goraits' jagirs in jungle grant Keotali in Gorakhpur and coming under the class "For the maintenance of public servants", were made "on other grounds."

(*b*) Difference in figures as shown in this statement and in that for the previous year is due to resumption of a few muafis and to an additional assignment.

STATEMENT XXXIV-A.—(PROVINCE OF AGRA).

Statement showing classification of holdings and rental statistics for 1321 *fasli or* 1913-14.

District.	Area of holdings.					
	Held as sír.	Held by zamindars other than sír, and thekadar's cultivation.	Held free of rent.	Held by permanent tenure holders and fixed rate tenants.	Held by ex-proprietary tenants.	Held by occupancy tenants with occupancy rights.

ORDERS OF GOVERNMENT.

No. 158L/I—154 of 1915.

RESOLUTION.

REVENUE DEPARTMENT.

Dated Naini Tal, the 26th June 1915.

READ—

A letter from the Secretary to the Board of Revenue, United Provinces, no. 638/XII—149-B. dated the 4th March 1915, being the Board's report on the revenue administration of the United Provinces for the year ending the 30th September 1914.

OBSERVATIONS.—For five successive years from 1908 onwards one good season was followed by another, and the Board's reports during these years were records of unchecked progress and prosperity. The end of this cycle came in 1913 when drought, with its dread companion famine, once more visited the United Provinces, and the report now under review is the record of a year's work carried out in circumstances that were generally adverse. The chief feature of the rainfall of 1913 was an untimely distribution rather than a total defect. An early excess in May and June, accompanied by very extensive sowings, was followed in the real monsoon period by a marked deficiency, resulting in a very poor kharif outturn. This was especially true of the Jhansi, Agra and Rohilkhand divisions. The eastern districts, being more dependent on the current from the Bay of Bengal, suffered less. The unfavourable rainy season was followed by a winter season almost equally unfavourable. A complete absence of rain in the early winter months very largely reduced the rabi sowings, and frost in January followed by hail in February and March, caused considerable damage to the standing crops with the result that the rabi outturn was the poorest since 1907-8. During the year famine was declared in the districts of Jalaun, Banda, Hamirpur and parts of Etawah, and scarcity in Jhansi, Muttra, Allahabad, Agra, Budaun, Moradabad, Fatehpur, Bareilly and Shahjahanpur.

2. The kharif area in 1913 was little below the normal owing to the good rains in May and June but the outturn was extremely poor. The rabi crop was disappointing in outturn besides being very largely curtailed in area. In the kharif the food crops generally declined, while the commercial crops did well. The chief feature of the season was the record cotton area of 1,547,717 acres. The rise was most marked in the Agra, Rohilkhand and Lucknow divisions, and it is certain that the profits of the cotton crop were instrumental in very largely diminishing the distress that would otherwise have resulted from the drought in these tracts. Sugar remained above normal in area but showed a poor outturn, while hemp made still further advance in the eastern districts. While the rabi area was only 82 per cent. of the normal, the more valuable crops, such as wheat and barley, which are usually sown in irrigated tracts, show much better returns both in area and in outturn than crops, such as gram and linseed, which are largely sown without irrigation. Bundelkhand stood out by itself with a rabi area of only 46 per cent. of the normal. Agra, Rohilkhand and Lucknow

divisions also suffered severely, but the two eastern divisions were actually able to record small increases. The Lieutenant Governor is pleased to note that in spite of the unfavourable conditions, in spite of the fact that the kharif largely failed to provide food for man or fodder for beast, and that the lack of seasonable rain did not permit the cultivator to recoup his losses from the rabi, there was an almost entire absence of acute distress. In the year ending 30th September 1914 the death roll was actually less than in the previous year. The favourable monsoon of 1914 coupled with the good prospects of the present rabi have inspired a hopefulness that the present year will bring a complete recovery from the year of famine.

3. The comparative failure of the crops is reflected in the trade returns for the year ending 31st March 1914, which show a set back after five years of continuous expansion. The total weight of rail-borne traffic declined by 11 per cent. Imports into the province increased by 24 per cent. in weight and 22 per cent. in value. This increase was mostly confined to grain and pulse (the weight of which was more than five times that of imports in the previous year) and fodder. Exports on the other hand decreased by 36 per cent. in weight and 20 per cent. in value. Grain was largely retained within the province, but the value of cotton exports increased from 354 lakhs to 475 lakhs. Although prices were unusually high throughout the year wheat was never dearer than $9\frac{1}{4}$ seers per rupee. Cattle suffered severely, especially in the southern and western divisions. Fodder was very scarce, though great assistance was afforded by the forests which supplied nearly $1\frac{1}{2}$ million maunds of hay in addition to imports from outside the province. Poor nutrition combined with hard work encouraged the spread of disease. His Honour the Lieutenant Governor notes with regret that frequent mention has been made by district officers of the shortage in supply of serum for inoculation. The cattle mortality has been very heavy, but there is some diversity of view as to its ultimate effect. If, as some Commissioners hold, it is chiefly the excess and useless stock that have died, then the economic loss has not been so great. There appears to have been no difficulty in obtaining sufficient plough cattle.

4. The net revenue demand was $6\frac{1}{2}$ crores and the collections 559 lakhs. The balance is mostly accounted for by remissions and suspensions, and the real balance was only Rs. 53,737. The drought necessitated a large measure of relief to landholders, and suspensions exceeded $49\frac{1}{2}$ lakhs, while remissions amounted to nearly 48 lakhs. It is satisfactory to note that these figures are very much lower than those of 1907-8. The form of relief varied according to local circumstances; thus in the Jhansi division according to the usual practice the whole of the relief, which amounted to 85·3 per cent. of the demand, was given by remitting, and none was suspended, while in Rohilkhand there was little remission but 28·2 per cent. of suspension. Relief was passed on to the tenants, and in Jhansi rent collections amounted to only 13 per cent. of the normal demand. Canal rates show a large increase due to the increased demand for irrigation. Unfortunately this has been accompanied by a considerable rise in arrears, due partly to actual stress and partly to the feeling that canal rates should not be

insisted on in years of scarcity. His Honour regrets that any district officers should have been under any misapprehension as to the possibility of remitting cesses, and agrees with the Board that this cannot be done.

5. A special feature of the year has been the very large advances made under the Agricultural Loans Acts. No less than 42·93 lakhs were advanced under Act XIX and 148·71 lakhs under Act XII, and the outstanding balances at the close of the year were 96·37 lakhs under the former Act and 151·25 lakhs under the latter, a total of 247·62 lakhs. The collections under the Acts were 81 per cent. and 60 per cent. respectively of the demands. The advances under Act XIX for permanent improvements call for no special mention. These will in time bring in a good return in the improved protection against drought, and are an unquestionably good investment. The Lieutenant Governor is specially pleased to notice the good work done in the distribution of this form of relief by the district officers mentioned in the Board's review, and he trusts that the stimulus given to the building of protective works will not be allowed to die away with the recurrence of more prosperous seasons. Out of a total increase in the irrigated area in 1913-14 of two million acres compared with the previous year, nearly $1\frac{1}{2}$ million acres were supplied from wells. In their remarks on the distribution of *taqavi* under Act XII of 1884 the Board insist on the necessity of using discrimination even in time of need, and the Lieutenant Governor accepts this obvious statement without reserve. He is, however, unable to agree with the suggestions made that insufficient weight was given to the favourable years which preceded 1913-14 or that the total distribution was unduly lavish. Estimates of the advances required were discussed at divisional conferences when the previous history of each district was carefully examined. In 1907 a sum of $1\frac{1}{4}$ crores was distributed for the rabi and in his note on agricultural loans in famine years Mr. Moreland estimated that in an equally severe calamity from 2 to $2\frac{1}{2}$ crores could be distributed with advantage. The advances for seed in the rabi of 1913 amounted to only 42 lakhs, out of a total of 79 lakhs for all purposes. A large proportion of the remainder was advanced for the construction of kachcha wells, and of the advances made in Rohilkhand, to which special attention is drawn by the Board, as much as 9 lakhs was given for this purpose. Owing to the distribution of rain in 1913 the Rohilkhand canal system failed to secure even the kharif of that year and was practically useless for the rabi. In the whole province the number of temporary wells used in 1913-14 exceeded that in the previous year by nearly half a million or 62 per cent. For the kharif the actual advances in 1908 were 78 lakhs and Mr. Moreland estimated that a crore might be necessary. In 1914 the advances were less than 52 lakhs. The most striking feature of this scarcity has been the unprecedented fodder failure, accompanied by endeavours on the part of Government to an extent never before undertaken in this province to provide hay and other fodder. Nine lakhs of *taqavi* in the year was distributed for purchase of fodder alone. In regard to the loans for purchase of cattle which amounted to about 42 lakhs out of the total kharif advances His Honour notes the Board's conclusion that loans were made too freely. The predecessors of the present Members of the

Board were urgent for an even larger employment of advances than the Local Government was able to sanction, and the whole subject will be examined in a separate resolution on the famine operations. All that need be said in the meantime is that much of the money so lent was used, if not for the ostensible purpose for which it was given, at least for the maintenance of other plough cattle owned by the borrower, or for ordinary agricultural purposes. While the Board term the loss of cattle of no use for ploughing or milk supply as a not unmixed evil, the Lieutenant Governor would prefer to describe it as a drawing on capital saved. Such cattle are maintained at little or no cost in ordinary years and in times of scarcity are saleable for the value of their hides and meat. The question whether collections should have been pushed remains to be considered. In Rohilkhand the rabi of 1914 was less than half of a normal crop and it was deficient elsewhere. There appear to have been omissions to allow formal suspensions in some districts, notably in Agra, but on the whole Collectors appear to have acted with discretion. From the latest reports received collections appear to be satisfactory; and the Lieutenant Governor concurs with the Board as to the necessity for special strictness in securing the ultimate repayment of *taqavi*.

6. The recent decrease in litigation under the Agra Tenancy Act has hardly been maintained. The total small actual decrease of 1 per cent. is clearly due to the effects of scarcity, and it is notable that the more prosperous parts of the province show considerable increase. There have been large decreases in suits for ejectment and enhancement of rent, while suits for arrears of rent show a continued tendency to rise. Government has under consideration proposals for the simplification of the procedure in enhancement suits which at present is cumbersome and difficult. In Oudh the very large increase in litigation was entirely confined to resumption suits and was due to the expiry of the period of limitation. The increase in the number of suits undisposed of at the end of year is satisfactorily explained in Agra by the preoccupation of many sub-divisional officers with famine work, and in Oudh by the abnormal number of resumption suits instituted within the year. As the officers first appointed in the new posts on the cadre of deputy collectors have now qualified for full powers arrears should be reduced. His Honour regrets to notice that the Board have again had to draw attention to the lack of despatch in disposing of suits for the execution of decrees, and he trusts that all district officers will pay special attention to this branch of court work. There has been a slight, but welcome, decline in the appeals filed in Commissioners' courts, though the balance of undecided cases showed a slight increase. The appointment of additional Commissioners in several divisions should result in a very large decrease in the pending file in the present year. His Honour observes with regret that the proportion of orders disturbed on appeal by the Board is still high and shows no tendency to decline. There has been a most satisfactory decrease in the number of applications for partitions and in the number of cases still pending at the close of the year. It is, however, unfortunate that the work is still so uneven and Sir James Meston endorses the Board's appeal to district officers to

endeavour to improve the standard of outturn and to make it more uniform. Honorary assistant collectors have again given most valuable assistance and have disposed of 24,374 cases. The Lieutenant Governor desires to place on record his appreciation of the services of these gentlemen, and is glad to notice that their numbers are being added to in the present year.

7. Except for two short intervals the revenue administration was in charge of Sir Duncan Baillie, K.C.S.I. and Mr. G. A. Tweedy, who retired shortly after the close of the year. By their departure the provinces have lost the services of two capable and distinguished officers. Sir Duncan Baillie's unique acquaintance with rent and revenue law and its effects on the rural population was of the highest value to Government. His minute knowledge of the economic conditions of northern India and his capable and sympathetic administration of the departments in his charge will long remain a living memory among the people and a pride to the service which he adorned. The Lieutenant Governor would also like to express his appreciation of the services rendered to the Board by their late Secretary, Mr. J. E. Goudge, who has now returned to district work.

ORDER.—Ordered that a copy of this resolution be forwarded to the Secretary to the Board of Revenue, United Provinces, for the information of the Board.

Ordered also that a copy of this resolution be published in the *United Provinces Government Gazette.*

By order of the Hon'ble the Lieutenant Governor, United Provinces,

R. BURN,

Chief Secy. to Govt., United Provinces.
